# BETTER MASONRY AT LESS COST

## *BRIXMENT winks at winter "jinx"*

MANY difficulties of cold-weather masonry are removed when BRIXMENT is used for mortar. BRIXMENT mortar repels moisture instead of absorbing it and can therefore be used at lower-than-usual temperatures with less danger of freezing.

Its unusual plasticity enables the mason to strike quicker, more accurate joints that attain a final strength equal to that of the brick itself.

No lime. No slaking. Can be used immediately after mixing—one part BRIXMENT; three parts sand. Used by nationally known engineers and contractors for greater efficiency and economy and to insure unquestioned permanence of their work. *Ask the BRIXMENT dealer.*

VOL. VI | INDIANAPOLIS, INDIANA, JANUARY 3, 1925 | No. 40

## News of the Week

**The asterick (*) prefix to an item indicates additional information to report published in previous issue.**

### INDIANAPOLIS

***Manufacturing Building:** $1,000,000, 5 sty. and bas., 260x146. Archt., Robert Frost Daggett, Consolidated Bldg. Mechanical engineer, Charles R. Ammerman, Occidental Bldg. Owner, Eli Lilly & Co. (Pharmaceuticals), J. K. Lilly, Prest., 700 S. Alabama St. Archt. receiving bids to close January 10 at noon. Face brick, Indiana limestone trim, reinforced concrete floor and roof constr., reinf. concrete stairs, mezzanine floor, steel sash, hollow tile partitions and backup, ornamental terra cotta, struct. steel, marquise, freight elevators, steel stairs, steel partitions, fence and gate work, rolled steel windows (reversible type and horizontally pivoted type), steel rolling curtains, tin clad doors, freight elevator doors, hollow metal doors and frames, vault doors, comp. roof, metal chute, dumb waiter, terrazzo work, slate and marble work. The following items are reserved: Heating and ventilating, plumbing, electric work, elevators.

***Office Building and Stores:** $1,500,000, 10 sty. and bas. 107x120, at Illinois and Market Sts. Archt., Rubush & Hunter, 428 Amer. Central Life Bldg. Owner, Illinois-Market Realty Co., A. L. Block, Prest., care L. Strauss & Co., Washington St. Archt. receiving bids to close January 20. Press brick, reinf. concrete floor and roof constr., 3 lower floors to be faced with solid granite, terra cotta from third floor to roof on Illinois and Market St. sides; four high speed elevators, vitreous tile floors in corridors, Italian marble side walls, African mahogany woodwork, terrazzo mosaic floors in offices, hollow tile, kalamein doors, hollow metal doors and elevator cabs, plain and ornamental bronze, misc. iron and steel, steel sash, mail chute, skylights, comp. roofing, heating, plmg. and wiring.

**State Armory Building** (National Guard), $150,000.00, 2 sty. and bas., 135x195, at 439 W. Market Street. Archt., Mothershead and Fitton, 542 N. Meridian St. Owner, company organizing, care of Harry Fitton, 542 N. Meridian St. Lessee of Armory, Indianapolis Units of the Indiana National Guard, Armory Board, Harry B. Smith, Adjutant-General, State House, Indianapolis; Wray DePrez, Shelbyville, Ind.; W. B. Montgomery, Crawfordsville, Ind.; Robert T. Tyndall, care of Fletcher-American National Bank, Indianapolis. General contractor, The Builders Construction Co., 542 North Meridian St., Indianapolis. Plans in progress, expect to start work soon. Brick, concrete and steel, steam heat, comp. roof, steel sash.

***Reformatory Buildings** (New buildings and equipment): $940,000. "New Indiana State Reformatory", Pendleton, Ind. Archt., Herbert Foltz, Wild Bank Bldg., Indpls. Owner, State of Indiana, Board of Trustees, Indiana State Reformatory, Joseph E. Henning, approved member, Anderson, Ind.; J. H. O'Neall, purchasing agent, care Reformatory, Pendleton, Ind. Plans in progress. Probably mature spring. May build by day labor and buy material. The following buildings are included in program:

| | |
|---|---|
| Dormitory K, to complete | $139,100 |
| Cellhouse J | 153,768 |
| Steel cells for J | 195,000 |
| Hospital | 81,984 |
| 2 vocational buildings at $16,896 | 33,792 |
| School and library | 59,040 |
| Vocational foundry building | 20,000 |
| Printing and tailor building | 40,000 |
| Chapel | 76,500 |
| Yardhouse | 7,480 |
| Soft water reservoir | 17,000 |
| Hothouse | 7,500 |
| Farm buildings | 5,000 |
| Residences (five) | 25,000 |
| Emergency electric lines | 6,000 |
| Yard lighting system | 5,000 |
| Fire protection system | 4,500 |
| Cement walks | 2,500 |
| Grading | 1,500 |
| Landscape gardening | 2,000 |
| Equipment of administration buildings, hospitals, chapel, farm, etc. | 22,000 |
| Equipment for construction purposes | 2,000 |
| Cost of labor and material to put all buildings now in use in a completed condition | 10,000 |

**Insane Hospital Buildings** (6 buildings of the cottage institutional type): $200,000 each, 2 sty. and bas. at the Central Indiana Hospital for the Insane, Indpls. Owner, Board of Trustees, Central Indiana Hospital for the Insane, Miss Mae Helmer, Terre Haute, Ind., Charles Jenkins, Noblesville, Burt E. Page, Mellott, Ind., Dr. Max A. Bahr, supt., Indpls. Owners are just outlining this building program. Will probably build one cottage in the spring. Brick, fireproof construction.

***Factory Building:** $1,000,000. Archt., Robert Frost Daggett. Owner, Eli Lilly & Co. Archt. receiving bids to close January 10 at noon. The following contractors are figuring general contract: Leslie Colvin, Continental Bank Bldg., Cornell Eng. Co., 2611 Cornell Ave.; E. C. Strathman Co., Meyer-Kiser Bank Bldg.; William P. Jungclaus Co., 825 Mass. Ave.; Latham & Walters Co., State Life Bldg.; Schlegel & Roehm, 601 Lexington Ave., all of Indpls.

***Business Building:** (6 store rooms), $15,000, 1 sty. 40x90, at 21st and Capitol. Archt., Elliott B. Hadley, State Life Bldg. Owner, Abe Gelman, 600 State Life Bldg. Archt. receiving bids. Brick, concrete block, comp. roof, separate heating plants, cement floors.

***Residence (Italian Design) and Two-Car Garage:** $12,000, 2 sty. and bas., Golden Hill. Archt., Elliott B. Hadley, 600 State Life Bldg. Owner, Remster A. Bingham, 1027 N. Pennsylvania St. Bids in. Rather indefinite as to when contracts will be awarded. Stucco, tile roof, steam or fan blast system, tile and hardwood floors, will contain laundry, servants' wing, two baths.

**Residence (Country):** 5 rooms, near Southport, Ind. Archt., H. Ziegler Dietz, State Savings and Trust Bldg., Indianapolis. Owner, Basil J. Templeton, Southport Road, Southport, Ind. Plans in progress. Owner will build by day labor. Frame, furnace, private water system.

***Office Bldg.:** 2 and 3 story and bas., at 600-700 West McCarty St. Archt., D. A. Bohlen and Son, Majestic Bldg. Owner, W. J. Holliday & Co., (iron and steel), 326 W. Georgia St. Plans in progress. Brick.

**Creamery:** $11,000.00, 1 sty., 40x60 and 40x40. North and Highland. Owner, National Dairy Products Co., 617 Shelby St. Owner will build by day labor. Brick and conc. block.

***Apartment Building** (16 apts.): 2 sty. and bas., 53x132, at 1925 College Ave. Archt., Frank B. Hunter, 912 State Life Bldg. Owner, Wm. E. Reiley (atty.), 1404 Fletcher Trust Bldg. Temporarily in abeyance. Stucco over frame, comp. roof and tile roofing, tile floors in baths, cork linoleum in corridors, hardwood floors, built-in-kitchen features, in-a-door beds, ranges, refrigerators, incinerator, steam heat.

**Lodge Bldg.** (addition of dormitory, and general alterations). Archt., Fermor S. Cannon, 21 Virginia Ave. Owner, Loyal Order of Moose, No. Delaware and Court Sts. Plans in progress. Brk.

### Contracts Awarded

***Bank Building and Stores:** $100,000, 1 sty. and bas., 42x80, 2600 West Michigan St., Indpls. Archt. and engineer, H. Frederick Beck, 159 East Ontario St., Chicago, Ill. Owner, Citizens State Bank, John W. Pullen, Prest., 2606 West Michigan St., Indpls. General contractor, G. W. Stiles Construction Co., 159 East Ontario St.,

## SEMI-ANNUAL MEETING OF THE I. S. A. BIDS FOR THE ATTENTION OF INDIANA ARCHITECTS

### Plans Under Way for Big Mid-Winter Gathering

Just a month intervenes before the members of the Indiana Society of Architects will gather again at Indianapolis for their semi-annual meeting. While the assembly place has not been definitely decided upon the dates for the gathering will be February 6 and 7. These mid-winter meetings have always proved interesting from a business, social and entertainment standpoint and every effort is to be made to live up to the high standard that has been set. With such an aim in view the officers of the Society feel assured that every architect who attends will enjoy himself and cordially invite all Indiana architects to be present that they may experience the spirit of goodfellowship that exists when the members of the profession of the state get together.

The society has many achievements to i's credit that have profited the profession and the building industry, but none of them is greater than the triumph that has been scored whereby it is now possible for the architects to experience a wide acquaintance with their fellow colleagues throughout the state, a situation that enables them to assemble periodically and thresh out professional matters collectively. And yet, that which has been done is little more than a beginning, ahead lie even greater prospects if the architects themselves will but back up the organization in a spirit of professional pride.

Another year has started, another meeting is at hand. Why not plan to attend the Indianapolis gathering next month and lend your aid to the cause of architecture?

## DON'T OVERLOOK THE ANNUAL INDIANA ARCHITECTURAL EXHIBIT

### Your Co-operation Is Due To Your Profession.

The time set for the annual Architectural Exhibit, sponsored by the Indiana Society of Architects, during the month of February, at the John Herron Art Institute, Indianapolis, is narrowing down and since these affairs have grown in scope from year to year, have attracted considerable notice, and set forth the profession to public notice in a most desirable manner, it is hoped that the members of the profession in Indiana this year will all do their part to make the exhibit the best ever held.

It is admitted that the preparation of individual exhibits takes time and effort but surely a little added interest along such a line of endeavor is due the profession of which each architect is a part. The advancement of the appeal that the architectural profession can convey to the public through an attractive exhibit will resiliently redound to the benefit of the individual members of the profession.

Such exhibits arouse real interest in plans worth while and their definite purpose, they impress the artistic sense, stress real arrangement and set forth economy of space, combinations that frequently are not familiar to the prospective builder and who is left to the mercy of stock plans and unscrupulous "plan free" builders.

Kurt Vonnegut, 610 Indiana Trust Building, Indianapolis, Ind., is chairman of the Exhibits and Pageants Committee, and is preparing a schedule of requirements for exhibits that are soon to be mailed out to Indiana architects.

The management of the Art Institute is anxious to co-operate to make the exhibit an attractive one, that which is needed most is active co-operation now on the part of the Indiana architects, it is fundamentally up to them to furnish the material with which the others are to make the galleries attractive.

## ONLY ELEVEN SIZES OF STEEL REINFORCING BARS AFTER JANUARY 1, 1925

### Recommended by U. S. Dept. of Commerce and Adopted by Reinforcing Bar Manufacturers

As a result of a conference held at the Department of Commerce in Washington, the following recommendation was made, relative to the manufacture, distribution and use of Steel Reinforcing Bars—round and square:

"In accordance with the unanimous action of the joint conference of representatives of manufacturers, distributors and users of square and round steel reinforcing bars, the United States Department of Commerce, through the Bureau of Standards, recommends that the recognized sizes of square and round steel reinforcing bars, in terms of cross sectional area, be reduced to the following:

| Size In Inches | Area In Square Inches |
|---|---|
| ¼ Round | .049 |
| ⅜ Round | .110 |
| ½ Round | .196 |
| ½ Square | .250 |
| ⅝ Round | .307 |
| ¾ Round | .442 |
| ⅞ Round | .601 |
| 1 Round | .785 |
| 1 Square | 1.000 |
| 1⅛ Square | 1.266 |
| 1¼ Square | 1.563 |

It is further recommended that this reduced list of sizes become effective as applying to new production January 1, 1925, and that every effort be made to clear current orders and existing stocks of the eliminated areas before March 1, 1925."

This recommendation has received practically the unanimous acceptance by manufacturers, distributors and users throughout the entire United States.

At a recent meeting of the Concrete Reinforcing Steel Institute, made up of members of the Reinforcing Bar Interests of the United States, these recommendations were accepted.

Another step forward to more simplified and economical building has been attained.

All industries have agreed to hereafter produce, distribute or use only the eleven sizes of steel reinforcing bars mentioned in the above recommendation.

This was accomplished through the untiring efforts of the Division of Simplified Practice of the Department of Commerce at Washington.

ORGANIZATION AND CURRENT NEWS

## PLANS IN PREPARATION FOR A GREAT CONVENTION OF INDIANA BUILDERS

### Affair To Be Held at Indianapolis, January 27 and 28

Once more the time is near at hand when the Indiana building contracting forces will gather in annual conference to discuss and weigh the various phases, questions, influences and other important ramifications of their business and the building industry as a whole. This gathering, in the nature of a convention, will be the Seventh Annual Convention of the Associated Building Contractors of Indiana and will be attended by contractors in all the crafts, of which the A. B. C. is constituted.

The plans for the convention, which is to be held at the Claypool Hotel, Indianapolis, January 27 and 28, are well under way, denoting a program of greater scope than ever before attempted. Among the topics to be taken up are:

State Building Code.
The Apprentice Question.
The Licensing of Contractors.
Legislative Activities.
Wage Scales and Labor Conditions.
And other subjects of importance.

The convention is for, of, and by contractors and all the builders of the state should avail themselves of this opportunity to meet with their fellow constructors to discuss and work out the solution of the problems common to all.

Already there are evidences of a deep interest in the approaching event indicating a big attendance for the greatest convention ever held by the Builders of Indiana.

## Calumet District

## A GREAT CHANCE FOR A GREAT START

### Business Conditions Never More Propitious

If all the reports that one hears and reads can be relied upon it would seem that 1925 is going to be a hard one for the pessimist. There was a ringing note of optimism on all sides and at every turn as the old year gasped its last and the new one was born. Business, the purveyor of our welfare, is better, according to all the evidence at hand, at the close of 1924 than it has been in several years. Thus is the anticipation conceived by many that we are entering upon an area of industrial and commercial activity that promises to carry American business to new high levels of production and prosperity.

The incentive to the hope that is being entertained for a great business year in 1925 comes not from just one or a few channels but from many and is inspired by the tone of earnestness that rings throughout the country, for instance: the railroads are placing large orders for equipment such as locomotives, freight and passenger cars; the steel mills are being called upon for large near future deliveries of rails and structural steel. Then, too, programs are in the making for great industrial business and residential building activities. Factories in many lines of endeavor are increasing their forces of employes thus cutting down the canker of unemployment. Such conditions as these warrant the prevalent expectation that 1925 should be an era of prosperity.

Unless some unforeseen event or events arise to check this upward trend of business, or Labor should take a more radical turn and demand greater increased wages that business could not stand, there is nothing to prevent a great business revival and volume.

As for Labor in this country, the rank and file is now being paid the best wages of any country on earth, and the highest the working man will receive again in a long time if, by any chance, the glorious prospects before us should receive a setback. The greatest insurance against any such calamity is for every man to buckle down and work, produce, and earn what he is being paid, such action will not be for the good of himself alone but for the good of all, which in the end means the good of the individual whose interest is so closely linked and intertwined with that of his fellow men.

Prosperity is a collective thing that works around and around affecting all not just one or a few. The farmer must be able to sell his products at a fair profit, that he can buy from the merchant who can thus pay his help and buy from the manufacturer who in turn buys the raw material and gives employment to the mechanic and working man, all of whom, when they are prosperous can bank some money which in a lump sum aggregates a large total that in turn is put out to finance building operations and business generally.

Therefore, why not all plug together, why not all boost in concert, it will mean a big year, a great year, this new one of Nineteen Hundred and Twenty-five.

## A REAL OLD-FASHIONED CHRISTMAS

### Snow and Ice In Plenty As In Days of Yore Bury the Calumet District Under a Wintry Blanket

As the colored man said when he dropped his bottle of gin on Christmas eve, "Dog-gone. Christmas done come and gone."

Well, it's all over until another year rolls around. It was a busy season, and apparently a happy one, but, the Calumet folks hope the next ones won't be quite so cold. Up out of the West, and down across the lake from the North came the icy breath of winter to envelop and cause the mercury and the red and green fluids in thermometers to fluctuate down and up from 15 above to 12 below zero and then to various degrees in between. The mercury ran up and down like the thin man's Adam's apple when he took a drink. Christmas Day the thermometer registered six be-

Community Building, Flora, Ind.

This structure, 80x140 feet, was built throughout of HOOSIER GIANT BRIX, including foundation and interior finish. Auditorium seats 2,000.

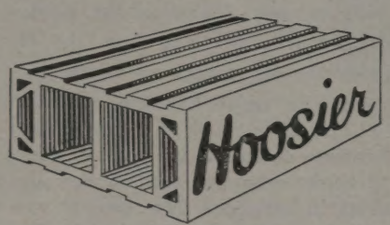
# HOOSIER GIANT BRIX

GIVE BETTER BUILDINGS AT LOWER COST

The chief object in any building project today is to secure better buildings at lower cost. The public demands economy without the sacrifice of quality. Architects and contractors are meeting this demand with HOOSIER GIANT BRIX, the ideal material for high grade, economical construction.

## Homes of HOOSIER GIANT BRIX

In residence construction, whether for outside veneer or solid walls, HOOSIER GIANT BRIX offer all the advantages of brick construction and yet save 25% over the cost of brick. HOOSIER GIANT BRIX can be laid up in a small fraction of the time required for other construction, thus making big savings in labor cost. In beauty they match fine quality tapestry brick. They equal brick in strength and load-bearing capacity. HOOSIER GIANT BRIX are five-walled, vitrified, mat-face fire-clay units, and are adaptable for any construction where brick can be used.



## For INDUSTRIAL BUILDING

HOOSIER GIANT BRIX and HOOSIER Building Tile are adaptable for every type of industrial buildings, such as schools, gymnasiums, churches, factories, garages, stores and other fireproof structures. This material insures big savings on construction cost and makes a building unsurpassed for beauty and serviceability.

Architects and contractors are invited to send for samples and illustrated literature describing HOOSIER GIANT BRIX and Building Tile. Let us submit estimates on your specifications.

low and the snow covered streets and walks under wheels and feet gave off more noises than a radio afflicted with static.

Is it any wonder a general halt has been called upon all Calumet building operations?

### DEMAND FOR UNIFORM SCALE FOR ALL BUILDING CRAFTS AT CHICAGO DOES NOT AUGUR WELL

**Threat of a Tie-Up Looms**

Reports from Chicago tend to indicate that, if the Building Trades Council of Chicago persists in the proposed demand for a uniform scale of $1.50 per hour for all the crafts the coming season, there will be another serious building tie-up there this approaching spring. This would really be a shame and prove costly for the prospects are good for a big building year, many large projects being contemplated. No one will suffer more than the craftsmen themselves, for, if work is stopped, every day will mean a dead loss to the workmen who are getting high wages at the present wage levels. Such, however, is the usual result of strikes and lockouts, for when all is over the men have lost so much time they never can make it up. If wages are boosted it is most probable that the men will have a greater scale but no work, or not enough to go all the way around. If a uniform scale is established it will not profit the more skilled mechanics, rather it will benefit the less skilled and put a premium on the commoner labor and discourage effort toward the other crafts where skill is absolutely required.

### COLD PROMISES TO EFFECT SUMMER BUSINESS

**Proves Impediment To Starting Resort Construction**

Should the cold waves continue to hold on their effect will be felt seriously next spring and summer by the promoters of the proposed new amusement park on the lake front, a site just recently acquired from the city park board. It was the intention of the new owners to start breaking ground soon after the first of the year in order to have the new resort ready for operation the latter part of May. It is quite a project as planned and will take several months to construct it. Every week lost now because of cold weather will have a telling effect on the coffers of the company when the warm days come and the prospective crowds, pleasure bent, can not be cared for.

### CALUMET BUILDING PROGRESS

Architect Mac Turner, Hammond, is preparing plans for a $25,000 waiting room and sexton's quarters for the Lutheran Cemetery Association. It will be located on Calumet Ave., 2 sty., 30x24, of brick and stone construction.

All work on the new hospital building has been stopped. The contractor had hoped to get the structure enclosed so he could finish up the inside work but the window frames failed to arrive in time to shut out the cold.

E. E. COLE.

## FT. WAYNE

### SOUNDS A RINGING NOTE OF OPTIMISM FOR FT. WAYNE

**Prominent Local Contractor Analyzes the Outlook**

The year Nineteen Hundred and Twenty-four has run its course marking for Ft. Wayne another great building construction period, an activity that surpassed the fondest expectations, for, in view of the previous year's enormous volume of building work, a let down was looked for. However, the past year's volume was almost up to that of 1923's record, the best in the city's history.

Commenting on the local outlook, Max Irmscher, one of Ft. Wayne's most prominent general contractors, also President of the Associated Building Contractors of Indiana, said:

"Prospective building for 1925 in our city will be nearly as good as 1924, I say nearly as good, because 1924 was one of the biggest years Ft. Wayne has ever had as far as building is concerned. We reached almost one million a month and for a city of our size, it is a record that is hard to beat. Although there will not be so many large projects as the past year, there undoubtedly will be a number of them to keep us busy.

"Home building will hardly slack, in fact, I believe it will increase some from the pace it has been going the last six months. There is plenty of money available, bankers are willing to back up home building as real estate loans are always good securities. All of our manufacturers look forward to good business and our merchants are having a satisfactory trade. Labor is fairly steadily employed and well paid, a condition that means much to any community.

"Seemingly there is no doubt or uncertainty existing since the people so definitely backed up the present administration at last November's election. Everybody takes prosperity for granted for the next few years at least, so I can not see anything to retard building, and we can be very optimistic about the building industry for the coming season."

## SOUTH BEND

### INCLINED TO PIN FAITH TO BETTER CLASS OF RESIDENCES

**South Bend Builder Feels That City Has Met Most of Its Structural Shortages**

Several years ago when the contractors of Indiana were meeting in annual convention at Michigan City they were taken on a sight-seeing trip and among the places visited was Floyd Fitzsimmon's much discussed large fight arena. Despite the snow that buried the place an active, smiling chap climbed through the ropes and put on an amusing, slipping, sliding shadow boxing stunt and we concluded a fellow who would take such a chance must be an optimist. Just recently we recalled he was a contractor from South Bend, Thomas P. Hickey by name, and as we wondered how things regarding building were going up there we turned to "Tom the Optimist" and this is what he had to say:

"As regards the coming year there is a clear cut tone of optimism prevailing among business men generally. The architects, supply men and lumber men especially are looking forward to 1925 with a cheerful and hopeful air, feeling as they do that the year will be one of the most prosperous in the history of their respective businesses and profession.

"As regards local conditions only I am not so favorably impressed; there seems to be a surplus of homes of all types, and there are also a great number of vacant store rooms, and there seems to be little need, as I see it, for any industrial buildings. However, South Bend can expect to see quite a few of the better class of homes constructed in the locality beginning very early in the spring.

"I recently attended a dinner at which a local banker was the principal speaker and he made the statement that he expected the years 1925 and 1926 to be two very good business years; he gave as the foundation for his observation the fact that the farmer, through increased prices being received for his products, was rapidly coming back into his own; and also, statistics show that the automobile owner buys a new car on an average of every three years, and that 1925 is one of the three-year cycles. And we all know that when new cars are being bought that business is good generally. He issued a note of warning, however, about being too optimistic and to guard against over-production. I presume he meant that over-optimism is akin to the local union bartender who is still paying his union dues."

Chicago, Ill. Plans completed. Start work in ten days. Brick, stone front, comp. roof, tile floors, marble work, steam heat, hollow tile, concrete vault, vault door, bank equipment, bronze work, hollow metal doors, walnut interior trim.

**Automobile Service Building, Filling Station and Garage:** Maryland St., between Pennsylvania and Virginia Ave. Archt., Vonnegut, Bohn and Mueller, 610 Indiana Trust Bldg. ***Start this afternoon and run out in any direction, to the outskirts of town and notice the many new homes going up and you will be surprised by their beauty and the many modern conveniences that are now considered indispensible to the modern home-owner. Places that were newly marked out subdivisions only two years ago are completely built up today. Try and buy one of these places and you will find that they have increased in value from twenty to fifty per cent, and they were built only a couple of years ago.***

### NOTICE OF BOND SALE

Notice is hereby given that on the 9th day of January, 1925, at 10 o'clock a. m., the Board of Trustees of the School City of Tipton, Indiana, will offer for sale at the office of F. M. Recobs, trustee, in Tipton, Indiana, an issue of Six Thousand ($6,000.00) Dollars of Bonds of the School City of Tipton, Indiana.

Said bonds will be ten (10) in number, dated December 16, 1924, and will bear interest at the rate of Five (5%) per cent per annum, payable semi-annually on the 16th day of June, and on the 16th day of December each year thereafter as evidenced by and upon the surrender of the coupons annexed thereto as they severally become due.

Said bonds will mature and become payable severally as follows:

One on the 16th day of June, 1926, and one on the 16th day of June in each succeeding year thereafter until paid. Said bonds to be in the denomination of $600.00 each.

Said bonds have been issued in strict compliance with the laws of the State of Indiana, and pursuant to an order or resolution of the Board of Trustees of the School City of Tipton, Ind., on the 22d day of September, 1924, authorizing said bonds to be issued for the purpose of providing funds for the erection of one half of an addition to the high school building owned jointly by said School City and Cicero Township, Tipton County, Indiana, the issuance of said bonds having been authorized by the Common Council of the City of Tipton, Indiana.

Said bonds will be sold according to law to the highest and best bidder for not less than their par or face value.

The right is reserved to reject any and all bids.

SCHOOL CITY OF TIPTON, INDIANA.
By I. H. WOODRUFF, President.
C. H. WARNE, Secretary.
JENNIE HURON, Treasurer.
F. M. RECOBS, Trustee,
Member Ex-Officio.

Dec. 20-27, Jan. 3.

### NOTICE OF BOND SALE

Notice is hereby given that on the 9th day of January, 1925, at 10 o'clock a. m., the Township Trustee of Cicero Township, Tipton County, Indiana, will offer for sale at his office in Tipton, Indiana, an issue of $22,500.00 of bonds of Cicero Township, Tipton County, Indiana.

Said bonds will be twelve (12) in number, dated June 1, 1924, one (1) of $500.00 and eleven (11) of $2,000.00 each, bearing interest at the rate of five (5) per cent. payable semi-annually after date, on the 1st day of December, 1924, and on the 1st day of June, 1925, and on the first day of December and June of each succeeding year as evidenced by and upon the surrender of the annexed coupons as they severally become due and maturing serially as follows: $500.00 maturing June 1, 1926, and $2,000.00 on June 1st on each succeeding year thereafter until paid.

Said bonds have been issued in strict compliance with the laws of the State of Indiana and pursuant to an order of the Advisory Board of said Township, made and entered of record on the 26th day of April, 1924, authorizing said bonds to be issue for the purpose of providing funds for paying for one half of an addition to the high school building, owned jointly by said Township and the School City of Tipton, Indiana.

Said bonds will be sold according to law to the highest and best bidder for not less than their par value.

The right is reserved to reject any and all bids.

FRED M. RECOBS,
Trustee Cicero Township, Tipton County, Indiana.
Dec. 20-27, Jan. 3.

### NOTICE OF BOND SALE

Notice is hereby given that on the 9th day of January, 1925, at 10 o'clock a. m., the Board of Trustees of the School City of Tipton, Indiana, will offer for sale at the office of F. M. Recobs, Trustee, in Tipton, an issue of $22,500.00 of bonds of the School City of Tipton, Indiana.

Said bonds will be ten (10) in number dated June 16, 1924, of $2,250.00 each bearing interest at the rate of 5 per cent per annum, payable semi-annually on the 16th day of June and on the 16th day of December each year as evidenced by and upon the surrender of the annexed coupons as they severally become due.

Said bonds will mature and become payable serially as follows: One on June 16, 1925, and one on the 16th day of June in each succeeding year thereafter until paid.

Said bonds have been issued in strict compliance with the laws of the State of Indiana and pursuant to an order or resolution of the Board of Trustees of the School City of Tipton, Indiana, duly entered of record on the 9th day of May, 1924, authorizing said bonds to be issued for the purpose of providing funds for the erection of one half of an addition to the high school building owned jointly by said School City and Cicero Township, Tipton County, Indiana.

Said bonds will be sold according to the law to the highest and best bidder for not less than par or face value.

The right is reserved to reject any and all bids.

### SCHOOL BUILDING

### NOTICE TO CONTRACTORS

State of Indiana, County of Tipton, ss:

Notice is hereby given that the Township Trustee of Cicero Township, Tipton County, Indiana, and the Board of Trustees of the School City of Tipton, Indiana, will at the office of said Township Trustee in Tipton, Indiana, receive sealed proposals for the construction of a brick and tile addition to the joint high school building in Tipton, Indiana, as set out in the specifications, plans and profile now on file in his office by and under the laws of the State of Indiana. Said sealed proposals will be opened and the contract awarded for said improvement on the 9th day of January, 1925.

Bids or proposals will be received up to 11 o'clock a. m. on said date.

The estimated cost is $52,000.00.

Bids will be for the completion of the said improvement in accordance with the plans, profile and specifications in the office of the Trustee of said Township, and shall include all labor and material for said work. In no case will extra compensation be allowed for any additional work alleged to have been done by the contractor or contractors to whom is awarded the contract.

Each bid shall be accompanied by a personal or surety bond in a sum equal to double the amount of the bid filed for the work bid on, to be approved by the Trustee of said Township and the Board of Trustees of the School City of Tipton, Indiana. Said bond shall be conditioned for the faithful performance of the work; the sureties, if personal, shall be resident freeholders of the State of Indiana, one of whom shall be a resident of Tipton County.

Said bond shall be for the benefit of any person, persons or corporation who shall suffer any loss or damage by reason of any such bidder failing or neglecting to enter into a contract to perform such work awarded to the said trustee, or to carry out the same in any particular or to pay for any labor or material which may have been furnished to any such contractor or contractors or to any sub-contractor, agent or superintendent under him, in the construction of said work, or the furnishing of said materials.

Said contract will be let as a whole or in parts to the lowest responsible bidder upon affidavit of non-collusion, which must be submitted with the bid, and upon failure to submit such affidavit such proposal or bid will be rejected by the Trustee; and the Trustee reserves the right to reject any and all bids. Time for the completion of said work will be agreed upon after the letting of said contract by said Trustee and successful bidder.

*"TOM DAILY NEWS HOUSE"*
*270 Lathrop Ave. River Forest, Ill.*
Designed by the Architects Small House Service Bureau

*Applying 1 inch Flax-li-num in the Top Story Ceiling and One-half inch Flax-li-num in the Walls of the "Tom Daily News" House.*

# Use One Inch Flax-li-num in the Roof

THE roof is the place the greatest amount of heat leaks out of houses. Experts say sixty-two per cent of the total heat loss occurs there.

This means uncomfortable, unhealthy rooms. It means fuel bills fifty to seventy-five dollars too high, and hot sultry upstairs rooms in summer.

And to stop these great losses requires heat insulation that is *thick*—one inch Flax-li-num—applied to the top story ceiling. One inch Flax-li-num is over twice as thick as common insulation. It costs no more to apply. Yet it stops winter cold and summer heat equal to many times its thickness of common materials.

Laboratory tests everywhere are made on heat insulation that is one inch thick. Results upon actual houses prove this thickness necessary to real comfort and savings. It is poor economy to recommend or specify material only a fraction of one inch thick.

Hundreds of builders now use nothing but one inch Flax-li-num for house roofs. They find houses with this great comfort factor sell easier and stay sold better. They find clients appreciate the common sense of their recommendation.

Write the Flax-li-num Insulating Co., St. Paul, Minn., for new data on heat losses thru roofs. Or phone the Flax-li-num Dept., Vonnegut Hardware Co., Indianapolis; the Thos. Moulding Brick Co., Chicago; or the Seufert Bros. Hardware Co., Kansas City.

### INDIANAPOLIS

**Office Building:** 2 sty. and bas., Bedford, Ind. Archt., The Elmer E. Dunlap Co., 1050 No. Delaware St., Indianapolis. Owner, Shea and Donnelly Stone Co., Bedford, Ind. Preliminary plans in progress. Bedford stone, brick and steel.

***Apartment Building:** (24 apts.), rem. from factory building), $50,000. Archt., McGuire and Shoop, 320 Ind. Pythian Bldg. Owner, Oscar Schmidt, c/o Lorenz Schmidt Co., 31 Monument Place. Plans about completed, ready for bids about February 1st. Brick veneer.

**Office** (add. and rem.): $6,000. Archt. and owner, Thornton & Rodecker. 658½ Fairfield. Plans in progress. Archt. will build by day work. Brick veneer and frame.

**Bank:** Owner, The Agricultural State Bank, C. H. Webb, 208 Hume-Mansur Bldg. Owners just organizing, will either remodel from store rooms or build a new 1 story building. Definite data later.

**Lodge Building:** $50,000 to $100,000, South Side. Archt. not selected. Owner, Marion Camp No. 3558, Modern Woodmen of America, John D. Volz, 309 Board of Trade Bldg.; Clyde Hurt, 1446 Spann Ave.; J. Fred Masters, 408 Fidelity Trust Bldg. Contemplated. Owners are negotiating for site. Definite data later. Brick.

***Residence:** $15,000, Rushville, Ind. Archt., McGuire and Shook, 320 Indiana Pythian Bldg., Indianapolis. Owner, Lee Andress, Rushville, Ind. Plans in progress. Brick.

***Residence and (2) Car Garage:** 49th and Pennsylvania. Archt., Roger N. Williams, 4025 Kenwood Ave. Owner, C. Fred Schmidt, 2007 Broadway. Taking bids. Face brick veneer and stucco, English type design, slate roofing, furnace heating, private water system, hardwood and tile floors.

***Residence:** $12,000.00, 2 sty. and bas., Graceland Ave. Archt., Edward D. Pierre, 1133 Hume-Mansur Bldg. Owner, Dr. J. M. Smith. Plans in progress. Stucco, slate roof, furnace, tile and hardwood floors. English type. All correspondence care of architect.

***Theatre** (motion picture) and Stores: Theatre seating 1,200, Central Ave. and Fall Creek Blvd. Archt., Frank B. Hunter, 912 State Life Bldg. Owner, A. C. Zaring (owner North Star theatre, 25th and Central, and Garrick theatre, 30th and Illinois). Bids in under advisement. Stucco.

***Office Building and Stores:** $1,500,000, 10 sty. and bas. 107x120, at Illinois and Market Sts. Archt., Rubush & Hunter, 428 Amer. Central Life Bldg. Owner, Illinois-Market Realty Co., A. L. Block, Prest., care L. Strauss & Co., Washington St. Archt. receiving bids to close January 20. Press brick, reinf. concrete floor

***Manufacturing Building:** $1,000,000, 5 sty. and bas., 260x146. Archt., Robert Frost Daggett, Consolidated Bldg. Mechanical engineer, Charles R. Ammerman, Occidental Bldg. Owner, Eli Lilly & Co. (Pharmaceuticals), J. K. Lilly, Prest., 700 S. Alabama St. Archt. receiving bids to close January 10 at noon. Face brick, Indiana limestone trim, reinforced concrete floor and roof

#### Contracts Awarded

**Tire Service Station:** $20,000, 1 sty. and basement, 100x22, Pratt and Delaware. Archt., Mothershead and Fitton, 542 N. Meridian St. Owner, The General Tire Sales Co., 601 No. Illinois. General contract let to Builders Construction Co., 542 No. Meridian. Start work in two weeks. Brick, stone trm, comp. roof, steel sash.

**Apartment Building** (4 Apartments) $15,000.00. 2 sty. & bas. East New York St. near Gray. Private plans. Owner, Frank Weissenberger, 253 No. Gray St. General contract awarded to E. B. Pierce, 237 No. Gray St. Frame construction. Start work in 10 days.

***Pie Bakery:** $20,000.00, 1 sty., 60x160. Archt., Russell N. Edwards Co., Union Trust Bldg. Owner, Butter Crust Pie Co., 2146 Madison Ave. General contract let to Southern Building and Realty Co., 604 Guaranty Bldg.

**Store:** (1 sty., rear add.), 144 No. Delaware. Bank Bldg. Start work shortly. Brick.

**Stores** (2): $8,000, 3514-16 College. Owner, Raymond Schmidt, c/o Archt. Archt. and contractor, The Ostrom Realty Co., Peoples Bank Bldg. Start work soon. Brick.

**Apartment:** (24 Apts.), 3458 N. Illinois St. (plans only), McGuire and Shook. 320 Indiana Owner, A. J. Huber, 144 N. Delaware. Archt. and contractor, The Ostrom Realty Co., Peoples Pythian Bldg. Owner, Chas. H. Ellis, Bicking and South East Sts. General contractor, Curry Constr. Co., Empire Life Bldg. Start work soon. Brick.

***Garbage Tankage Bldg.:** 1 sty., 65x115, "Sellers Farm Disposal Plant." Engineer, E. W. McCullough, Garbage Disposal Plant, Sellers Farm. Owner, Board of Sanitary Commrs., City Hall. General contractor, Schlegel and Roehm, 602 Lexington Ave. Excavating.

***Residence and Garage:** $10,000, Pleasant Run Driveway. Archt., John Hagel, 2632 E. 10th. Owner, Frank Meyer, c/o Archt. General contract let to Nicholas Staub, 1830 Applegate St. Brick veneer.

***Bungalow:** $7,000, Beech Grove, Indianapolis. Archt., John Hagel, 2632 E. 10th. Owner, Charles Russ, 644 So. New Jersey. Work started. Frame.

***Office Building and Stores:** $500,000, 8 sty. and bas., 40x127, Russell & Hohman Sts., Hammond. Archt., The Elmer E. Dunlap Co., 1050 N. Delaware St., Indpls. Owner, Dr. A. W. Lloyd, Hammond Bldg., Hammond, Ind. General contractor, Leslie Colvin, Board of Trade Bldg., Indpls. Plans in progress. Start work about Feb. 20. Brick, reinf. concrete, stone and terra cotta, passenger elevators (2), terrazzo floors, steam heat, comp. roof, concrete and steel slabs, marble work.

### INDIANAPOLIS BUILDING PERMITS

## FINAL SUCCESS OF ANNUAL ARCHITECTURAL EXHIBIT NOW UP TO THE INDIANA ARCHITECTS THEMSELVES

### Those In Charge Have Perfected Elaborate Plans For a Most Complete Affair

If the proposed plans of the Exhibit and Pageants Committee of the Indiana Society of Architects carry the Annual Indiana Architectural Exhibition scheduled for the John Herron Art Institute, Indianapolis, February 1 to 28, will be the best and most extensive affair of the kind ever held in Indiana. The surest way to effect such success is for the individual architects to back up the committee in charge and submit exhibits. Chairman Kurt Vonnegut and the other members of the committee, Robert Frost Daggett, Clarence T. Myers, Ed Pierre, all of Indianapolis, and Wayne Bell, Ft. Wayne, can plan and scheme for an artistic and elaborate exhibit, but to what end, unless the members of the state architectural profesison sincerely co-operate in the approaching venture?

The exhibit this year will be more elaborate than any other attempted by the Society for it will, in addition to strictly architectural matters, incorporate the allied arts such as stained glass, sketches and painting of decorative subjects, and executed work in wood, bronze, wrought iron, mosaic, glass, leather and tapestry. As for the purely architectural features there will be drawings in plans, elevations, sections, perspectives and details illustrative of structural, decorative and landscape architecture, and photographs of completed work. It is desired when practicable, that perspective and elevations be accompanied by carefully rendered plans of the same; and scale drawings or details of some portion of the work, as well as models of architectural detail and sculpture in wood and stone.

are requested. The committee particularly solicits exhibits of groups of drawings, models and cartoons illustrating in combination the architectural, sculptural and decorative scheme of a single important work in course of execution. The committee will make a special effort to assign definite spaces to such groups of exhibits.

All accepted exhibits must remain until the close of the exhibition, and will be hung only upon this condition. Exhibits will be refused which do not bear the name of the designer, and the right is reserved to reject any exhibit. Drawings must be either framed or mounted. Any exhibit is subject to publication unless the exhibitor stipulates otherwise.

All exhibits must be delivered or sent prepaid by the exhibitors, to the John Herron Art Institute, corner of 16th and Pennsylvania streets, Indianapolis, Ind., not later than January 26, 1925. Exhibits received later than this date can not be hung. All accepted or rejected exhibits will be returned at the expense of The John Herron Art Institute.

Photographs: Photograph one or more examples of the best work you have executed, which has not been exhibited here before.

Student Work: Any work, not previously shown here, done at college, in traveling, in competition for scholarships, etc., will be given special consideration.

Entry Blanks have been sent out and more will be furnished upon request. Fill out one form for each exhibit and send at once to "The Director of The John Herron Art Institute, Indianapolis, Indiana."

Calendar: Entries must be received at the Art Institute not later than January 26th, 1925. Exhibition opens February 1st, 1925, and closes February 28th, 1925.

Receiving this notice, architects are urged to give this event publicity. See that your home newspaper publishes the salient facts, in order that we may reach everyone who can possibly contribute to the exhibition. Urge your draftsmen to send sketches, scholarship drawings, etc.

It is hoped that the architects have prepared their exhibits and can send them in promptly. If not, they still have time to prepare it.

## TRUE ART IN ARCHITECTURE

### Its Accomplishment Assured by Lack of Visible Effort in Production Which Indicates the Ease of Inspiration

"One of the greatest charms of a work of art is the absence of any visible effort in its production. The most touching music, the most restful pictures, the most captivating style in literature, all possess this quality of ease, and so it is with architecture. The most delightful buildings are wholly unself-conscious, they almost seem to have grown of themselves, their special features are there because they are wanted, and not because the designer wanted to introduce them. One of the greatest foes of art is affectation—and affectation is the off-spring of conscious effort. There are many forms of affectation, and there is an affectation of omission as well as of commission. No new style in architecture or painting or any other art has a chance of life which is a mere negation of what has hitherto been accepted as being in itself beautiful or as lending beauty. Such negation is only a form of affectation; the discarding of all ancient methods of adornment entails a visible effort; it is an obvious indication of self-consciousness. Qualities such as these have never yet been found in fine architecture."—Building News.

## INDIANAPOLIS ARCHITECTS DISSOLVE PARTNERSHIP.

### To Continue Practice Individually

Architects Clarence T. Myers and Kenneth Coffin, Indianapolis, operating under the firm name of Myers & Coffin, announce their decision to dissolve partnership.

Both will continue individually in the practice of architecture at Indianapolis, Mr. Myers retaining his present office location, 4412 Penway Bldg., while Mr. Coffin will open a new office at 424 Board of Trade Bldg.

ORGANIZATION AND CURRENT NEWS

## ECONOMIC PROSPECTS OF THE NEW YEAR

### Secretary of Commerce Herbert Hoover Sizes Up the Business Situation

A forecast of the business future must be simply a weighting of the economic and political forces in motion. The annual survey of the Department of Commerce shows that the New Year begins with the economic structure of the world upon more solid foundations than at any time since the war. With the exception of a few spots of secondary importance there has been during the past year a real advance toward social, economic, and political stability throughout the world. The only exceptions are Russia and China, which even before the war contributed less than 3½ per cent of international commerce and of course a part of this continues. Generally the world is producing more goods, there is fuller employment, there are higher standards of living, more assurance of economic stability for the future and more promise of peace than we have seen for many years. The world is by no means free from liability to economic shock, yet the forces today in motion all tend to great promise for the forthcoming year.

#### Outlook for Agricultural Interests Much Improved

In our own country the outstanding economic development of the year has been the very large recovery in agriculture after its two year lag behind the recovery of industry. The farmers have a large measure of losses in the last three years yet to recover, but their outlook is encouraging. There are some secondary difficulties still remaining, particularly in the cattle industry and the effect of the sub-normal corn crop; but the prices of all farm products are gradually moving toward the general average of commodity prices. This improvement in prices of farm products has been paralleled with some decrease in the prices of many industrial commodities, such as fuel, building materials, metals, etc., so that there has been little change in the average of all price levels, and thus the farmers' purchasing power is being remedied in both directions.

While there has been a good deal of adjustment in prices of single commodities during the year, the average wholesale price of all commodities has varied but 3 per cent as between the ends of the years 1922, 1923, and 1924. It would thus appear that we are tending to the common level in prices of about 50 per cent over prewar, which seems to represent at least our present economic plane in prices.

#### Wages More Stable

The average wage in industry has been stable during the last year, and remains around 100 per cent above prewar, while the cost of living has maintained almost exactly the same level at the end of each of the last three years, 1922, 1923 and 1924, about 72 per cent over prewar. Our labor, therefore, continues to enjoy the highest real wage in its history. There was some unemployment in the middle of the year but it has now been largely overcome.

While there was some slackening of manufacturing production as a whole in the spring due in part to the uncertainties of election and in part to reduction of accumulated stocks, yet there was but little slackening at any time in consumption of major articles as shown by the continued high levels of car loadings, of sales of wholesale and retail establishments and of construction activities. The end of the year finds us with a recovered industrial production at practically the same levels as a year ago.

Two industries—textiles and northern soft coal—have lagged in recovery. The textiles are suffering in part from sharp competition of foreign imports, and in part from shift in national habits. An improvement may be looked for in the forthcoming year. The condition of the bituminous coal industry in the northern states is unsatisfactory owing to the unusually large stocks accumulated early in the year as a safeguard against possible strikes; to the decrease in industrial consumption during the middle of the year; and to the increased proportional production of the southern states due to lower wage levels. The difficulties in this industry created by strike stocks and mid-year dip in industrial activity should soon be overcome.

#### Building Shortages Being Gradually Reduced

The construction work of the country has maintained high activity. While the shortage, particularly of housing and business buildings, due to the cessation of construction during the war, has been to a large degree overcome, yet continued high real wages and general prosperity create a demand in excess of that due only to increasing population, because of the insistence of a population of rising standards of living, for more elbow room and better housing generally.

One striking factor in maintenance of increased construction activities is the effect which the automobile is producing in increasing the demand for road construction and in causing migration of population in many of our towns to new housing in the suburbs. Another effect of these forces is to maintain rents out of line above the general price levels. With our high real wages and little unemployment there is no reason to expect any material change in the course of this industry

Our railroads have shown continued increase in efficiency during the year, and have now proved themselves equal to any burden which is likely to be thrown upon them. Motor transportation continues to develop and to enter more and more into the vital economic life of the country—in fact, almost imperceptibly our road improvement programs are taking on the complexion of new transportation systems.

#### Foreign Trade Expanding

Our foreign trade has shown considerable expansion during the year in exports, and some decrease in imports. The increase in export figures has been due in some degree to the higher prices of agricultural produce, though chiefly to general expansion in all exports; the decrease in imports has been due in large part to lessening activity in production lines at the middle of the year, thus reducing the requirements for imports of raw material. The total of our exports for the year will show about four billion six hundred millions and our imports about three billion six hundred millions. The merchandise balance will be about one billion dollars in our favor. The net gold imports for the year in partial liquidation of this balance amounts to about two hundred eighty millions. Our invisible exchange will show larger balances against us than in 1923 because of the greater volume of tourist travel, increased freight charges paid foreign shipping, and above all the largely increased volume of loans and investments to foreign lands, which will probably amount to as much as one billion as against one-third of that amount for 1923.

International trade in the world as a whole shows a larger movement of commodities during the past year than at any time since before the war. But international exchange of goods, measured in quantities, is probably still 10 or 12 per cent below pre-war, although the United States is unique amongst the large combatant nations in having recovered its foreign trade to a point 15 per cent to 20 per cent above pre-war on a quantity basis. One of the by-products hitherto of this lower movement of commodities has been the continued depression of shipping. With the general strengthening of the economic fabric of the world, with the gradual growth in the movement of com-

modities which is now taking place, together with the fact that there has been but little new ship construction during the last four years, and that the existing shipping is becoming more and more obsolete, it is fair to expect a recovery in the shipping world. The usable surplus tonnage at the present time in the world is probably not in excess of two million tons as against four million tons a year ago.

The year has again been marked by a decrease in federal taxation and by a large discharge of federal debt, which will amount for the year to something in excess of $900,000,000.

### Banking Conditions Good

Time and demand deposits in member banks show an increase of about two billion eight hundred millions, and bank clearings for the year were higher than in 1923. The gold reserves have not increased despite imports because of the larger circulation given to gold certificates. Savings continue at a very high rate, as indicated by the increasing savings deposits, the large absorption of bond issues, and the extraordinary expansion in insurance, thus demonstrating that there has been maintained a high state of efficiency throughout industry and commerce, with little evidence of waste, extravagance and speculation. In fact, the most far reaching movement in our economic life today is the larger understanding of its broad problems, the better appreciation of the factors of stability, and the definite progress in the elimination of waste, through more stable employment, through better administrative methods and through the rapid march of scientific discovery. That we are able to maintain wages at 100 per cent above pre-war while the cost of living is 72 per cent, and the average wholesale price of commodities about 50 per cent above pre-war is the very definite proof of increasing efficiency in production and distribution and of the free flow of competitive action.

### Influence of Improved European Conditions World-Wide

In the foreign situation the settlement of the conflict over German reparations through the Dawes plan, with its stabilization of German currency and the German budget and the recuperation of employment and production in Germany, is having and will have a far-reaching effect upon the whole of Europe, and it has favorable influence reaching to our shores. Great Britain shows considerable improvement in all phases of its economic life.

The commercial and industrial situation in France, Italy and Belgium shows steady improvement during the year. Some progress is being attained in these countries towards reduction of expenditure and increased taxation, directed towards the better balancing of budgets and more stable currency. Poland has stabilized her currency. Yugoslavia, Finland, Serbia, Esthonia, Lithuania, Sweden and Norway show manifest stability in economic and trade conditions and steady progress over preceding years. The Netherlands, Denmark and Spain show some temporary depression during the year due to local conditions which are improving. Austria, Roumania, Bulgaria, Hungary and Turkey do not show the rate of progress of some of the others. Russia makes no real advance. A large part of Europe, however, continues dangerously overarmed and currencies are not yet upon that foundation of stability which will only be reached when they are placed upon a gold basis.

The year has been one of steadily increasing prosperity for the whole of Latin America despite three revolutions. Our sales of export goods to this territory show an increase over the previous year of about 12 per cent. We now enjoy the highest trade with them in our history.

The conditions in Egypt, South Africa, Congo and other parts of that continent show steady improvement, with increased productivity and trade. In Asia, the situation in Japan marks the courageous upbuilding from the earthquake disaster. China is much depressed by continued civil war. Conditions in India, in the middle East, have shown a steady economic improvement and subsiding of political and social agitation.

### Recovery From War Effects Is a Wholesome One

It has been suggested in some press quarters at home and abroad that the result of these favorable factors may be leading our country towards a period of inflation of the character of 1919-20 with its disaster of 1921. It can be assuredly stated that we are on the march of wholesome recovery from the war and there is no present indication of inflation. We only secure inflation when undue expansion of credit finds its outlet in bidding up prices after the plant and labor capacity of the country is employed to the maximum. We have reached no such stage because there is still a margin of labor capacity for enlarged output in the form, however of more full time employment than from people out of work. As a nation our business men, bankers and public officials have gained enormously during the past four years in understanding of the basic factors which create healthy prosperity as distinguished from over expansion as well as in understanding of their responsibilities in the matter. Our informational services are now upon such a basis as quickly detect dangerous currents. It might be added that a holiday season when anyone might think about safeguards from over expansion is infinitely more comfortable than one fraught with negative problems of repair of economic depression.

Altogether forces in motion both at home and abroad mark solid progress toward peace and toward prosperity for the coming year.

## Calumet District

### WITH FIGURES ALL IN, 1924 PROVED TO BE HAMMOND'S BEST BUILDING YEAR

#### Total of Building Operations For the Twelve Months Ran Over Six Million Dollars

Never before in the history of Hammond was so much building construction work done over the given period of a year as took place in 1924. It was the city's banner building performance and fully justified the glowing prophesies that were advanced with the dawn of the year twelve months ago. This assertion is made after going over the official records of City Building Inspector Henry Vis.

The figures not only show a great volume of construction work for a city the size of Hammond, 40,000, but impress with the fact that there was a much better class of buildings as regards commercial and residential structures than is ordinarily the case.

However, that is not all, men who are in close touch with the local situation are of the opinion that the general building outlook now is more encouraging than ever before and unless inimical conditions arise, not at present indicated, the construction program for 1925 will even exceed that put across the past year.

Here are some of the new structures in prospectively sight and contemplated: Hotel and theatre (with 3,500 seating capacity), to be located in E. State street; two seven or eight-story office buildings, and another new theatre planned for S. Hohman street; a large amusement park along the lake on the North Side; numerous lesser commercial structures for State, Hohman streets and Calumet avenue; the new bank and office building on Hohman street and the Gas and Electric Company's new office building, both of the latter now in course of construction. These both individually and collectively will do much to inspire faith in the building field and lend an impetus to future construction operations that will place Hammond well up in front with the other progressive and growing cities of the state.

Getting back to past performances, December building permits issued totaled 103 for a total estimated valuation of $800,300. Here was a gain of 41 permits over December a year ago with the valuation registering an increase of 201.11%.

During 1924 there were 1,371 permits issued as against 1,184 in 1923. The total estimated valuations for 1924 were $6,110,858. while in 1923 the sum total was $4,700,780, an increase of 29.9% for the past year.

### HAVE BEEN THERE BEFORE

#### Previous Experience Now Tending to Whet Appetites

Several Calumet contractors have gone on a short diet in preparation for the big banquet of the Builders and Manufacturers Mutual Casualty Co., to be held in Chicago, January 12. Quite a few of the builders from The District are planning to motor over for the festivities next Monday night and are going to take along some healthy appetites.

### CALUMET BUILDING PROGRESS

Again the General Contractors Central Council of the Calumet District met informally at the Building Trades Employers Association, Hammond, on January 2, to discuss general building conditions and to lay out a preliminary program for guidance in 1925. Then the council gathered on January 5, in joint session with representatives from Carpenters' Union to talk over the wage situ-

ation and proposed certain moves in the hope of correcting some of the customs now in vogue that are considered detrimental to building progress.

---

There is a persistent rumor that will not down to the effect that Mandel Bros., Chicago, big department store owners, have closed a site deal involving a 100 foot frontage in S. Hohman St., Hammond, upon which it is contemplated to erect a six or seven-story store building.

---

The contract for the erection of a $20,000 residence in Forest avenue for John Williams has been awarded to M. A. Dickover.

---

The lease for the lake front site, upon which it is proposed to erect a new amusement park, has been signed, plans are in progress and the company promoting the scheme is anxious to get construction work started as soon as the weather will permit.

---

The Tri-City Electric Co. was the successful bidder on the wiring for the new bank building. The fixtures are to be let separately at a later date.

E. E. COLE.

# EVANSVILLE

## BEST ONE CAN DO IS TO MAKE THE BEST OF THE OPPORTUNITY

### That Is What Evansville Did Regarding Building

Statistics for 1924 released by city building commissioner, Kerth, of Evansville, are encouraging.

While the total amount of money represented in building operations in this city last year lacked $673,001 of reaching the 1923 total, there were approximately 200 more dwellings erected in 1924 than in 1923. The difference in expenditures is accounted for by the construction in 1923 of the Bosse high school, Boys' Catholic high school, and manufacturing plants. The year 1924 meant a great deal more to the average citizen than did 1923, the records indicate.

It is also claimed that the new building code has had a salutary effect upon the type of homes going up in the city. Better built homes are the rule, and not the exception now, it is said.

Everyone agrees that 1924 was not as good a business year as 1923. The most striking improvements came as the year drew to a close. When the year ended the buying power of the country had shown marked improvement, demand was reviving, employment was on the increase and production of both raw and finished materials was being forced closer to plant capacity. Everything points toward 1925 being a sound, prosperous year.

Evansville moved ahead, statistics show, and made the most of her opportunities during 1924.

# FT. WAYNE

## NEAR RECORD APPROACHED BY LOCAL BUILDING OPERATIONS IN YEAR 1924

### Over Six Million Dollars Spent On New Residence Construction

Fort Wayne people spent $11,488,092 almost a million dollars a month, for new buildings and repairs to old structures in 1924. While this figure is not a record breaker, it comes within $300,000 of the building permit totals in the banner year of 1923, when the sum expended for new construction was $11,853,648.

A total of 2,998 building permits were issued as compared with 2,842 in 1923. Not so many permits for large expensive buildings were taken out in the year just past.

The most expensive structure for which a permit was issued this year was the Trinity Lutheran church, at Ewing and Wayne streets, which is being built at a cost of $450,000. The second largest structure is the Wayne Pharmacal building on West Berry street, costing $400,000. Others follow: Northern Indiana Gas and Electric company plant, Reidmiller and Hale avenues, $328,000; Home Telephone and Telegraph company building, $227,000; Dudlo Manufacturing company, $135,000; Adams school, $127,000; James Smart school (addition), $206,000; Forest Park school, $275,000; Hilgeman & Schaaf building, Wayne and Clinton streets, $100,000; Sheridan apartments, $150,000; Concordia College dormitory, $125,000, and Harrison Hill school, $250,000.

A total of 1,359 new residences were erected during the year at a cost of $6,714,182. More residences were started in construction in April than any other month.

Permits issued by months follow:

| | Total Permits | Total Cost |
|---|---|---|
| January | 67 | $ 241,650 |
| February | 98 | 733,450 |
| March | 264 | 1,676,000 |
| April | 451 | 1,609,612 |
| May | 406 | 1,844,270 |
| June | 292 | 773,436 |
| July | 285 | 769,272 |
| August | 250 | 1,096,469 |
| September | 308 | 795,290 |
| October | 288 | 798,768 |
| November | 191 | 690,330 |
| December | 98 | 459,545 |
| Grand total | 2,998 | $11,488,092 |

# INDIANAPOLIS

## ANOTHER BIG BUILDING YEAR IMPRESSES THE IMPORTANCE OF THE CITY BUILDING INSPECTION DEPARTMENT

### Indianapolis Construction in 1924 Estimated At Over Twenty-Five Million Dollars

One of the most interesting, yet one of the least said about departments of a city government is the building inspection bureau. Folks who build know it is in existence for they come in direct contact with it, thousands of others never give a thought to the strict record the city keeps on its building operations, in fact, they don't even know there is such an accounting of construction work.

Of course the big feature of the building department is its scrutiny of new building work that the welfare of citizens may be safeguarded through proper sanitary, ventilation and structural factors. Within the past few years every effort has been exerted on the part of the building commissioner and his men to increase the efficiency of the department until today it is on an extremely high engineering plane and few cities in the country the size of Indianapolis can boast of a more efficient building department.

Commissioner F. F. Hamilton and his aides have been laboring steadily for several years to improve the city building code into an up-to-date regulatory measure with the result that some eight hundred pages of revised technical data is practically completed and ready to be introduced in the City Council for consideration and passage. The new code, if passed, will demand for Indianapolis the latest engineering developments in building construction fire prevention methods.

The work of the department of late years has been steadily increasing as is shown by the fact that in 1921 there were approximately 10,000 permits issued while in 1924 the issuance just failed to total 17,000 permits, an increase of 70%. Inspections increased from 22,000 in 1921 to 120,000 in 1924, a gain of 555%.

That some idea may be gained as to the thoroughness with which permits are issued, the building inspection department is now operating under an ordinance passed in 1924 requiring all prospective builders to file engineering and architectural plans when permit is desired. This provision, however, does not apply to small sheds or private garages. The building department also sees to the enforcement of the zoning ordinance passed in 1922.

The city building record for any given time is obtainable always and the figures, which cover the daily building prospects, clearly indicate the progress and expansion of the city. The latest record from the department show that there were 16,967 permits issued in 1924 for a total estimated valuation of $25,452,812. This was 1,200 more permits than were issued in 1923, but the valuations fell off 6.19% as the money involved the previous year amounted to $27,134,464.

A tabulation of the building operations for 1924, according to the official record, was:

| Classifications | Per. | Est. Val. |
|---|---|---|
| Additions | 1,223 | $ 859,489 |
| Alts. and Repairs | 8,475 | 2,805,268 |
| Accessory Bldgs. | 2,627 | 832,167 |
| Business Bldgs. | 236 | 4,153,490 |
| Flat Bldgs. | 30 | 2,029,000 |
| Industrial Bldgs. | 35 | 1,013,176 |
| Public Bldgs. | 45 | 1,932,189 |
| Residences | 2,459 | 10,249,509 |
| Signs, Elevators, etc | 1,830 | 1,478,724 |
| Tenements & Stores | 7 | 99,800 |
| Total | 16,967 | $25,452,812 |

**Residences** (2) 5335 Park Ave. cost $6,800.00. at 1865 No. Dexter to cost $4,400.00. Owner and builder, R. H. Shelborn Co., 4836 College Ave.

**Store Bldg.:** $4,750, 1 sty., 50x52, at 618 No. Capitol. Owner, Sam Finklestein, 411 No. Illinois. General contract let to F. Osterwald, care of owner.

**Residence:** $5,900.00, at 1045-47 Dawson. Owner, Elmer Wehrling, 1122 Villa Ave. Contract let to Horace R. Mathews, 441 No. Gladstone St. Frame.

**Residence:** (2) $5,000.00 each, at 5122 Kenwood and 337 West 44th. Owner, William Low Rice, State Life Bldg. Owner builds.

**Residence:** $6,500.00, at 5225 English Avenue. Owner, Johnson and Rasener, at site.

**Residence:** (double) $3,000, at 1629-31 Draper. Owner, Gladys Moore, care of contractor. Contract let to Southern Bldg. Co. Frame.

**Residence:** $,3400.00, at 137 No. Drexel. Owner, Economy Bldg. Co.

### WAIVER OF LIEN

Frank Stewart, as contractor, and St. Clair & Illinois Realty Co., as owner, agree to install heating and plumbing for $14,625, on Alameda Apartments, southeast corner of E. St. Clair and Illinois Sts.

### BLOOMINGTON

***Lodge Building:** $150,000. Archt., John L. Nichols, 204 So. Indiana Ave. Owner, Elks Lodge, Prof. U. S. Hanna, John W. Gravens, Fred Matthews, H. B. Gentry. Sketches. Owners may purchase new site. Project will probably mature next summer.

***Factory** (add.) $100,000. Archt. and contractors, The H. K. Ferguson Co., 4900 Euclid, Cleveland, Ohio. Owner, Showers Bros., Bloomington. On brick work; heating and plumbing let to Fletcher Plumbing and Heating Co., Bloomington.

### COLUMBIA CITY

**Ditch: Bids close Friday, the 16th day of January, 1925.** Receive separate sealed bids for furnishing of tile; on tile construction work; and on open or dredge construction work.

Said system of drainage consists of a Main Line and Sixteen Branches thereto. The open or dredge work totals 29,170.62 cubic yards in 130 consecutive stations; the tile ranges in size from 6-inch to 24-inch in 193.72 stations on fif-

VOL. VI | INDIANAPOLIS, INDIANA, JANUARY 17, 1925 | No. 42

## BUILDING CONTRACTORS GO ON RECORD AGAINST FIVE-DAY WEEK.

### Contention Is That, Since Skilled Labor Is Scarce, Cutting Down of Working Time Would Handicap Building Operations.

Building trades employers from cities throughout the United States meeting in Cleveland, Ohio, last week, went on record as being opposed to the five-day week asked by the building trades in many localities.

In practically every instance where the short week has been asked for the demand is accompanied with a request for an increased hourly wage, so that the mechanic might be able to earn in 40 hours what he formerly did in 44 hours.

There is a serious shortage in most of the major trades at the present time and if the five-day week is universally adopted this will be still further increased by about ten per cent.

Reports submitted at the conference, which was held under the auspices of the National Association of Building Trades Employers, indicate that in a number of cities some of the trades have already succeeded in putting into operation the five-day week. This is true in the case of the painters in New York and Boston, while the plasterers in Philadelphia and Boston are only working forty hours per week.

The plasterers and lathers in Cleveland have announced that they are demanding the five-day week and it is believed that the painters and glaziers will make a similar request. At the last annual convention of the United Brotherhood of Carpenters and Joiners of America a resolution was adopted authorizing the carpenters in those cities where there is a District Council or where there is more than one local union to take a referendum vote on the five-day week. This vote is now being taken in the larger cities of the country and the results will be announced shortly from the Brotherhood headquarters in Indianapolis.

Employers are of the opinion that if one of the key trades, such as the carpenters are successful in their efforts that the movement will spread to all the other trades in the construction industry and eventually to other industries. Any shortening of hours can not help but increase construction costs and it is believed that any advance at this time will seriously curtail the immense construction program planned for this year. Inasmuch as the general prosperity of the country depends largely upon the construction industry, it is essential that nothing be done which will cause a stoppage of work.

The conference adopted the following resolution:

Whereas, There is an extreme shortage of mechanics in the building trades in the United State today, and

Whereas, The efforts being made by some labor organizations in the Building Industry to establish a five-day week would further increase this shortage by almost ten per cent, thereby increasing the cost of building homes and other essential structures and limiting the amount of construction possible, and

Whereas, Organized labor has placed itself definitely on record as acknowledging the existing extreme shortage of labor in the building trades and has cooperated with the employers in the establishment of apprentice schools throughout the country in order to create more mechanics.

Therefore Be It Resolved, That the employers in the Construction Industry here assembled at Cleveland this 5th day of January, 1925, from throughout the United States believe that the efforts on the part of several trade unions now to put into effect a five-day week thereby nullifying the splendid work of the apprentice schools to create more mechanics to take care of the shortage is unwarranted and is a distinct step backwards for the Building Industry as a whole.

Therefore Bt It Resolved, That any further attempt on the part of any labor organization to put into effect any such destructive program cannot be looked

(Continued on Page 13)

## ALMOST UP TO THE BIG BUILDING RECORD OF 1923

### Total Operations in Indiana's Nine Leading Cities in 1924 Show But a 5.3% Decline From Those of the Previous Year

Indiana's leading cities, as a whole, came through nicely in 1924 with a large building volume, reflecting creditably the activity that prevailed generally throughout the state. Nine of these cities reporting in on the work accomplished show that the amount of structural construction operations started amounted to $65,863,156. This, compared with the $69,549,674 of 1923, the high record for a year in Indiana history, was but 4.8% in arrears of the best yearly building performance ever achieved in the state. The fact that the volume in 1923 ran to such large proportions for this territory led many to believe that the succeeding year would show a decided falling off in building effort, but they were wrong as the final figures attest. Therefore, the result is all the more gratifying.

Northern Indiana, particularly the Calumet District, made up for considerable losses in other sections. Gary on the final returns made the best showing in the matter of gain over 1923, of any Indiana city with 107.26% increase. Gary's $9,059,128 did not include some $15,000,000 steel mill improvements for which no permits were taken out. Hammond also stood out near the head of the list with 52.46% gain over last year. Little Elkhart bustled into third place with a 47.67% increase over the corresponding period of 1923, Richmond gained 8% on last year's building, while Terre Haute was fifth, registering 3.08% gain. Ft. Wayne, while ssuing 155 more permits n 1924, with a total estimated valuation of over $11,000,000, was 3.08% in arrears of last year's record figures. Indianapolis granted 1,200 more permits but her $25,452,812 total valuation was 6.23% less than the 1923 total. Evansville issued 579 more permits but failed by 16.79% to reach her previous year's volume of building business. Richmond a 24% loss. South Bend experienced the greatest building slump of all the larger Indiana cities, recording a 59.38% drop from the business of 1923.

The official figures from the nine cities for the two years are:

| | 1924 | | 1923 | |
|---|---|---|---|---|
| Cities | Per. | Est. Val. | Per. | Est. Val. |

## HARVARD ARCHITECTURAL COMPETITION DECIDED

### Interesting Affair Ends In Selection of Big Firm of New York Architects

McKim, Mead and White, New York, were selected as the architects for the new group of buildings for the Harvard Business School, under the George F. Baker Foundation.

The jury to make the selection in the final stage of the competition was composed of: President A. Lawrence Lowell, chairman; George F. Baker, donor of the proposed buildings; Charles F. Adams, treasurer of the university; and the following architects, chosen from a list suggested by the competitors: John Russell Pope, of New York; M. B. Medary, Jr., of Zantzinger, Borie and Medary, of Philadelphia; and Louis Ayres, of York and Sawyer, New York.

The competition was in two stages and the competitors in the final stage consisted of the six winners chosen some two months ago from the forty-nine original contestants, together with six originally chosen to enter the final stage without participation in the first stage because of previous work for the University, for Harvard Clubs, for the donor, or who have official connection with the School of Architecture of the University.

Those in the final stage of the competition as the result of successfully winning the first stage were: Aymar Embury II; Raymond M. Hood; Ludlow & Peabody with Harold F. Kellogg of Boston, associated; Benjamin W. Morris with Eric Gugler, associated; Egerton Swartout, all of New York; and Hewitt and Brown of Minneapolis.

Those originally chosen to enter the final stage direct were: Coolidge, Shepley, Bulfinch & Abbott, of Boston; Professor J. J. Haffner of the Harvard School of Architecture, with Perry, Shaw and Hepburn, of Boston, associated; Guy Lowell of Boston; McKim, Mead and White, of New York; Parker, Thomas and Rice, of Boston; and Walker and Gillette, of New York.

With the selection of the architect, work on the actual plans for the new buildings will be pushed forward as rapidly as possible, according to Professor Killam of the Harvard School of Architecture, professional adviser for the competition. The buildings are to be located on the Boston side of the Charles River near the Harvard Stadium, and it is hoped that the actual construction may be undertaken soon after the beginning of 1926.

## ANOTHER APPEAL SOUNDED

### Committee Anxious That Indiana Architects Do Their Part to Make Annual Architectural Exhibit a Success

How about that display for the annual Indiana Architectural Exhibit to be held at the Art Institute, Indianapolis, beginning February 7th and continuing through the month?

The Pageants and Exhibit Committee has completed its preliminary duties by arranging for the location and space and is now anxious to hear from the state architects in the way of receiving displays so that the work of arranging and hanging them can be carried forward and completed in time for the opening.

As was explained in an advance circular of instructions sent out recently the Exhibit will consist of architectural work in various forms and will also include the allied arts. The entry list is not merely confined to members of the Society, instead all Indiana architects and draftsmen are cordially invited to submit exhibits that the display, which is open to public inspection, may create a favorable impression for the architectural profession of the state.

The exhibit is sponsored by the Society but it is up to the individual architects to provide the exhibits and thus make it what it purports to be, a showing of the works of Indiana architects and those allied with them.

The time is growing short, and here and now is the period in which to get out some of your work and send it in to the Committee who is shouldering the burden in an endeavor to do the profession credit. Surely, if other architects in other localities can stage worthwhile exhibits, Indiana architects can too, if they but will.

## PRESIDENT OF THE SOCIETY MAKES BUSINESS CHANGE

### Enters Individual Practice At Lafayette

Announcement has just been made that the firm of Nicol, Scholer and Hoffman, architects, Lafayette, has undergone a change in its organization. Walter Scholer and Mr. Hoffman have withdrawn from the firm. The former will engage in individual practice with offices at 301 Painters and Decorators Bldg., Lafayette. Mr. Hoffman, for the present at least, will do Mr. Scholer's engineering work.

ORGANIZATION AND CURRENT NEWS

## A MESSAGE FOR THE BUILDER

### The Part He Can Play in Safe-Guarding His Industry

J. H. OWENS, Field Rep.
Asso. Bldg. Contrs. of Ind.

The greatest service any builder or group of builders can perform is the active participation in all State Legislative matters, with but the one purpose in mind, "To work for the general welfare of the building industry by advocating helpful legislation." No man ought to consider himself entitled to enjoy any of the benefits accruing to the building ndustry in Indiana unless he gives unreservedly of his time, ability and influence to assure these benefits to all. Any man who neglects this duty, slacks in his responsibility and should invite the strongest kind of criticism.

The average builder is of course not familiar with all the "Preliminaries" that usually accompany lobbying among legislators during every session of the General Assembly. In the years that have passed, and in the years to come, will politics be played. It is the greatest game of all the ages, and played by the wise and experienced, offensively or defensively, depending on their attitude.

**Bills Must Be Scrutinized**

There is but one manner in which the builder may be protected against vicious legislation, and that is by the careful examination of bills presented. If such bills contain merit or are not detrimental to the building industry, it is our duty to encourage their enactment. If, on the other hand, bills evidence a purpose of favoring classes rather than masses, or that grant special rights or privileges that are not equally shared by the industry as a whole, it is our duty to strenuously oppose their enactment into law.

**State Association Should Be Supported**

Since its organization, the Associated Building Contractors of Indiana has made its legislative activities of paramount importance. True, in the beginning the association could ill afford expensive legislative programs, but it has been growing steadily, and its activities have more than kept pace. Today the association is recognized as one of the best and most active of its kind in the country—its activities studied and emulated elsewhere. Our motto, "The greatest good for the greatest number," has given the association the reputation for service it so highly prizes.

In the General Assembly of Indiana, every two years there are bills introduced that request special legislation. Heretofore, all bills have been carefully studied and analyzed, and when found detrimental to the interest of the builder they have been opposed by the association. Comparatively few builders realize to what extent the policy of "Watchful Waiting" has been used to protect the interests of the industry. If the extent of such service could be fully realized, the association, through increased membership, would be given stronger support and be better able to fulfill its requirements. Dues would be cheerfully and promptly paid, and those who now deny their support to the cause would become identified with the organization not merely as supporting members, but as enthusiastic boosters.

At this time full information on all legislative bills that may have bearing on the building industry is not available, but some such bills are now being considered, and as these are brought to light there may be disclosed situations that may require some very close attention if the building industry is to be protected from inimical inroads.

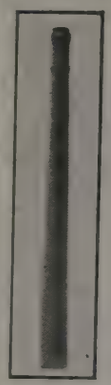
This is one of the big things the Associated Building Contractors of Indiana is doing, it is seemingly silently, ever on the job, and yet it is there looking out for the best interests of the great building industry of the state and the contractors. Therefore, since such is the case, it would seem that the A. B. C. is worthy of the full support of every builder in Indiana.

## Calumet District

### LOOKS LIKE A BUSY SEASON AHEAD FOR SOME

**Citizens Committee At Chicago to Seek to Enforce Landis Award Wage Scales**

What a lovely prospect. Any committee assignment or membership is bad enough, but for a prize package of work and trouble it would seem at this distance that a seat on the Citizens Committee at Chicago to enforce the Landis Award stands at the head of the list. Rumor has it that this said committee is to continue on the job in the Windy City, and will act as a buffer between the contractors and the unions. There is something to do. There are some 67,000 Landis Award mechanics working in Chicago for contractors who are cooperating with the Citizens Committee but there are many more on the outside, both mechanics and contractors, an element conducive to trouble now and then by the discontent they are capable of stirring up.



However, there is a ray of hope for the Committee in that a large percentage of the big structures going up are being erected by contractors who are friendly to the committee. Further, speculative building is not so thriving as formerly and if the Unions who are now asking for an advance of scales are persistent in their demands, there is a possibility that more contractors will seek the Committee's shelter, a condition that will make for a spread of the open shop work that is now in progress in Chicago. At that the Committee appears to have a real job cut out for it when the 1925 season opens.

he had Dawson City only to learn the low temperature report he caught was broadcasted from Chicago. But that wasn't so bad. One night we heard a lot of tinkling music and a Spanish song that came in faintly; we strained our ears, being sure we had Mexico City or Cuba, and waited for the announcement of the broadcasting station. Then it came, and it, too, was Chicago. Sure we quit right there for that night.

## GENERAL CONTRACTORS' COUNCIL AND PLANING MILL MEN MEET IN JOINT SESSION

### Discuss Conditions and Wage Scale Matters

In preparation of plans to discuss with the carpenters' union representatives the demand for an increased scale this season the General Contractors' Council of the Calumet District and the planing mill operators met in joint session at the B. T. E. A. headquarters, Hammond, the past week.

Though no details were given out it was said the local situation and conditions were gone into thoroughly and every effort is to be made to assure a condition that will encourage rather than discourage the prospective builder and thus aid in the maturity of the District's bright prospects for the new building season.

## LIKE DROPPING MATCH IN A CAN OF GASOLINE

### Careless Musing Only Made the Wintry Environment More Oppressive

One of our visitors nearly caused a riot at the B. T. E. A. office the other day, all because he forgot to appreciate just how "the gang" present was irritating under winter's close confinement. Everybody was gazing out of the windows at the snow and ice and slidling over closer to the radiators each time the wind howled. There was a death-like silence when "the reckless one" chimed n with, "Oh for some quiet nook along some shady brook, a can of bait, a line, a pole, and now and then a bite! Oh, man!" Only the thought of a wife and children at home saved the tormentor from the rage of a fury and an untimely end.

## A GOOD ALIBI

### Correspondent Seeks to Get by With This One

Committee meetings, conferences and waves upon waves of correspondence descended upon the correspondent to such an extent this week that he was unable to produce much of a Calumet column. No, emphatically not, no cross word puzzles caused the curtailment of news.

## REASON FOR BUILDING

### Hammond Growing to Real City Proportions

Going up!

Hammond now claims a population of 50,000. That is one reason why building has been good. There is a constant growing demand for new structures, especially of a housing nature, and also for commercial and mercantile purposes down in the business districts.

## CALUMET BUILDING PROGRESS

Architect Mac Turner, Hammond, is revising plans for the Fischer warehouse and mill at Whiting. The plans for increasing the capacity of the mill will be ready for the contractors shortly.

The contract was awarded by the Central Realty Co. to Rufus Danner & Co., for the erection of a $60,000 building at Hohman and Douglas streets.

M. A. Dickover, general contractor on the Technical High School, got the jump on the weather, succeeded in enclosing the structure and is now going right ahead with the interior finish despite the wintry conditions.

## WOULD ELIMINATE SHYSTER AND UNSCRUPULOUS BUILDER AS MEANS TO BETTER CITY

### Local Labor Leader Suggests Ideas to Improve Conditions

When asked for Labor's views on requirements needed for the creation of a better Ft. Wayne, President H. G. Flaugh, of the Ft. Wayne Federation of Labor, said one of the first things that should be done should be the elimination of the unscrupulous builder, the man who erects houses purely for commercial gain without reference either to beauty or construction.

Commenting further he said: "Every resident of Fort Wayne should be interested in its future. All should co-operate to see that many of the destructive influences of the city are eliminated without delay. From the standpoint of the union man, the layman or the employe, all of our people should look to the advancement of the city in many ways.

"The unscrupulous builder, the man who erects houses purely for commercial gain without reference either to beauty or construction, should be eliminated from our midst. The man who covers a faulty construction, and inferior, cheap material by a coat of paint is, in the fullest sense of the word, no better than the public swindler. The end does justify the means, and the welfare of our city demands that these building pirates be subjected to public surveillance.

"Also, a better building code should be adopted, not only for aesthetic reasons, but also in order to provide our city with better, safer and more modern buildings; a code that will operate equally upon all and afford every citizen equal protection and security.

"A greater community spirit between the employes and employer, and particularly between unions and employers, should be fostered. It has been demonstrated that unions have come to stay, for the rights of the great masses of people must be protected at all times. Therefore, a greater spirit of co-operation between employer and employe, the patronage of home labor at all times, the recognition of uniform wages and standard working hours will all help to promote favorable relationships and better times for the people and the city as a whole.

"The employer who seeks to deal with the laboring man individually and to take advantage of the latter's circumstances to procure cheap labor is merely, in the long run, cheating himself. The time will come when a greater feeling of reciprocity between the employer and employe will exist, which will not only be for their mutual benefit, but which will benefit the public proportionately.

"These thoughts surely represent the sentiment of the great masses of people of Fort Wayne, who have the city's best interests at heart, and by proper direction these people will actively co-operate to secure their enforcement and make Fort Wayne a greater and better city."

## BLDG. CONTRS. GO ON RECORD

(Continued from Page 5)

upon by the public and the employers as anything but bad faith and must be resisted to the utmost.

Be It Further Resolved, That it is requested and expected that organized labor will join wholeheartedly with the employers in the Building Industry throughout the country so that this further restriction in hours of labor will not be sanctioned or upheld and that they will earnestly assist the employers in removing from the working agreements of any trades any such prohibitive restrictions as a five day week.

canvas deck for veranda, remodeling of heating system, two new sets of plumbing equipment in both baths and toilet rooms. House to be Colonial design.

***Residence:** (Bungalow type) $11,000.00, Brookville, Indiana. Archt. Jos. R. Fallon, Thornburg Building, Connersville. Owner, Dr. F. E. Seal, Brookville, Indiana. ***Start this afternoon and run out in any direction, to the outskirts of town and notice the many new homes going up and you will be surprised by their beauty and the many modern conveniences that are now considered indispensible to the modern home-owner. Places that were newly marked out subdivisions only two years ago are completely built up today. Try and buy one of these places and you will find that they have increased in value from twenty to fifty per cent, and they were built only a couple of years ago.***

Warne, Secy., Tipton, and Fred M. Recobs, Township Trustee, Tipton, Indiana. General contract let to Dave Thomas, Tipton, Ind., $50,230.00 Heating and Plumbing let to Compton and Son, Tipton, Ind., for $8,373.00.

# Sealed Proposals

**SCHOOL HOUSE**
**NOTICE TO CONTRACTORS**

Notice is hereby given that bids will be received for the changes and repair of the present school building located at the town of Blackhawk, in Pierson Township, Vigo County, Indiana. And being in school district No. 4 of said Township. Also for the building of a two story addition to said building which addition shall be approximately fifty by seventy feet with gymnasium and etc., on lower floor with two class rooms and an Assembly room and office on the second floor. Said bids to include all materials labor, heating, plumbing and etc., necessary to complete said building and repair.

Which said repairs and building shall conform, in material and workmanship, and in all other respects to the plans and specifications therefor, which are now on file, in the office of Johnson, Miller. Miller and Yeager, Architects, 30 N. 5th St., in the City of Terre Haute, Vigo County, Indiana. And also at the residence of said Trustee in Pierson Township, Vigo County, Indiana.

The total estimated cost of said changes, repair and additions are Thirty-Five Thousand ($35,000) Dollars. Separate bids will be received for general construction of the building and for installation of heating and plumbing of present school building and addition thereto at the present school building in the said town of Blackhawk, in said Township, County and State, on the 10th day of February, 1925, at eleven o'clock A. M.

Each bidder will be required to file with said Trustee in connection with his bid a non-collussion affidavit and shall also deposit with the Trustee, cash or a certified check payable to said Trustee in an amount equal to four per cent of his bid as a guarantee that he will accept said contract and carry out the construction of said work if it be awarded to him.

Said bids shall be received and opened at the said School Building in the said Town of Blackhawk on the 10th day of February, 1925, at eleven o'clock A. M.

Should the successful bidder fail to enter into said contract, if the same is awarded to him, he shall forfeit said sum to said Trustee as such.

The successful bidder shall within seven days after he has been notified that the contract has been awarded him, enter into a written contract, and shall furnish a bond with security to be approved by said Trustee in a sum equal to the contract price, insuring the completion of said work according to said contract and plans and specifications, and any such successful bidder shall be prepared to immediately begin

### SCHOOL HOUSE
### NOTICE TO CONTRACTORS

Notice is hereby given that the Trustee and Advisory Board of Bethlehem School Township, Cass County, Indiana, will receive sealed bids at the present school building in the Village of Metea, Bethlehem Township, Cass County, Indiana, up to 12:00 o'clock noon on Tuesday, the 10th day of February, 1925, for the furnishing of all material and performing all labor for the construction and completion of the addition to and the remodeling of the school biulding at the Village of Metea, in said Bethlehem Township.

Such work will be under the plans and specifications heretofore approved and now on file in the office of the State Board of Accounts of the State of Indiana, and the office of the State of Indiana, and the office of the undersigned Trustee, and in the office of the Architects, Henkel & Hanson, 108 Heinemann Building, Connersville, Indiana.

Copies of plans and specifications will be furnished any contractor applying for same on deposit of the sum of $15.00 to be held in escrow for the return of said plans and specifications to the architect on or before seven days after the opening of the bids, after which date all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on forms 96 bidding blanks. Each bid shall be accompanied by certified check upon a solvent bank, made payable to Guy Smith, Trustee, in the amount of not less than three per cent of the total amount of their bid, tendered as a guarantee that the bidder will, if awarded contract, enter into a bona fide agreement with the said school township of Bethlehem for the contract, and furnish sufficient bond equal to one hundred per cent (100%) of the contract price.

If, for any reason whatsoever, the bidder shall fail to enter into proper agreement or fail to execute a proper bond, the full amount of the certified check shall be retained by the school township as liquidated damages. The estimated cost of the building complete is $44,000.00.

The undersigned Trustee and Advisory Board reserves the right to reject any and all bids, and waive any defects or informality, if deemed in the interest of said Bethlehem School Township.

The certified check to be deposited by bidders must be drawn upon a bank doing business in the State of Indiana. The surety upon the bond of the successful contractor must be satisfactory to the Trustee and Advisory Board.

Signed and dated at Logansport, Indiana, this 8th day of January, 1925.

### HEATING PLANT FOR SCHOOL
### NOTICE TO CONTRACTORS

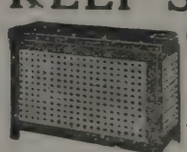
Notice is hereby given that the School Board of the City of Batesville, Ripley County, Indiana, will receive sealed bids at the office of the Secretary, which office will be moved to the Community Room of the Batesville Memorial Building on the date hereafter mentioned, in the City of Batesville, Indiana, until 10:30 A. M., Monday, January 26th, 1925, for the furnishing of all materials and performing all labor for the construction, installation and completion of a heating plant in the new high school building now under construction in the City of Batesville, Indiana. Such construction and installation shall follow the plans and specifications approaved by and now on file in the office of the State Board of Accounts, Secretary of the School Board, and the office of the architect, Karl P. Henkel, 108 Heinemann Building, Connersville, Indiana.

Copies of plans and specifications will be furnished any contractor applying for same on deposit of the sum of $15.00 to be held in escrow for the return of said plans and specifications to the architect on or before seven days after the opening of the bids, after which date all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on form 96 bidding blanks. Each bid shall be accompanied by certified check upon a solvent bank, made payable to the Treasurer, Mr. L. E. Howard, in the amount of not less than three per cent of the total amount of their bid, tendered as a guarantee that the bidder will, if awarded contract, enter into a bona fide agreement with the School Board of Batesville, Indiana, for the contract, and furnish sufficient bond equal to one hundred (100%) per cent of the contract price.

If, for any reason whatesoever, the bidder shall fail to enter into proper agreement or fail to execute a proper bond, the full amount of the certified check shall be retained by the School Board as liquidated damages.

Each bidder must also file with the secretary of the School Board when he files his bid, the usual statutory affidavit.



The School Board erserves the right to reject any or all bids, and waive any defects or informality if deemed in the interest of the School City of Batesville, Indiana.

Dated this 5th day of January, 1925.

VOL. VI INDIANAPOLIS, INDIANA, JANUARY 24, 1925 No. 43

## ANOTHER FIVE-BILLION-DOLLAR BUILDING YEAR IN NINETEEN TWENTY-FIVE

*Such Is Prediction Made After a Careful Study of National Building Conditions.*

Perhaps the most interesting statistical development in the building field during the past few years has been the Annual Building Survey and Forecast by the Architectural Forum. For the past three years, since the institution of this annual forecast, the Forum prediction as made the first of each year, has been within 3 per cent correct when compared with actual figures at the end of the year. This forecast of building activity is based on a comprehensive survey carried out through individual reports from a large number of architects and from building contractors, bankers and others directly interested in the construction field. The investigation is made in 19 building types and covers each state. Percentage comparisons are made with the previous year in each classification, so that there is provided not only a definite measure of activity in each district, but a relative measure of the increase or decrease of public interest in the particular building type in question.

This Survey was conducted in exactly the same manner as that used successfully for the past three years during which period the Forecast of the Architectural Forum presented at the first of each year, has closely approximated the actual totals of the year. In January, 1924, the published forecast of The Architectural Forum predicted an expenditure of $5,560,367,700 during that year. Figures now available prove that this prediction was correct within 3 per cent.

**Factors Influencing 1925 Building**

All evidence would seem to bear out the prediction that 1925 is to be another record building year and that the great momentum of the building industry would continue almost unchecked. The basic elements which establish the total volume of building in any given year include the following:

An established shortage of buildings.
Public confidence in the building situation.
Stabilized costs.
Good transportation conditions.
Ample mortgage money.
Good labor conditions.
Well maintained rentals.
Sound general business conditions.

Of course, in certain districts the building shortage has to a considerable extent been met but at present building costs, the normal expenditure required in this country is approximately three and a half billion dollars, so that even at the five billion dollar rate, it will still take several years of more than normal activity to meet the requirements of the shortage which accumulated over the period from 1913 to 1920.

**Conditions Better Than a Year Ago**

There has occurred no abrupt rise in building costs or no trouble in the labor situation to disturb public confidence in building. In fact, conditions today are better than they were a year ago, for we have behind us a year remarkably free from labor disturbances and one in which building projects proceeded in a smoother manner than for many years before. Investments in mortgage bonds and individual financing of building projects continue unabated and there are no apparent signs to indicate anything but a strong element of confidence in the real estate market and throughout the building industry. In certain districts speculative building has been over-done and it may well be that the volume represented by that field will be less in 1925 than in 1924, but on the other hand institutional and commercial building promises to over-balance this situation.

**Transportation Facilities Improved**

The handling and shipping of building materials has been greatly facilitated by improved transportation conditions, and this fact coupled with the good production situation, makes it possible to obtain deliveries without undue delay so that the element of waste has been considerably eliminated from the building cost situation. Building material manufacturers are producing and distributing their products today more extensively and more smoothly than ever before in the history of the industry. In spite of the huge building program of the last year, there are no apparent shortages of materials. This is a particularly important fact because the shortage of materials in the past, particularly prior to 1924, has been a definite drag on the developing momentum of the construction industry.

**Easier to Finance Building Projects of Merit**

Building finance is in excellent condition, primarily due to the confidence of the public in this field and to the ability of building enterprisers to pay well for the use of money. Reports from mortgage companies everywhere indicate confidence in the situation and willingness to aid in any legitimate building project.

Financing has become easier and with fairly well stabilized building costs, it is probable that building operations can be carried out with an even smaller proportion of equity than at any time during the past few years. Real estate circles report considerable activity in the sale of sites for buildings of all types, including a considerable movement in suburban districts.

**Labor Conditions Promising**

The labor situation in the building field promises little or no trouble next year. In the various trades the union scales have evidently been worked out in a manner reasonably satisfactory to all parties and many agreements between labor and employers will probably remain in force at least during the year 1925. As no great disturbance is anticipated in this quarter, this condition becomes an important factor tending toward continued prosperity in the construction industry.

It may also be noted that rentals are evidently being well maintained on present levels and consequently building projects offer excellent investments with a strong speculative factor still in evidence. No great change is anticipated in this condition during 1925, as the demand for various classes of building occupancy is still strong except for certain districts and building types where past shortage has been overcome and even here there has been no great reduction in rental income.

**Comparative Activity in Nineteen Types of Building**

Of the total volume of new construction in 1925, the various building types evidently will show the following change in ratio of public interest as compared with 1924.

| Type of Building | Comparative Activ. |
|---|---|
| Banks | Slightly less |
| Apartments | Slightly greater |
| Apartment Hotels | About 20% less |
| Clubs and Fraternal | Slightly greater |
| Community and Memorial | Slightly less |
| Churches | Considerably greater |
| Small Dwellings | Slightly greater |
| Medium sized dwellings | The same |
| Large Dwellings | Slightly Less |
| Hotels | About 25% less |
| Hospitals | Slightly less |
| Industrial Buildings | Slightly greater |
| Office Buildings | Slightly greater |
| Public Buildings | About 20% greater |
| School Buildings | The same |

## MID-WINTER MEETING PLANS WORKING OUT NICELY

### Indiana Architects Gathering At Indianapolis February 6 and 7, Promises To Be An Attractive Affair

The semi-annual gathering of the Indiana Society of Architects is but two weeks distant, and as plans are shaping themselves this event will be an attractive affair. With plenty of advance notification to the architects of the state relative to this meeting the officers are hopeful that the members of the profession will turn out in goodly numbers February 6th and 7th at Indianapolis to participate in the event.

Arrangements have been completed for the holding of the various sessions, luncheons and the banquet at the Indianapolis Athletic Club, Meridian and Vermont streets. The tentative plans provide for a Board of Directors' meeting at 10 a. m., February 6th, luncheon for all guests at 12:30 p. m.; general meeting of architects, 2:30 p. m.; banquet and entertainment, 6:30 p. m. Then at 10 a. m., February 7, the architects will go in a body to the John Herron Art Institute where the annual Architectural Exhibit will be formally opened and the I. S. A. prize for the best individual exhibit will be awarded by ballots cast by the architects in attendance. At noon there will be a complimentary dinner at the Athletic Club in honor of the winner.

The general meeting and banquet programs have not been definitely decided upon, but in view of the excellence of past performances arranged for I. S. A., mid-winter meetings one one can rest assured that the program committee will well take care of their part in order to interestingly entertain the architects of the State, who will journey to Indianapolis, February 6 and 7.

This is one of the two big get-together meetings of the year for Indiana architects, so why not take advantage of the occasion to get acquainted with your fellow members of the profession in Indiana and enjoy the association thus afforded, hear what the other man's view points and ideas are, and get in closer touch with the Society which is working for the advancement of your profession and you who are a part of that profession?

## ARCHITECTS SUBSCRIBE TO CODE OF ETHICS FOR THE BUILDING INDUSTRY IN BIG WESTERN CITY.

### Obligations of Architect, Contractor And Labor Specified.

Out in San Francisco there is an Industrial Association which among other things took hold of a troubled building situation, and since doing that the city's volume of building business has grown steadily until in 1924, it reached unprecedented heights as far as local records were concerned.

The San Francisco Chapter, American Institute of Architects is in harmony with the association and has subscribed to the code of ethics proposed for the building industry.

Several of the clauses of that code as they pertain to the architect, contractor and Labor are interesting in that they define the obligation of each in this particular field of endeavor. The clauses read as follows:

**The Architect**

The architect should always act entirely in a judicial capacity in determining contract obligations, insisting upon full performance by owner and contractor; he should not engage in work in the building trades, except in his capacity as an architect; he should write into his specifications clauses providing for the observance by the contractor of all building ordinances, safety and sanitary codes; he should never require a contractor to perform any part of the service which is generally recognized as the work of the architect; he should not attempt to cover possible oversights or errors by indefinite clauses in the contract or specifications.

**The Contractor**

The contractor should insist on enforcement of building ordinances and safety and sanitary codes; he should carry compensation insurance; he should not engage independently in any service which is generally recognized as the work of the architect, either in the preparation of plans and specifications or the supervision of the work; he should refuse to deal directly with the owner where an architect has been employed for supervision, and should never submit to the owner directly, without the architect's approval and knowledge, any proposals or estimates; he should never improperly increase the cost of work or produce work inferior to that contracted for; he should deal fairly and justly with the labor employed by him and make every effort to afford opportunity to apprentices to learn the building trades.

**Labor**

Labor employed in the building trades should never endeavor improperly to increase the cost of the work or to produce inferior work; labor should never endeavor to restrict the quantity or quality of the output of the individual; labor should cooperate in affording every opportunity to apprentices to learn the building trades and, when qualified, to practice their trades.

## HOW ABOUT YOUR CONTRIBUTION TO THE ARCHITECTURAL EXHIBITION?

### Committee Is Anxiously Awaiting To Hear From The Architects.

Have you sent in your contribution for the annual Architectural Exhibit, or, are you arranging to? The committee has done its part in securing the Art Institute for exhibit purposes and stands ready to do the placing and hanging if the architects will but lend their aid in contributing the wherewithal to make the exhibit possible.

This year there are two prizes, a $50 cash prize to the architect who, by the vote of the architects, is deemed to have the best architectural design at the exhibit; then, also, an honorable mention in the form of an artistic certificate will be given to the architect whose entire exhibit has the greatest architectural merit.

# Build with the Builders

ORGANIZATION AND CURRENT NEWS

## ANOTHER FIVE BILLION DOLLAR BUILDING YEAR.

(Continued from Page 5)

Retail Stores_____About 25% greater
Theaters _____Slightly less
Welfare Buildings__|___Slightly greater

It is to be understood that the above tabulation shows relative public interest —not the volume of money to be spent in 1925.

Those which seem to represent the greatest changes in public interest, are, for instance, office building in the northeastern states, the figures for which indicate almost double the activity of last year while in the same district the building of retail stores promises to be almost double. Drastic changes in the North Atlantic States are to be found in industrial building which promises to be exceptionally good.

The Middle States tend to indicate a considerable decrease of interest in the building of apartment hotels, while apartment building construction will be more active. Greater activity is promised in the residential field in all classes in the Middle States and a considerable increase in factory building is shown. Office building activity will be about one-third less than in 1924 in the Middle States.

The residential field, including dwellings, apartment buildings and hotels, has been analyzed and indicates that the bulk of excess activity during 1924 was in this field. Nearly 40 per cent of the total value of new building construction during 1924 was residential in character. As to residential building investment, figures have shown that every month during the past year there was a considerable increase over the corresponding month of 1923. In 1921 a great drop in the cost of building was recorded. This was the period of deflation for the building industry, when costs dropped from the unprecedented peak which followed wartime building activity, and it is plain that in 1921 as costs dropped the volume of new building increased steadily. So great was the momentum of falling costs and the impact of the "buyers' strike," which occurred in 1921, that the general cost of building fell to an artificially low level early in 1922 from which it recovered gradually as the volume of new building mounted. Eliminating its seasonal trend, this index line of building cost may almost be said to reflect the element of public confidence which has mounted steadily as building costs have stabilized and investment returns have proved certain and not subject to any further rapid deflation in the cost of building.

### Trend of Building Costs

It is interesting to note in studying this building cost trend that each period of spring activity in 1922, 1923 and 1924 has been followed by a corresponding increase in the cost of building. This is a natural and healthy condition, which affects stabilization because it is at these periods that stocks are naturally low, building labor scarce and costs correspondingly high. These peaks of increased cost extend through the summer months, because the great volume of building construction is under way during that period, and only the seasonal effect of the winter months causes a slowing down of demand and consequently a drop in the cost trend line.

Comparisons of activity in other building types are interesting but do not show as great a difference in totals as those indicated in the residential field. Statistics relative to the activities of four years in the commercial building field show that in 1924 there was more activity in this field than in other years, although that of 1922 closely approached this total. Evidently, under fairly normal conditions, the demand for commercial buildings in this country is steady, and does not show any great fluctuation from year to year except in relation to the totals of all building activity in different parts of the country.

It is surprising to note that in the school building field the activity of 1924 has been approximately equal and sometimes greater than for the unusual periods recorded in 1921 and 1922, which were supposed to represent the era of greatest activity ever known in the school building field. Here is reflected not only a definite effort to meet the shortage in school buildings which developed during and before the war period, but also a decided trend toward improvement and modernization in educational methods and consequently in the buildings which house such activties. School building is to remain active for some time to come, because there exist not only the problem of meeting the normal demand but also that of meeting a changing educational system of replacing thousands of inadequate and obsolete schools.

Nineteen twenty-four was a great year in the hospital building field. During the three years, 1921, 1922 and 1923, the building of new hospitals seemed to maintain an average pace, and strange to say, with very little seasonal fluctuation. 1924 has shown at least three record-breaking months in the hospital field, due to a tendency toward the construction of extremely large and expensive hospital units, and many more of these are to come in 1925, judging by preliminary reports and plans filed within the last two months.

The industrial building field during the last three years has shown a decided recovery from the slow period immediately following the war, and 1924 has contributed a quota equal to that of 1922 or 1923.

Church building has for the past three years gone on quietly but in large volume,—almost twice as great as normal. The year 1924 shows a greater volume of church building than any preceding year, and again there is reflected a drastic change in the planning of a basic building type, because churches today are for the most part built in larger units than in the past. Religion has been expanded to embrace many forms of community activity which in times past were not thought of as part of the service rendered by the church to its neighborhood. Consequently, the plan of church buildings has been developed to include educational and social facilities.

### Two Activity Peaks in Building Looked for in 1925

The facts and figures as presented by The Architectural Forum promise for 1925 a sound and prosperous year in the construction industry, with probably more general activity throughout the country and less concentration of record-breaking activity in the New York district. Again, there will be two peaks of building activity, one occurring in the normal spring building season, and another in the late fall, totaling in all an expenditure of nearly $5,000,000,000 for building materials and labor.

## Calumet District

### THE ONE OF ALL THE REST WHO GOES ON UNHERALDED.

#### Attention Called To The Importance of The Foreman.

There is a personage on all construction jobs of whom nothing is ever heard, and yet he is one of the most important elements in the whole operation. You hear of the architect, the general contractor, sometimes of a sub-contractor, even the brick-layer, carpenter, plasterer, painter, and what not, but whoever heard of the foreman on the job?

That is why the following by A. Luke Payne, in the Associated General Contractors, Constructor, caught our eye.

"The success of any building project depends to a large extent upon the foremanship exercised. It is not sufficient that the project be a good one, the price fair, and the constructor of unquestionable ability, unless the foreman in charge

(Continued on Page 13)

General Discussions of Problems
Pertinent to the Good of
the Building Industry

of the project is a peer in his department.

"The day has gone when brow-beating methods and ability to bully were practically the only essentials to a foreman's success. There is no longer any need for the Simon Legree of the Old School who swore hard and was the heaviest drinker of the lot on pay night.

"The modern foreman to be successful must be the best man on the job; he must be able to do each man's work as efficiently as the man himself does it; he is at a disadvantage as a supervisor if he does not possess that skill and ability. He must be a man of more than average intelligence and with at least the average education. He should be just, firm and patient. An impulsive foreman is always adjusting mistakes due to bad judgment. He should, without being a "wet nurse," learn to understand each man on the work, and should know something of him, but he should not do this at the sacrifice of the proper relations, neither should he be sentimental. The personal welfare and safety of the men, properly considered, will always enlist their loyalty and whole-hearted support for a good foreman.

Then, too, the foreman must be a leader. Those who have been in war will realize how quickly and readily any number of men will respond to good personal leadership and put forth the maximum amount of efficient effort to a good cause, or, in this case, a good project.

"Though not exactly essential to his success, a good foreman should learn something of first aid, and in case of accidents be able to organize affairs in such a way as to afford the best relief possible on the instant. He should, however, forestall disaster and accident if possible by proper precautionary methods.

"As the constructor's adjutant, he should serve him loyally and look after his employer's interests as he would his own. He should not be afraid of responsibility and ought not to appeal to the boss in matters that come under his authority for disposal.

Details, and every important item in computing costs, should be attended to with personal attention by the foreman, and even an empty grease cup or a mislaid hammer should not be overlooked by him. In fact, so much depends on the foreman as the executive head of the job that he must of necessity be the most important man on it.

"Preservation of and the proper accounting for materials and supplies is another important item for which he must be responsible to the constructor and he should guard these as the cashier of a bank guards its money.

"In consideration of all these important things it behooves the contractor to pay particular attention to the selection of his foreman, and having secured the right man he should support him and make his job sufficiently attractive to assure his staying with the firm as long as it desires his services."

Let us add, if you are fortunate enough to have a foreman of such qualifications as set forth above you had better stick to him.

## CONTRACTORS ENJOY THEMSELVES.

**Are Among The Guests At a Big Banquet At Chicago.**

Quite a number of Hammond contractors attended the banquet given by the Builders and Manufacturers Mutual Casualty Co., in the Gold Room at the Congress Hotel, Chicago, January 14. The crowd was not so keen this year on taking a chance with the slippery roads, so, we all took the train in to the big city.

The stay-at-homes missed a great treat. There was real music and plenty of it, entertaining speakers, the kind you are sorry to see sit down, and then, also, there was a wonderful menu such as the B & M always puts on for its guests. It was one of the events that will go down in our memory as one of the finest we ever experienced.

Thus fortified with such recollections Hammondites who went to Chicago are entertaining the hope that they will be fortunate enough to be enabled to attend that other B. & M. affair that is to be held in Indianapolis, on the evening of January 27.

## CALUMET BUILDING PROGRESS

Where do they come from and what do they do? Just start something unusual and a crowd seems to spring from the ground to loiter around and watch. Recently the contractor on the new bank swung a 100 ft. derrick into action to place the structural steel and now there is always a large crowd of spectators when the contraption is in operation.

The Neilson Development Co., has completed plans for a store and apartment building on Hohman and Goslin streets, for H. Taitz.

Architects Berry, Wainwright & Co., Hammond, are receiving bids for an eight-room brick residence on Forest avenue, for James Jacobson.

The plans for a five-story warehouse and storage building, fireproof construction, for Fred Juergens, have been completed by Architects J. T. Hutton & Son, Hammond. The latter are receiving estimates.

Contracts for the construction of a warehouse and garage have been awarded by E. C. Minas as follows: General, J. D. Smith; plumbing, Dorsey Plumbing Co.; electric wiring, Fred Juergens.

A report is being circulated that the plans for the new Ambassador Hotel will soon be out for figures.

Bids are now being received on the revised plans for the Jarnowski Store and Apartment Building to be erected at Calumet City, Ill., near Hammond.

With a blanket of snow covering the surface and about three feet of frost in the ground early construction work is at a standstill in this territory.

E. E. COLE.

# FT. WAYNE

## FT. WAYNE PLANS TO SEND A LARGE DELEGATION TO THE STATE A. B. C. CONVENTION.

**Reservations For Thirty-Six Filed At Indianapolis Headquarters.**

There is one event in building affairs in Indiana each year in which Ft. Wayne builders are greatly interested, doubly so because of a pardonable personal pride that is theirs. The event referred to is the annual convention of the Associated Building Contractors of Indiana an organization that came into being in Ft. Wayne eight years ago when a mere handful of contractors from out over the state met at the Allen County seat and organized. Max Irmscher, now president of the A. B. C.'s was one of the charter members as was Herman Witte, also of Ft. Wayne.

The interest of the local contractors in the convention is attested by the fact that plans have been made to take a delegation of thirty-six Ft. Wayne builders to the convention that is to be held at Indianapolis next week, January 27 and 28. This is the largest outside delegation reservation that has been filed to date at State A. B. C. headquarters.

## ZONING MOVE AT FORT WAYNE RIGHT IN LINE WITH THE GENERAL TREND IN OTHER CITIES.

**Fifty-Four Cities In The U. S. In 1924 Adopted The Zoning Scheme.**

With the people of Fort Wayne becoming increasingly interested in the zoning plans adopted in other cities, it is interesting to learn, at the beginning of the new year, that more than 28,000,000 people comprising 40 per cent of the urban population of the United States, live in 183 zoned cities, towns and villages. The information is contained in a statement of the division of building and housing of the federal department of commerce.

During 1924 fifty-four municipalities, with more than 6,500,000 population, adopted zoning ordinances. This indicates the greatest progress in zoning that has ever been made during a similar period. More than two-thirds of the 183 zoned municipalities have been zoned since September, 1921.

Neighborliness in the use of land is said to be the keynote of zoning. The home owner is protected from the intrusion of the junk yard and business and shopping districts are protected against noisy factories. Industrial plants have greater freedom in selecting sites convenient to good transportation. Such measures should provide for the use of the different kinds of land and districts within a city for the purposes to which they are best adapted, and allow for orderly growth of commercial and industrial districts.

The zoning ordinance is generally an auxiliary to the city plan, and helps to provide for the orderly growth of the city along lines that will bring the most satisfactory results to all concerned.

# Sealed Proposals

### SCHOOL HOUSE
### NOTICE TO CONTRACTORS

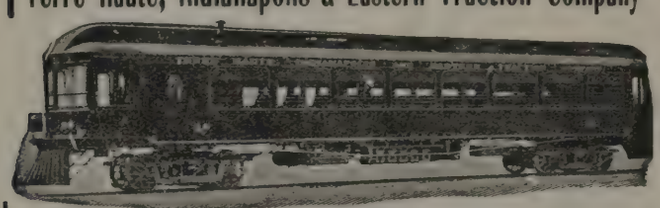
Notice is hereby given that bids will be received for the changes and repair of the present school building located at the town of Blackhawk, in Pierson Township, Vigo County, Indiana. And being in school district No. 4 of said Township. Also for the building of a two story addition to said building which addition shall be approximately fifty by seventy feet, with gymnasium and etc., on lower floor with two class rooms and an Assembly room and office on the second floor. Said bids to include all materials labor, heating, plumbing and etc., necessary to complete said building and repair.

Which said repairs and building shall conform, in material and workmanship, and in all other respects to the plans and specifications therefor, which are now on file, in the office of Johnson, Miller. Miller and Yeager, Architects, 30 N. 5th St., in the City of Terre Haute, Vigo County, Indiana. And also at the residence of said Trustee in Pierson Township, Vigo County, Indiana.

The total estimated cost of said changes, repair and additions are Thirty-Five Thousand ($35,000) Dollars. Separate bids will be received for general construction of the building and for installation of heating and plumbing of present school building and addition thereto at the present school building in the said town of Blackhawk, in said Township, County and State, on the 10th day of February, 1925, at eleven o'clock A. M.

Each bidder will be required to file with said Trustee in connection with his bid a non-collussion affidavit and shall also deposit with the Trustee, cash or a certified check payable to said Trustee in an amount equal to four per cent of his bid as a guarantee that he will accept said contract and carry out the construction of said work if it be awarded to him.

Said bids shall be received and opened at the said School Building in the said Town of Blackhawk on the 10th day of February, 1925, at eleven o'clock A. M.



Should the successful bidder fail to enter into said contract, if the same is awarded to him, he shall forfeit said sum to said Trustee as such.

The successful bidder shall within seven days after he has been notified that the contract has been awarded him, enter into a written contract, and shall furnish a bond with security to be approved by said Trustee in a sum equal to the contract price, insuring the completion of said work according to said contract and plans and specifications, and any such successful bidder shall be prepared to immediately begin

**SCHOOL HOUSE**
**NOTICE TO CONTRACTORS**

Notice is hereby given that the Trustee and Advisory Board of Bethlehem School Township, Cass County, Indiana, will receive sealed bids at the present school building in the Village of Metea, Bethlehem Township, Cass County, Indiana, up to 12:00 o'clock noon on Tuesday, the 10th day of February, 1925, for the furnishing of all material and performing all labor for the construction and completion of the addition to and the remodeling of the school biulding at the Village of Metea, in said Bethlehem Township.

Such work will be under the plans and specifications heretofore approved and now on file in the office of the State Board of Accounts of the State of Indiana, and the office of the State of Indiana, and the office of the undersigned Trustee, and in the office of the Architects, Henkel & Hanson, 108 Heinemann Building, Connersville, Indiana.

Copies of plans and specifications will be furnished any contractor applying for same on deposit of the sum of $15.00 to be held in escrow for the return of said plans and specifications to the architect on or before seven days after the opening of the bids, after which date all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on forms 96 bidding blanks. Each bid shall be accompanied by certified check upon a solvent bank, made payable to Guy Smith, Trustee, in the amount of not less than three per cent of the total amount of their bid, tendered as a guarantee that the bidder will, if awarded contract, enter into a bona fide agreement with the said school township of Bethlehem for the contract, and furnish su....cient bond equal to one hundred per cent (100%) of the contract price.

If, for any reason whatsoever, the bidder shall fail to enter into proper agreement or fail to execute a proper bond, the full amount of the certified check shall be retained by the school township as liquidated damages. The estimated cost of the building complete is $44,000.00.

The undersigned Trustee and Advisory Board reserves the right to reject any and all bids, and waive any defects or informality, if deemed in the interest of said Bethlehem School Township.

The certified check to be deposited by bidders must be drawn upon a bank doing business in the State of Indiana. The surety upon the bond of the successful contractor must be satisfactory to the Trustee and Advisory Board.

Signed and dated at Logansport, Indiana, this 8th day of January, 1925.

**HEATING PLANT FOR SCHOOL**
**NOTICE TO CONTRACTORS**

Notice is hereby given that the School Board of the City of Batesville, Ripley County, Indiana, will receive sealed bids at the o....ce of the Secretary, which office will be moved to the Community Room of the Batesville Memorial Building on the date hereafter mentioned, in the City of Batesville, Indiana, until 10:30 A. M., Monday, January 26th, 1925, for the furnishing of all materials and performing all labor for the construction, installation and completion of a heating plant in the new high school building now under construction in the City of Batesville, Indiana. Such construction and installation shall follow the plans and specifications approaved by and now on file in the office of the State Board of Accounts, Secretary of the School Board, and the office of the architect, Karl P. Henkel, 108 Heinemann Building, Connersville, Indiana.

Copies of plans and specifications will be furnished any contractor applying for same on deposit of the sum of $15.00 to be held in escrow for the return of said plans and specifications to the architect on or before seven days after the opening of the bids, after which date all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on form 96 bidding blanks. Each bid shall be accompanied by certified check upon a solvent bank, made payable to the Treasurer, Mr. L. E. Howard, in the amount of not less than three per cent of the total amount of their bid, tendered as a guarantee that the bidder will, if awarded contract, enter into a bona fide agreement with the School Board of Batesville, Indiana, for the contract, and furnish sufficient bond equal to one hundred (100%) per cent of the contract price.

If, for any reason whatesoever, the bidder shall fail to enter into proper agreement or fail to execute a proper bond, the full amount of the certified check shall be retained by the School Board as liquidated damages.

Each bidder must also file with the secretary of the School Board when he files his bid, the usual statutory affidavit.

The School Board erserves the right to reject any or all bids, and waive any defects or informality if deemed in the interest of the School City of Batesville, Indiana.

Dated this 5th day of January, 1925.

## "BC" Series Up-Draft Smokeless Boiler

Patent Pending

Prox Boilers are equipped with a top header, which is a positive steam separator, assures dry steam carrying maximum number of B. T. U.'s Water boiling up will not go into main and cause water knock, no matter how hot a fire may be in any part of boiler. A side connection to this header with natural drain to rear of boiler discharges all water and condensation to side headers. This is only one of the many superior features of Prox Boilers.

PROX UP-DRAFT SMOKELESS BOILERS

**Burns all grades of fuel, such as bituminous coal, lignite, coke, oil, gas, wood.**

VOL. VI INDIANAPOLIS, INDIANA, JANUARY 31, 1925 No. 44

## SEVENTH ANNUAL A. B. C. CONVENTION PROVES HIGHLY SUCCESSFUL

### Terre Haute To Get Meeting Next Year

The seventh annual convention of the Associated Building Contractors of Indiana, a two-days' session held at Indianapolis, Jan. 27 and 28, attracted a fine representative crowd of builders from out over the state, many cities both large and small being represented by delegates who evidenced their faith in organization as a means of creating greater unity and solidarity in the ranks of building construction contractors, and voiced the sentiment, both in word and action, that it was the one and only way to eliminate friction and reduce impediments to the industry to a minimum.

**President Irmscher Calls Convention to Order**

President Max Irmscher of Ft. Wayne, was on the job early and promptly at 11 a. m., Tuesday called the convention to order. He extended a hearty greeting to the assembled delegates, acknowledged his appreciation of their interest in the state association of contractors as betokened by their presence, and referred to the constructive effort that had been put forth by them, the association, that had made for achievement. He said there was still greater work ahead and exhorted the contractors to keep their shoulders to the wheel, expressing the hope that as time progressed the organization might continue to grow, to expand, and incorporate in its ranks all of the real, conscientious contractors and sub-contractors in Indiana, and move on to still greater success not for itself, or merely the contractors, but for the success and good of the building industry as a whole.

**City Attorney Welcomes Delegates**

Rev. Ralph V. Austin then pronounced the invocation following which James M. Ogden, corporation counsel of Indianapolis welcomed the delegates to the city announcing that as the Capital City it was their city, too, that it belonged to all the citizens of Indiana, not just its own inhabitants, and he said he hoped they would feel at home during their stay. He assured the members of the A. B. C., that he had heard of the work they had done and were seeking to do through their organization and said he was glad to realize that every effort put forth had been devoid of selfish interest. In closing he wished them well in their undertakings as a body, and voiced the opinion if they held true to their inspirations and ideals great good would come to the state in building matters for the provision of shelter for both industries, businesses and the citizenry.

In responding to the above remarks A. E. Kemmer, of Lafayette, First Vice-President of the State A. B. C., thanked Mr. Ogden for the cordiality of the official welcome and assured him that the organized contractors had but one motive in mind, their official slogan, "The Greatest Good for the Greatest Number."

**Committee Appointments**

President Irmscher at the conclusion of Mr. Kemmer's words announced these committee appointments:

Resolution—O. A. Toelle, Terre Haute; Walter W. Wise, Indianapolis; E. H. Fuhrman and Al Weiman, Fort Wayne; Roy Clark, East Chicago; Sam Kirk, Vincennes, and H. H. Herbert, Michigan City.

Legislative—J. H. Owens and C. C. Pierson, Indianapolis; A. E. Kemmer, Lafayette; Charles Morrow, Muncie; Frank Burget, Terre Haute; G. W. Schack, Fort Wayne.

Memorial—Henry Knauth, Vincennes; E. L. Danner, Kokomo; J. A. Gallivan, Muncie.

Publicity—E. H. Hyman, South Bend, Don Campbell, Indianapolis.

Guy Brill, Terre Haute and Ed Oeschlaeger, Fort Wayne, were appointed sergeant at arms.

Roll call of city and individual memberships, reading of the minutes of the last convention and the report of officers took up the remaining portion of the initial session concluding with noon adjournment.

**Work and Function of Administrative Building Council Stressed Upon**

At the afternoon meeting, called at 2 p. m., Walter W. Wise, mason contractor, Indianapolis, and member of the Advisory Committee of the Administrative Building Council of Indiana, made an interesting analytical report on the inception, the organization of, the preliminary work and finally the actual work of the Building Council to date. This talk gave a concrete idea of the vast amount of work entailed in this joint move to standardize building requirements and regulations begun by and being carried on in harmony with the architects, engineers and labor so that, in the end, better structures may be assured to the citizens of the state by eliminating waste in material and increasing the factor of sanitation and safety.

In an address by Architect Fermor S. Cannon, Indianapolis, also a member of the Advisory Committee of the State Building Council, the reasons for putting certain restrictions on building operations, as practiced today, was stressed upon. Originally people built much as they pleased but as populations have grown, expanded and continued to do so attention finally has been drawn to the common interest involved. Property rights and respect for the neighbors rights must now be considered a situation that has developed a regard for their safety, sanitation methods, and protected values, all of which have brought into play the planning and zoning moves which greatly affect building operations. Also the fire hazzards and factors of safety must be considered. In these increased demands and requirements as they effect building construction, structural requirements had to be reckoned with, and to obviate mounting costs without sacrificing safety the effort is being made to minimize and standardize requirements, not to work hardships on, but to aid the prospective builder. Under the present scheme it is hoped, said Mr. Cannon, to reach a flexibility in building codes that will prevent them from becoming obsolete. It is a big task and in the development of the scheme those engaged in the work are always open to suggestions and no effort is being made to rush the work through hate, which might cause regret later on.

Adjournment was then taken till 10 a. m. Wednesday, Jan. 28.

**Evening Entertainment**

That evening the delegates were the guests of the Builders and Manufacturers' Mutual Casualty Co., Chicago, who gave a 6:30 p. m., dinner in the Riley

## A REAL TREAT IN STORE FOR ARCHITECTS AT THE SEMI-ANNUAL MEETING

### Fine Program Offered

Everything is in readiness for what promises to be the best meeting ever held by the Indiana Society of Architects, when the members gather in Indianapolis, Friday, Feb. 6, for the semi-annual session of the organization. President Walter Scholer, Secy., Merritt Harrison, Treas., L. A. Turnock, Kurt Vonnegut Chairmen, of the Pageants and Exhibit Committee, and the Entertainment Committee have spent much time, off and on, for the past few weeks in forming plans for the approaching event which, now completed, stands out as the most elaborate ever prepared for a state achitects' gathering, and this assertion is made with the feeling of assurance that when all is over such will be the general verdict of those who attend.

An especial effort has been made to secure speakers who will have pertinent messages along architectural and current business lines, also a toastmaster of repute has accepted that office for the evening banquet who is a gifted speaker and is sure to add much to the evening's pleasure. Among those who have accepted invitations to appear for talks before the architects are: Dr. G. I. Christie, Director, Department of Agricultural Extension, Purdue University, Lafayette, Ind., Architect Irving K. Pond, Chicago, Past President A. I. A., J. Arthur MacLean, Director, John Herron Art Institute, Indianapolis, Z. M. Smith, State Department of Education, Indianapolis, Leonardo De Vinci, and there is also a possibility that Fredrick Law Olmstead, Boston, Mass., one of the most noted landscape architects in the country may be present.

There also will be a musical program by Lillian Hueslein and Hazel Silvey with an added attraction—a playlet, "The Pallbearers," arranged by Tom Hibben and put on by members of the Indianapolis Architectural Club.

The official program as announced will be as follows:

**PROGRAM**

**Friday, February 6, 1925**
Indianapolis Athletic Club
Fifth Floor

11:00 a. m.—Meeting of Board of Directors—Parlor B

12:30 noon—Luncheon—Parlors C & D

2:00 p. m.—Business Session—Parlors, B, C and D

Subjects:

Report of Committees:

Legislative program.

Business relationships.

"Schools"—Plans, locations, best manner for selection of the architect.—Z. M. Smith, State Department of Education.

General Discussion.

**Stag Banquet**
Indianapolis Athletic Club
Fifth Floor—Parlor A
Six-Thirty O'cloock

Introduction:
Walter Scholer, President, Indiana Society of Architects.

Toastmaster:
Leonardo De Vinci.

Music:
Arranged by Lillian Hueslein and Hazel Silvey.

"Building With Art"
J. Arthur MacLean, Director, The John Herron Art Institute, Indianapolis.

"Building Communities"
Professor G. I. Christie, Director Department of Agricultural Extension, Purdue University, Lafayette.

"Toast to the Architectural Draftsmen"
Alfred Grindle.

Response by Members of the Architectural Club.

Stunt—"The Pall Bearers"
Arranged by Tom Hibben.

**Saturday, February 7, 1925**

10:00 a. m.—Viewing Architectural Exhibit at The John Herron Art Institute and Awarding of Prizes.

12:30 noon—Honorary Luncheon, Indianapolis Athletic Club Main Dining Room.

## FORMER MEMBER OF THE I. S. A. ANSWERS LAST SUMMONS

### W. H. MacLucas, Indianapolis Stricken This Week

The architectural profession suffered a distinct loss this week with the passing of W. H. MasLucas, Indianapolis. For quite a few years he was an active worker in the Indiana Society of Architects, particularly in regard to the Annual Architectural Exhibit, he being enthusiastic on that score and serving several seasons on the Exhibit Committee.

"Mac" as he was familiarly known was born in Scotland, received his early training in architecture at Edinburg then in England. He was in love with his chosen profession, was artistic and most thorough.

He came to Indianapolis about 12 years ago and was a member of the firm of George, MacLucas and Fitton. Later there was a dissolution and the firm name was changed to George & MacLucas. About a year ago Mr. Mac Lucas' health failed and he gave up active practice in an endeavor to recover. Only recently he decided to return to Scotland when he was suddenly stricken again and death came Wednesday, Jan. 28 at noon. Funeral services were held from his late home on Washington Blvd., Friday afternoon, interment following at Crown Hill Cemetery.

# Build with the Builders

"The builders . . . . . are insuring their liability in their own company, a trade mutual---a company that has enviably succeeded in every factor involved in carrying out principles of compensation insurance. This company is the

## Builders & Manufacturers Mutual Casualty Company

ORGANIZATION AND CURRENT NEWS

Room at the Claypool Hotel. This was a fine affair to which members of the State Legislature, architects, engineers and material men were also invited resulting in a grand gathering of some four hundred who greatly enjoyed an elegant dinner, a superb musical program and unusually interesting speeches.

**Other Conventions' Delegates Sit in With A. B. C., to Hear Attorney H. A. Fenton in Talk on Indiana Building Laws**

Wednesday morning upon reconvening, the A. B. C., had as its guests the delegates to the conventions of the Sheet Metal Contractors of Indiana and Painters and Decorators' Association of Indiana, who came over to the Claypool to be addressed by Attorney Harry A. Fenton, Indianapolis, who spoke on, "The Building Laws of the State." In opening he said, those engaged in the building business should all move along in harmony and inculcate in their ranks the spirit of sympathy that would arise at all times to help each other along. Such action would establish a unity and solidarity nothing could break. Each craft it is true is individual and has peculiarities of its own, but, after all the crafts are primarily interested in the one big thing, the welfare of the building industry. Trouble in one craft affects the others, and when one ceases to function the others must stop, too. Hence all crafts should play in harmony for, discord here is like that in music, it ruins everything. The way out is a compact business organization through which to work, wipe out prejudices, unite in the common effort and concert and conserve strength.

Mr. Fenton then called attention to the various laws on the statute books that offer protection to the builders laws which many of them fail to realize and as a result learn to their sorrow that their ignorance has cost them dearly. He went into a most thorough reference to such laws and commented on each while the builders sat transfixed, seemingly surprised at the wealth of information that came their way. He touched upon the legal apprentice provisions, the lien law, the compensation law, the waiver of lien, arbitration and a host of other statutes in a most enlightening, interesting, manner. It was the finest, most valuable, and instructive dissertation ever delivered at an A. B. C. Convention and when completed had aroused all those present to a determination to move carefully past themselves in legal lore hereafter.

**Reports and Resolutions**

J. H. Owens, field representative of the A. B. C., followed Mr. Fenton with an instructive report on the association's activities for the past year.

A report was then called for from the credentials committee who reported in twenty cities represented by accredited delegates.

Resolutions were next introduced and adopted as follows:

WHEREAS, the District Meetings, held the past year throughout the State have been held so that only a few could attend,

BE IT RESOLVED, that the territory covered by the State A. B. C., be divided into three districts, i. e., Northern, Central and Southern.

All meetings to be called by the State A. B. C., Secretary, and at the pleasure of the cities represented in the respective districts; Northern—East Chicago, Ft. Wayne, Gary, Hammond, Indiana Harbor and South Bend. Central—Aderson, Kokomo, Lafayette, Marion, Muncie and Peru. Southern—Indianapolis, Evansville, Terre Haute and Vincennes, and

BE IT FURTHER RESOLVED, that a semi-annual State meeting be held, not later than August 1st., at Indianapolis. This meeting to include the wives, daughters and sweethearts of the members of this Association.

WHEREAS, the Resolution Committee finds that the names of some members of the State A. B. C., have been omitted from the membership list,

BE IT RESOLVED, that the State A. B. C., secretary correct the membership to include all members in good standing.

WHEREAS, the Builders and Manufacturers Mutual Casualty Company, Chicago, Ill., made it possible for the members of the convention to have a most pleasant evening, Jan. 27th., as the guests of the above company, there being an elegant dinner, fine speeches, and glorious music in the Riley Room at the Claypool Hotel,

BE IT RESOLVED, that the State A. B. C., extends, to the said company, its most hearty thanks and sincere appreciation, and

BE IT FURTHER RESOLVED, that the A. B. C., also extend its thanks to Rev. Ralph R. Austin and James M. Ogden, who aided in the convention.

WHEREAS, during the past year the A. B. C., of Indiana has lost certain members through death, and

WHEREAS, we feel keenly the loss of these members from our association,

BE IT RESOLVED, that the Associated Building Contractors of Indiana, in the seventh annual convention assembled at Indianapolis, Ind., this 29th., day of January, 1925, pause in the deliberations for the moment to pay silent tribute and respect to the memory of the following deceased members:

Louis T. Dorste, plumbing and heating contractor, Anderson. Ind.

Wm. P. Jungclaus, general contractor, charter member of the first contractors association of Indianapolis, and the oldest member of the A. B. C., of Indiana.

Max Schumacher, general contractor, Indianapolis, Ind.

Joseph Schiminsky, general contractor, Michigan City, Ind.

William Kalter, mason contractor, South Bend, Ind.

Joe Luther, plumbing contractor, South Bend, Ind.

E. Dunning, roofing contractor, Terre Haute, Ind.

E. J. Workman, general contractor, Terre Haute, Ind.

**Election of Officers**

Followed preparations for the annual election of officers upon the report of the nominating committee. This feature, when the vote was counted revealed this result:

President—Max Irmscher, Ft. Wayne.

1st Vice-Pres.—A. E. Kemmer, Lafayette.

2nd Vice-Pres.—O. A. Toelle, Terre Haute.

3rd Vice-Pres.—John F. Rahn, East Chicago.

Secretary—C. C. Pierson, Indianapolis.

Field Rep.—J. H. Owens, Indianapolis.

Genl. Counsel—H. A. Fenton, Indianapolis.

The executive board will be appointed later by the president.

**Standardization As Means to Eliminate Waste in Industry Discussed**

An added feature on the program was an address by E. W. McCullough, Indianapolis, Third District Governor of the American Engineering Council, who spoke on, "The Elimination of Waste in Industry," and by the use of charts showed how, through standardization, many useless sizes in various materials all along the line of industry had been elminiated thus speeding up production and bringing about a great financial saving. For instance in the item of lumber $100,000 was spent in standardization of sizes and though only put into effect in June of this year, a saving of $600,000,000 has been effected to date. At the conclusion of Mr. McCullough's talk this resolution was introduced and adopted:

Whereas, it has been demonstrated to this convention that the effort of the American Engineering Council has done much to eliminate waste in all lines of industry and is bent on continuing that effort.

BE IT RESOLVED, that the Associated Building Contractors of Indiana endorse the work of the above council to standardize materials and that every effort be extended by the A. B. C., of Indiana, to co-operate in such work whenever possible.

Just before final adjournment the delegates selected Terre Haute as the site for the 1926 convention.

Among those present were: Blythe Johnson, Wm. E. Thompson & Son, Anderson; H. H. Achemeier, Auburn; A. A. Gill Colfax;John F. Rahn, East Chicago; William Abeler, Evansville; W. R. Dunkin, Flora; O. C. Filler, Fred Grote, Otto Gumpper, W. G. Harrod, H. A. Hattersley, Henry Hockmeyer, E. F. Irmscher, Max Irmscher, J. C. Kreidt, James McMullen, W. S. Sams, O. R. Sauer, G. W. Schack, W. P. Schenkel, W. A. Sheets, H. Wehrenburg, Jr., Paul Wehrenburg, Albert Weinmann, C. R. Wermuth, all of Ft. Wayne; E. W. Schroeder, L. B. Snowden, Gary; E. E. Cole, Hammond; Roy C. Clark, James Johnson, H. B. Olney, Indiana Harbor; Arthur Braun, Sr., Fred W. Jungclaus, H. G. Maas, C. C. Major, O. B. Morgan, Frank O'Toole, J. C. Rybolt, Paul Striebeck, Walter Wise, Indianapolis; E. L. Danner, G. O. Simpson, Charles Ulsafor, kokomo; S. A. P. Boyer, S. A. Bylsma, George E. Dahm, Jacob Evans, A. E. Kemmer, Lafayette; L. E. Wickersham, Logansport; J. G. Blank, H. H. Herbert, Henry Koelln, L. O. Ludwick, Vincent Milcark, Michigan City; Jerry Gallivan, L. M. Glass, Charles Morrow, H. K. Nicewoener, C. A. Rowe, Muncie; E. V. Trautman, Peru; William Toelle, Princeton; W. R. Bergman, G. F. Brill, F. A. Burget, Wm. Caton, A. W. Dudley, J. F. Joslin, Nofke Bros., F. T. Ransham, Louis Roehm, O. A. Toelle, G. Vollmuth, A. J. Weinhart, Terre Haute; H. G. Christman, H. E. Fassnacht, W. O. Fassnacht, T. L. Hickey, E. H. Hyman, C. P. Lupton, South Bend; R. M. Cannon, J. A. Keller, S. L. Kirk, Henry Knauth, Albert Schnuck, Vincennes. Also many delegates who were in the city attending the Sheet Metal Contractors of Indiana convention, and those from the convention of the Indiana Painters and Decorators' Association, who attended the A. B. C., gathering the second day to hear Attorney Harry Fenton, Indianapolis, who addressed the assembled builders jointly.

## A BANQUET HARD TO EXCEL

**Builders and Manufacturers Mutual Casualty Co., Royally Entertains Convention Visitors**

One of the most enjoyable social functions that has ever marked an A. B. C. of Indiana convention took place at Indianapolis the evening of Jan. 27, when the Builders and Manufacturers Mutual Casualty Co., of Chicago, played host to Indiana building men, puting on a delightful banquet and entertainment for the delegates to the convention, the builders, engineers and architects. Also there were quite a few of the state legislature present, both senators and representatives. More than four hundred were seated around the tables when the orchestra began with its contribution to the evening's program.

There was an enthusiastic atmosphere of good fellowship that cropped out early and expanded to all parts of the banquet hall as the hours progressed, aided and abeted by a delectable menu.

Dr. W. F. King, well known to Indiana building men, acted as toastmaster adding to the evening's pleasure. Andrew Lanquist, Chicago, President of the Builders and Manufacturers Mutual Casualty Co., when called upon recounted the experiences of himself and other contractors some years ago with compensation and liability insurance companies and the increasing premium rates that confronted them. When they could get no relief from the considered unjust rates they banded together and organized their own insurance company which, tho forced to battle for existence, finally triumphed as is attested by the yearly in Indiana, Illinois, Iowa and Michigan. Mr. H. B. Barnard, Vice President of the B. & M., also spoke and paid a glowing tribute to Mr. Lanquist whom he styled the "Daddy of Workmen's Compensation." Lieutenant Governor Harold Van Orman, Evansville, arose from a sick bed to fulfill his part on the program and made one of his inimitable speeches that at times convulsed his auditors with laughter. Speaker of the Indiana House of Representatives Harry Leslie, of Lake County, was also on for a talk and brightened up the crowd with some subtle wit. Other speakers were Dixon H. Bynum, chairman of the State Industrial Board, Newman T. Miller, State Fire Marshall, and S. W. Kimball, Grand Rapids, Mich., treasurer of the Associated Building Employers of Michigan.

Last, but not least, in fact it was of more than extraordinary merit, was the musical program rendered by the Chicago Concert Company, a mixed quartet. The voices were of superb quality, the selections were well chosen, the solo and duet numbers beautiful, while in quartet the harmony was most pleasing, all of which went to make up an evening of music long to be remembered.

## TEXAS CONTRACTORS TIRE OF JURISDICTIONAL DISPUTE DELAYS

**Also Take a Rap At Sympathetic Strikes**

Construction work hereafter in Houston, Texas, will proceed regardless of whether it is done by union or non-union men, according to a statement recently issued by the Board of Directors of the Associated General Contractors of America, Houston Chapter. The report states that during the last five weeks work has been tied up on account of jurisdictional disputes between the trades and that for the past twelve months numerous strikes have been called for the same reason. Relative to the question of collective bargaining, the report says, "We have no objection to collective bargaining or to working a craft intact upon a specific job, but we do object to and will countenance no further sympathetic strikes and affiliations which serve no purpose except one of discort and controversy. We expect in the future to man our jobs as we see fit, taking into consideration the economic feature and the time phase."

## AN AWAKENING COMING

Some fellows have an odd way of figuring; they seem to be imbued with the idea that the higher the wages paid the greater chance for profit. All dumb-bells are not found in gymnasiums. Where will the profits be when Mr. Public decides he can't afford to build at the high wage level, and concludes to get along somehow in the old homestead instead of in the contemplated new house?

### EVANSVILLE

***Hospital:** $100,000.00, "Boehne Camp Tuberculosis Hospital." Archt. Shopbell, Fowler and Thole, Furniture Bldg. Owner, Board of County Commissioners, Samuel Bell, Auditor, Court House. Bids close February 19th., at 10:00 a. m. Brick.

# Sealed Proposals

**SCHOOL HOUSE**
**NOTICE TO CONTRACTORS**

Notice is hereby given that the Trustee and Advisory Board of Bethlehem School Township, Cass County, Indiana, will receive sealed bids at the present school building in the Village of Metea, Bethlehem Township, Cass County, Indiana, up to 12:00 o'clock noon on Tuesday, the 10th day of February, 1925, for the furnishing of all material and performing all labor for the construction and completion of the addition to and the remodeling of the school biulding at the Village of Metea, in said Bethlehem Township.

Such work will be under the plans and specifications heretofore approved and now on file in the office of the State Board of Accounts of the State of Indiana, and the office of the State of Indiana, and the office of the undersigned Trustee, and in the office of the Architects, Henkel & Hanson, 108 Heinemann Building, Connersville, Indiana.

Copies of plans and specifications will be furnished any contractor applying for same on deposit of the sum of $15.00 to be held in escrow for the return of said plans and specifications to the architect on or before seven days after the opening of the bids, after which date all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on forms 96 bidding blanks. Each bid shall be accompanied by certified check upon a solvent bank, made payable to Guy Smith, Trustee, in the amount of not less than three per cent of the total amount of their bid, tendered as a guarantee that the bidder will, if awarded contract, enter into a bona fide agreement with the said school township of Bethlehem for the contract, and furnish su....cient bond equal to one hundred per cent (100%) of the contract price.

If, for any reason whatsoever, the bidder shall fail to enter into proper agreement or fail to execute a proper bond, the full amount of the certified check shall be retained by the school township as liquidated damages. The estimated cost of the building complete is $44,000.00.

The undersigned Trustee and Advisory Board reserves the right to reject any and all bids, and waive any defects or informality, if deemed in the interest of said Bethlehem School Township.

The certified check to be deposited by bidders must be drawn upon a bank doing business in the State of Indiana. The surety upon the bond of the successful contractor must be satisfactory to the Trustee and Advisory Board.

Signed and dated at Logansport, Indiana, this 8th day of January, 1925.

## BIG CROWD OF STATE ARCHITECTS EXPECTED IN INDIANAPOLIS FRIDAY AND SATURDAY

### Indiana Society of Architects to Hold Semi Annual Meeting

The latest indications at press time, according to Secretary Merritt Harrison of the Indiana Society of Architects, were that there would be a large representation of state architects in Indianapolis, Friday and Saturday, to attend the mid-winter, semi-annual, meeting of the Society to be held at the Capital City. The hope for a good crowd was based on the gratifying response, in the form of the acceptances that came in from the architects all over the state, many of them returning the post cards mailed to them for that purpose.

Plans, upon which the various committees worked, shaped upon quite an elaborate scale, called for several sessions both business and social, and covered practically the whole of Friday from 10 a. m., on into the night. In casting about for a meeting place the Society was fortunate in again securing accommodations at the beautiful Indianapolis Athletic Club where the appointments are perfect for such a meeting, the architectural atmosphere being in harmony with the tastes of those attending while the general assembly rooms are commodious and obviate crowding or discomfiture.

A meeting of the board of directors was held at 11 a. m., with a luncheon for all delegates at 12:30 p. m. Then at 2 p. m., President Walter Scholer called the regular business meeting to order. In the evening, beginning at 6:30 p. m., there was a banquet, entertainment and speeches.

Since Purdue University has officially recognized the Indiana Society of Architects it is most fitting that Prof. G. I. Christie, Director of the Agriculatural Extension Department of that institution, was scheduled for a talk, his subject being "Building Communities." While Dr. Christie is connected with the agricultural work of Purdue he never forgets the relation of the industry of agriculture to business in general and this is the main idea underlying his remarks, the result being a most interesting dissertation that gives the auditor a new view point, or at least recalls considerations most folks are prone to overlook or neglect.

Then, too, J. Arthur MacLean, Director of the John Herron Art Institute who has shown such a sincere interest in the Architectural Exhibits of Indiana Architects, encourages art in building without a sacrifice of the utilitarian motif, graciously accepted an invitation to address the architects. His talks are always most timely, instructive and entertaining. Architect Irving K. Pond, Chicago former president of the A. I. A., also was present and addressed the members of the profession.

So much for the more serious phase of the meeting. Variety is the spice of life and believing in that the committee on entertainment proceeded to arrange a program accordingly. There was music, both instrumental and vocal and an assortment of stunts that added much to the evenings enjoyment.

On Saturday the architects will go to the Art Institute and there formally open the annual Architectural Exhibit. The members of the profession after viewing the individual exhibits will then vote on the one which in their opinion has the most architectural merit and an honorary dinner will be given for the architect who was voted the $50.00 prize that is awarded by the Society.

## INDIANA CHAPTER A. I. A., MEETS IN SEMI-ANNUAL SESSION

### Past President I. K. Pond of Chicago Is Guest of Honor

The regular semi-annual meeting of the Indiana Chapter, American Institute of Architects, was held at the University Club, Indianapolis, Thursday evening, Feb. 5, many of the members responding to the roll call. The meeting was ushered in by a 6:30 p. m., dinner at which Architect Irving K. Pond, Chicago, ex-president of the American Institute of Architects was the guest of honor. After the dinner a general routine business session was held.

## ANENT THE SMALL HOUSE

### Instructor In Architecture In Large Eastern Institution Believes That American Small Homes Are Best

Recently in discussing "The Development of the Small House," Henry Hornbostle, well-known architect and professor of Architecture at Carnegie Institute of Technology, Pittsburgh, Pa., made some very pertinent points which are doubly interesting since there is so much small home building being done at this time.

He dealt with, among other things, the prejudices that persist, the pretenses and conventionalities that sway the judgment of the builders of small houses.

Despite many of the bad habits still obtaining in the architecture of small houses, he stated that he believed "we today in this country have better taste in the building of small houses than that manifested by any other country.'

ORGANIZATION AND CURRENT NEWS

## INDIANA TO PROFIT BY PROPOSED BUILDING PROGRAM OF THE GOVERNMENT

### Eight Cities of the State In Line For Postoffice Improvements

An extension and remodeling of the Federal Building in Hammond to cost $200,000, previously recommended because of pressing need by the secretary of the treasury and the postmaster-general, will be obtained under the bill of Representative Richard N. Elliott of the sixth Indiana district, which has been placed on the legislative program of the present session. The bill has been approved by President Coolidge, Andrew W. Mellon, secretary of the treasury; Herbert M. Lord, director of the budget; the house committee on public buildings, and the steering committee of the house.

Other improvements in Indiana previously urged along with the one for Hammond are: Fort Wayne, new site and building, $1,000,000; Kokomo, extension and remodeling, $95,000; Logansport, extension and remodeling, $125,000; Muncie, extension and remodeling, $130,000; South Bend, new site and building, $675,000; Terre Haute, additional land and new building on present site, $385,000; Vincennes, additional land and extension and remodeling, $150,000.

Rep. Elliott's bill, which would authorize the expenditure over a period of six years of $150,000,000 for public buildings, contemplates a new principle of public building legislation in that it takes away from the congress the authority it always has exercised of designating the places where improvements shall be made and the amount to be spent in each place.

Passage of the bill, which now is forseen, will mark the end of omnibus building legislation, it is predicted, and make forever impossible enactment of another "pork barrel" building measure designed to meet the wishes of each individual member of the congress.

The secretary of the treasury and the postmaster-general, acting with the advice and consent of the director of the budget, hereafter will prepare building programs to cost not more than $25,000,000 a year.

## WAGE OUTLOOK FOR 1925

### Scale Increase Demands Begin to Bob Up

It is perhaps a little too early in the season to present an accurate picture of the wage demands for 1925, but a brief review of conditions in a few key cities may not be out of place at this time. All of the agreements in New York run until December 31, 1925. However, a strike of wire lathers foremen for $75 a week of forty-four hours, a raise of $12.50 over their present wages, is regarded by some of the employers as an opening wedge. Iron workers, carpenters and laborers in Chicago are asking for increases in accordance with a clause in the general agreement which stipulates that demands must be presented prior to February 1st. In Cleveland the plasterers and lathers are demanding $1.75 an hour and the forty-hour week. The painters have made a demand for $1.50 and the five-day week. A thirteen months' agreement has been negotiated in Cincinnati, effective February 23, at the 1924 rate. A new agreement with the plumbers in Pittsburgh was signed recently at $1.43¾ to run until June 1, 1927. Several other trades in that city have made known their demands, among them being the iron workers, present rate $1.25, demanding $1.50; hod carriers, present rate $1.00, demanding $1.25; laborers, present rate 70 cents, demanding $1.00. In Kansas City the hoisting engineers are asking an increase of twenty-five cents an hour over their present rate of $1.12½ and the lathers are asking the same amount over their present rate of $1.25. Bricklayers in Nashville, Tenn., were granted an increase of $1 a day over their old rate of $11 on January 1st. (Bulletin National Association of Bldg. Trades Employers.)

## NEXT MEETING OF NATIONAL JURISDICTIONAL AWARDS BOARD TO BE HELD IN MARCH

### Labor to Have New Representatives On the Board

The next meeting of the National Board for Jurisdictional Awards will be held in Washington beginning March 9th. Labor will be represented on the Board by two new delegates to take the places of Geo. F. Hedrick, newly elected president of the Building Trades Department, and Thomas R. Preece, former vice-president of the Bricklayers, Masons and Plasterers International Union. The place vacated by Mr. Hedrick will be taken by J. P. Noonan, president of the International Brotherhood of Electrical Workers, while that of Mr. Preece will be filled by Walter Price of the Bricklayers. The resignation of W. J. Spencer as secretary of the board was tendered at the last meeting but action on same will be deferred until the next session.

## WAS REALLY A FINE BUILDING YEAR

### New York Did 36% of the Country's Entire Building Volume

Official building permit figures for 1924 from 343 comparable cities show a total of $3,630,258,649. The gain over 1923 in the cities reporting was 4 per

cent which may be taken to represent the percentage of gain for the entire country.

Since the close of 1923, the greater activity has shifted location. In 1923 the larger gains were in the Central and Pacific West. In 1924 these sections lost and the gains in the East and South prevented the country as a whole from showing a loss from 1923.

New York heads the list of cities with a total for the year of $843,270,328 or 36 per cent of the total for the entire country. Chicago had a loss of about 10 per cent for the year. Detroit gained third place over Los Angeles with a gain over 1923 of 23 per cent. Although Philadelphia had a remarkable gain of 16 per cent it failed to get fourth place away from Los Angeles. Of the other cities in the first ten San Francisco, Boston and Baltimore show gains over 1923 while Cleveland and Washington show losses.

## BRICKLAYER PRODUCTION ON THE INCREASE ACCORDING TO GOVERNMENT SURVEY

### Birmingham Craftsmen Are Speediest

According to the Monthly Labor Review, issued by the United States Department of Labor, the bricklayer production in this country is higher than at any time since the introduction of ornamental bonds and joints demanded in modern brickwork.

Ethelbert Stewart, Commissioner of the Bureau of Labor Statistics, Washington, directed recently an investigation of labor productivity and costs in certain building trades in fifteen typical cities. He found Birmingham bricklayers at the top in production and those in Indianapolis at the bottom. The average number of brick laid a man an eight-hour day in the fifteen cities is 1,364. In all except three cities, Boston, Philadelphia and Indianapolis, the production of the bricklayer is far above 1,000 a day. In Birmingham, the average bricklayer places 1,928 bricks in the wall a working day.

## AGITATION TO LICENSE CONTRACTORS BREAKS OUT ON THE WEST COAST

### State Rather Than City Control Favored

Here and there about the country the proposition to license building contractors is continually being advanced though nothing of a definite nature has so far been accomplished. In Illinois the matter has been brought to the attention of the Associated Building Contractors several times and even in Indiana it has been mentioned now and then when contractors have met though it has never been officially introduced or endorsed by any of the associations. Michigan, Iowa, Missouri, Ohio and the East have also heard the subject broached.

And now it seems the idea has percolated to the western coast where the Los Angeles contractors have taken it up. The Express of that city recently printed the following editorial comment on the matter:

"With the difference only that they favor state instead of municipal control, Los Angeles contractors, for whom the Southern California Chapter of the Associated General Contractors of America is spokesman, give unreserved support to the recommendation of the State Department of Labor that all building constructors be licensed. They see in this proposed innovation a means of ridding the building industry of the irresponsible 'fly-by-night' contractors who prey upon the innocent, their victims in most cases being home builders whose entire resources, their life earnings, often are lost.

"Through their association, the Los Angeles Building Exchange, a way to balk the dishonest and irresponsible contractor long has been sought. It is felt that the Labor Commissioner has furnished the key. The Labor Commissioner, however, asked only for a city ordinance—to secure quicker action—while the constructors hold that it would be better to wait, and bring the matter before the next legislature and secure if possible, the enactment of a state law to establish a building or commission which would examine as to responsibility. Those men who could prove satisfactorily their ability and integrity would be licensed, and others who could not would be forbidden to engage in building contracting.

The contractors' seems the better way to proceed, but, in either event, there would be advantage to home builders, and that is what is sought."

# Calumet District

## JOLT GIVEN TO ADVOCATES OF THE SEPARATE AWARDING OF CONTRACTS

### However, It Is Up to the General Contractors to Invite More Harmonious Relationships With Sub-Contractors

Closely related to the "day-labor" problem is the move that has been made by various organizations of sub-contractors, and certain individuals engaged in private design, or employed in public construction departments, to dispense with the general contractor by awarding separate contracts for various subdivisions of the work. Here is a situation in which the managerial function of the general contractor is either misunderstood or willfully rejected by self-interested individuals who would gain their own ends. These parties have even gone so far as to attempt to force the issue through legislation. However, the attempt to fasten the separate contracts scheme upon the Federal Government, through the Inter-departmental Board of Contracts and Adjustments, has failed completely.

The above board, after long hearings granted to both general and subcontractors, with consequent studious deliberations, rendered a decision against the proposed separate contract plan. The ruling of the board was based purely upon the economic problem involved as brought out by the evidence submitted and should impress upon the building public the value of the function as performed by the general contractor, also it should tend to stress the fallacy of the system, that would eliminate the general contractor, the general manager or overseer on the job.

One important phase of the situation not to be overlooked is the fact that in many cases the actions of the subcontract proponents have been due to the abuses that irresponsible contractors have resorted to, or due to sharp business practices perpetrated by the owner or his representatives upon the general

contractor who in turn, because he was not morally strong enough, passed the buck on onto his sub-contractors.

Too much emphasis can not be put upon the idea that contractors, particularly general contractors, must exert increased effort to establish sound business practices and ethics amongst themselves and insist on such conduct from owners and their representatives. Also every effort should be made to establish the best of relationships between the general contractors and the sub-contractors.

When associations have the ability, through actual, sincere, co-operation, to establish a high standard code of business practice amongst members and the moral strength to enforce an observation of such practice then and not till then will their real mission be on the way to attainment. It is all right to prate about co-operation, but unless much of the selfishness that causes breaches in the ranks is stifled, eliminated for the good of the industry, association effort is bound to be in vain to a great extent. High business ethics will build faith, and faith alone can inspire real co-operation that will remove just such action as referred to relative to the separate awarding of contracts.

## PLENTY OF FLAT BUILDINGS BUT SHORT ON RESIDENCES

### Report of Chicago Real Estate Board on Housing Indicates Lessened Apartment House Construction This Season

It would not be surprising to see a slackening up of extensive flat building operations in Chicago this season for the simple reason that a survey by the Real Estate Board, just completed relative to housing conditions, shows that the city is heavily overbuilt with apartment structures. Also the report indicates that office buildings are ahead of the demand, a situation that will probably curtail effort in that direction.

However, there seems to be a lack of single residences of a moderate class for which there is a strong demand. This will probably cause a new activity of small home building.

## WILL THEY CONTINUE TO DRIVE FOLKS AWAY FROM INDIANA?

### They Have Done It Before

Not long ago a little habitation sprang up near Hammond just across the state line over in Illinois, a place known as Calumet City. During the past year a thousand or more people have moved from Indiana over to that little city and built homes to get away from ever increasing taxes in Indiana. But what do taxes mean to a legislator if he can get a bill put through with his name on it as the sponsor? They say the festive members of the House and Senate, now in session at Indianapolis, are proposing other "big" moves that may further in the long run add some more to the tax duplicate. Sometimes we wonder if the politicians are as free with their own money as they are with the public's.

## A PROSPECTOR DROPS IN FROM CANADA

### Really the Climate of Hammond Must Have Seemed Balmy

A stranger dropped into B. T. E. A. headquarters at Hammond the other day who proved to be E. J. Lindskog, general contratcor of Viscount, Saskatchawan, Canada. He said he was looking over various localities in the U. S. A. with the intention of locating in this country. He expressed a favorable impression of the Calumet District with its evident industrial activity. He said when he left his home city it was a little too cold for outside work, the thermometer registering 44 degrees below zero.

## ONE OF LIFE'S DARKEST MOMENTS

### An Eclipse That Was Eclipsed

No matter what the event, where the place, or what the date disappointment is liable to crop out regardless of preparations. Only recently many of the Calumet District had just such an experience. Much glass was smoked, and everybody got up early to watch the eclipse of the sun only to find great cloud banks overcasting the sky, and so the great phenomenon came and went, and, as none of us had aeroplanes, we got gyped. Well, here's hoping 200 years hence the sky will be clear in the Calumet region when the moon cuts in again between the earth and the sun.

## CALUMET BUILDING PROGRESS

Excavation work is offering its hardships these days with quite a layer of frost-laden ground to be dug through. General Contractor Rufus Danner found the going a bit slow recently when he started the new building for the Central Realty Co. at Hohman and Douglas streets. The ground was frozen to a depth of from 18 to 20 inches.

They are rapidly shooting up the steel frame structure for the new ten-story bank and office building. The whistle and puffing of the hoisting engine and the constant tattoo of the riveters proclaims the activity that is animating the scene.

Architect Mac Turner, Hammond, is receiving bids on a one-story garage, 56x160, in Morton Court, for the Rimbach Estate. He is also ready for bids on a similar structure, 90x123, for Otto Morebeck.

E. E. COLE.

# INDIANAPOLIS

## WELL KNOWN INDIANA ELEVATOR MANUFACTURER FATALLY STRICKEN

### President of Reedy Elevator Co. Dies While on Business Mission at Lafayette

Daniel V. Reedy president and founder of the D. V. Reedy Elevator Company, Indianapolis, died suddenly, Feb. 4, at Lafayette, Ind., a short time after he was stricken with heart disease while boarding a traction car. When his condition was noticed by other passengers

aid was summoned and he was rushed to St. Elizabeth's Hospital, where he died shortly after arrival.

The deceased was born in Cincinnati, O., June 6, 1870, and moved to Indianapolis in 1898, at which time he founded the elevator company that bears his name. He came from a long line of manufacturers of freight and passenger elevators. His father headed a large elevator company in Cincinnati, which is now operated by one of his brothers while another brother is at the head of a similar plant in Chicago.

## FT. WAYNE

### MASON CONTRACTORS GET SET FOR A BUSY SEASON

#### Annual Election Held

There is one craft organization in Ft. Wayne that is on the job all the time and, because of the solidarity in the ranks of the Mason Contractors Association, the members are always assured of the best sort of working conditions and experience, the minimum of trouble in the operation of their various jobs. It is this sort of co-operation and unity that counts and other contractors could well seek to effect into their associations the esprit de corps of which the masons are possessed.

Looking forward to another good building year in Ft. Wayne the local Mason Contractors' Association has cleared the decks for action in 1925 and at an election Monday, February 2, elected the following officers as helmsmen:

# These Lumber Firms

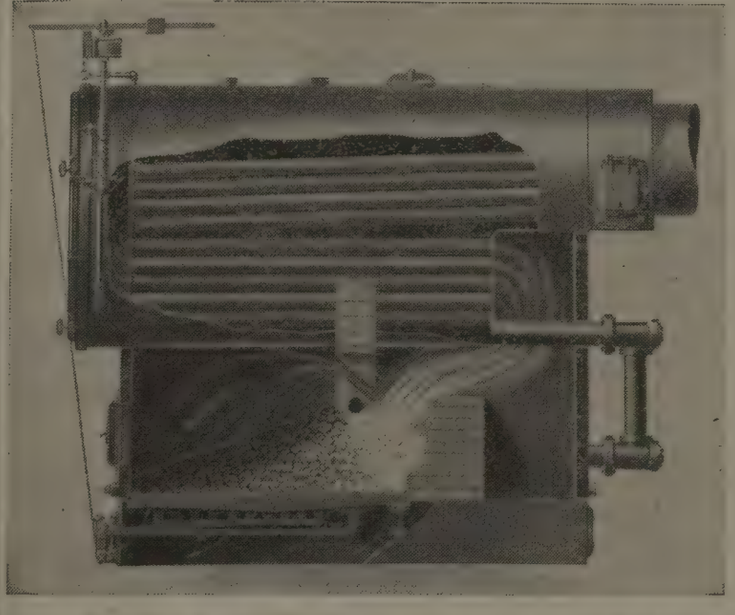
## JANUARY BUILDING FIGURES SHOW IMPROVEMENT OVER THOSE FOR JANUARY A YEAR AGO

### Residence Work Accounted For The Bulk of the Volume

Though building prospects in Ft. Wayne are promising for the coming season things have not yet assumed much impetus, but then it is a little early to expect much activity with winter still firmly entrenched in our midst. At that January got away to a better building start than did January last year, a fact that some take as a good omen for what to expect later on.



A feature of the official record from the building inspector's department is that 62.7% of the total permits issued last month were for new residence work, in other words 54 of the 86 permits issued during January were for new homes. The total estimated valuation of the 86 permits granted amounted to $261,767 an increase of 8.3% over the same item recorded for the corresponding period in 1924; also there were 19 more permits issued this January than were taken out a year ago.

## RIVER IMPROVEMENT AT FT. WAYNE, TWO YEARS UNDER CONSTRUCTION, READY FOR FINAL INSPECTION

### Long Under Contemplation Now Has About Reached Maturity

The new dam in the Maumee river at Ft. Wayne is now ready for a trial operation and as soon as the ice clears away in the stream the machinery will be tried out. If found in perfect working order the project will be turned over to the city. When in use the dam will back up the water for a mile in both the St. Marys and St. Joseph rivers from the point of junction where the two form the Maumee river. This improvement has cost $225,000 and two years have been spent in its construction. It is the first step in a program of river redemption and reclamation for Ft. Wayne.

FOR SUPPLYMAN CONTRACTOR

VOL. VI — INDIANAPOLIS, INDIANA, FEBRUARY 14, 1925 — No. 46

## MID-WINTER MEETING OF INDIANA ARCHITECTS DEVELOPS INTO ONE THAT WILL LONG BE REMEMBERED

### Most Excellent Program of Business Matters Dealing With the Profession, Entertainment and Fine Addresses Offered Those of the Profession Who Attended

The one outstanding feature of the mid-winter meeting of the Indiana Society of Architects held at Indianapolis, Feb. 6, was the impression made by the wide field of discussion developed by the program indicating the business function of the Society and extent to which it reaches in arousing interest of the members in the many ramifications that enter into the profession of architecture today, elements that pertain to more than just ethics and professional procedure. This is as it should be for there are influences outside of the profession that affect it and with which the successful architect today must be conversant. As for the professional side of his practice the architect is steeped in that, he has been reared in that atmosphere. There is however, a need for arousing him to the hundred and one things outside the profession that indirectly and directly bear upon his and the general practice; interest in civic moves, public improvements, legal matters, co-operation with other building interests for the good of the building industry, a closer contact with his fellow architects and other matters that are inclined to be neglected because not seemingly deeply involved in the working out of his profession. It is to break down this aloof individualism that has gripped the architect, more or less, that the Indiana Society of Architects seeks to accomplish and is accomplishing as is clearly demonstrated by its gatherings today where architects all over the state meet and prove by their deliberations that the Society effort has not been in vain.

#### Again Gather At the Palatial Home of Indianapolis Athletic Club

The semi-annual meeting at the Indianapolis Athletic Club, opened with a session of the Board of Directors at 10 a. m., at which nothing of import developed, just routine business being transacted.

At noon there was a luncheon in Parlor A, at which some fifty architects assembled, many from other cities besides Indianapolis, and enjoyed social intercourse.

#### Committees Report

President Walter Scholer, Lafayette, called the actual business meeting to order at 2 p. m., extending a welcome to the members of the profession and expressing the appreciation of the officers at the interest and co-operation shown by those present. Reports of the various standing committees were then called for. Geo. Allen, Laporte, Chairman of Membership Committee reported three new members taken in recently, C. L. Troutman, Evansville, D. J. Zimmerman, Indianapolis and Charles T. Freijs, Indiaanpolis, which has brought the enrollment up to 115. Treasurer L. A. Turnock, reported the Society to be in good financial shape with $400.00 in the treasury. Donald Graham, Chairman of the Entertainment Committee referred to the prospective evening program and expressed the hope that it would please the architects during the banquet period. Kurt Vonnegut, Chairman of the Exhibits Committee, referred to the effort put forth by his committee in assembling this year's architectural exhibit, expressed regret that more of the Indiana architects had not seen fit to participate in the affair. He questioned the advisability of continuing the annual exhibit unless all the architects of the state took more interest in it and made it the exhibit it should be. After discussing the matter the members of the Society voted to continue the holding of the exhibit and suggested that all members be notified from time to time, as reminders, about future annual exhibits, a procedure, it was felt, that would stimulate interest.

Mr. Vonnegut, then introduced Architect Irving K. Pond, Chicago, Past President of the American Institute of Architects, who was to act as judge of this year's exhibit and award the $50.00 prize offered by the I. S. of A., for the best exhibit submitted. The matter was also taken up as to whether it would be more appropriate in the future to award a cash prize or a metal medalion or plaque with wording to the effect of what the prize stood for.

#### Attention Directed to Proposed Legislative Matters

Legislative affairs were then taken up and reports submitted by Herbert Foltz, Chairman of the Legislative Committee. He called attention to several Senate and House Bills now before the Legislature for passage, and said that since they bore a relation to the practice or to things in which the profession of architecture was interested the architects should get in touch with their senators or legislators in an endeavor to secure the proper disposal of the proposed bills as architects considered best in serving the public, resolutions were passed condemning the Penrod Bill, and one endorsing the bill providing for the state taking over the Lanier residence near Madison, Ind., a fine example of early Indiana architecture, that it might be preserved to posterity. The Penrod Bill provided, if passed, that the War Memorial buildings could not be built within a block unless entire title to all the land had been secured. This bill was aimed at preventing the Memorial Building from being erected contiguous to the First Baptist and Second Presbyterian Churches now on the Plaza site. The I. S. A., members formerly went on record as opposed to the retention of the churches on the Memorial site and are still of that mind hence their opposition to the Penrod Bill.

While dealing with legislative matters attention was called to the effort exerted by the I. S. of A., in helping to establish the Administration Building Council of Indiana and Architect Fermor Cannon, Indianapolis, Chairman of the Advisory Committee of that body made a comprehensive report on what the Council had done to date. He further announced that an invitation had again been extended by Purdue University to the architects, contractors, engineers and representatives of Building Labor to hold another joint conference for builders next Fall at Lafayette. No action will be taken in this matter until further details are developed.

Announcement was made that the Society had been invited to send a delegate to the A. I. A., convention in New York, April 20, and also one to the regional meeting of the Directors of the A. I. A., at Detroit, Mich., next November. There was considerable discussion on these subjects and it was the sense of those present that since several Indiana Chapter A. I. A. members also belong to the society one of them act as the I. S. A. delegate.

## INDIANAPOLIS

**Old Folks Home:** $35,000.00, 2 sty. & bas. (32 rooms and dining hall 30x100) 20th and Capitol Ave. Archt. William O. Morck, 603 Lombard Building. Owner, Altenheim of Indianapolis, 2007 N. Capitol Ave., Joseph Gardner, Pres. Board of Trustees, 37 Kentucky Ave.; William E. Krieger, Secy., 1402 N. Illinois St. Plans completed. Archt. ready for bids in a few days. Brick veneer over frame, steel basement sash, mosaic floors, asbestos built-up roofing, glass enclosed porches, steam heating plant, boilers, baths and toilets.

**Bank Building:** 1 sty. and bas., 41x80, Wabash, Ind., corner of Market and Wabash Sts. Archt., McGuire and Shook, 320 Indiana Pythian Bldg., Indianapolis. Owner, Wabash National Bank, Thomas W. McNamee, Chmn.; T. F. Vaughn; J. C. Teague, Building Committee, Wabash, Ind. Plans nearing completion. Ready for bids soon. Brick, stone front, complete bank equipment.

**Business Building:** (4 store rooms 1 sty. & bas. 55x75. 10th and Alabama Sts. Archt. N. J. McClure, 404 City Trust Building. Owner, Phillip Deutscher, (Tires), 49 North Capitol Ave. Plans about completed. Archt. ready for bids in a few days. Brick or hollow tile, composition roof, yellow pine floors, plate glass store fronts, hot water heating.

**New Foundry Coke Screening Station, $185,000, and New Coal Handling System, $250,000:** Langsdale Plant, Indianapolis. Owner, The Citizens Gas Co., Clarence Kirk, V. P., Majestic Bldg. Plans in progress, mature this spring.

**Bungalow:** $5,500, private plans. Owner, Fred E. Wagner (barber), 706 East 27th St. Plans in progress, build this spring.

**Church:** $40,000, University Heights, Indianapolis. Archt. (plans will probably be prepared by the United Brethren Headquarters, Dayton, Ohio). Owner, University Heights United Brethren Church, Rev. W. R. Montgomery, Otterbein Ave., University Heights, Indianapolis. Owners financing at present, will mature late this year. Brick, stone trim.

**Church** (seating 300): Lynnhurst Drive and Morris St. Archt. not selected. Owner, Lynnhurst Baptist Church, Rev. C. H. Scheick, Plainfield line, Indianapolis, Rural Route. Contemplated. Probably mature summer. Brick veneer.

**Church:** $25,000. Archt. not selected. Owner, Second Evangelical Church, Rev. J. H. Rilling, pastor, 1045 Church St. Contemplated, probably mature this year. Brick.

**Bridge Paint:** (6,300 gallons). Owner, Indiana State Highway Commission, John D. Williams, director, State House, Indianapolis, receiving bids to close February 24th at 10:00 a. m. on the following: 1,200 gallons of red paint; 2,100 gallons brown paint; 1,800 gallons black paint; 75 gallons black stencil paint; 1,125 gallons white paint.

**Road Supplies:** Board of County Commrs., Harry Dunn, auditor, is receiving bids to close March 6th at 10 A. M. on the following: Sealed bids for free gravel road supplies (pipe, hardware, road oil, cement, asphaltic concrete, gravel, paints, oils and gasoline, crushed stone, road maintainers and dump trucks), according to plans and specifications on file in the office of the auditor of Marion county.

**Department Store:** (General alterations), 311 West Washington. Archt., Wlliam Earl Russ, Meridian Life Bldg. Owner, The Fair Store, Edward Traugett, V. P., 311 West Washington. Bids in under advisement, work will consist of new store fronts, tile floors, struct. steel, marble work, walnut floors, rem. of plumbing, wiring and heating systems, painting.

***Apartment Bldg.:** (4 apts). Archt., William Earl Russ, Meridian Life Bldg. Owner, Charles T. Nankervis, 21 Kentucky Ave. Revised plans about completed. Brick.

**United States Veterans' Bureau Rooms:** (new partitions, plumbing and electric work), Indianapolis. Owner, The U. S. Veterans' Bureau, 709 Arlington Bldg., Washington, D. C. Will probably award contract to E. C. Strathman Co., Meyer-Kiser Bank Bldg., Indianapolis, for $14,600.

**Office and Paint Shop:** $17,000, 1 sty. and bas., 47x107, 706 No. Fulton St. Archt. and Contractor, The Ostrom Realty & Constr. Co., Peoples Bank Bldg. Owner, Staley and Crabb (sign painters), 346 So. Pennsylvania St. Plans in progress. Start work soon. Brick and concrete block, steam heat, steel sash, fire door, comp. roofing, hollow tile partitions.

### Contracts Awarded

***Creamery:** $30,000. Archt. and engineer, The McCormick Co., Inc., 121 So. Negley St., Pittsburgh, Pa. Owner, Schaefer Bros (creamery), 1855 East 38th St., Indianapolis. General contract let to Krebay Construction Co., 605 City Trust Bldg. Owner taking bids on refrigeration and wiring.

**Residence:** $14,000, 2 sty. and bas., 4466 No Pennsylvania St. Archt., Kenneth Coffin, Board of Trade Bldg. Owner, F. L. Kresge, c/o Archt. General contract let to Sawyer System, Board of Trade Bldg. Brick veneer. Foundation in, will start work on superstructure in 30 days.

**Store:** 1 sty., 35x50, 721 East 49th. Owner, M. C. Bird, 4810 Carrollton. Owner builds.

**Factory:** 2 sty., 30x36, 2217 Mass. Owner, Indianapolis Reed Co., 2217 Mass. Ave. Contract let to Brown and Mick, 226 E. Michigan St. Brick and frame.

**Residence:** $8,000, 5527 Carrollton. Owner, J. G. Warren, 1849 Nowland. Contract let to H. Wuelfing, Jr., 2414 East 16th St.

**Residence:** $7,000, 214 West 44th. Owner, P. L. Creighton, 3343 Kenwood. Contract let to F. M. Bartholomew & Son, 5114 College. Frame.

**Residence and Garage:** $11,000, 5102 N. Capitol. Owner, William Low Rice, 600 State Life Bldg.

## INDIANAPOLIS BUILDING PERMITS

**Issued from February 5th to February 12th**

**Residence:** $4,960, 4628 Kenwood. Owner, F. M. Linder, 1301 Leonard St. Contract let to Nicholas Linder, 1301 Leonard St.

**Residence:** (double), $5,250, 914-16 East 17th. Owner, Henry W. Lewis, 46 No. Penn. St., room 210.

**Residence:** $3,300, 5540 Carrollton. Owner, Sherman Roberts, 31 No. Sheffield. Frame.

**Residence:** $5,700, 320 Blue Ridge Drive. Owner, Griffin and Wright, at site.

**Residence:** $4,340, 1521 West 22nd. Owner, John H. Gottenmoeller, 3830 Cornelius.

**Residence:** $3,300, 910 No. Chester. Owner, P. W. Halfacre, at site.

**Residence:** (double), $3,550, 2831-33 Indianapolis Ave. Owner, F. L. Palmer, 4401 Washington Blvd.

**Residence:** $3,500, 609 Bernard. Owner, Everett Nunamaker, 4030 Byram. Owner builds. Frame.

**Residence:** $4,300, 1325 Parker. Owner, H. V. Taylor, 325 N. Dearborn.

**Residences:** (2) doubles, $3,200 each, at 1322-24 and 1318-20 No. Sheffield. Owner, Mark DeHass, 2166 No. Meridian. Contract let to E. M. Bundy, 1906 Ludlow Ave.

**Residence:** $4,675, 502 No. Wallace. Owner, G. C. Jose, 212 Indiana Trust Bldg. Owner builds.

**Residence:** $4,675, 808 No. Wallace. Owner, G. C. Jose, 212 Indiana Trust Bldg. Owner builds.

**Residences:** (2), $2,500 each, 1401 and 1405 Garfield. Owner, A. E. Glidden, 2439 N. Talbott.

**Residence:** (double), $3,600, 214-16 West Raymond. Owner, Charles Koerner, 2302 South Meridian. Contract let to Royse-Borchert Co., 603 City Trust Bldg.

**Residence:** $3,155, 1505 West 26th. Owner, V.

## MID-WINTER MEETING

(Continued From Page 5)

### Pay Tribute to Former Member Recently Deceased

The recent death of Architect W. H. Mac Lucas, Indianapolis, a former member of the state society of architects, and an interested worker in previous architectural exhibits was referred to. Architect Alfred Grindle, Bloomington, paid a glowing tribute to Mr. Mac Lucas as a man and architect. He touched upon his early thorough training, his ability as an architect, his loyalty to his profession and his fine character. At the conclusion of Mr. Grindle's remarks a resolution was passed by the members expressing the high regard in which Mr. Mac Lucas was held and the deep regret that was felt at his passing. The secretary was instructed to send a copy of this resolution to Mr. Mac Lucas' family.

President Scholer next spoke on the Standard Contract for use between Owner and Architect on Public Buildings as endorsed by the State Board of Accounts, called attention to several objectional clauses that architects hardly felt were right and suggested that a move be instituted by the Society to have the Accounts Board revise such articles.

### Educational Authorities Suggest Some Fine Ideas Relative to Architecture and Its Consideration in Public Building

Dr. H. L. Smith, Indiana University, Bloomington, Ind., and Prof. C. M. Smith, of the State Department of Public Instruction, were introduced and both spoke on "Better Schools." They advanced arguments for the creation of a greater appreciation by the public for the need for good school buildings, planned properly so as to offer the best advantages for the health, welfare and education of the child.

Prof. C. M. Smith condemned the practice of certain public educational officials who sought to secure plans cheap regardless of the service to be rendered by the planner. He advanced the information that the State Educational Department was considering the issuance of a pamphlet as a guide to township trustees and boards of education in how best to proceed with the building of proposed schools; certain definite information along the line of requirements for certain sized buildings, the selection of co-operation from the I. S. of A. would be greatly appreciated.

### Representative of Contractors Tells of Their Association Endeavors

J. H. Owens, Field Representative of the Associated Building Contractors of Indiana, being present, was called upon for a few remarks and referred to what his organization was doing for the building industry. He dwelt upon recent legislative activities, enumerated several bills that had to do with building, affecting both architect and contractor, also an architect, specifications, plans and the receiving of bids. He suggested that the Public, and said the A. B. C. had been active to kill off inimical legislation and just as ardent to further proposed laws that were considered good for the building industry.

Just previous to adjournment, Warren D. Miller, Terre Haute; Kurt Vonnegut and Merritt Harrison of Indianapolis were named a nominating committee to arrange for a ticket to be voted upon at the annual election next June. The president will also name a ticket.

### Banquet and Evenings Entertainment Unusually Fine

That evening there was quite an elaborate banquet and entertainment for the architects and draftsmen, an affair that far surpassed any like event ever offered by the I. S. of A. There was a most enthusiastic crowd present, numbering close to one hundred, who were well repaid for turning out.

The music, singing, dancing and stunts were all high class and most enjoyable adding greatly to the evening's attraction. As for the talks made they were most edifying, their scope was wide and the subject matter timely. The Indiana Society of Architects was greatly honored by having as its distinguished guests, Hon. Harry Leslie, Speaker of the House of Representatives; Prof. G. I. Christie, Director of the Agricultural Extension Department of Purdue University, Lafayette; Architect Irving K. Pond, Chicago, Past President of the American Institute of Architects and J. Arthur McLean, Director of the John Herron Art Institute, Indianapolis.

Mr. Leslie acted as toastmaster and his ready wit kept the crowd in an uproar of laughter. Prof. Christie delivered a remarkable talk on the relation of agriculture to business. Mr. Pond stressed upon the education of the public to an appreciation of architecture, particularly the children of today that they may realize in the future what beauty in buildings means to their own lives. Mr. McLean spoke on "Building With Art" and in effect placed art along with the other essentials necessary to a well constructed building.

It was a fine meeting, the best from all angles ever held by the Society and will be hard to excel in the future.

## INDIANAPOLIS ARCHITECTS ASSOCIATION TO HOLD REGULAR MONTHLY MEETING, WED., FEB. 18

### Postponed From This Week

Owing to the inclemency of the weather, Feb. 11, and previous engagements for which many of the members of the Indianapolis Architects Association had arranged it was deemed best to postpone the regular monthly meeting of the association a week. Hence, the affair will be held Wednesday, Feb. 18, at the Hoosier Athletic Club. There will be a 6:30 P. M., dinner after which a business session will be held.

The new administration has just assumed office and hopes to be able each month to arrange programs that will compare favorably with those of excellent quality that have marked the past year. By such means it is contemplated to arouse new interest amongst the architects of Indianapolis that will assure good attendances.

The meetings under the former administration were quite enjoyable and offered some fine instructive talks that covered a wide and diversified field that was in various phases related to the profession and practice of architecture. Then, too, there is an attractive social side to the meetings that affords an ample opportunity for goodfellowship.

ORGANIZATION AND CURRENT NEWS

## Calumet District

### STILL SOME FAIL TO SCENT THE MENACE THAT HIGHER WAGE DEMANDS INVOLVE

**Success If Gained, May Prove An Empty Thing**

To all intents and purposes one is inclined to the belief that the building trades craftsmen are determined to keep on raising wages until they get into the same situation as the miners of Indiana and Illinois have found themselves, high wages but no work. The argument that is advanced by the representatives of the workmen in the building field is that the men must have so much a year to live on, and if they work only half time because of weather conditions and what not they must have double wages to make up for the time they are not employed

Right now there are thousands of miners idle with spring coming on and no indication of an increase of employment. Lot of good a high wage scale does under such conditions. The Illinois mines once had a preferential rate to western points over the eastern mines and could afford to pay high wages, but since the freight rates have been equalized the eastern coal, being of a better grade, is crowding the western coal out of the markets where there is competition. The result is that the western mines are not being called upon for their product, hence unemployment for the miners in this section. A high wage is very beneficial indeed when there is no work and yet the constant boosting of wages serves to bring about just such a condition.

The building crafts seem to have failed to read the handwriting on the wall, and if they keep on tilting the hourly scale they will find themselves just where the miner is today. Wage boosting year after year means that construction costs must mount even beyond recognized high levels, and when building construction costs reach the height that to build is a poor investment the man who so invested will turn to other fields to employ his money and get greater returns on it than building investment would afford. That can mean but one thing, a curtailment of building and when that time arrives what will high wage scales profit the craftsmen.

Several of the building trades are even now demanding increases in the wage scale with the added demand of a five days week. If such demands are met it will mean that construction costs must mount higher still though at present they are considered to be as high as the industry can stand and move ahead. Things have already reached the stage where it is with difficulty that a loan sufficient to carry on the building project can be obtained. Much more inflation and the building bubble will be no more.

### WEATHER, PRIMARILY, IT IS HOPED CAUSED THIS

**January Building at Hammond Somewhat Below Par**

Last month building operations in Hammond showed a sharp tendency to let up. The weather had an effect, it is true, but there was not the incentive indicated behind prospective building work to lend much hope. There were but 28 permits issued by City Building Inspector Henry Vis as against 103 in December. Last year during the corresponding period there were 32 permits granted. The estimated valuation of the January, 1925 building work amounted to $102,200, while the same item in December ran up to $800,300. In January, 1924, the estimated valuation amounted to $129,690.

### JUST A REMINDER OF WHAT TO EXPECT LATER

**Breath of Spring Breathes Over the Calumet District, But Was Only Temporary**

It was hard to shake off the feeling of hope that maybe the pleasant weather that came along recently would tarry awhile and give contractors a chance to get busy again. The warm sunshine broke up the ice and thawed out the frost laden ground all of which should have been conducive to bring forth soon the echoing tap, tap, tap of busy hammers in the hands of carpenters. However, it all seems to have been a false alarm for the sun soon cooled under chilling blasts and flurrying snow clouds and once more winter's solitude reigns in the Calumet building field. But-then, really, February is too early for spring breezes and all will be better in the end if the winter runs its natural course. In the meantime we will keep the old radiator steaming with the coal bought with proceeds from season before last's building profits, and shall hope the coal holds out.

### TRIED IN VAIN TO CATCH THE FIRST RUMBLINGS OF THE CATACLYSM

**"Listeners In" Sought to Put It Over on the Rest of Us**

Some of our radio fans while professing no faith in the prophesies of the California woman who predicted the end of the world on Feb. 5, at which time a few chosen were to mount a cloud and be wafted away to safety, nevertheless tuned in on California wave lengths to hear what might happen when the crack of doom came. All they heard was music and singing just regular every day tunes that did not sound in any way like the celestial choirs and harps are supposed to reverberate. Now the radio crowd is done with prophets and prophetesses who hearald Judgment Day.

### CALUMET BUILDING PROGRESS

The contract was awarded to Gabriel Benedict, Whiting, for the construction of the L. L. Fischer Planing Mill and Warehouse in that city.

Architects Berry-Wainwright & Co., Hammond, will be ready for bids March 1, for a new township high school building at Calumet City, Ill. The structure

**INDIANAPOLIS :: INDIANA**

will be of face brick and stone exterior construction, 2 stories and basement and will contain 21 class rooms, auditorium and gymnasium.

Architects J. T. Hutton & Son, Hammond, received bids Feb. 10, for an addition to the Straube Piano Co. The building will be four stories high, 86x160 feet.

The opening of bids for the construction of the Juergens fireproof storage warehouse has been temporarily held up because of sickness in Mr. Juergens' family.

## NEW IMPETUS GIVEN TO BOULEVARD IMPROVEMENT SCHEME

### Proposition to Beautify St. Joe River Banks Strikes a Responsive Chord

Never have the people of Fort Wayne been so unitedly and enthusiastically back of an improvement plan as they are today in urging the park board to proceed without delay to the development of a beauty spot along both banks of the St. Joesep river extending southward from the State boulevard bridge.

The plan includes the creation of beautiful park areas extending south from the bridge, establishing a new boulevard along the east bank from State boulevard to connect with St. Joe boulevard, and establishing a new boulevard following the bends in the river for several miles.

Now comes the sequel in the greater plan to extend the boulevards northward along both banks of the St. Joseph.

The route, as far as the east bank is concerned seems near to determination as many of the property holders along the proposed route have expressed a desire to grant to the city strips of land along the way for boulevard purposes.

Also there is under consideration a proposition to boulevard the west bank of the river.

Since citizens have shown so much civic pride in the improvement of the river's banks more impetus has been given to the move which, if successfully carried through will give to the city something like twelve or thirteen miles of new boulevard—a needed stretch of beauty for the coming greater Fort Wayne.

## A REMEDY THE POPULATIONS OF ALL CITIES MIGHT FOLLOW TO THE ADVANTAGE OF THEIR COMMUNITIES

### It Simply Is, "Know Your City Better"

A well-known Ft. Wayne lumber man in discussing the city's possibilities suggested that with a better knowledge of Fort Wayne and its needs, the people will be better fitted to unite in solving the city's many development problems.

"Most citizens," says he, "know too little of what we have and the wonderful possibilities of our city's growth and development. Being in the lumber business, I am naturally interested in seeing our city build, but in building we should not lose sight of the beauty side. Someone has said that ' no man or woman can be really dignified if they know that they have a hole in their hosiery.' By the same reasoning, it is hard to feel justly proud of our city unless we beautify our rivers, have cleaner streets, make uniform traffic laws, and use more judgment in placing unsightly signs. Fort Wayne has great possibilities, and eventually must do these things if she expects to maintain the position which is rightfully hers."

# INDIANAPOLIS

## A LITTLE DRAGGY AT THE START BUT PICKING UP NOW

### Building Effort Improving Under Active House Construction Movement

Slow in getting started the first two weeks of the month, January building activity showed quite an improvement over the closing weeks in Indianapolis and wound up with a volume estimated at $964,526 according to the record issued at the building commissioner's office at the city hall.

These figures were not up to those registered during the corresponding period in 1924, when $1,012,221 was posted. Thus this January's building record was 4.72% in arears of the first month in 1924. However, there were 771 permits issued last month, a gain of 137 permits over those granted a year ago, when 634 were granted.

The projects submitted for approval during the month just past were of no great scope, running mostly to new houses, additions and alterations. The house building movement bids fair to continue active this season as it began early and is gaining strength as the weeks progress. February so far has shown unusual activity in that line of construction, and just recently 21 permits for new houses were granted in one day which is close to a record.

# SOUTH BEND

## NEW $300,000 HOTEL PROJECT INDICATES FAITH IN SOUTH BEND'S BUSINESS FUTURE

### Project Contemplated For Some Time Now to Be Started

Evidence of the confidence in the future prosperity of South Bend is shown in the announcement by Jacob Hoffman, secretary-treasurer of the Allardt-Hoffman Hotel company that a five-story building will be erected on the property at northeast corner of Michigan street and LaSalle avenue.

The building has been in contemplation for some time and final plans have been drawn by Willard M. Ellwood, architect, and negotiations concluded with the numerous heirs to the property for the 99 year lease.

The new building will include a garage, shops, stores, recreation rooms and bachelor apartments for permanent guests.

The improvements, which are to begin at once, consist of a five-floor building, 132x165 feet in dimensions. In architecture the structure will be Italian and conform to that of the Hotel LaSalle when completed the structure will represent an investment of $300,000.

# Sealed Proposals

**SCHOOL HOUSE**
**NOTICE TO CONTRACTORS**

Notice is hereby given that the Board of School Trustees of the City of Greenfield, Indiana, will receive sealed proposals for the construction of a certain high school building, to be erected in the City of Greenfield, Indiana, and to be constructed as set out in the plans, specifications, and drawings prepared by Omer P. Gordon, Architect, and now on file for the inspection of bidders at the office of said Board of School Trustees at their office in the high school building in the City of Greenfield, Indiana, at the office of Omer P. Gordon, Architect, Thayer Building City of Greenfield, Indiana, and at the office of the State Board of Accounts in the Statehouse Indianapolis, Indiana.

Copies of said plans and specifications will be furnished bidders by said board upon the deposit with them of Twenty-five ($25.00) Dollars in cash, the same guaranteeing the return thereof in good condition on or before the date of letting said contract.

Said sealed proposals will be received and opened at the office of said Board of School Trustees on the 9th day of March, 1925. Bids or proposals will be received until 10:00 o'clock a. m. on said date.

The building is to be erected on the real estate owned by the School City of Greenfield, Indiana, on the north side of West North Street, between Wilson and School Streets in said city. Each bidder must file a certificate with his bids that he has complied with Section 68 Workman's Compensation Act.

Each bid shall be accompanied by a bond in the sum equal to the amount of the bid filed for such construction, such bond to be to the approval of said Board of School Trustees, or in lieu thereof, said bidder may file his certified check payable to said board in an amount equal to five per cent of his bid, guaranteeing that the successful bidder will within 10 days after the contract is awarded enter into a contract for the construction of said building, and will execute his bond guafanteeing the faithful performance of said contract. And will at the time of entering into said contract furnish a bond in a sum double the amount of saidcontract, with surety thereon to be approved by said board. Each bid must be accompanied by a noncollusion affidavit, and upon failure to submit said affidavit such proposal or bid will be rejected. The Board of School Trustees reserves the right to reject any and all bids.

Dated this 12th day of February, 1925.

### AUTOMATIC REFRIGERATING PLANT

Specifications for Refrigerators and Automatic Refrigerating Plant for the Cass County Hospital. Bids will be received at the office of the Secretary at the Farmers and Merchants State Bank, Logansport, Ind., February 18th, 1925, at 10:00 A. M.

One large refrigerator, 6-door type, size about 7 ft. 3½ ins. wide, 2 ft. 7¼ ins. deep and 6 ft 3 ins. high. Walls to be 4 ins. thick consisting of: Exterior 13/16 in. Oak, highly polished, 2 thickness of insulating sheeting, 2 of high grade Mineral wool, inside lining odorless wood, except the floor, to be covered with heavy galvanized iron. Interior arranged with shelves and meat hooks. All hinges and fasteners to be heavy solid brass, nickle-plated fasteners on all doors to be lever type self-closing. Shelf space inside, 52 sq. ft.

Also three diet kitchen refrigerators, exterior case to be selected quarter-sawed Oak, golden finish, size of each about 40½ ins. wide, 24¾ ins. deep and 54 ins. high. Interior lining to be 7/16 ins. white opal glass with floor of hexagon vitreous tile set in cement. Conveniently arranged 4-door type.

Or—Three white enamel lined odorless wood refrigerators. Submit specifications.

Refrigerating plant to take care of large refrigerator described above containing up to 70 cubic feet inside measurements. Must be automatic and make 40 lbs. of ice cubes per day. Price to include installation and efficient operation. Also to refrigerate the three diet kitchen refrigerators described above of 75 lb. ice capacity. Cabinets to be placed on first, second and third floors. Machine to be placed in basement. Must be automatic and make about 15 lbs. of ice cubes in each cabinet per day. Prices on the above to include installation and efficiency in operation satisfactory to said Cass County Hospital Trustees.

Also 100 lb. ice maker, cork insulated, with eight 25 lb. ice cans. Bidders will submit prices for the refrigerators and the refrigerating plant separately.

Also submit separate bids for cooling the 3 drinking fountains.

Bidders must submit complete details as to construction of the refrigerators, and the Board of Trustees reserve the right to reject any or all bids and to use their judgment as to which would be the most satisfactory to the Cass County Hospital.

TRUSTEES CASS COUNTY HOSPITAL,

FOR SUPPLYMAN CONTRACTOR

VOL. VI INDIANAPOLIS, INDIANA, FEBRUARY 21, 1925 No. 47

## ORGANIZATION LIKENED UNTO AN ORCHESTRA AS A MEANS TO WIPE OUT DISCORD IN THE INTEREST OF HARMONY

### Builders Should, For the Good of Their Industry, Work in Concert to Prove Contracting is Service, Not Mere Effort

Recently at Indianapolis several conventions of various building trades employers were held simultaneously and, with so many of them in from all over Indiana, a joint meeting was arranged at which Attorney Harry A. Fenton, Indianapolis, known the length and breadth of the Indiana Building Field, general counsel of the Associated Building Contractors of Indiana, spoke. Referring to contractural business, its ills and evils, he cited organization as the remedy by means of which the drawbacks could be minimized, and thru which great progress to better conditions and relationships could be made.

He said, in part:

"Gentlemen, it is very pleasing indeed, to the speaker that we meet here together in peace and harmony, and that agreeable arrangements were effected for a joint session of your associations, the speaker being scheduled to talk to two associations at the same time and on the same day. You all can't help but appreciate the fact that we, engaged in the building industry, must move together in a great brotherhood and cooperative spirit, and I am certainly glad to have the privilege and honor to speak to men representing the building industry in the broadest sense, the general contractors, sub-contractors, sheet metal men, hardware men, painters and decorators, all representative of the industry.

The many of you men, who know me personally, know that I have had for a great many years a very supreme sympathy with the contractor and builder. "sympathy" means. I appreciate that sympathy in the employee when he strives to assist his brother. I do hope men that we can inculcate in our system and our organizations something of that same sympathy of fellow builders towards each other that when the crucial moment or time of strife arrives we have solidarity of movement and uniformity of action. My interest in building business reaches back through the years possibly to my previous connection with members of the organization. Following that it covers a period that I have been working with this A. B. C. since the time it started, when it started as a paper organization with some seven, ten or twelve members signed up, with the idea foremost of the "greatest good for the greatest number" being the thing they were striving for.

Men, sincerely in a close study and analysis of the situation in the building business, not only in the State of Indiana, but in the country generally I have wondered what is wrong in the scheme, plan or mode of carrying on this business that results in a failure of the men whom we are representing to a degree of ninety percent? Think of that, men. What is wrong? What is fundamentally and basically wrong in this building business with the man, firm or corporation that engages in this pursuit, the most important pursuit, the earliest pursuit and profession, first the food and clothing, the second in a house or a habitation. What is wrong in this country or this industry that causes such a result? Have you ever stopped to think why that is?

Mon contact with the men engaged in this business has brought me to the point of believing that, "my" men are honest, that they do discharge their duty honestly in the performance of their contracts; that they are unjustly treated and are improperly understood by the public. I would bring this to your attention, that contractors are maligned by the public, they are classed as a bunch of crooks. I do not believe that, and I would not stand for that.

It just occurs to me: Is it our unfair and unreasonable competition among bidders where service, integrity, honesty, good workmanship and substantial construction are sacrificed for the lowest price,—that gives the answer to this condition that ninety per cent of our men are failing who are striving for an honorable living, their families and children are left destitute, deprived of properly and left in bankruptcy? Is that one of the evils? Is not a man's good name in his community, or a firm's name for honorable and fair dealing worth anything in this building world? Is that worth nothing? Can we not estimate the value of such service? Is there any distinctive mark that places the man in his class, anything in the backing that places one man above the other, that is worth while for the buying public to consider? Is there anything that the members of the A. B. C. can do that means anything from the point of service or for fair and honest performance of contracts? I say there is. I say that is a condition our men must stop to consider and remedy.

When you are sick and call in your doctor at the bedside or at the hospital, do you start out for competition to see who is going to b ethe lowest bidder? Is that the practice? When you go to consult your lawyer do you run around the city to see who is going to be the cheapest? No, you don't. You go for the fellow or firm in whom you have confidence and who will deliver the service, and who is loyal to the trust he represents. Isn't that the thing? Not the low fellow who can or wll do something for nothing. What is the result? The client or patient or building public finally suffers in the end. He expects real one hundred per cent service when he gets this cheap price.

You know that since the war our government has been busy in its study of standardization and elimination of loss and waste in the various branches

## INDIANAPOLIS

**Masonic Temple:** 2 sty. & bas. 50x100, Shelbyville, Indiana. Archt., Donald Graham, 1126 Hume-Mansur Building, Indianapolis. Owner, The Masonic Lodge of Shelbyville, Indiana. On working drawings. Plans will be ready for bids about April 15th. Brick, concrete and steel, composition roof, vacuum heating & ventilating, tile & marble work, terrazzo floors, stone trimmings, orn. iron, wood casement windows, maple floors, ornamental plaster, complete lodge building equipment.

**Bank and Offices:** (rem. from stores), 2 sty. & bas. 60x66, Main and Jefferson Sts., Tipton, Indiana. Archt. McGuire and Shook, 320 Indiana Pythian Bldg., Indianapolis. Ower, Citizens National Bank, R. S. Martin, Cashier, Tipton, Ind. Preliminary plans in progress. New front and general alterations.

**Church:** (general interior alterations), $10,000.00, West Wash. St., Indianapolis, West Washington Street Presbyterian Church. Rev. T. J. Simpson, 46 N. Sheffield Ave., Indianapolis. Archt. H. H. Heistand, 211 Main St., Eaton, Ohio. Preliminary plans. Mature this summer. The owners are also contemplating the erection of a Community Building and Gymnasium next year. The same architect will prepare the plans. Will cost approx. $25,000.00.

**Sunday School:** (addition to present church), $200,000.00 34th and Central, Indianapolis. Archt. J. W. C. Corbusier, Keith Theatre Building, Cleveland, Ohio. Associate architect, Robert Frost Daggett, Continental Bank Bldg., Indianapolis. Owner, Tabernacle Presbyterian Church, Rev. J. Ambrose Dunkel, 3815 N. Delaware St., Indianapolis. Plans in progress. Will probably ask for bids late summer. Limestone.

**Administration Building:** (general interior alterations to Murdock Home). Archt. Bass, Knowlton and Co., 312 N. Meridian. Owner, International Typographical Union, 611 Bankers Trust Bldg. Plans in progress.

***Apartment Building:** (24 apts.), rem. from factory, $15,000.00. Archt. McGuire and Shook, 320 Indiana Pythian Bldg. Owner, Oscar Schmidt, 31 Monument Circle. Archt. receiving bids. Brick veneer.

**Recreation Building:** $40,000.00, 1 & 2 sty., 44x110, E. Mich. and Walcott Sts. Archt. A. A. Honeywell, 413 Penway Bldg. Owner, Woodruff Place Baptist Church, Rev. L. C. Trent, 411 N. Arsenal St. Preliminary plans. Mature this summer. Brick.

**Business Building** (stores): 1 sty., 101x136, at 436 North Illinois St. Archt., Vonnegut, Bohn and Mueller, 610 Indiana Trust Bldg. Owner, E. G. Sourbier, 152-154 North Illinois St. Archt. receiving bids to close at once. Brick.

### Contracts Awarded

***Motion Picture Theatre and Stores:** 2 sty. and bas., 100x131, (theatre seating 1,200, 2 stores, 3 offices), $100,000, Central Ave. and Fall Creek Blvd. Archt., Frank B. Hunter, State Life Bldg. Owner, A. C. Zaring (owner of North Star Theatre, 25th and Central and Garrick Theatre at 30th and Illinois). Low bidder on general contract J. G. Karstedt Construction Co., 10th floor Lemcke Bldg. Making some changes in plans. Contract not signed.

**Apartment Building:** (24 apts.) $150,000, 1142 No. Pennsylvania. Archt., Osler and Burns, Penway Bldg. Owner, Dollman-Soverign Co., H. G. Dollman, Pres.; H. L. Dollman, Secy., Merchants Bank Bldg.; J. J. Kiser, care of Meyer-Kiser Bank. Plans in progress. Owner will build and award separate contracts. Brick, stone trim, comp. roof, steam heat, tile baths, incinerator, ranges, refrigerators, laundry in basement.

***Church:** $45,000.00, Cincinnati, O. Archt., W. H. Garns, 1218 Fletcher Trust Bldg. Owner, Methodist Protestant Church, Rev. T. LeRoy Hooper, Pastor, 1223 Corbett Ave. General contract let to C. A. Baker, 1223 Corbett Ave., Cincinnati, Ohio. Brick, stone trim.

**School:** (Completion), $5,000, Jackson Twp., Decatur County, Ind. Archt. The Elmer E. Dunlap Co., 1050 N. Delaware, Indianapolis. Owner, A. C. Moncrief, Trustee, Westport, Indiana. Contract let to Hege & Co., Columbus, Ind., Htg. & Plmg. to Worland & Schwendermann, Greensburg.

### Contracts Awarded

**Business Building (4 store rooms): 16th and Meridian. Owner, Russell T. Byers, care of American Central Life Insurance Co. General contract let to Mr. Hall, care of owner. Brick. Wrecking at present.**

***Bank, Stores and Offices:** $175,000.00, Bloomington, Ind. Archt. McGuire and Shook, 320 Indiana Pythian Building, Indianapolis. Owner, Citizens Loan and Trust Co., J. D. Showers, Prest., Roy O. Pike, Secy., Bloomington, Ind. General contract awarded to Leslie Colvin, Continental Bank Bldg., Indianapolis, Heating and Plumbing let to The Fenneman Co., Bloomington, Ind., Eectric work to Evans Electric Co., Bloomington, Bank fixtures to The Ohmart Sons Co., Dayton, Ohio. Start work at once.

***Warehouse:** $200,000.00, 4 sty & bas. 149x80, Pratt and Senate. Archt. and Engineer, The Hunting-Davis Co., Century Bldg., Pittsburgh, Pa. Owner, The Standard Sanitary Manufacturing Co., Bessemer Building, Pittsburgh, Pa. General contract awarded to Thompson-Binger Co., Hume-Mansur Building, Indianapolis, Ind. Start work shortly. Brick, reinforced concrete floor and roof construction.

**Residence:** $11,000.00, 5102 N. Capital. Owner and builder, William Low Rice, 600 State Life Bldg. Stucco and frame.

**Power Plant:** (add.), $10,000, 1 sty. 18x74, Ky. Ave., and West St. Owner, Indianapolis Light and Heat Co., Monument Circle. Brick. Owner builds.

**Store:** $5,000.00, 726-28 S. West. Owner, W. B. Wood, at site. Brick.

**Store:** $8,500.00, 1627 Prospect. Owner, H. F. Roempke, 1631 Prospect. Contract let to W. C. LeFeber, 440 N. Rural St.

## INDIANAPOLIS BUILDING PERMITS ISSUED (WEEK OF FEBRUARY 12. to FEBRUARY 19TH)

**Factory:** $46,000.00, 916 Harrison. Owner, G. Ittenbach Stone Co., 916 Harrison St. Owner builds.

**Residence:** $8,385.00, 258 Hampton Drive. Owner, A. Schlessinger, 2852 N. Illinois St. Contract let to H. H. Fulk, 2233 Brookside.

**Residence:** $8,050.00, 421 Blue Ridge Road. Owner, George Wantz, 2715 N. Meridian. Contract let to J. M. Ritter, c/o owner.

**Residence:** $7,000, 5416 N. Penn. Owner, F. C. Cash, 320 N. Irvington Ave. Contract let to A. O. Cash, 320 N. Irvington Ave. Brick veneer.

**Building:** (rem.) $8,000. Owner, Fletcher Trust Co. Contract let to J. E. McGaughey, American Central Life Bldg.

**Residence:** $5,490.00, 740 N. Bolton. Owner, W. S. Jensen, 2630 S. East. Contract let to Home Development Co.

**Residence:** $5,190.00, 309 S. Butler. Owner C. M. Burkhart, at site. Contract let to Home Development Co.

**Residence:** (double), $5,250.00, 832-34 N. Bradley. Owner, T. Letzinger, 2411 Kenwood.

**Residence:** (double), $5,500.00, 1335-37 Belmont. Owner, T. H. Nelson, 1450 S. Belmont.

**Residences:** (2), $4,180.00 each, at 4718 and 4722 Winthrop. Owner, C. S. Clifton, 1415 N. Tuxedo. Owner builds.

**Residence:** (double), $4,800.00, 1913-15 Pleasant Run. Owner, A. P. Shalley, 3867 Central Ave.

**Residences:** (6) $3,900.00 each, at 3630-3626-3634-3638-3642-3646 N. Capital Ave. Owner, L. W. Kiene, at site.

**Residence:** $4,150.00, 1724 S. Randolph. Owner, Mary E. McGuff, 5325 Park Ave.

**Residence:** (double), $3,800.00, 2510-12 E. 16th. Owner, Shiel and Chapin, 220 North Illinois.

500 BOARD OF TRADE BUILDING
Indianapolis, Ind.

## DEAN OF INDIANA ARCHITECTS ANSWERS LAST SUMMONS

### Adolph Scherrer, Pioneer Indianapolis Architect, Dies After Long Illness

Once more a gifted member of the architectural profession has been removed from the ranks of the Indiana architects through death. Adolph Scherrer, 76, senior member of the firm of Adolph Scherrer and Sons, Indianapolis, for many years one of the leading architects of the city and the state, and dean of the profession in Indiana, passed on at his home, 1839 N. Illinois St., the night of February 13, after a long illness superinduced by a stroke of paralysis suffered six years ago.

Mr. Scherrer was one of the pioneer architects of Indianapolis, having been connected with the profession of the city for fifty-two years. He was born at St. Gaul, Switzerland, in 1848, was educated there and later studied at universities in Vienna and Budapest. In 1870 he came to the United States, was connected with architectural offices in New York and Chicago, and in 1873 moved to Indianapolis. As chief draftsman he entered the office of Edwin May, at that time one of the most prominent members of the local profession. When his employer, who had the commission to build the new State House, died Mr. Scherrer was appointed supervising architect and completed the work.

During the period of his practice, Mr. Scherrer's commissions covered a varied and extensive scope, his efforts in Indianapolis are to be seen in many of the city school buildings, the New York Store, Police Headquarters, Maennerchor Hall, Central Indiana Asylum for the Insane. the State Blind Institute, Mannual Training High School buldings, the Hoosier Athletic Club, and many other prominent structures, besides there are numerous lesser buildings and residences too numerous to mention.

He served as member of the board of public works during the administration of Mayor J. L. Sullivan, 1891-1893.

He was married in 1877 to Emma Aneshaensel, and she, with two sons, Herman and J. Anton Scherrer, both members of the firm, survive him. He also leaves one grandson.

Mr. Scherrer was a member of the Chamber of Commerce, the Indianapolis Architect's Association, the Indianapolis Maennerchor and held a fellowship in the American Institute of Architects.

Funeral services were held at the late home Monday, February 16, interment following at Crown Hill Cemetery.

## BUILDING WITH ART

ARTHUR McLEAN, Director
John Herron Art Institute,
Indianapolis, Ind.

Building with art is a new American characteristic, as sure as building with steel is new, modern consideration. The other day I went into the office of a gentleman in the Union Trust Building, this city. He is an old man, and as a young man he started his law practice in that office. It reminded me of the black hole of Calcutta, yet as I looked out of the window I saw a brave attempt at architectural embellishment. The ornament was good and the building in its day was grand, no doubt, but it seemed to me when I compared it with the new buildings on the Circle about to be finished that it was all facade with little guts. On the other hand the new buildings have little ornament, yet glorious facades, and certainly guts. The finess of plan, the adaptability of its avowed purpose, the finish, the material and the conveniences of the modern building represents wells of imaginative genius to me. The absence of obvious embellishment is striking, yet more art has been built into its plain areas than was ever dreamed of in its precursor.

Art in architecture is not necessarily the result of the brush or the chisel, but the feeling for proportion, for consistency, for adaptability and beauty which comes without either the brusn or the chisel being brought into play. I believe a room can be so exquisitely proportioned that without ornament it can be very beautiful, but I also know that ornament artistically conceived and carefully placed adds enchantment and pleasure for the layman, and for the hypercritic as well. To the architect who can make plain areas alive belongs the laurel, and to the architect who adds ornament to enhance plain areas, like bloom on the cheek of a healthy child, to him belongs the double laurel. Structural invention, proportion and scale, when blended are to a fine building what design and representation are to a picture. I once heard an architect say that he had tried to make a certain bank building look "affluent, with moderation, prosperous, with dignity and solidarity." He had not seen the problem in mere steel and stone but had thought of the building as having human characteristics. Good craftsmanship was the work of others; humanizing the material was his job, and the result is a building of character.

How I wish this could apply to the small house as well as to our great public buildings. How I wish we could have buildings great and small built with art as the basic consideration. Is it possible that the houses of our city of a generation ago were built with art as a basic consideration? As one walks up any of the older streets, is it possible that the houses so curious, even ludicrous to us now, were built then by serious-minded architects who felt in terms of art? Did they try to humanize the idea? If so, one must infer that they were ahead of their time, and their humanizing characters were "Mutt and Jeff" or "Pa and Polly" of our current newspapers.

In this connection I would like to ask,

(Continued on page 11)

# Build with the Builders

"The builders . . . . . are insuring their liability in their own company, a trade mutual---a company that has enviably succeeded in every factor involved in carrying out principles of compensation insurance. This company is the

SURPLUS OVER $650,000.00

*Excess Premiums Returned to Policyholders*

"Is the small home the contractor's job, and the plaza the architect's job?" Perhaps so; I hardly know, to tell the truth, but this I know, if such is the case, then our city can never be fair to look upon. Million-dollar plazas and Mutt and Jeff travesties for homes spell inconsistency, and inasmuch as consistency is the beginning, the middle, and the end of art, then we are doomed to live in a "mean" city.

It's the "idea" that should be our goal. I say "our" for I like to feel that I'm one of you, in spirit and sympathy, if not more. Art is merely the expression of an idea in adequate terms. By adequate terms, in architecture, I mean structural excellence and inventiveness, proportion and scale and surface finish. By the idea I mean tonal character, living attributes infused by artistic will power into the inorganic matter out of which buildings are made. All this is applicable to large or small jobs; all is your responsibility to the profession and the world, and when builders of cities react to the "big idea" and express it in adequate terms then we will live in "no mean city." That the big idea must permanate the field of architecture if we are to have good architecture is well expressed by the story of a builder of ancient Oriental times. The master stone mason was at work laying out the decoration of a beautiful course when he put his hand out to receive from his helper a new bit of bettle nut without even taking his eyes off his work. So intent was he upon it that he did not see the king directly behind watching him. And the king quickly slipped an Imperial infusion of bettle nut and lime into the outheld hand. The master mason popped it into his mouth, but had no sooner closed his teeth upon it when he realized the difference between his simple fare and that of the kings. Turning he threw himself down before the king and begged forgiveness for daring to place in his own humble mouth that which was meant for a king. "Rise, and be at peace," said the king, "for thou art a king of artists while I, I am merely a king of men."

In the Orient, especially India, workmen chew bettle nut, rather than tobacco, but they rarely drink. In Ohio it's different. A salesman was once trying to navigate between towns in an auto and after miles of terrible road he came against a blank end. Fortunately, a farmer's house was nearby and the farmer who was building a well curb, came out and gave the salesman traveling directions. As the salesman was leaving he said, "By Heavens, I don't see how you get the common necessity of life up here." "Well," said the farmer, "we don't hardly, and when we do it ain't fit to drink." But architects as a rule, are temperate.

Building with art is a modern slogan. But with what shall we build? Shall it be Gothic, Renaissance, French, English, or what? No, I say no. Let us build with an art that is true to contemporaneous life. It is not that we should ignore the creations of the past, but that we should try to assimilate them into our conscience and seek to enjoy the present more. Can slavish conformity to traditions give individuality to architecture? Why be devoid of originality and why repeat so religiously obsolete styles? Let us not forget the ancients, but let us love them more and copy them less. My plea is for contemporaneous art in painting, in sculpture, in architecture. How can we be ashamed of modern art? It is ourselves; it is our own reflection. When we condemn it, it condemns ourselves. Let us create our daily life in visible art. Let us not go into rhapsodies over the ancient, over obsolete though beautiful styles at the sacrifice of our own potentialities. If we create in the image of the past posterity will laugh at the barrenness of our art. There are beautiful things about us, we have beautiful thoughts, we have inspirational tendencies, we may create therefore, that which is distinctly ours, distinctly contemporaneous, and add to the world of art. To build with art is to add to that which we already have. Would that we were as skillful and as artistic in all architectural fields as we are in the creation and construction of the strictly modern, the strictly contemporaneous American sky-scraper. It is a contribution to the world of architecture and the latest buildings in this style are so thoroughly artistic in reality that we cease to marvel at their technique and stand before them in genuine admiration.—(Address delivered at the Mid-Winter Meeting of the Indiana Society of Architects.)

# Associated Building Contractors of Indiana

MAX IRMSCHER, President
Ft. Wayne

C. C. PIERSON, Secretary
Indianapolis

## ORGANIZATION AND CURRENT NEWS

### ORGANIZATION

(Continued from page 5)

of the buildng business. I understand from our report of regional meetings in the piping and heating trades that 26,000 fittings are going to be eliminated down to a nominal number. In brick maybe one hundred different patterns, styles and kinds reduced to seven or eight, and all of these things our government is interested in eliminating because it is a waste and loss. There is one great problem in this industry the government has not yet attempted on the waste and loss question. That is upon the troubles that "my" men encounter in dealng with the collection of their accounts and the securing of honest pay for honest work. They have delved into the relations of labor, the human relation, but they have not yet been able in the human relation, and never will they be able, to set out a fixed standard or law to define this flexible and workable problem. That has to be met every day, every hour in every city, every county and every state owing to the diversified conditions.

I offer one remedy for your consideration, men, that it may help you to help go forward, and I am proud of this great State of Indiana that it has a state organization and good organization among contractors and builders second to none in the United States, and by that co-operation they have moved forward and placed upon the statute books of the State of Indiana a law for the standardized regulation and control of building operations, and they are recognized the length and breadth of this great land. That remedy men, is your organizations, your associations, your co-operation. You men have separate

problems unto yourselves with which to deal. The contractors and employers have those peculiar problems peculiar to their own trades and conditions, but after all you should all be interested in this big state organization that should father us all.

What benefits accrue to the separate employers of the trades, and how can they go forward no matter how well organized in the individual trade in the state or country if there is trouble with the plasterer, bricklayer or carpenter and other crafts. You are all building bosses and peace and harmony must go along with the work. You hear an orchestra in perfect harmony—a wonderful thing to listen to, but if one discordant note creeps in there is a terrible noise. Is not the organization of your various businesses and compact working organizations much like an orchestra, the thing to effect harmony, and to aid successfully you must wipe out certain prejudices personally that you may hold one for the other by way of competition. You must not be prejudiced and selfish. Let us go for the big thing. Let's unite and concert our strength."

## QUOTATIONS ON BUILDING MATERIALS STEADY TO FIRM

### New Activity Noticeable in Construction Field Around the Country

Information gleaned from data of national scope reveals the fact that with the opening of the spring building season but a few weeks off, prices of construction materials are either rising or remaining fairly firm at recent levels. Recent developments show the presence of a pure plentiful supply of common labor in the northern sections of the country, with consequently lower daily wage rates for this class of workmen. The prevai ing hourly rate for common labor is 54 cents.

Consistent gains in contract letting which has been noted lately continues along that trend. Gains are noticeable in private projects in all parts of the United States and in industrial, private and commercial buildings for the Middle Atlantic states; in industrial buildings and water works for the West and Federal government construction in the South. General indications point to reawakened activity in the building construction field, a condition that should lead up to an active season when it really opens under normal weather conditions.

# Calumet District

## A CODE FOR BUILDERS

### Declaration of Realization of Responsibilities Made by Illinois Contractors

At their recent convention, at Chicago, The Associated Building Contractors of Illinois went into an analysis of the Builder and his relationship to his business and his fellow contractors. That delving resulted in the unanimous adoption of the following Builder's code:

"The Builder considers his vocation worthy of respect and adulation as affording him distinct opportunity to serve society.

"The Builder desires to improve himself, increase his efficiency, and enlarge his service. By so doing he expects to profit through and by such service.

"The Builder realizes that he is a business man, and is ambitous to succeed, but that, first, he must be ethical and wish no success that is not founded on justice and morality.

"The Builder holds that he must exchange his product, his labor, his service and his ideas for profit; he wants that profit legitimate and ethical, and desires all parties in the exchange benefited.

"The Builder wants to be an example to his brother builders, and uses his best efforts to elevate the standards of his vocation, and so conducts his affairs that others may find it wise, profitable, and conducive to happiness.

"The Builder wants to conduct his business so as to render perfect service, superior to his competitors, and, when in doubt, give service beyond the strict measure of obligation.

"The Builder believes in the Golden Rule; 'All things, whatsoever ye would that men should do unto you, do ye even so unto them.'

"The Builder contends that society best holds together when equal opportunity is accorded all men."

By resolution a special committee was appointed to draft also a code of ethics to be adopted in connection with the above code.

## SOME FOLKS GET SORE WHEN OTHERS REFUSE TO PICK THE CHESTNUTS FROM THE FIRE

### Contractors Know What It Is to Get Burned

And now comes the Manufacturers Association with a howl about increasing the carpenters' wages. Two years ago when we asked them to co-operate with the contractors in holding down the wages of all the crafts, the above association absolutely refused to lend any assistance, or moral support whatsoever. Why the change of heart? That is the question.

## GOING UP!

### Craft Scale At Chicago Given a Boost

According to reports from Chicago, the marble setters, architectural iron workers and carpenters have been granted an increase in wages from $1.25 to $1.37½. The building laborers were tlted from 82c to 87½c. Bricklayers, fire-proofers, stone cutters are yet to settle with.

## CALUMET BUILDING PROGRESS

The Midland Construction Co., of Chicago, was the low bidder for the carpenter and mason work on the Modern Bakery Building on west State street. All sub-contracts are to be let separately.

Architect Mac Turner is preparing plans for Leonard Elster for a one-story and basement brick store building, 40x40, at the corner of Sibley and Jessie streets. Also for Abe Wineberg, Whiting, for a two-story brick addition containing two flats. The estimated cost is $15,000.

Surveyors are at work staking out the ground for the different concessions at the new amusement park. The owners are preparing to start the construc-

tion work with a rush just as soon as weather conditions will permit. They desire to have things in shape for the opening, May 1.

---

The Indiana Harbor Belt and The Pennsylvania Roads each have a construction gang at work laying tracks into the Jones-Laughlin Steel Mill site. Looks like there might be something doing there soon!

E. E. COLE.

# FT. WAYNE

## BUILDERS ELECT OFFICERS FOR THE YEAR.

### Al Weinman Again Heads Builders Exchange.

Members of the Ft. Wayne Builders Exchange held the regular annual meeting and election at headquarters Monday evening, February 16, a fine crowd turning out.

There was a general discussion of building conditions and the consensus of opinion was to the effect that prospects are encouraging for a continued activity in the local building construction field.

When the ballots were counted it was revealed that Al Weinman, President, and F. H. Grote, Vice President, had been re-elected. Other officers named were J. McMullen, treasurer, and G. W. Schack, secretary.

The board of directors will be composed of Geore Irmscher J. McMullen, F. H. Grote, Art Rodenbeck and W. A. Sheets, delegates to the executive board of the Builders' exchange are A. Weinman, E. H. Fuhrman and A. R. Sauer; arbitration committee, Al Weinman, J. McMullen, F. H. Grote, H. C. Offutt and E. H. Fuhrman; membership committee, Al Weinman, J. McMullen, George Irmscher, E. H. Fuhrman and William Nassenstein.

## PROVES HIMSELF A BUILDER IN A BROAD WAY

### President of State A. B. C. Demonstrates Indiana Contractors Picked a Wide-Awake Man to Lead Them

When the Associated Building Contractors of Indiana re-elected Max Irmscher, Ft. Wayne, president of their organization at their recent convention at Indianapolis they picked a real builder not only as effort is counted, but in spirit also. He is an industrial builder, being interested in quite a few local concerns, a construction builder and now is proving himself to be a community builder, a booster for a more beautiful city in which his fellow citizens may live.

Ft. Wayne for several years has been making extensive civic improvements in the way of boulevard, park and other like moves for the advancement of the welfare of the citizenry. The zoning and city plan idea is being agitated and already a beautificaton effort has been started along the banks of the several rivers that meet at Ft. Wayne. A continuation of the boulevard system along the river banks is now being considered.

Anent this proposed move Mr. Irmscher demonstrates his spirit as a civic builder, and steps to the fore with the following:

"Having lived in Fort Wayne 40 years and having seen it grow up from a small town to the beautiful city of today, I am for a continuation of the effort. We have the opportunity to make it more beautiful, especially at this time. Our river banks should be improved by all means. When you drive along some streets, where the banks are visible you see some awful sights, and there is no excuse for it—simply negligence. With the completion of our new dam, our people will take the time to look at the deplorable condition of the river banks, and, as I know our people, you have to show them and you will get their support. With the banks improved and the river drives where feasible, we can make Fort Wayne so attractive that it will be a notable beauty spot in the state of Indiana.

"We further need more track elevation, but real elevation—not mere depression such as we have at certain points with more in prospect in other localities.

"We should get busy right now, for every day we wait will but add to the cost of improvements."

## LOOKS AS IF HOME BUILDING WOULD PLAY A BIG PART IN LOCAL CONSTRUCTION EFFORT IN 1925

### Good Start Made

The new year started another Fort Wayne residential building boom with a record that indicates that more homes will be erected here in 1925 than in any previous year of the city's building history.

An interesting feature of the official record from the building inspector's department is that 62.7 per cent of the total permits issued during the first month of the year were for new residence work—54 of the 86 permits being for new homes.

That the city of Fort Wayne leads its class in the percentage of home-owners and that it will continue to hold that proud position among American cities seems to be shown positively by these early indications of the type of activities in which the people are most extensively engaged.

Fort Wayne realtors declare that never before in the history of the city has there been such a desire on the part of the people to acquire their own land and homestead than there is today, and never before have the builders of the city been so well prepared to serve them in knowledge of modern methods of building, in the provision of modern conveniences at the lowest possible price and on terms of payments which make home-ownership possible to many who cannot afford to pay cash for their purchases.

***Start this afternoon and run out in any direction, to the outskirts of town and notice the many new homes going up and you will be surprised by their beauty and the many modern conveniences that are now considered indispensible to the modern home-owner. Places that were newly marked out subdivisions only two years ago are completely built up today. Try and buy one of these places and you will find that they have increased in value from twenty to fifty per cent, and they were built only a couple of years ago.***

### NOTICE OF SALE OF BONDS OF PIERSON SCHOOL TOWNSHIP, VIGO COUNTY, INDIANA

Notice is hereby given that the undersigned Trustee of Pierson Township, Vigo County, Indiana, will sell the bonds of said School Township in the sum par value of Thirty-seven Thousand and Fifty ($37,050.00) Dollars, which said bonds will be of the following denominations to-wit:

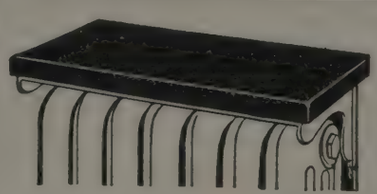
The first bond will be of the denomination of Twenty-four Hundred and Seventy ($2,470.00) Dollars, and will be due and payable on July 15, 1926. The additional bonds will be fourteen (14) in number, and each of the denomination of Twenty-four Hundred and Seventy ($2,470.00) Dollars.

The first of which additional bonds will become due and payable on July 15th, 1927, and one of said additional bonds of the par value of Twenty-four Hundred and Seventy ($2,470.00) Dollars will become due and payable on the 15th day of each succeeding July thereafter.

And which bonds will draw interest at the rate of five (5%) per cent. per annum, interest on all unpaid bonds to be paid semi-annually.

Said bonds will be offered for sale at the present School Building at the Town of Blackhawk, in said Pierson Township, on the 17th day of March, 1925, at the hour of one-thirty (1:30) o'clock P. M. of said date.

The right is hereby reserved to reject any and all bids.



Witness my hand this 18th day of February, 1925.

R. M. GRAHAM, Trustee.
Of Pierson School Township,
Vigo County, Indiana.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given that the Board of School Trustees of the City of Greenfield, Indiana, will receive sealed proposals for the construction of a certain high school building, to be erected in the City of Greenfield, Indiana, and to be constructed as set out in the plans, specifications, and drawings prepared by Omer P. Gordon, Architect, and now on file for the inspection of bidders at the office of said Board of School Trustees at their office in the high school building in the City of Greenfield, Indiana, at the office of Omer P. Gordon, Architect, Thayer Building City of Greenfield, Indiana, and at the office of the State Board of Accounts in the Statehouse Indianapolis, Indiana.

Copies of said plans and specifications will be furnished bidders by said board upon the deposit with them of Twenty-five ($25.00) Dollars in cash, the same guaranteeing the return thereof in good condition on or before the date of letting said contract.

Said sealed proposals will be received and opened at the office of said Board of School Trustees on the 9th day of March, 1925. Bids or proposals will be received until 10:00 o'clock a. m. on said date.

The building is to be erected on the real estate owned by the School City of Greenfield, Indiana, on the north side of West North Street, between Wilson and School Streets in said city. Each bidder must file a certificate with his bids that he has complied with Section 68 Workman's Compensation Act.

Each bid shall be accompanied by a bond in the sum equal to the amount of the bid filed for such construction, such bond to be to the approval of said Board of School Trustees, or in lieu thereof, said bidder may file his certified check payable to said board in an amount equal to five per cent of his bid, guaranteeing that the successful bidder will within 10 days after the contract is awarded enter into a contract for the construction of said building, and will execute his bond guaranteeing the faithful performance of said contract. And will at the time of entering into said contract furnish a bond in a sum double the amount of saidcontract, with surety thereon to be approved by said board. Each bid must be accompanied by a non-collusion affidavit, and upon failure to submit said affidavit such proposal or bid will be rejected. The Board of School Trustees reserves the right to reject any and all bids.

Dated this 12th day of February, 1925.

## INDIANA STATE LAWS OF PARTICULAR INTEREST TO BUILDING CONTRACTORS, SUB-CONTRACTORS AND MATERIAL SUPPLY MEN.

### A Series of Articles, Taken From a Speech Made By Attorney Harry A. Fenton To Indiana Contractors In Joint Session, That Will Appear From Week to Week In The Recorder.

There is no better way that I know of to get right down to the subject assigned to me, State Laws of Interest to Building Contractors, Sub-Contractors and Material Men, than to take each law as we have it today and read it separately and the very first thing I am going to start in on is the thing that is heralded in the press today—the apprentice question. These are not new questions. This has been canvassed by our legislature years ago. I do not know how many of you know that we have law on that matter, and if you are going to be patient with me I want to give it all to you. I have studied about these things and the only way I can impart them to you is to read the law and make comment. I will read "Master and Apprentice" Section 8381 and following, Burns' Revised Statutes of 1914.

#### Apprentices and the Law

**8381. INDENTURES—EFFECT OF MARRIAGE**

Children may be bound to serve as apprentices for any term not extending beyond the age of twenty-one in a male or eighteen in a female; but the marriage of a female shall annul her indentures.

**8382. WHO MAY BIND CHILD**

Children may be bound by the father; or if there be no father, or if he be incompetent, then by the mother; if there be neither father nor mother, then by the guardian. If the child be over fourteen, his or her assent to the indentures, expressed thereon, and attested by his or her signature, shall be necessary to their validity. Any minor over the age of fourteen, having neither father, mother nor guardian, may bind him or herself, with the consent of the judge of the court having probate jurisdiction of the proper county, to be testified by his indorsement on the indenture.

**8383. WHEN TOWNSHIP TRUSTEE MAY BIND.**—The overseers of the poor (township trustees) in their respective townships, may bind children under the age of sixteen, in the following cases.

First. The child of any pauper supported in whole or in part by the county.

Second. Any child whose parents abandon or neglect, or are unable to support it.

Third. Any child having neither father, mother nor guardian, and having no sufficient means of support and education.

Fourth. Any white child taken from any asylum in any other state, and brought into this state to be bound.

**8384. ASSENT OF JUDGE.**—The assent of the judge of the court having probate jurisdiction in the proper county shall be necessary to the validity of any indenture, made under the first and second specifications of the preceding section, and shall be indorsed thereon; and he may, in his discretion, cause notice to be given to the parents of application for such assent, and withhold the same until they can be heard.

**8335. INDENTURES EXECUTED IN OTHER STATES.**—Any indenture executed in pursuance of the fourth specification of the third section (sec. 5336), which shall contain the covenants on the part of the master required of persons procuring children from such asylums in the state where they are situate, shall be valid for the time named in the first section of this act (sec. 5334).

**8386. INDENTURES. HOW MADE AND FILED.**—All indentures shall be signed and acknowledged by the parties thereto, before some officer authorized to take acknowledgements of deeds, and shall be in two parts; one to be kept by the master or mistress, the other to be filed in the office of the clerk of the court having probate jurisdiction in the proper county, for the use of the apprentice.

**8387. RECORDING INDENTURES.**—Every such indenture shall, within ninety days after execution, be recorded by the recorder of the county in which the master or mistress lives, in a book provided for that purpose, for which he shall receive from such master or mistress a fee of fifty cents.

**8388. WHEN EVIDENCE.**—Such indenture when so acknowledged, or such record, or a copy thereof, duly certified, may be read in evidence without further proof.

**8389. EDUCATION OF APPRENTICE.**—There shall be essential to the validity of any indenture binding a white apprentice who has more than three years to serve, an agreement, on the part of the master or mistress, to cause the apprentice to be taught to read and write, and the rules of arithmetic, to the double rule of three, inclusive, if practicable; and in any suit for breach of such agreement, the measure of damages shall be, what the value of the instruction not given would have been to the apprentice, if given, to be ascertained by the verdict of a jury.

**8390. RIGHTS OF APPRENTICE IN AGREEMENTS.**—All valuable agreements on the part of the master or mistress, contained in any indenture, shall be for the benefit of the apprentice; and if stipulated therein to be for the benefit of any other person, they shall stand for the benefit of such apprentice, and may be sued on and recovered in his name.

**8391. ANNULLING INDENTURE—JUDGMENT.**—The court having probate jurisdiction in any county where such master or mistress resides shall have power, on complaint, in writing, of any party to such indenture, or of any person on behalf of such apprentice, to annul such indenture for misconduct on the part of such master or mistress or of such apprentice, such notice being given to the parties, as such court may order; and if such indenture shall be annulled for misconduct on the part of the master or mistress, such court shall render judgment in favor of such apprentice for such sum of money as may seem just; which judgment may be given in evidence in mitigation of damages in any other suit on such indenture, but shall not be a bar thereto.

**8392. ABSCONDING APPRENTICE.**—Such court may, on application of a master or mistress, cause an absconding apprentice to return to such master or mistress; or, if he shall refuse, may commit him to jail; and shall, in all cases occurring under this and the preceding section, make such order for the payment of costs as may be just.

**8393. INDENTURE NOT ASSIGNABLE—MASTER'S DEATH OR REMOVAL.**—The indenture shall not be assignable; and the death, or removal from the state, of the master or mistress, shall discharge the apprentice from all further obligations; but, in case of removal, such discharge shall be optional with the apprentice.

**8394. LIMITATION OF ACTION.**—No action shall be commenced on any indenture after two years from the expiration of the term of service.

**8395. HOURS FOR LABOR.**—The master shall not compel any apprentice to work more than ten hours a day, unless he pays him an additional compensation for the same.

## ARCHITECTS TOLD THEIR SUCCESS IS CLOSELY LINKED UP WITH THAT OF AGRICULTURE

### Professions and Businesses More Vitally Dependent Upon Prosperity of the Farmers Than is Generally Recognized

Since the cities do the big building construction volume it is only natural that the profession of architecture is more generally concerned about metropolitan affairs rather than about rural business conditions and the welfare of agriculture and its interests. However, Indiana architects at the mid-winter meeting of the state society of architects were impressively reminded that their prosperity depends largely on the success or failure of the agricultural industry, by Prof. G. I. Christie, head of the Agricultural Experimental Department, Purdue University who spoke on "Building Communities." Agriculture's intricate relationship to business, and visa versa, in this complex age in which we are living, was most interestingly traced for the architects by the speaker to demonstrate that if agriculture prospered, there was greater building effort put forth all along the line and the architects benefited accordingly, and then again, if agriculture slumped, so did business, building operations declined and thus affected the architectural profession. Too, with the rural communities thriving there resulted an added volume of building in the way of schools, churches and better homes.

Seldom is such an intimate touch of the influencing ramifications of the great industry of agriculture given to architects for consideration. We of the city are too prone to neglect a serious thought to the importance of this subject which in this day and age is as vital to our welfare as are the mercantile or industrial industries.

Prof. Christie acknowledged the pleasure that was his for the opportunity to address the Indiana architects, the men who design, plan and make possible the modern buildings in which are incorporated the greatest and latest utilitarian features, conveniences, and methods to advance the health and welfare of the citizenry of the state.

He said what was needed most these days was a closer contact between the farmers and city folks, the men of industry, mercantile walks and the professions. The problems of agriculture will never be solved until that closer contact is formed that a greater degree of understanding may be established between city and country folks.

In part, Prof. Christie said:

"Reference was formerly made to the 'independent farmer,' but his day is over, there is no such being today. He used to grow all his food, make his own fabrics for clothes, but times have changed; he can no longer live unto himself. Today he is dependent on others, he is a business man who sells his products; he is working at the job of farming on a business basis; he specializes on products and exchanges them with others for profit.

"The greatest trouble with agriculture is that there are men in it who don't know how to handle money and for the same reason as business in the city goes bad just so with farmers.

"The farm is one of the big buying powers, it brings new wealth into the world annually, wealth that was never here before and if those products can't be sold at a fair profit other business interests suffer, they are all interlocked with farming. The farmer is needed to buy the product of the industries of the city and we of the city and those of the farm must get together and work out the solution that will benefit agriculture, for it determines business."

## ARCHITECTS INVITED TO ENTER A NATION-WIDE CONTEST

### Architectural Forum Asks For Plans and Offers Prizes—Gypsum to Be Used

Architects, draftsmen and architectural students throughout the country are invited to participate in a competition in designing fireproof small homes with exterior walls of stucco, which is being conducted by The Architectural Forum of New York City. The contest is approved by the American Institute of Architects, and will close April 15.

Prizes of $500, $300, $200 and $100 will be awarded by a jury of leading architects to the winning designs in each of two classes, and ten honorable mentions in each class will receive $50 apiece. Class A is for five-room bungalows and Class B, for six-room two-story houses.

Service to the family that wants an attractive, fire-safe, structurally sound home—economically—is the object of this competition. The Architectural Forum's announcement states that "the hypothetical tenant of either of these houses will be an average small American family of moderate means and without servants." In both cases the exterior walls must be of stucco, brick, stone, shingles or siding. The total cost must not exceed 50 cents a cubic foot.

Purposes of the competition are stated as follows:

"1. To encourage further a higher standard of design and plan of the average American home which, because of its moderate cost, is often built without the benefit of competent individual architectural service.

"2. To introduce widely a new form of fire-resisting permanent and economical construction through the use of structolite concrete construction. This is an improved method of fire-resistive construction for walls, floors, partitions and roofs, adaptable for all classes of buildings. Structolite concrete is a mixture of structolite, a form of gypsum possessing great structural strength, with various recommended aggregates to form a rapidly setting mix for pouring monolithic construction." The resultant construction gives a fireproof home of high insulating value, thoroughly soundproof, at a cost within the purchasing power of almost any builder.

# Build with the Builders

## ORGANIZATION AND CURRENT NEWS

### INDIANA BUILDING LAWS

(Continued from page 5)

8396. MANUAL-LABOR SCHOOLS MAY BIND.—Any manual-labor school organized and incorporaed under any general or special law of this state is hereby authorized and empowered to accept and execute indentures of apprenticeship, according to the provisions of the statute in such case made and provided, and to have the same rights and assume the same liabilities thereunder as in case of natural persons.

8397. EXECUTION OF INDENTURES.—Such indenture shall be executed for and in the name of such corporation by the trustees thereof, or by some officer or person thereunto authorized by such trustees; and such trustees shall be personally liable, during the existence of such indentures; or until a legal transfer thereof shall be made, as hereinafter provided, for the performance of all covenants and agreements therein stipulated to be performed by such corporation.

8398. TRANSFER OF INDENTURES.—It shall be lawful for such corporation, by and with consent of such apprentice and parents, if living in this state, and upon order of the judge of the circut court for good cause shown, to transfer any indenture, taken pursuant to this act, to any person of lawful age, and capable of contracting: Provided, That such trustee shall be made by an agreement in writing executed by the trustees or by some officer or person authorized by them, and also by the transferee, be approved by the judge of the circuit court, and contain an agreement on the part of such transferee, to assume and be bound by all the covenants and obligations in such indenture stipulated to be performed by such corporation; which said agreement shall be executed, acknowledged and recorded in the same way and manner as is by law provided for the indentures themselves.

8399. RIGHTS OF TRANSFEREE.—Upon the execution of such agreement in manner and form as aforesaid, the transferee of such indenture shall at once be invested with all the rights and powers, and become subject to all the duties and obligations created by the said indenture, the same, to all intents and purposes, as though such transferee had been the original party to such indenture instead of such corporation.

#### Personal Responsibility Involved

Now, gentlemen, here is an act and law that has been on our statute books since May 6, 1853. This is one of the burning subjects of the day. Since the war you have had heralded in the press that no young men are going in or learning the building trades. Everybody is running wild about the apprentice question. Every organization is moving towards the apprentice question. What is the situation in your respective lines? What are you bosses doing towards increasing the building trades mechanics?

I think it has been said that in the plastering trade only a few boys are learning the trade. The plasterers are called the "Grandfathers Club." Are we approaching the time where we are forgetting our obligation to try to do our part? Each man has an individual obligation to perform. That is the law made years ago. Of course, we understand the transformation possibly of numerous and various trades, but as our civilization has grown our men have had to become specialists. Some law firms give more attention to trial of different classes of cases. Some go the other way. So in the progress of time the trades have been divided and separated until we have about twenty-two different groups or trades. Each of them has to be rehabilitated from time to time by our own bosses and all of you have a personal responsibility.

#### Some Are Getting Results

It has been my good fortune to be associated with the Mason Contractors' Association of the United States and Canada in their drive during the last few years to encourage apprentices. I am proud to say that they have been getting results. More than 11,000 boys are now entered and indentured. I am further interested along that same line to know that the government in a recent communication from the Federal Agent of Vocational Education, of which Mr. Hoover is the active head, on the subject of bricklaying has favorably commented upon the agreement between the association I represent and the men on the other side and has quoted section after section with their approval in this pamphlet. They have said throughout that a boy or child must have skilled training, and he can not be an efficient mechanic until he has had training under experienced mechanics.

A friendly and co-operative relation between employer and employe is advanced as one of the best things toward relieving the building conditions of today. In this respect there as been created an arbitration tribunal of our Mason Contractors' Association and the Bricklayers' Association to study their problems. They have created an appellate tribunal also to study these matters in a different way. This matter is commented on favorably by our government. Have you stopped to deliberate upon this apprentice question?

#### Ranks of Craftsmen Must Be Rehabilitated

While I am not a farmer, everybody is talking about the farmer. The wide awake farmer of today, when he tills his ground and takes off his crops, certainly puts fertilizer back in the soil so he may have productive results. Did you ever stop to think that our building public and our people engaged in this building business are sapping the strength of the soil without putting anythink back? Men, if you do not rise up and watch this problem you are going to get to the place much like the one in Indiana, in the Southern part of the state, where they are now suggesting an act in the legislature for the need of reforestation, saying the land is run down and desiring the state to vote an appropriation to put out trees, to go back and do what ought to have been done at the start.

If you take out, put something back. The same thing is true in your Association here. This fact was brought to my attention day before yesterday. A lawyer friend of mine in this city, a most prominent and distinguished lawyer visited our office. He said, "Boys I am glad to see the way you work. This law business is a zealous master. You get only what you put in it. You get no return unless you work at it." Isn't that true of your business? If you don't rehabilitate this business it will come to a most serious situation before long."

(Editor's Note:—This, the first article. Other touching on Mechanic's Liens, Workmen's Compensation, Insurance, Jurisdictional Awards, Etc will follow.)

# Calumet District

## TWENTY MILLIONS OF DOLLARS WORTH OF INDUSTRIAL CONSTRUCTION WORK TO BE STARTED THIS SPRING

### East Chicago to See a Great Building Movement

Springtime will see East Chicago in the midst of a gigantic industrial expansion program.

Nearly $20,000,000 worth of new work is scheduled to begin at the various local plants in the current year.

The following improvements have already been authorized by East Chicago and Indiana Harbor interests to be made in 1925:

Inland Steel, $8,000,000, to build new blast furnace, boiler station and electrification of old works.

Universal Portland Cement, $3,000,000 to construct new harbor, docks and additional mill.

Youngstown Sheet & Tube, $5,000,000, to erect continuous bar and skelp mill.

Hubbard Steel, $350,000, to erect large machine shop.

Standard Oil, $1,000,000, for erection of new storage tanks on East Chicago side of refinery.

The proposed improvements reflect the advantages of the Calumet District as an industrial center because of its geographical position offered from a production standpoint. The great lakes and wonderful railroad facilities east, west, north and south lend almost unlimited possibilities for bringing in raw materials for later distribution as finished products to the countries markets.

## CONTRACTORS ASSOCIATION AT HAMMOND NAMES OFFICERS FOR THE ENSUING YEAR

### J. Wesley Reed Elected President

The annual meeting of the Building Trades Employers' Association of Hammond held at the association rooms, 108 Citizens National Bank Building, attracted quite a crowd and proved an interesting affair. In addition to a discussion of building conditions various reports were made by sundry committees which showed the organization to be in a thriving condition. Then, too, the annual election was held, resulting in the naming of these men:

President, J. Wesley Reed.
1st Vice-Pres., Rufus Danner.
2nd Vice-Pres., Vergil Walls.
Treas., J. W. Beckman.
Directors—(2-Year Term):
H. L. Morris.
L. J. Granger.
M. A. Dickover.

## CALUMET BUILDING PROGRESS

Supt, Hammond who will have charge of the erecting of the Lloyd building at Hohman & Russell Sts., made us a pleasant call this week. Excavating for this structure is to be started at once. The Public Construction Co., has the contract for the excavating, and Leslie Colvin of Indianapolis has the general contract.

The Neilson Development Company has considerable work in course of preparation. The most advanced projects, now in the plans in preparation stage are: Flat Building, 2 sty. & bas., 37x72, brick construction, English design, at Whiting for Mac Sherman; also a similar building for Kaplan and Kaplan, Whiting. Both owners will receive bids and award separate contracts.

Archts. J. T. Hutton & Son, Hammond, are preparing plans for R. H. McHie, for an L shaped garage on S. Hohman St., and also an entrance on Ogden St. The contract has been awarded tentatively to the Federal Building Corporation of Chicago.

Anderson & Winbad, Chicago, were the successful bidders on the contract for the construction of the new addition to the Straube Piano Co., plant.

The directors of the Central Lumber and Mill Co., have taken under advisement the bids submitted recently for the erection of a new warehouse and an addition to the mill.

E. E. COLE.

# FT. WAYNE

## WASHINGTON'S FAITH IN FT. WAYNE TERRITORY BEING EXEMPLIFIED BY THE HUSTLING PRESENT DAY CITY

### Little Did He Suspect to What Extent His Predictions Would Carry

The recent rolling around once more of George Washington's birthday recalls to mind that, according to the records, he saw in the territory where Ft. Wayne is now located great potentialities for future development and referred to it as an important spot for the country. Those were in the days before our great transportation facilities were started, away back in 1785, and little did Washington dream of the stalwart city, Ft. Wayne, that would arise to verify and fulfill his anticipations regarding the then unbridled wilds west of the Ohio river.

Today Ft. Wayne with her great industrial and commercial interests and her steady, healthy, building expansion, that runs into the millions of dollars each year is a living counterpart of part of the great dream, come true, that Washington had. And it is a source of pride to Ft. Wayne citizens to know that the Father of Our Country had such an undying faith in and hope for the future of Ft. Wayne and its environs; further, it is a source of gratification to feel that they and the locality are living up to the vision George Washington possessed.

## HARD TO KEEP UP WITH THE CITY'S ACTIVE EXPANSION

### Map Makers Put To It To Produce Complete Up-to-the-Minute Lay-Outs of Ft. Wayne

Because of the rapid growth of Ft. Wayne, it has been observed that any map of the city, while continuing to be useful, soon gets out of date.

Not only is this due to subdivision development but because of the opening of streets in the older parts of the city to meet modern conditions. Just as it is now difficult for even the most active citizen to know personally more than a small fraction of the men now engaged in business in the downtown district, so are the unknown names of streets becoming so numerous as to cause the nativeborn resident to feel that he is in a strange city.

***Start this afternoon and run out in any direction, to the outskirts of town and notice the many new homes going up and you will be surprised by their beauty and the many modern conveniences that are now considered indispensible to the modern home-owner. Places that were newly marked out subdivisions only two years ago are completely built up today. Try and buy one of these places and you will find that they have increased in value from twenty to fifty per cent, and they were built only a couple of years ago.***

Notice is hereby given that sealed bids will be received by the director of the state highway commission, at the office of the state highway commission in the State House, city of Indianapolis, Ind., until 10 A. M. on the 17th day of March, 1925, for the construction of certain highways and described as follows:

**No. 1**—F. A. No. 21, Sec. A and E—Louisville road, Marshfield to Carter's Corner, except completed parts, Jackson and Scott counties, 9.467 miles.

**No. 2**—F. A. No. 46, Sec. A—Pendleton pike, Marion county line to Fortville, Hancock county, 6.024 miles.

**No. 3**—F. A. No. 46, Sec. 8—Pendleton pike, Fortville to state road No. 11, Hancock and Madison counties, 5.952 miles.

**No. 4**—F. A. No. 46, Sec. C—Pendleton pike, state road No. 11, to Anderson, Madison county, 8.312 miles.

**No. 5**—F. A. No. 72, Sec. A—Anderson-Muncie road, Anderson to two miles north of Daleville, Madison and Delaware counties, 5.704 miles.

**No. 6**—F. A. No. 72, Sec. B—Anderson-Muncie road, two miles north of Daleville to 1 mile west of Muncie, Delaware county, 6.425 miles.

**No. 7**—F. A. No. 73, Sec. A—Anderson-Marion road, Kilbuck creek to three miles south of Alexandria, Madison county, 4.303 miles.

**No. 8**—F. A. No. 80—Connersville-Cambridge City road, Connersville to Cambridge City, Fayette and Wayne counties, 10.477 miles.

**No. 9**—F. A. No. 83, Sec. A—Anderson-Marion road, Alexandria to Fairmount, Madison and Grant counties, 7.021 miles.

**No. 10**—F. A. No. 82, Sec. B—Anderson-Marion road, Fairmount to two miles south of Marion, Grant county, 4.981 miles.

**No. 11**—F. A. No. 89, Sec. A—Elkhart-Middlebury road, three miles east of Elkhart to Middlebury, Elkhart county, 9.811 miles.

Combination bids will also be received on the projects listed below for which proposals will be furnished:

**No. 2 and 3**—F. A. No. 46, Secs. A. and B., Pendleton pike, Marion county line to state road No. 1, Hancock and Madison counties, 11.976 miles.

**No. 5 and 6**—F. A. No. 72, Secs. A and B—Anderson-Muncie road, Anderson to one mile west of Muncie, Madison and Delaware counties, 12.129 miles.

**No. 9 and 10**—F. A. No. 83, Sec. A and B—Anderson-Marion road, Alexandria to two miles south of Marion, Madison and Grant counties, 12.002 miles.

Bids will be received for three types of pavement—brick, bituminous concrete and concrete on the above listed projects, as shown on plans and described in standard specifications for same.

Cement for the above listed projects will be furnished the contractor by the Indiana State Highway Commission.

J. D. WILLIAMS, Director,
Indiana State Highway Commission.

ENGINEER

Desires to connect with some large Plumbing and Heating concern. Qualifications are, practical, college, superintendent, estimator and engineer of 18 years experience at plumbing, heating, sprinklr, and oil burning systems. At present employed; married and will start at a salary of $60.00 per week for trial period. Address Box 20, Indiana Construction Recorder, 312 E. Market Street, Indianapolis.

**Construction Superintendent:—** Desires position with general contractor; 25 years experience in different lines of building construction. Can furnish the best of references, also recommendations covering the past twenty years in this territory. Just completed a large Township School project. Address Box No. 12, Indiana Construction Recorder, 312 East Market St., Indianapolis.

# Sealed Proposals

### SCHOOL BUILDING
### NOTICE TO CONTRACTORS

Sealed bids will be received by Edgar Beatty, Trustee of Barton School Township, of Gibson County Indiana, at the Somerville Bank, at Somerville, Ind., until Saturday, March 28th, 1925, at two o'clock P. M. and then opened for the following:

A new five-room grade school building at Somerville in said township, and a new eight-room high school building at Mackey, in said township; also for the heating, wiring and plumbing of each of said buildings, all in accordance with the plans and specifications for each of said buildings, now on file at said bank and at the office of the County Superintendent of Schools at Princeton, Indiana, the estimated cost of which said improvement at Somerville, including the heating, wiring and plumbing, is Twenty-one Thousand Dollars, and the estimated cost of which said improvement at Mackey, including the heating, wiring and plumbing, is Thirty-five Thousand Dollars.

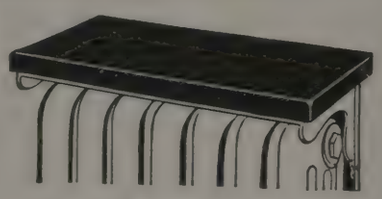
Bids for the construction of each of said buildings and for the heating, wiring and plumbing of each of said buildings will be received separately, or bids for all the work as a whole for either of said buildings will be received.

All the bids must be submitted on Blank Form No. 96, prescribed by the State Board of Accounts. Each bid shall be in a sealed envelope, with writing thereon plainly indicating the character of the work to which the bid relates, as for example: "Bid for heating the Somerville School Building."

Each bid must be accompanied by a certified check for two (2%) per cent. of the minimum bid. The check must be drawn payable to the order of Edgar Beatty, Trustee of Barton School Township, Gibson County, Indiana.

In case a bidder whose bid shall be acceptable shall not within five (5) days after notice of such acceptance comply with his bid by entering into a written contract with said Trustee in accordance with his bid and the provisions of the plans and specifications, his certified check and the proceeds thereof shall be and remain, the absolute property of said township as liquidated damages for such failure, it being impossible to etsimate the amount of damage such failure would occasion to said township.

The contractor shall execute a contract meeting the approval of said trustee. The right is reserved to reject any and all bids.



Dated this 19th day of February, 1925.

EDGAR BEATTY,
Trustee Barton School Twp.,
Gibson County, Indiana.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given that the Board of School Trustees of the City of Greenfield, Indiana, will receive sealed proposals for the construction of a certain high school building, to be erected in the City of Greenfield, Indiana, and to be constructed as set out in the plans, specifications, and drawings prepared by Omer P. Gordon, Architect, and now on file for the inspection of bidders at the office of said Board of School Trustees at their office in the high school building in the City of Greenfield, Indiana, at the office of Omer P. Gordon, Architect, Thayer Building City of Greenfield, Indiana, and at the office of the State Board of Accounts in the Statehouse Indianapolis, Indiana.

Copies of said plans and specifications will be furnished bidders by said board upon the deposit with them of Twenty-five ($25.00) Dollars in cash, the same guaranteeing the return thereof in good condition on or before the date of letting said contract.

Said sealed proposals will be received and opened at the office of said Board of School Trustees on the 9th day of March, 1925. Bids or proposals will be received until 10:00 o'clock a. m. on said date.

The building is to be erected on the real estate owned by the School City of Greenfield, Indiana, on the north side of West North Street, between Wilson and School Streets in said city. Each bidder must file a certificate with his bids that he has complied with Section 68 Workman's Compensation Act.

Each bid shall be accompanied by a bond in the sum equal to the amount of the bid filed for such construction, such bond to be to the approval of said Board of School Trustees, or in lieu thereof, said bidder may file his certified check payable to said board in an amount equal to five per cent of his bid, guaranteeing that the successful bidder will within 10 days after the contract is awarded enter into a contract for the construction of said building, and will execute his bond guaranteeing the faithful performance of said contract. And will at the time of entering into said contract furnish a bond in a sum double the amount of saidcontract, with surety thereon to be approved by said board. Each bid must be accompanied by a non-collusion affidavit, and upon failure to submit said affidavit such proposal or bid will be rejected. The Board of School Trustees reserves the right to reject any and all bids.

Dated this 12th day of February, 1925.

## "BC" Series Up-Draft Smokeless Boiler

Patent Pending

Prox Boilers are equipped with a top header, which is a positive steam separator, assures dry steam carrying maximum number of B. T. U.'s Water boiling up will not go into main and cause water knock, no matter how hot a fire may be in any part of boiler. A side connection to this header with natural drain to rear of boiler discharges all water and condensation to side headers. This is only one of the many superior features of Prox Boilers.

PROX UP-DRAFT SMOKELESS BOILERS

Burns all grades of fuel, such as bituminous coal, lignite, coke, oil, gas, wood.

Capacities - 1750 sq. ft. to 22,800 sq. ft. steam

VOL. VI INDIANAPOLIS, INDIANA, MARCH 7, 1925 No. 49

## DEVIATING FROM THE LAW, COUNSELOR FOR THE A. B. C. OF INDIANA TOUCHES UPON THAT GREAT IMPEDIMENT TO BUILDING CONSTRUCTION PROGRESS— JURISDICTIONAL DISPUTES

### Asserts It Is a Problem That Must Be Solved If Building Operations Are to Move Along With a Minimum of Interuption

"One of the most annoying features to the successful prosecution of building construction work has to do with jurisdictional disputes between the crafts, and things have reached the stage where that foolishness is getting under everybody's hide. Has that fact ever occurred to you? A great deal of attention has been turned in that direction in an effort to study the problem, analyze it and solve it.

Just what right or property right has a man in his trade? Just what are his rights. Take the sheet metal man, iron worker and carpenter. They say to one another, "You don't do this, you don't do that. That is mine." Where are we getting under such conditions?

There is the International Board of Jurisdictional Awards. It has done their good deeds. In some respects I feel that the board has not sufficient strength or it has not sufficient attachments by agreement or otherwise to make it effectual. Are we not all tired and sick of this trouble? What are we going to do? We can not deal with these problems, men, single handed. We must act as a body and it is going to require real grey matter to solve this question. You are all familiar with the trouble of the sheet metal men and carpenters about the metal trim question. I have a new one for you. At Ceveland on the Moreland Court Apartments they have had some real problems developed. The Van Swearingen boys who have taken over the Nickle Plate System, are also real estate men. They are building an enormous apartment house in Cleveland. At the time of the trouble in question 80 bricklayers were working on that apartment house. I understand there was a fancy cast mantle that was to be placed in these apartments. I believe the plasterer started in to do the work, and the bricklayer said "That belongs to me." The marble man says "That belongs to me." The result was that the job stopped. Finally the bricklayers went back on the job with the understanding that the Jurisdictional Award Board would make a practical application and demonstration on the job of their decision.

A decision could not be reached at Cleveland by the representatives of the Jurisdictional Award Board, and it was decided to have a full Board meeting at St. Louis. Then they shipped all the men down to St. Louis, the bricklayers, plasterers, marble setters and everybody on the job and erected a mantle before the Board, each craft demonstrating their reason for believing the job was theirs. In the meantime the bricklayers were back on the job performing their part of the work. Finally the Board gave it to the bricklayer.

Everybody thought that would end the trouble in the Moreland Court Apartments, but such was not the case. The plasterers bucked; they only put one boss and two boys on the job. Their men and plasterers have had other business and are somewhere else. They are sick. In the meantime there the job hangs. What are we going to do? We must put real brain matter in this thing and get the adjustments of these disputes settled. I think these are real questions for your consideration."

(Editor's Note: This, the second article taken from a speech made by Attorney Harry A. Fenton before the Associated Building Contractors of Indiana at Indianapolis recently. Others touching on Mechanic's Liens, Workmen's Compensation, Insurance, Etc., will follow.)

## INFRINGEMENT OF PATENT AND VIOLATION OF COPYRIGHT ALLEGED IN SUITS BROUGHT IN U. S. DISTRICT COURT

### Heating and Ventilating Specialties Are Involved

Two suits of interest to the building industry of Indiana have been filed in the United States District Court at Indianapolis in which alleged violations of patent and copyright are involved.

The suits have been filed by C. C. Shipp, Indianapolis against Herman F. Zietlow, Mary A. Zietlow and the Herman F. Zietlow Company, Indianapolis, alleging that the defendants infringed on the patent under which the plaintiff manufactured connections for ventilating box bases for direct indirect heating and ventilating systems. Further, it is alleged that the defendant marketed the infringed patented articles and a permanent injunction is asked against the defendants to prevent them from further infringement. Also an accounting and damages are asked, amounting to three times the profits alleged to have been derived illegally thru infringement of the said patent.

Shortly after the filing of the complaint in the above suit another separate complaint was filed by C. C. Shipp against the same defendants alleging that they had reproduced the contents of a catalogue, reading matter, cuts and confidential discount sheets to jobbers upon which he held a copyright and that they had circulated these catalogues for the solicitation of business.

In this case also he asks that a permanent injunction be granted against the defendants to prevent further infringement upon the rights of the plaintiff under said copyright. An accounting is sought relative to the number of catalogues, books, circulars, inserts and discounts in question that were printed

## ACTION BY INDIANA ARCHITECTS ACKNOWLEDGED BY UNITED STATES SENATOR

### Thanks Indiana Chapter, A. I. A., For Endorsement of His Bill

Recently, when Senate Bill 4253, to create a Federal City Planning Commission for Washington, introduced in the United States Senate by Senator W. H. King of Utah, was brought to the attention of the Indiana Chapter, American Institute of Architects, the members voted to go on record as endorsing same and passed a resolution to that effect. A copy of the resolution was forwarded to Senator King, who the past week replied, thanking the Indiana architects for the stand they had taken.

He also enclosed the report made on the bill by the Senate Committee on the District of Columbia, which reads as follows:

"It has long been realized that the District of Columbia is without an adequate and comprehensive plan for the orderly physical development of the Federal city.

"The effectiveness of modern city planning comes from the coordination of the different factors in city development—the street system, the parks, playgrounds, school sites, zoning districts, bridge locations, and water-front improvements. If these elements are developed without proper correlation we have a scrambling, inconvenient, and poorly integrated city.

"Washington was fortunate in having been established on the L'Enfant plan, but this original plan covered but about one-sixth of the area of the present District of Columbia.

"The park plan of 1901 caused the revival of the L'Enfant plan, particularly as to the park system, but of 53 areas recommended at that time for acquisition as park sites but 6 have been acquired in the intervening 24 years.

"During this period the population of the District of Columbia has doubled. It is reasonable to be anticipated that in the next 25 years the undeveloped area within the District of Columbia will be occupied. No one can observe the awkward and scrambling street system which is being extended over the hills surrounding the area covered by the L'Enfant plan without being impressed with the imperative need of an intelligent and rational scheme in conformity to which both public and private improvements in the District of Columbia and environs shall be projected and constructed. The highway system especially demands intelligent study. Motor traffic has brought new problems which must be accommodated.

"The old highway plan is obsolete and the park plan has never been coordinated with an adequate highway plan. Many things have been done and are being done which are inconsistent with the accepted principles of modern city planning. Flagrant errors have been made which require correction. The Key Bridge, for example, projected and constructed without provisions for adequate approaches and connections. Other cities of less importance than the Capital of the country, are expending large sums to correct the mistakes of the past and to establish plans for potential improvements and development. The great Federal city established as the seat of government should become the most beautiful and well arranged capital in the world. The physical development and improvement of the city are under the direction of a number of distinct departments which pursue distinct policies. There is no planning commission to lay down practical lines for orderly improvement, to prevent the overlapping of functions, and to forestall the recurrence of mistakes which have been made in the past because of lack of foresight and proper city planning.

"It is especially urgent at this time to take measures to better adapt traffic ways to existing traffic requirements. Since the highway plan of the District was given technical attention great changes in traffic requirements and usages have taken place.

"Frederick Law Olmstead, Jr., who was retained to advise upon the highway plan for the District many years ago, makes this comment upon the problem as presently presented:

" 'Professional advice about highway plan alone given 30 years ago, even if it had been more influential in perfecting that plan at that time than actually happened, is no substitute for comprehensive planning today or coordinating highways, parks, zoning, and other elements of city and keeping the combination properly revised from decade to decade.'

"Conflicting and inconsistent schemes for the improvement of the District of Columbia are offered at each session of Congress. This session has brought forth suggestions to raise building heights and to lower them, to widen streets, to cut traffic arteries, and to convert parks into parking space for automobiles. A thoroughgoing physical examination is necessary before any intelligent or rational correction may be made. That is the function of the planning commission created by the bill. The commission will not interfere with existing agencies, but through interlocking memberships it proposes to examine each project in its relation to other projects and to general conditions, and to develop lines of activity in the order of their relative importance.

"The country is in favor of the orderly and proper development of Washington as the seat of government. The societies representing the fine arts and municipal planning and engineering professions have been keenly alive to their responsibility for the future improvement and beautification of the Capital. Men of professional eminence have served without compensation as members of the Commission of Fine Arts, which advises the Government as to the location and acceptability of new public monuments and other structures for the embellishment of the city. The professional societies have worked consistently to stimulate public interest and to focus the attention of the country upon the possibilities for the improvement of the Capital, and we are assured that men of the highest technical attainments will be willing to serve upon the Federal City planning commission without compensation and as a matter of professional pride and patriotism.

"The creation of the Federal City planning commission as proposed in the accompanying bill has the approval and support of the American Civic Association, the American Institute of Architects, the American Society of Landscape Architects, the City Planning Institute, and other distinguished groups and individuals throughout the country.

"The Committee on the District of Columbia, having had the question under consideration, therefore report the accompanying bill (S. 4253) to create the Federal City planning commission, and recommend favorable action thereon."

ORGANIZATION AND CURRENT NEWS

## STRANGE WHAT SOME MEN EXPECT

### Demand, Demand, Demand, Yet Seldom Acknowledge That Two Can Play At the Game

One of the greatest problems, probably the most aggravating, that confronts the officers of national, state or local contractors' associations is the matter of finances so that the organizations may properly function in order to give to the members service. The members certainly expect the latter and are demanding that this and that be taken care of. But they grow disgruntled because the association does not do more and yet those same men frequently overlook the fact it takes money to get anything accomplished. Those same men wonder why Labor is so powerful and can always champion the cause of its men so strongly. They fail entirely to appreciate the fact that Union men pay dues and willingly, not only that but promptly, too. The result is that the Unions have adequate funds that permit of action when needed, furthermore, these funds enable the Unions to have capable men on the job all the time taking care of the employes' interests.

How different is the average contractor; the matter of dues to his association is something that sticks in his craw. Frequently to mention the subject to him is like waving a red rag in front of a bull, he will go all to pieces and belittle the association effort and minimize or make negligible its accomplishments. And yet, he will elect men to office, an honorary job purely, and expect them to work out his and the building industry's problems, giving of their time, though he contribute nothing to the cause. When a crisis arises he rushes in for the protection of the association and expects the organization to be fully prepared to meet the emergency.

It really is poor sportsmanship on the part of many contractors to ask so much, yet cause the officers, who volunteer their services, to be compelled to spend time pleading for funds, dues, to keep the association going. It is a shame that in an industry as large as the building contracting business the contractors should be so careless about organization and the financial means necessary to carry on the work destined to protect their interests and the conditions that mean prosperity or dull times for them.

Were it not for the sincere men of foresight who labor along under a handicap to keep the organization movement alive, kindled by an appreciation of the chaos that would follow should no effort at unity exist, there is no telling where conditions would drift.

That being the case, why turn the associations into collection agencies for dues when the time could be turned to much greater advantage by disposing of really vital matters concerning the industry if each contractor would shoulder his burden, a burden that has been reduced to a minimum?

## Calumet District

### WAITED TILL IT WAS ALL OVER

#### Outside Contractors Not Interested Till the Shoe Pinched

Now they are yelping.

Some of the outside contractors who apparently had nothing in common with the local contractors' association while the negotiations with the carpenters were in progress have come to with a start and seem to realize they were "asleep at the switch."

They are howling about the agreement reached and are wondering why they weren't consulted. They turned a deaf ear on the local association and showed no inclination to co-operate when such action would have been welcomed, and now they are nursing quite a peeve.

For years the local contractors tried to save the local situation only to hold the bag in the end. No longer are they doing that, they are not picking anybody's chestnuts out of the fire these days.

### ON THE JOB

#### Calumet Contractors Working Together

The General Contractors Council of the Calumet District held a regular monthly meeting March 2, and went into several important matters concerning the local building situation. The council is keeping a close tab on things this year and has things pretty well in hand. All of which means there is not so much groping around in the dark as in former times.

### FEBRUARY PROVED IRKSOME

#### Winter Windup Got Under the Hides of Hammond Builders

Some of the boys are figuring on following the swallow next fall. Things moved along fairly well till February, then it began. A dog doctor on a hurry up call crashed into a new car of one of "the boys," then a lot of colds cropped out and now rheumatic complaints are being murmured about. A few more weeks, though, and the sunshine will be making us forget our winter aggravations.

### CALUMET BUILDING PROGRESS

Archts. Berry-Wainwright & Co., Hammond, is preparing plans for a new heating plant and four additional class rooms for a school at Highland, Ind. The same firm of architects will receive bids March 20, for the Thornton Township School at Calumet City, Ill.

General contractor John R. Rahn, East Chicago, was awarded the contract for the construction of the Juergens storage buiding on Douglas street, Hammond. It will be fireproof construction and is estimated to cost $41,000.

The Modern Bakery Co., awarded the contract to Hilbrick & O'Conner for its new building. Estimated cost, $15,000.

Architect Mac Turner, Hammond, is working on plans for a new residence for Lois Roth. Bids after March 15. The building will be two story and basement, 25x34, with face brick and terra cotta trim.

E. E. COLE.

# EVANSVILLE

## BUILDING ACTIVITIES SHOW A BIG PICKUP

### February Movement Far Exceeds That of January and Trebles Figures of February, 1924

The month of February witnessed a triple increase of business in the office of Building Commissioner Ed Kerth over the corresponding month of last year, and indications are that the year 1925 will see new records reached in local building activities.

Two hundred and sixty-five building permits, totaling $354,779, were issued last month as against 89 permits, amounting to $122,736, in February, 1924. Those issued during January, 1925, numbered 216 and amounted to $129,704.

Permits issued last month were as follows:

Old construction and repairs, 61 jobs, $34,261; private garages, 19 jobs, $3,040,261; electrical and plumbing installations, 146 jobs, $28,601; 36 residences, $125,760; six industrial permits, $37,560; permit for one semi-public building, $125,557.

Statistical reports for February show a decided increase in all lines of building activity and if this can be taken as a criterion, 1925 should prove a banner construction year in Evansville.

# FT. WAYNE

## PERMITS GRANTED IN FEBRUARY INCREASED CONSIDERABLY OVER JANUARY ISSUANCE

### This Year's Building Effort Lagging Behind That of 1924

Though local building figures from the records of the city building inspection department show that there was a stronger tone in building construction circles in February than in January at the same time the issuance of permits and the estimated valuation of the entire month's building volume was considerably in arrears of the February, 1924, business.

Only one hundred and seventeen permits for a total valuation of $66,850 were granted last month while a year ago during the corresponding period ninety-eight permits totaling a valuation of $733,450 were issued. Sixty-five of the one hundred and seventeen permits granted last month were for new homes.

## WELL-KNOWN FT. WAYNE MASON CONTRACTOR DIES

### His Local Contracting Effort Covered a Period of Forty Years

There passed from the Ft. Wayne building field the past week one of the best known mason contractors of the city, and one who had, over his years of effort, done much toward the upbuilding of Ft. Wayne. The man in question was Peter Schenkel, for forty years connected with local building affairs.

He was one of the few remaining organizers of the Ft. Wayne Mason Contractors Association and was, up until his retirement from active business recently because of ill health, an ardent worker in organization effort.

Mr. Schenkel was born in Philadelphia, Pa., sixty-six years ago and moved to Ft. Wayne at the age of twenty-one, taking up masonry at that time and followed the trade throughout the remaining years of his life. Ill health recently forced him to retire from the firm of Peter Schenkel & Sons, the business being continued under the old firm name by his sons.

Having firmly established himself in Ft. Wayne building construction circles the announcement of death caused much regret amongst his contractor associates and others identified with the building business.

# INDIANAPOLIS

## BUILDING VOLUME AT INDIANAPOLIS IN FEBRUARY ALMOST DOUBLED THAT OF JANUARY

### Gain of 97.5% Shown

February building operations at Indianapolis came back strong and fully justified the predictions made during the earlier part of the month that a new impetus was making itself felt in building construction circles.

Both in the number of permits issued and the total estimated valuation placed on same a big improvement was shown over the January building business. During the first month of the year there were 771 permits granted while in February there were 1,125 new projects approved, a gain of 354 permits issued. Then, too, the estimated valuations on last month's new work ran $941,052 ahead of the preceding month's valuations, an increase of 97.5%.

While the February valuations amounted to $1,905,578, a fine record, nevertheless, they were in arrears of the February, 1924, record which amounted to $2,354,162. The figures last year received a big boost when one permit totaling $700,000 for a bank and office building was taken out. However, there were 341 more permits issued in February, 1925, than during the corresponding period in 1924.

The big feature of the recent month's building movement centered around home building activities, 233 permits for an estimated valuation of $897,710, having been issued in February.

An analytical classified tabulation of the various projects approved by the city building inspection department last month shows the following:

| Projects | Per | Est Val. |
|---|---|---|
| Accessory Bldgs. | 127 | $ 30,223 |
| Alts. and Repairs | 608 | 210,987 |
| Apts. and Tenements | 5 | 78,800 |
| Business Bldgs. | 19 | 290,200 |
| Industrial Bldgs. | 4 | 352,000 |
| Miscellaneous Work | 126 | 32,638 |
| Public Bldgs. | 3 | 13,020 |
| Residences | 233 | 897,710 |
| Total | 1125 | $1,905,578 |

## INFRINGEMENT OF PATENT ALLEGED

(Continued From Page 5)

and that all infringing publications be destroyed together with all plates or other means for making same, and that all such publications be impounded during the pendency of this suit. Damages in the sum of $20,000 with costs and attorney's fees are asked in this latter case.

Realty Co., Peoples Bank Bldg. Brick.

*Start this afternoon and run out in any direction, to the outskirts of town and notice the many new homes going up and you will be surprised by their beauty and the many modern conveniences that are now considered indispensible to the modern home-owner. Places that were newly marked out subdivisions only two years ago are completely built up today. Try and buy one of these places and you will find that they have increased in value from twenty to fifty per cent, and they were built only a couple of years ago.*

# Sealed Proposals

### NOTICE OF BOND SALE

Notice is hereby given that the undersigned will receive sealed bids up to 2:00 o'clock P. M. on Thursday, the 26th day of March, 1925, at the office of such Board, the same being in the High School Building located in the Town of Argos, Indiana, for the issue of bonds of such School Town of Argos, Indiana, which mature at the following described dates, in the respective amounts to-wit:

July 15th, 1925, $500.00; January 15th, 1926, $500.00; July 15th, 1926, $1,000.00; January 15th, 1927, $1,000.00; July 15th, 1927, $1,000.00; January 15th, 1928, $1,000.00; July 15th, 1928, $1,500.00; January 15th, 1929, $1,500.00; July 15th, 1929, $1,500.00; January 15th, 1930, $1,500.00; July 15th, 1930, $2,000.00; January 15th, 1931, $2,000.00; July 15th, 1931, $2,000.00; January 15th, 1932, $2,000.00; July 15th, 1932, $2,500.00; January 15th, 1933, $2,500.00.

Such issue shall be in the total principal sum of $24,000.00 shall all be dated January 15th, 1924, shall be in denominations of $500.00 each, and shall bare interest at the rate of 5% per annum, payable semi-annually, provided that no interest shall be due until July 15th, 1925.

That such bonds and the interest thereon shall be payable at the office of this Board, or at such bank in said Town of Argos as the Board may select.

That the purpose for which such bonds are issued is to provide funds to pay upon the cost of the proposed addition to the present school building in said Town of Argos, and upon the proper or necessary items of expense connected with such addition and sale of bonds and these proceedings.

That the total estimated cost of the proposed new addition is $35,000.00.

The right is reserved to reject any and all bids.

The purchaser will be furnished with a transcript of the proceedings under which such issue of bonds is made.

Dated at Argos, Indiana, this 2nd day of March, 1925.

### SCHOOL HOUSE NOTICE TO CONTRACTORS

Notice is hereby given that the Board of School Trustees of the City of Portland, Indiana, will receive sealed proposals for the construction of a certain high school building, to be erected in the City of Portland, Indiana, and to be constructed as set out in the plans, specifications, and drawings prepared by Walter Scholer, Architect, and now on file for the inspection of bidders at the office of the Portland City Schools in the Jay County Court House, in the City of Portland, Indiana, at the office of Walter Scholer, Architect, City of LaFayette, Indiana, and at the office of the State Board of Accounts in the Statehouse, Indianapolis, Indiana.

Copies of said plans and specifications will be furnished bidders by said board upon the deposit with them of Fifty Dollars ($50.00) in cash or certified check payable to School City, the same guaranteeing the return thereof in good condition on or before the date of letting said contract, also the submission of a bid.

Said sealed proposals will be received and opened at the office of said Board of School Trustees on the 30th day of March, 1925. Bids or proposals will be received until 10:00 o'clock A. M. on said date.

Separate bids will be received on the following:

(a) General Construction;
(b) Plumbing;
(c) Heating and Ventilating;
(d) Combination of (b) and (c);
(e) Electric Wiring.

The building is to be erected on the real estate owned by the School City of Portland, Indiana, at the southwest corner of the intersection of Wayne and Water Streets.

Each bid shall be accompanied by a bidder's bond in the sum equal to the amount of the bid filed for such construction, such bond to be to the approval of said Board of School Trustees, or in lieu thereof, said bidder may file his certified check payable to said board in an amount equal to five per cent of his bid, guaranteeing that the successful bidder will within 10 days after the contract is awarded enter into a contract for the construction of said building, and will execute his bond guaranteeing the faithful performance of said contract. And will at the time of entering into said contract furnish a bond in a sum equal to the amount of said contract, with surety thereon to be approved by said board. Each bid must be accompanied by a non-collusion affidavit, and upon failure to submit said affidavit such proposal or bid will be rejected. The Board of School Trustees reserves the right to reject any and all bids.

W. B. MAGILL, Pres. of Board,
W. D. SCHWARTZ.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given that the Board of School Trustees of the City of Greenfield, Indiana, will receive sealed proposals for the construction of a certain high school building, to be erected in the City of Greenfield, Indiana, and to be constructed as set out in the plans, specifications, and drawings prepared by Omer P. Gordon, Architect, and now on file for the inspection of bidders at the office of said Board of School Trustees at their office in the high school building in the City of Greenfield, Indiana, at the office of Omer P. Gordon, Architect, Thayer Building City of Greenfield, Indiana, and at the office of the State Board of Accounts in the Statehouse Indianapolis, Indiana.

Copies of said plans and specifications will be furnished bidders by said board upon the deposit with them of Twenty-five ($25.00) Dollars in cash, the same guaranteeing the return thereof in good condition on or before the date of letting said contract.

Said sealed proposals will be received and opened at the office of said Board of School Trustees on the 9th day of March, 1925. Bids or proposals will be received until 10:00 o'clock a. m. on said date.

The building is to be erected on the real estate owned by the School City of Greenfield, Indiana, on the north side of West North Street, between Wilson and School Streets in said city. Each bidder must file a certificate with his bids that he has complied with Section 68 Workman's Compensation Act.

Each bid shall be accompanied by a bond in the sum equal to the amount of the bid filed for such construction, such bond to be to the approval of said Board of School Trustees, or in lieu thereof, said bidder may file his certified check payable to said board in an amount equal to five per cent of his bid, guaranteeing that the successful bidder will within 10 days after the contract is awarded enter into a contract for the construction of said building, and will execute his bond guaranteeing the faithful performance of said contract. And will at the time of entering into said contract furnish a bond in a sum double the amount of saidcontract, with surety thereon to be approved by said board. Each bid must be accompanied by a noncollusion affidavit, and upon failure to submit said affidavit such proposal or bid will be rejected. The Board of School Trustees reserves the right to reject any and all bids.

Dated this 12th day of February, 1925.

## ANENT THE LIEN LAW

### Importance of This Statute Stressed In Interesting Dissertation Before Joint Meeting of Indiana Contractors.

The lien law is one that contains, or should hold, a vital interest for contractors and others engaged in the building business in that it is aimed to protect their interests. Nor was it overlooked or hurriedly passed over by Attorney Harry A. Fenton, Counsel for the Associated Building Contractors of Indiana when he was discussing "State Laws of Interest to Building Contractors, Sub-contractors and material men at a recent convention of Indiana state contractors.

In getting at the lien feature he said:

"Now, I want to read a section of the laws of more than passing interest. This is like reading the Bible, you have read it many times and each time you read it you find something new. I will read the Section on Mechanic's Liens, Section 8295 of Burns' Revised Statutes:

'That contractors, sub-contractors, mechanics, journeymen, laborers and all persons performing labor or furnishing materials or machinery for the erection, altering, repairing or removing any house, mill, manufactory or other building, bridge, reservoir, system of water works or other structure, or for constructing, altering or repairing or removing of any sidewalk, walk, stile, well, drain, drainage ditch, sewer or cistern may have a lien separately or jointly upon the house, mill, factory or other building, bridge, reservoir, system of water works or other structure, sidewalk, walk, stile, well, drain, drainage ditch, sewer or cistern which they may have erected, altered, repaired or removed, or for which they may have furnished materials or machinery of any description, and, on the interest of the owner of the lot or parcel of land on which it stands or with which it is connected to the extent of the value of any labor done, material furnished or either; and all claims for wages for mechanics and laborers employed in or about any shop, mill, wareroom, storeroom, manufactory or structure, bridge, reservoir system of water works or other structure, sidewalk, walk, stile, well drain, drainage ditch or cistern, shall be a first lien on all the machinery, tools, stock of material, work finished or unfinished located in or about such shop, mill, wareroom, storeroom, manufactory or other building; bridge, reservoir, system of water works or other structure, sidewalks, walk, stile, well, drain, drainage ditch, sewer or cistern or used in the business thereof; and should the person, firm or corporation be in failing circumstances the above mentioned claims shall be preferred debts, whether claim or notice of lien has been filed or not.'

Now, you men, are all pretty familiar with that, and have you ever stopped to think that for years and time immemorial that some form of lien has been given to us, the employee, the man that works with his hands to protect him for his labor? As we move along in our modern civilization its scope has been widened and expanded passing from the employee and including the claims of the material man and of the contractor and sub-contractor provided that within sixty days of the performance of his last labor or material that he files a notice of his intention to hold a mechanic's lien on the property of the owner on which this building is erected, describing the property, naming the owner and filing the same with the recorder of the county in which the building is erected, and then can foreclose his lien through court proceedings, and if he forecloses, the court allows reasonable attorneys fees for such foreclosure. Then the sale, judgment and collection of the money.

Do you know, men, that when they undertook to put the contractor and subcontractor in the scope of this law to give them protection that we had a case that went all the way to the supreme court here? They didn't think a contractor or sub-contractor was entitled to a lien under this statute. There was a contracting firm that had to fight all the way to the Supreme Court against a certain traction company to recover on an electric line built in Indiana. The defendant said this was an act to cover employees; that the contractor did not work with his hands; that he employed men; that he was one step remote. The same thing is true when the material interest comes in. We have had a development along this line, and in every case there is a constant effort to expand the provisions of this law. The lawyer has to analyze these cases to see if he is within the scope of the act.

There is another section here I want to call your attention to. I do not know how many of you have had experience with this other section, but while I am speaking about these two sections, I want to remind you of an article in the paper the other day to the effect that a hotel company declared a large dividend, retired a lot of stock and showed a wonderful earning, about one-half a million or so. My thoughts went back to the time the original structure was erected by a Chicago contractor, who came to this state to erect the building. That was the first time this hidden waiver of lien was introduced in this state. I thought when this dividend was declared little did the people know that twelve or fourteen honest firms went into bankruptcy on the building of the original structure. Fine stuff! Money now declared as dividend taken from those men through hiddent secret waiver of lien. Do you wonder I speak with feeling when I have these things brought to my attention?

Here is another section I want to call your attention to. Section 8302—'Personal Liability of Owner.'

"Any sub-contractor, journeyman or laborer employed in erecting, altering, repairing or removing any house, mill, manufactory or other building, or bridge, reservoir, system of water works, or other structure, or in furnishing any material or machinery therefor, may give to the owner thereof, or, if said owner is absent, to his agent notice in writing particularly setting forth the amount of his claim and services rendered, for which his employer is indebted to him, and that he holds the owner responsible for the same; and the owner shall be liable for such claim, but not to exceed the amount which may be due, and may thereafter become due, from him to the employer, which may be recovered in an action whenever an amount equal to such claim, over other claims having priority, shall be due from such owner to the employer. And any such sub-contractor, journeyman or laborer, by giving notice as above provided setting forth the amount of labor he has engaged to perform, or of materials or machinery he has engaged to furnish in erecting, altering, repairing or removing of any of the buildings or structure (s) above described, shall have the same rights and remedies against such owner for the amount of such labor performed, or materials or machinery furnished, after said notice is given as are above secured and provided, (for those) who serve notice after the labor is performed or the materials or machinery furnished. And whenever an action is brought against an owner, in pursuance of the provisions of this section, all sub-contractors, journeymen and laborers who have performed labor or furnished materials or machinery, and given notice as herein required, may become parties to such action; and if, upon

## LOUIS H. SULLIVAN AS SEEN THRU HIS DRAWINGS

### What One Architect Felt

The series of beautiful pencil drawings by Louis H. Sullivan, done at the close of a long life, illustrate in an excellent way his point of view in art. Architect, writer, philosopher, dreamer, he had a vision of the romance of design, which he called the "scientific-poetic theory"—to the bewilderment of most of his confreres. In the early plates of the series, he gives us the fundamentals of this theory, the seed form, the leaf form, the square, circle, triangle, etc., and develops these to illustrate "man's initial control over materials and their destiny." He shows us the "beginnings of the imaginative element," "the manipulation of the organic," "the plastic changes following nature's method of liberating energy," until, somewhat dazed, we turn with a sigh to the later drawings—the full flower of his imagination.

Whether we think that Sullivan was a great architect or not we willingly admit that his ornament, as typified in these designs, is fascinating. The titles themselves are delightful and reveal the poetic nature of the man. "The Pentagon in Action," "A Geometrical Playground," "Impromptu," "A Study in Virtuosity," "Fantasy," who could read these without bestowing more than a passing glance upon the drawings? And here we find a wealth of imagination and invention that is refreshing. No hackneyed forms, no labored details, but a new art portrayed with a delicacy of touch, a crispness of indication and a mastery of accuracy that is amazing. The method of drawing alone merits the most careful study but it is the power and fluency of design that most intrigues the eye. One constantly detects little details, new motives, worked into the general scheme with a deftness that baffles description. It is like gazing at a snowflake, a bit of old lace, an oriental carpet; always new, always interesting. We feel the absolute freedom from tradition even when detecting here and there a familiar bit, a Gothic cusp, a classic leaf, a Romanesque scroll, but underlying all there is perhaps more of the oriental in its splendor and profusion of detail.

There seems, in fact, to be very little to remind us that this is an architect's art and that this system of ornament was executed in iron, plaster, and terra cotta and applied to buildings. One plate only has an indication of the head of a doorway and it is one of the least convincing. We can more easily imagine the designs worked in silver and gold, a setting for a beautiful jewel, a crown for a proud monarch, than see them carved in stone.

It is, paradoxically, as an ornamentalist that we chiefly know Sullivan although the buildings he designed were almost severe in character with the exception of the characteristic but meagerly applied ornament. He even advocated the abandonment of architectural ornament in favor of a frank and brutal expression of the architectural framework, and yet his imitators tried, with little success, to reproduce his ornamentation. He was perhaps the first to successfully solve the expressional problem of the steel skyscraper and his solution has been largely followed by subsequent designers. But we chiefly think of him as a poet, a visionary, a pilgrim to Parnassus, scattering beautiful designs like leaves along his way. (Ralph J. Batchelder, Indianapolis Architect, in The Monthly Builder of the Art Association of Indianapolis, John Herron Art Institute.)

## HOW ABOUT THE ELIMINATION OF SOME OF THIS GREAT WASTE IN THE BUILDING INDUSTRY?

### Tons of Advertising Matter Prepared At Great Cost Yearly Deposited In Waste Baskets Because of Worthlessness to Architects

If the Advertising Manager of any large manufacturer of building specialties would only spend an hour in the office of any prominent architect and would look over the mass of literature that is daily received by every architect, it is probable that the advertising methods of certain manufacturers would be at once modified.

The matter received varies in size from Deluxe postcards to a three sheet poster and usually varies in color from red to violet; every color in the spectrum being used, and out of the almost incredible total of this kind of matter that daily reaches every architects' office, a most careful search would probably not locate a single item available for filing for future reference.

Approximately 98% of all the advertising matter received is made up of statements and other matter that no architect can possibly afford the time to read.

Advertisers not being contented to bombard the patient architect's office with a monthly circular, are in the habit of mailing the same stuff to the same architect every time his name appears in any trade report in connection with any building project. In the Editor's own experience, he has received the same advertising matter as often as twenty-three times within thirty days. Is it any wonder that the most useful piece of furniture in an architect's office is the waste-paper basket?

If our advertisers would only spend more brains in preparing advertising matter and less dollars in duplicating their advertising matter when prepared, better results would at least be obtained. If any advertiser is laboring under the illusion that every architect, or for that matter, any architect, has the time to read the mass of second and third class mail that daily reaches his office, if he will only call on some architectural friend and look over the "Junk" that daily reaches the professional man's desk, he will probably secure at first hand some valuable information.—(From Monthly Bulletin of the Illinois Society of Architects.)

## Calumet District

### A REAL GO

**Fine New Show House To Be Started At Once**

**A Few Facts**

Plans are completed.

Contracts are let.

Contracted expenditures are $1,650,000.

Theatre to have seating capacity of 3,500.

Ballroom to accommodate 3,000 dancers.

Location State and Sibley streets west of Sohl street.

Promoters Merchants Improvement Association, Samuel A. Schlesinger, president; David Posner, secretary-treasurer.

Ground to be broken at once.

Project to be completed in 1925.

Hammond is to have one of the most beautiful theatres in the United States, comparing favorably with the finest in New York, Chicago and Los Angeles.

Work will begin immediately.

The theater building, which will also house a magnificent ballroom, is to cost $1,650,000.

### ARCHITECTS HAND OUT SOME ENCOURAGING NEWS

**All of Them Announce It Looks As If the Calumet District Was in For a Busy Building Year**

A cheering message has been wafted from the offices of the Calumet architects, without exception they all report many inquiries are being received from prospective builders about various building details preliminary to actually getting a project going. They assert they are quite busy on tentative sketches and preliminary plans which makes prospects for this spring really brighter than were those of the past few years.

Then, too, there is much talk being aired about relative to contemplated work, and if only a fair proportion of the projects anticipated materialize the Calumet District is destined to see a fine volume of construction work put across in 1925.

### ANOTHER PROMISING PROJECT CONTEMPLATED

Columbia avenue, Hammond, will soon have a modern theater, store and office building. The new structure will be located at the terminal of Morton avenue. When completed it will cost $250,000.00, and represents the greatest business improvement yet to be made in that part of the city. It is said to be the beginning of a series of such improvements that will create a new and distinct social and business unit.

### QUITE A CONTRACT

**Hammond Contractors to Move Business Houses Back Without Interfering With Tenants**

"Business as usual," and "no interruption to business," will be the current signs along the south side of W. State St., Hammond for sometime to come, despite the fact that all buildings are to be moved back twenty-five feet and set on new foundations.

A contract for the above work has just been awarded to general contractor, J. Wesley Reed and house mover Friedenfelt with the specification that the operations are to be carried on without disturbing tenants.

### CALUMET BUILDING PROGRESS

R. Elster has awarded the contract to George Bates for the erection of a 1 sty. store building on Sibley st., to cost $10,000.

Archt. Mac Turner, Hammond, is preparing plans for a store building, 2 sty. & bas., 83x126, for J. Laurie. The structure will be located on Columbia ave., and bids will be received after March 25.

The steel frame for the new 10 sty. bank building is about completed and work has been started on the concrete floors.

General Contractor Rufus Danner, is winding up the third floor brick work on the Melton Apartments building.

A fellow hardly knows whether to grab a hammer and start in again or to put his fishing tackle in shape once more since a few spring days have blown in. We just hope they haven't gotten lost and will be caught in another stampede of winter weather. E. E. COLE.

## INDIANAPOLIS

### WHY SUCH A DIFFERENCE?

**Maybe If Birmingham Bricklayers Were Imported Into Indianapolis Field They Would Show the Local Folks a Thing or Two**

It costs $4.82 to lay 1,000 of brick in Birmingham, Ala., and $14.87 to lay the same amount of bricks in Indianapolis, it is reported in the Monthly Labor Review, issued by the Bureau of Labor Statistics of the United States Department of Labor. The field work of this investigation was done in 1923.

The average rate per hour in bricklaying was found to vary in different cities from $1.01 to $1.76, while the productivity in different cities varies to such an extent that it costs more than three times as much to lay brick in Indianapolis than it costs to lay brick in Birmingham.

# Sealed Proposals

### NOTICE OF BOND SALE

Notice is hereby given that on the 11th day of April, 1925, at 10:00 o'clock A. M. the Board of School Trustees of the School City of Portland, Jay County, Indiana, will offer for sale at the office of the Superintendent of the Schools of the City of Portland, located on the third floor of the Jay County Court House in the City of Portland, Jay County, Indiana, an issue of $100,000.00 of bonds of the School City of Portland, Indiana.

Said bonds will be 100 in number, dated April 11th, 1925, bearing interest at the rate of 4½% per annum, payable semi-annually as evidenced by and upon the surrender of the annexed coupons as they severally become due. The first interest coupon of each bond will be for interest from date of issue until May 30th, 1926, others will be semi-annually from that date.

Said bonds will mature and become payable in one hundred equal series as follows: One series consisting of two bonds of $1,000.00 each, due and payable May 30th, 1928, and three bonds due and payable on November 30, 1928, and a like series due and payable on the 30th day of each May and November thereafter until all are paid.

Said bonds have been issued in strict compliance with the laws of the State of Indiana and pursuant to a resolution of the Board of School Trustees of the School City of Portland, Indiana, duly entered of record on the 5th day of August, 1924, authorizing said bonds to be issued for the purpose of providing funds for the construction and erection of a High School Building in the City of Portland, Indiana.

Said bonds will be sold according to law to the highest and best bidder for not less than par or face value.

The right is reserved to reject any and all bids.

# Sealed Proposals

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given that the Board of School Trustees of the City of Portland, Indiana, will receive sealed proposals for the construction of a certain high school building, to be erected in the City of Portland, Indiana, and to be constructed as set out in the plans, specifications, and drawings prepared by Walter Scholer, Architect, and now on file for the inspection of bidders at the office of the Portland City Schools in the Jay County Court House, in the City of Portland, Indiana, at the office of Walter Scholer, Architect, City of LaFayette, Indiana, and at the office of the State Board of Accounts in the Statehouse, Indianapolis, Indiana.

Copies of said plans and specifications will be furnished bidders by said board upon the deposit with them of Fifty Dollars ($50.00) in cash or certified check payable to School City, the same guaranteeing the return thereof in good condition on or before the date of letting said contract, also the submission of a bid.

Said sealed proposals will be received and opened at the office of said Board of School Trustees on the 30th day of March, 1925. Bids or proposals will be received until 10:00 o'clock A. M. on said date.

Separate bids will be received on the following:

(a) General Construction;
(b) Plumbing;
(c) Heating and Ventilating;
(d) Combination of (b) and (c);
(e) Electric Wiring.

The building is to be erected on the real estate owned by the School City of Portland, Indiana, at the southwest corner of the intersection of Wayne and Water Streets.

Each bid shall be accompanied by a bidder's bond in the sum equal to the amount of the bid filed for such construction, such bond to be to the approval of said Board of School Trustees, or in lieu thereof, said bidder may file his certified check payable to said board in an amount equal to five per cent of his bid, guaranteeing that the successful bidder will within 10 days after the contract is awarded enter into a contract for the construction of said building, and will execute his bond guaranteeing the faithful performance of said contract. And will at the time of entering into said contract furnish a bond in a sum equal to the amount of said contract, with surety thereon to be approved by said board. Each bid must be accompanied by a non-collusion affidavit, and upon failure to submit said affidavit such proposal or bid will be rejected. The Board of School Trustees reserves the right to reject any and all bids.

W. B. MAGILL, Pres. of Board,
W. D. SCHWARTZ,
SADIE S. LaFOLLETTE.

FOR SUPPLYMAN CONTRACTOR

VOL. VI INDIANAPOLIS, INDIANA, MARCH 21, 1925 No. 5

## VARIOUS PHASES OF THE WORKMEN'S COMPENSATION ACT SET FORTH.

### Importance of Necessity For Builders To Thoroughly Acquaint Themselves With Ins And Outs of This Law Impressed Upon Indiana Contractors.

There is a law on the Indiana statute books that means much to contractors, it is the Workmen's Compsation Act; it not only protects the employe but the employer as well. All contractors have heard much about that act, and yet, because of its importance and bearing on a construction project, if anything happens in the way of accidents, it is well for builders to be thoroughly familiar with it and its general ramifications.

A few weeks ago at Indianapolis, Attorney Harry A. Fenton when speaking to Indiana contractors made this law one of the high spots in his address when he said, in part:

"You, as employers, all know that you must carry and keep in force your liability for your workmen. This law at the start was looked on as a dangerous law, but it is one of the best that has ever been enacted in this country. It has been wonderful in that it has been productive of good feeling and good spirit between employer and employe. Of course, from time to time the session of the legislature will undertake to amend, modify, alter or change certain parts of the law, and these moves builders must carefully watch.

"There is one section I want to call your attention to in the Workmen's Compensation Act, it is this: Section 14 of the Workmen's Compensation Act which reads as follows:

'The State, any political subdivision thereof, any municipal corporation, any corporation, partnership or person, contracting for the performance of any work without exacting from the contractor a certificate from the Industrial Board showing that such contractor has complied with Section 68 of this act, shall be liable, to the same extent as the contractor for compensation, physician's fees, hospital fees, nurses' charges, and burial expenses on account of the injury or death of any employe of such contractor, due to an accident arising out of and in the course of the performance of the work covered by such contract.

Any principal contractor, intermediate contractor, or sub-contractor, who shall sublet any contract for the performance of any work, without requiring from such sub-contractor a certificate from the Industrial Board, showing that such sub-contractor has complied with Section 68 hereof, shall be liable to the same extent as such sub-contractor for the payment of compensation, physician's fees, hospital fees, nurses' charges and burial expenses on account of the injury or death of any employe of such sub-contractor due to an accident arising out of and in the course of the performance of the work covered by such sub-contract.

That the State, any political division thereof, any municipal corporation, any corporation, partnership, person, principal contractor, intermediate contractor, or sub-contractor, paying compensation, physician's fees, hospital fees, nurses' charges, or burial expenses under the foregoing provisions of this section, may recover the amount paid from any person who, independently of such provisions, would have been liable for the payment thereof.

Every claim, filed with the Industrial Board under this section, shall be instituted against all parties liable for payment, and said Board, in its award, shall fix the order in which said parties shall be exhausted, beginning with the immediate employer.'

"Just a little comment on this act. It requires that every contractor and every owner who engages people to work on his building must require of the sub or general contractor that he comply with the Workmen's Compensation Act, for if he doesn't and an employe is injured he may be liable therefor. Another comment. The act of Indiana seems to be extraterritorial. Our act follows the employe if the employment is made in this state. I have just had an experience long that line within the last two or three weeks.

"You men probably have heard of the Powers and Addy Company, of Indianapolis, and know that they travel around the country from state to state in erecting steel for buildings. At the very start they complied with the Workmen's Compensation Act, and have at all times kept compensation insurance on their men in force. They have been doing some work recently in Kentucky. They paid for insurance in Indiana, and they have paid for insurance in Kentucky, and in every state wherein they operate. They have a copy in their files of the forms required to be filed in Kentucky to comply with the act in Kentucky. It is different than in Indiana. It is elective both ways. Every job has a job register. Every employe has to sign his name on the dotted line before he works and before he is held to have accepted the Act. You may be under the act, but he is not. You have the common law defenses if he doesn't sign. If neither one of you are under the act, the common law defenses are taken away from the employer.

"Powers and Addy erected steel at the Elks Club at Louisville. At the close of the job one of the beams slipped and struck the csaffolding carrying the riveting gang causing one of the men to fall in such a manner that he was badly injured. He was hurried to the hospital. Insurance representatives were informed. They were on the job. The employer was ready to leave, and thought his employee would be taken care of. He didn't follow up the case, trusting that to the insurance carrier as it is his duty. If you have insurance see to it that your insurance carrier promptly renders proper medical attention to your injured employe. About four months after the accident this iron worker brought an action in the courts of Kentucky against the general contractor and the Powers Addy Company for $80,000.00 damages. He alleged a most terrible injury and charged that the Powers and Addy Company had failed to comply with the Workmen's Compensation Act of the State of Kentucky. This thing was battled along until the latter part of July when Powers and Addy were served with notice by

## INDIANAPOLIS

***War Memorial:** (Main Building, monumental), $3,000,000. N. Meridian St., Indianapolis. Archts., Walker & Weeks, 1900 Euclid Bldg., Cleveland, O. Owner, Indiana War Memorial Commission, Paul R. Comstock, Secy., Indianapolis. Owner soon to advertise for bids. Plans nearing completion. Stone.

**Apartment Hotel:** 10 sty., Chicago. Archt., H. Ziegler Dietz, 5 E. Market St., Indianapolis. Asso. Archt., Augustus C. Wilmonns, 35 S. Dearborn St., Chicago. Owner, Albert C. Fuchs, care Associate Archt., who is now receiving bids. Face brk., stone trim, frprf. construction, elevators, steam htg., plmg. fix., baths, showers, lavatories, toilets, elec. fixtures, birch of gum doors and trim.

***High School Bldg.:** $1,500,000, "New Shortridge," 34th St. between Pennsylvania and Meridian Sts. Archts. and Engrs., J. Edwin Kopf & Woolling, 402 Indiana Pythian Bldg.; consulting archt., Herbert Foltz, 704 J. F. Wild Bank Bldg. Owner, Board of School Commissioners, Meridian and Ohio Sts. New contract signed March 16. To start preliminary plans at once. Brick, fireproof constn. To accommodate 2,500 pupils. Further details later.

***Residence & Garage:** $40,000, N. Meridian St. Archts., J. Edwin Kopf & Woolling, 402 Indiana Pythian Bldg. Owner, Albert S. Goldstein, care Archts. Archts. receiving bids till March 28. Face brick veneer.

***High School:** (for colored children), 12th and West Sts., $550,000, 2 sty. & bas., 186x190, a 26 ft. wing. Archt. Harrison & Turnock, 500 Board of Trade Bldg. Owner, Board of School Commissioners, 150 N. Meridian St. Plans in progress. Brick, concrete and steel. Will contain 49 class rooms, capacity of 1,370 children, four study halls with capacity of 370 pupils, an auditorium with seating capacity of 1,000, lunch rooms, science depts., commercial art, music, shops for vocational training.

**Residence:** "Irvington," 2 sty. Archts., Harrison & Turnock, 500 Bd. of Trade Bldg. Owner, H. E. Jordan, care Archt. Preliminary plans in progress. No details yet.

**Church:** (remod. and add.): $50,000, "Irvington." Archts., Harrison & Turnock, 500 Bd. of Trade Bldg. Irvington Presbyterian Church. Archts. selected. Details later.

***High School:** (West Side), $500,000, (capacity 1,500 pupils), 25 class rooms, auditorium, gymnasium, laboratories and shop rooms, at West Washington and Sheffield. Archt. Vonnegut, Bohn and Mueller, Indiana Trust Building. Owner, Board of School Commissioners, 150 N. Meridian St. Plans in progress. Brick, concrete and steel, fireproof construction.

**Store & Lodge Bldg.:** 3 sty., 125x75, Brazil. Archt., Donald Graham, 1126 Hume-Mansur Bldg., Indianapolis. Owner, Eagles Lodge, F. C. Dilley, Chmn., Brazil. Archt. selected. Face brick, re. conc., compo. rfg., steam htg., struc. steel, plmg. fix., elec work., maple and pine floors, copper store fronts, freight elevator. Will contain store rooms on ground floor with social and lodge rooms above, assembly hall, bowling alleys.

**Grade School** (12 rooms): $170,000, School 46. Archt. not selected. Owner, Board of School Commrs., Jacob Hilkene, Supt. of Bldgs., Ohio and Meridian Sts. Contemplated. Plans ordered, to select Archt. soon. Work will consist of 12 class rooms, gymnasium and auditorium.

**Grade School:** (add 8 class rooms, gymnasium and auditorium): $140,000. School 34. Archt. not selected. Owner, Bd. of School Commrs., Jacob Hilkene, Supt. of Bldgs., Ohio and Meridian Sts. Contemplated. Plans ordered, to select Archt. soon.

**Grade School:** (add 4 rooms), $50,000. School 43. Archt. not selected. Owner, Bd. of School Commrs., Jacob Hilkene, Supt. of Bldgs., Ohio and Meridian Sts. Contemplated. Plans ordered; to select archt. soon.

**Grade School:** (add 2 rooms), $25,000, School 33. Archt. not selected. Owner, Bd. of School Commrs., Jacob Hilkene, Supt. of Bldgs., Ohio and Meridian Sts. Contemplated; plans ordered, to select Archt. soon.

**School:** (miscellaneous repairs), $250,000. Private plans. Owner, Bd. of School Commrs., Jacob Hilkene, Supt. of Bldgs., Ohio and Meridian Sts. Contemplated. The following work is to be done on various city schools this summer: Electric lighting fixtures for 48 schools, est. cost, $47,325; plumbing fixtures for 34 bldgs., est cost, $57,000; new blackboards at 15 schools, est. cost, $12,000; roof repairs, est. cost, $43,500; heating and ventilating installations, est. cost, $90,175.

***Undertaking Establishment:** $75,000, 2 sty. and bas., Fall Creek Blvd., near Meridian St. Archt., Fermor S. Cannon, 21 Virginia Ave. Owner, Flanner & Buchanan, 320 N. Illinois St. Archt. finishing plans, will soon be ready for bids. Face brick veneer.

***Church:** $45,000, 69x88, Flora. Archt., L. H. Sturges, 527 Bd. of Trade Bldg., Indianapolis. Owner, Methodist Episcopal Church, G. E. Vorhees, Chmn. Bldg. Comm., Flora, receiving bids to April 1st. Face brick, stone trim.

**Newspaper Bldg.:** 2 sty. and bas., 75x160, Columbus. Archt., Elmer E. Dunlap & Company, 10th and Delaware Sts., Indianapolis. Owner, R. S. Brown, Columbus. Plans in prog. Brk., mill construction, comp. rfg., steam htg., steel sash, elevator.

***Country Residence:** (12 rooms and baths), 2 sty. and bas., "Colonial." 79th St. and Springmill Rd., Marion county, Ind. Archt., Everett H. Crabb, 910 State Life Bldg. Owner, Charles H. Beckett, c/o State Life Insurance Co., State Life Bldg. Archt. receiving bids. Frame.

### Contracts Awarded

***Country Residence & Estate:** $125,000, Near Indianapolis. Archts., Bass-Knowlton & Co., 312 N. Meridian St., Indianapolis. Owner, J. I. Holcomb, 1702 N. Illinois St., Indianapolis. Gen. contr. awarded to Brown & Mick, 226 E. Michigan St., Indianapolis. Stucco over hollow tile, frpf. construction.

***Lodge Bldg.:** $150,000, Millersville. Archt., John Parrish, 418 Castle Hall, Indpls. Owner, F. & A. M., Millersville Lodge, Millersville. Genl. contract let to Ferd Smock & Son, 3228 College Ave., Indpls. Face brick, stone trim. Bids in on elec. work, not awarded. Archt. to receive bids later on steam htg. and plumbing.

***Shop & Office:** 1 sty. and bas., $20,000, N. Liberty St. Private plans. Owner, Staley & Crabb, 346 S. Pennsylvania St. General contractor, Ostrom Realty Co., Peoples Bank Bldg., face brick, concrete block. Htg. and plmg. to I. W.

## COMING INTO ITS OWN

### Art Gaining Recognition Steadily in the Business World

To those interested in the idea of furthering art in industry, architects and others, it will be gratifying to learn that the government has for the first time broadly recognized this principle through the appointment of a Commission by Herbert Hoover, Secretary of Commerce of the United States.

This Commission was appointed to visit the International Exposition of Modern Decorative and Industrial Arts to be held in Paris in 1925, and to report its findings to the Secretary of Commerce for the benefit of the American manufacturers.

In the meanwhile delegates from such trades in which art is prominent are being officially designated by their body to visit the Exposition. The Commission and the delegates will visit Paris in June.

In harmony with the above idea it is not amiss to recall to mind that one who has been deeply interested in the Indiana Society of Architects, J. Arthur MacLean, Director of the John Herron Art Institute, Indianapolis, has been an ardent advocate in that direction. Only recently he made a splendid address at the Mid-Winter meeting of the I. S. A., on "Building With Art" which was reproduced at the time in the Recorder.

However, he goes even farther than building and this week before the Rotary Club at Indianapolis asserted that art is becoming more widely recognized as a factor in the business world.

"Art has never before functioned in the world of business to the extent that it does now," Mr. MacLean declared. "The ordinary business man may scoff at the statement that art does have a part in his affairs. However, that business man, if he is an up-to-date, progressive business man, realizes that appropriate clothing is an important factor in his business relations.

**Good Taste in Attire**

"The well-dressed man, and all good business men today are well dressed, shows an element of good taste in clothing himself appropriately. Good taste is the first fundamental of art."

Mr. MacLean declared that nowhere as in the newspaper business is the trend of business toward art exemplified.

"The newspaper business is one of the most strenuous," he said, "yet even in the rush and hurry of getting out the paper, considerable attention is paid to the making up of the pages in the most artistic manner."

## THOMAS A. WINTERROWD ONE OF THE OLDER INDIANAPOLIS ARCHITECTS AND AN I. S. A. MEMBER SUMMONED

### Had Been Ill For Months

Another member of the Indiana Society of Architects has been taken by death with the passing, March 15, of Thomas A. Winterrowd one of the pioneer architects of Indianapolis. While not an active member of the society the deceased was interested in the organization and retained his membership in it from the time of its inception.

During the earlier years of his practice Mr. Winterrowd was primarily a residence architect and planned many of the finer older homes of Indianapolis. He later went into the larger building field and built quite a few structures in the down town business district and also a number of public buildings.

Forsaking the practice for a time he became city building inspector some years back and served two terms in that capacity. While in office he was instrumental in revising the city building code which is now in use, and he did much to improve the city building inspection department.

Shortly after reentering the architectural field some years back Mr. Winterrowd suffered a serious stroke of paralysis from which he never fully recovered, and for the last eight months he was confined to his bed.

Funeral services were held from his late home Tuesday, March 17, interment following at Crown Hill Cemetery, Indianapolis.

## HERE IS AN INDICATION OF WHAT MAY BE LOOKED FOR IN BUILDING CRAFTS' WAGES

### Far Western City One of the First to Get This Matter Settled

Now that the building season is soon to open attention is being directed toward next year's construction campaign and wage matters are beginning to filter in. San Francisco is one of the first cities to get the major building trades scales for 1925 settled and announces these figures:

Bricklayers, iron workers and plasterers, $10.00 a day. Marble setters, tile setters, plumbers and steamfitters, $9.00 a day. Cement finishers, sheet metal workers and stone cutters, $8.50 a day. Carpenters, electricians, lathers, painters and composition roofers, $8.00 a day. Asbestos workers, stationary engineers and plasterers' hod carriers, $7.00 a day. Bricklayers' hod carriers, $6.50 a day. Skilled labor, $5.00 and common labor, $4.50 a day.

# Build with the Builders

ORGANIZATION AND CURRENT NEWS

## COMPENSATION LAW

(Continued from page 5)

the insurance carrier that they were afraid this case was going to get away from them and exceed their liability and asked them to have their own personal attorneys come into the case. Mr. Ed Powers is a personal friend of mine. He came to me. I went to Kentucky with him and employed another attorney, and we got busy. We had to co-operate with counsel for the insurance carrier. It was a hard job to outline a plan and theory of co-operation in the defense of this case when the insurance carrier desired that my clients stultify themselves and say nothing to the jury that they had compensation insurance though my clients had paid their money for such insurance and protection. I couldn't stand that kind of stuff. We got ready to try this case on the 13th of February. In the meantime, traveling around the country taking depositions. I took the position that this was a compensation case. My clients had paid and had substantially complied with the law in Indiana and Kentucky. The fact of the matter was that this injured employe had worked for the Powers and Addy Company on the track elevation job here in Indianapolis. We were of the opinion that the contract of employment was continuous in operation, even though intermittent as to time and place. The injured employe's attorney, giving this matter consideration, made a request of the Industrial Board of Indiana as to report filed concerning said accident. Our insurance carrier for Kentucky had not reported it to the Indiana Board. After this request for report to the Indiana Board our client was requested to make report, and we filed such report, requesting that the Indiana Board take jurisdiction and see that our injured employe was protected as well as our employer, and we had a New York case for authority. The Industrial Board, acting upon our report and petition, served notice for hearing, and were of the opinion that they had jurisdiction in the case.

"At the outset, knowing that we had done everything necessary to comply with the law, we served notice on the insurance carrier that the Powers and Addy Company would hold them liable for any and all damages, costs and expenses that would have to be paid by reason of the fact that we did not secure the service in the form of the protection for our workmen to which we were entitled. The day before this case was set for trial in Kentucky, and after we had assembled all of our witnesses in Kentucky for trial, the general counsel for the insurance carrier made a trip to Louisville to investigate the situation and he said to his clients, 'You have failed miserably. You have not given Powers and Addy the protection for which they paid, nor have you given the employe the service secured,' and he ordered the case compromised and settled, and the Insurance Company paid $15,000.00 plus all expenses in settlement of said case.

"Are these points worth your while knowing? If you travel in foreign states to do business, you have foreign corporation laws to consider, compensation laws of the various states to watch. I think you should give your careful consideration to all of these matters, before proceeding to the execution of any contract for the erection or construction of any building in any foreign states."

(EDITOR'S NOTE: This is the fourth article of a series taken from an address on Indiana Laws of Particular Interest to General Contractors, Sub-contractors and Material Supply Men, made by Attorney Harry A. Fenton, Indianapolis, Counselor for the Associated Building Contractors of Indiana.)

## FEBRUARY REGISTERED A NICE BUILDING GAIN

### Country's Figures Show 16% Gain Over Those For January

Despite a marked slowing down of new building in Greater New York during February the whole country was within 7 per cent of the record established in February, 1924. The second month of 1925, in fact, from a national standpoint, was 16 per cent ahead of January this year, which in view of the severity of the winter, was quite unexpected.

February building permit reports from 364 cities and towns made to the national monthly building survey of S. W. Straus & Co., issued recently, show a total of $281,016,826, compared to $301,898,236 in February, 1924. The central region had a gain of 31 per cent over February, 1924, and the South exceeded its last year's record by 43 per cent. The Pacific West lost 8 per cent and the East, by reason of a 47 per cent loss in Greater New York, showed a loss this February of 30 per cent. Eliminating New York City the Eastern region would show a gain and it was also New York's loss which produced the 7 per cent loss in the whole country.

In the 25 leading cities there was a February loss of 10 per cent, also due to the slowing down in New York. Only six other cities in the twenty-five showed losses in February.

Chicago held second position, with a gain of 46 per cent. Los Angeles retained third place. Philadelphia took fourth place away from Detroit in February, with a gain of 44 per cent. Detroit was the fifth city, in the list. Cleveland was sixth with a gain of 23 per cent. Kansas City, Mo., was in the 25 city list for the first time since October, 1924, occupying seventh place, with a gain of 367 per cent, the highest proportionate gain of any city over February, 1924. St. Louis jumped from eleventh place in January, this year, to ninth place, with a gain of 108 per cent over February, 1924. Pittsburgh retained tenth place with a gain of 97 per cent.

Miami was in thirteenth place with a gain of 175 per cent. Baltimore rose from sixteenth place in January to fourteenth. Louisville rose from twenty-fourth to seventeenth place, with a gain of 225 per cent over February, 1924. Columbus, Ohio, was nineteenth with a gain of 168 per cent over February, 1924, coming into the twenty-five city list for the first time since April, 1924. St. Petersburg, Fla., came into the list, for the first time, with a gain of 269 per cent over February, 1924. Denver rose from twenty-third place in January to twenty-first place. Richmond, Va., was twenty-fourth, coming into the list for the first time.

## Calumet District

### WHY SUCH A RUSH OF BUILDERS FROM CHICAGO TO THE CALUMET DISTRICT?

**We Thought There Was So Much Building Up There**

Somehow, to a man up a tree, things don't seem to gee.

Up in the Calumet District there are many builders wondering why it is, if there is so much building going on at Chicago as the reports indicate, that there is always a rush of contractors from the Big City pouring into the District to figure when new projects appear for estimates. Whenever a new building bobs up for figures these fellows pounce upon it like a pack of hungry wolves upon a lamb, each striving to get the best hold.

Surely this exodus of contractors from Chicago must mean that the reports are greatly inflated, for, if there was that great amount of building going on up there, why would all these stragglers be popping in on another territory. One would think they could find all they could handle in their home city without butting into someone else's baailiwick.

This rush, however, seems to be waking up some of our business men who are always hollowing about "trading at home," though they have persistently awarded their building contracts to Chicago builders. They are beginning to realize that by awarding their contracts thusly it gets them little in the end as the men employed by the foreign contractors live in other localities and take their wages back there to be spent, hence, the local merchant don't get any profit from big building movements when the contract is given to the outside man. Oh, well, may be they will learn their lesson and from now on practice what they preach, they knock the local contractor out of some nice business by awarding the contracts to outside builders, but it is beginning to dawn upon them that their actions are somewhat like a boomerang, the idleness of the local building fraternity has in turn cut down the local buying power.

### MILL OWNERS GET TOGETHER

**Those of Lake County Form New Organization**

The planing mill owners up in this ganization to be known as the Mill Owners Association of Lake County.

Though the weather was anything but propitious to getting a crowd out it did not seem to dampen the ardor and enthusiasm of these fellows who turned out in good numbers. The crowd met at the B. T. E. A. headquarters at Hammond and perfected their new organization by electing officers and appointing committees. About 90 per cent of the planing mill owners have joined in the movement and are quite enthusiastic about it.

### FORGET THE WAY THEY ENCOURAGED THAT WHICH HAS LED TO THE PRESENT SITUATION

**High Wage Pinch Makes Self Felt Among Realtor Builders**

Some of the home-builder realty men in this section of the State are chafing and squawking under the alleged high prices prevailing in the local building field. Many of these men who dreamed of great sub-divisions laid out, built up and disposed of in a year or two are beginning to realize that all dreams don't come true.

With them it is more or less a case of reaping the whirlwind. These same men were never backward about boosting wages when they needed men to build their projects, even when the association sought to hold wages down to reasonable figures, and now they complain that wages are too high to permit of extensive investment building operations. They have not only choked off their own prospects by their actions, but even the workmen who profited by the wage tilting campaign are, in the end, liable to find that the high wage grab and give methods pursued are to act as a boomerang.

It is just such conditions that organizations of builders forsee and seek to ward off, but, too frequently the effort exerted is misconstrued by craftsmen and the fellows who are set on going it alone and the organization men are ignored. However, when the worm turns the association gets the blame and never gets credit for what it, alone, sought to accomplish.

### WEATHER AT IT AGAIN

**Nobody Knows What to Expect**

The vagaries of the weather again demonstrated themselves to the Hammound builders buoyed the latter up to the pitch where they were jubilant and then plunged them wantonly back into the depths of despondency. Nature breathed the breath of Springtide into the local atmosphere several days last week and then must have been disappointed with her effort for she suddenly whirled and from her vast resources whipped out some chilling blasts and sent them scurrying in to chase Spring from the scene. The change assumed the proportions of a blizzard and once more put the quietus on outside building operations. Surely such reversals of form can't last much longer.

### JUST AS WELL HE DON'T KNOW

**Where Ignorance Is Bliss 'Tis Folly to Be Wise**

Down in Florida they must not get radio weather reports, or, maybe they don't listen in so intently down there as they do up here. At least that is our surmise since word has reached Hammond that our well known contractor Charles Rhoades, who has been sojourning in Florida through the winter, is starting back home. Any one who thinks the writer would leave the southern sunshine and take a chance with the local weather right now has another think coming.

### CALUMET BUILDING PROGRESS

General contractors George P. Pearson & Son, Hammond, have just lined up several more contracts as follows: Lutheren Cemetery Building, 2 sty. & bas., 30x24, Calumet Ave., at $23,000; brick veneer residence, 2 sty. & bas., $13,000, for Frank Miller, on Hohman st.; brick veneer bungalow, $7,500 on Detroit ave.

Wm. Love, Hammond, will build a 2 sty. brick veneer residence on Forest ave., Hess & Greenwood, 112 Citizens Bank bldg., were the architects.

Architects Hess & Greenwood have just received bids on a brick veneer residence for Louis Mott, to be erected on S. Hohlnan st.

J. D. Smith, was awarded the contract for Dr. Oberlin's new residence at Hohman and Standard ave., at $24,000.

The contract for the construction of O. B. Peterson's new $15,000 residence has been awarded to Guy Young, Hammond.

Here's hoping they can put it over.

A syndicate is seeking to finance a big building scheme out near the site of the new Jones-Laughlin Steel Plant. If successful it is proposed to erect two hundred bungalows and twenty two-story apartment buildings.

E. E. COLE.

Cotton, 217 N. Alabama St. Brk. work to Arthur Reed, American Central Life Bldg.

*Store Bldg.: (6 rooms), 1 sty., $25,000, N. Illinois St. Archts., Vonnegut, Bohn & Mueller, 610 Indiana Trust Bldg. Owner, Empire Realty Co., W. Market St. General contractor, Service Constn. Pendleton pike, No. 37, from state road No. 11 to Anderson, Madison county, 8.31 miles, $164,566.37 bid by C. E. Holderbaum, Columbia City.

Anderson-Muncie road, No. 37, from Anderson to two miles north of Daleville, Madison and Delaware counties, 5.70 miles, $107,665.59 bid by McCoun Construction Company, Noblesville; engineer's estimate, $116,575.67.

Anderson-Muncie road, No. 37, from two miles north of Daleville to one mile west of Muncie, Delaware county, 6.42 miles, $122,240 bid by Mannix Brothers, Greenville, O.; engineer's estimate, $187,012.71.

Anderson-Marion road, No. 37, from Kilbuck creek to three miles south of Alexandria, Madison county, 4.30 miles, $87,101.46 bid by McMahan Construction Company, Rochester; engineer's estimate, $93,460.15.

Connersville-Cambridge City road, No. 34, from Connersville to Cambridge City, 10.47 miles $170,914.44 bid by Pilliter & Oliver, Cincinnati; engineer's estimate, $220,732.55.

Anderson-Marion road No. 11, from Alexandria to Fairmount, Madison and Grant counties, 7.02 miles, $138,440.39, bid by McAffe & Smith, Bluffton; engineer's estimate, $151,743.27.

Anderson-Marion road No. 11, from Fairmount two miles south of Marion, Grant county, $91,800.18, bid by W. B. Hutchison, Indianapolis; engineer's estimate, $101,781.79.

Elkhart-Middlebury road No. 25, from three miles east of Elkhart to Middlebury, Elkhart county, 9.81 miles, $204,704.59, bid by C. E. Holderbaum Company, Columbia City; engineer's estimate, $229,822.12.

Combinations of two projects in one were also bid in three cases.

BRIDGES

**Bridges:** The Board of Commissioners of Marion County, Indiana, will, up to 10 o'clock a. m., March 26, 1925, receive sealed bids for Wayne township drain No. 790110, and the following bridges: Warren township, Culvert 787-47; Wayne township, 782-61; Lawrence township, 783-10; Franklin township, 788-55; Perry township, 785-45; Wayne township, 781-107; Lawrence township, 784-15; Warren township, 789-46; Perry township. 786-35, according to plans & specifications on file in the office of the Auditor of Marion County. Harry Dunn, Auditor.

DITCHES

**Ditch:** Will T. Knox, commissioner of Construction, Albion, Ind., is receiving bids to close March 26 at 1:00 P. M. on the following: Jesse Bilger, ditch. Said work consists of about sixteen (16) miles, 287,992 cubic yards of dredge work. Also 13,261 feet of open ditch, 5,831 cubic yards. Also 139,051 feet of tile ditch, 48,436 cubic yards. Said work is divided in main ditch and eighty-seven laterals.

# Sealed Proposals

## STREET CONSTRUCTION EIGHT BLOCKS IN CITY OF MITCHELL, IND. NOTICE TO CONTRACTORS

Sealed proposals for the building and construction of

(1) Seventh street from the south line of Main street to the north line of Crawford street.

(2) Sixth street from the north line of Mississippi avenue to the south line of Main street, and from the north line of Main street to the south line of Warren street.

(3) Seventh street from the north line of Main street to the south line of Warren street.

will be received by the Common Council of the City of Mitchell, Indiana, until seven o'clock P. M. April 6th, 1925, at which hour the bids will be publicly opened and read. The bids will then be examined and considered, and the Council will proceed without unnecessary delay to designate by preliminary order the kind of pavement to be used in the improvement, the Council expressly reserving the right to reject any or all bids, and to judge of the character and sufficiency of any materials bid upon.

Permission will not be given for the withdrawal, modification or explanation of any bid or proposal, after the same has been filed.

Each proposal shall be endorsed with the title of the work, the name of the bidder and the date of its presentation. All bids shall be filed with the City Clerk on or before the date and hour mentioned above, and stated in the advertisement, and no proposal presented after this time will be accepted.

All bids filed by those to whom contracts may be awarded must be in the form prescribed by the State Board of Accounts, and the price must be stated both in words and figures.

Each bidder is required to name in his proposal a price per square yard for the particular kind or kinds of pavement bid upon, which price shall be for the pavement complete, including excavating, filing, grading and concrete foundation.

Each bidder is required to deposit with his bid a certified check for an amount not less than two and one-half per cent of the engineers estimate of the cost of such work bid upon, but in no case shall such check be less than the sum of one hundred dollars, said check to be certified by a reputable bank doing business in this State. In case the bid is not accepted, the check will be returned to the bidder, but if the bid is accepted, and the bidder shall refuse or neglect to enter into a contract with the City of Mitchell within ten days from the time he shall have been notified of the acceptance of the same, said check shall be forfeited to the City of Mitchell as

ascertained and liquidated damages for failure so to do.

Bidders shall demonstrate to the satisfaction of the Common Council of said City that they have the proper facilities, workmen and experience to execute the contract in a proper manner. In case the specifications permit the use of either, or any one of two or more materials the bidder must specifically state on which his bid is based.

Plans and profiles are on file in the office of the Clerk of said City, and bidders are expected to examine the same before submitting their bids. Bidders must satisfy themselves by personal examination of the location of the proposed work, and by such other means as they may choose, as to the accuracy of the estimates of the work to be done, and shall not at any time after the opening of the bids dispute or complain of the statement or estimate of the City Civil Engineer, nor assert that there were any misunderstandings as to the nature or amount of the work to be done. The estimate is believed to be correct, but the City of Mitchell will not be responsible for any error in the same, or for any errors or inaccuracies in the plans, profiles or specifications.

Dated March 10th, 1925.

Stella Edwards, City Clerk.

March 21, 1925.

## SCHOOL HOUSE
## NOTICE TO CONTRACTORS

Notice is hereby given that the School City of Frankfort, Indiana, Clinton County, and the Board of Trustees thereof, will receive sealed bids at the office of the said Board of Trustees, located in the library building, northwest corner of Clinton and Columbia streets, Frankfort, Indiana, until 10 o'clock a. m. Friday, April 3rd, 1925, at which time and place same will be opened, read and considered for the Reconstruction and Alteration of the High School Building, including heating, ventilating, plumbing, electric wiring, clock and signal system and lighting fixtures, for use of said school city, and located in said city and all by and according to plans and specifications as provided therefor as further approved by the State Board of Health and State Board of Accounts. Estimated cost of building $150,000.

The plans and specifications are on file for the inspection of bidders at the office of the Board of School Trustees, Frankfort, Indiana, and at the office of Rodney W. Leonard, Architect, 309 Peoples Life Building, Frankfort, Indiana. Copies are available to bidders for use at their own offices upon deposit with the Architect or Trustee of $25.00 to guarantee safe return of same on or before opening of bids. If plans are not returned on date of letting, deposit shall be forfeited. Bidders must familiarize themselves with such plans and specifications before bidding and no departure from the same will be considered.

Bidders in submission of bids will submit same as follows:

1. On general contract.
2. On heating and ventilating.
3. On plumbing.
4. On heating, ventilating and plumbing combined.
5. On electric wiring, clock and signal systems and lighting fixtures.

In this way the bidder only being required to submit his bid for such portion or portions of the total work as he may desire.

All bids shall be accompanied by the certified check of the bidder in sum equal to at least 5 per cent of his gross bid or bids, conditioned upon his entering into his written contract with sufficient and approved surety if he is the successful bidder, according to proposal. Checks to be made payable to Treasurer of the Board.

All bids and proposals shall be upon the forms prescribed by the State Board of Accounts. Unless bids are accompanied by certified check as above and upon forms as above, no attention will be given same.

The successful bidder will be required to enter into his written contract and also deliver his bond with approved surety to the School City of Frankfort, Indiana, in a sum equal to the full amount of contract as usually conditioned. The successful bidder will be required by the terms of his contract to enter into the active prosecution of his work immediately and complete said work at the time mentioned in general conditions of the specifications. The Board of Trustees for the School City reserve the right to reject any and all bids without giving any reason therefor.

School City of Frankfort,
Clinton County, Indiana.
Howard Harshman, President.
C. V. Fulham, Secretary.
Frank Isgrigg, Treasurer.

March 21, 1925.

## SCHOOL HOUSE
## NOTICE TO CONTRACTORS

Notice is hereby given that W. Cyrus Wampler, Township Trustee and the Advisory Board of Vigo Township, Knox County, Indiana, will receive sealed proposals until one o'clock p. m. Tuesday, April 7th, 1925, at the Sandborn School building, for the erection and completion of the High School building at Sandborn, Indiana, and for the two toilet rooms and the plumbing in the present school building at Sandborn, Indiana.

All materials and labor must be according to the plans and specifications as furnished by J. W. Gaddis, Architect, Vincennes, Indiana, which plans and specifications are on file at the office of W. Cyrus Wampler, Township Trustee of Vigo Township, Bicknell, Indiana, and at the office of J. W. Gaddis, Architect, Vincennes, Indiana.

The plans, specification and this notice are calling for:

No. 1. Independent bids for the High School building proper.

No. 2. Independent bids for the two toilet rooms complete in the present building.

No. 3. Independent bids for the heating and ventilating system.

No. 4. Independent bids for the plumbing.

No. 5. Independent bids for the plumbing in the present building.

No. 6. Independent bids for the electric wiring.

Certified check of 2 per cent, or bidder's bond, as provided by the State Law, must accompany each proposal, as evidence of good faith, and that the bidder will enter into a contract with the Township Trustee, if the proposal is accepted.

The envelope containing the proposal must be plainly marked: "Proposal for the High School building at Sandborn, Ind., and the Toliet Rooms in the Present School Building," "Proposal for the Heating and Ventilating System," "Proposal for the Plumbing," "Proposal for the Plumbing in the Present School Building,' 'and "Proposal for the Electric Wiring," etc.

The right is reserved to reject any or all bids.

W. Cyrus Wampler,
Township Trustee, Vigo Township,
Bicknell, Knox County, Indiana.

March 21, 1925.

## SCHOOL HOUSE
## NOTICE TO CONTRACTORS

Notice is hereby given that the Trustee and Advisory Board of Bethlehem School, Township, Cass County, Indiana, will receive sealed bids at the present school building in the Village of Metea, Bethlehem Township, Cass County, Indiana, up to 12:00 o'clock noon on Fri-

**J. F. BOEHM**
**Tin and Sheet Metal Contractor**
Dealers and Appliers of Carey Built Up Asphalt and Asbestos Roofing
Webster 0217 2326 E. 10th Street Indianapolis, Ind.

day, the 10th day of April, 1925, for the furnishing of all material and performing all labor for the construction and completion of the addition to and the remodeling of the school building at the Village of Metea, in said Bethlehem Township.

Such work will be under the plans and specifications heretofore approved and now on file in the office of the State Board of Accounts of the State of Indiana, and the office of the undersigned Trustee, and in the office of the Architects, Henkel & Hanson, 108 Heinemann Building, Connersville, Indiana.

Copies of plans and specifications will be furnished any contractor applying for same on deposit of the sum of $15.00 to be held escrow for the return of said plans and specifications to the architect on or before seven days after the opening of the bids, after which date all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on forms 96 bidding blanks. Each bid shall be accompanied by certificed check upon a solvent bank, made payable to Guy Smith, Trustee, in the amount of not less than three per cent of the total amount of their bid, tendered as a guarantee that the bidder will, if awarded contract, enter into a bona fide agreement with the said school township of Bethlehem for the contract, and furnish sufficient bond equal to one hundred per cent of the contract price.

If, for any reason whatsoever, the bidder shall fail to enter into proper agreement or fail to execute a proper bond, the full amount of the certified check shall be retained by the school township as liquidated damages. The estimated cost of the building complete is $44,000-.00. The successful bidder will be expected to begin work immediately on this building and prosecute the same vigorously and complete the same for school in the fall of 1925.

The undersigned Trustee and Advisory Board reserve the right to reject any and all bids, and waive any defects or informality, if deemed in the interest of said Bethlehem School Township.

Particular attention is called to the alternates provided for in the plans and specifications.

The Trustee and Advisory Board also reserve the right to accept the lowest and best bids upon any one or more of the four classes of work identified as general contract, heating, plumbing and electric wiring, and reject bids upon the remainder of such four classes, and in such event will proceed with the construction of the work upon which such bids are accepted and defer the construction of the remainder to such future time as may be decided by such Trustee and Advisory Board. In such event an agreement will be made with the successful bidders concerning adjustment for such deferred work.

The certified check to be deposited by bidders must be drawn upon a bank doing business in the State of Indiana. The surety upon the bond of the successful contractor must be satisfactory to the Trustee and Advisory Board.

Signed and dated at Logansport, Indiana, this 14th day of March, 1925.

## WANTED

**Construction Superintendent:**—Desires position with general contractor; 25 years experience in different lines of building construction. Can furnish the best of references, also recommendations covering the past twenty years in this territory. Just completed a large Township School project. Address Box No. 12, Indiana Construction Recorder, 312 East Market St., Indianapolis.

## NO APPLAUSE SO FAR

### Laborers Now Playing to the Gallery

Here is a good one.

The laborers have stepped to the footlights and are now trying to put a monologue across. With much gesturing and gusto they are prattling along with a line of talk to the effect that because of certain skill, the result of long training in their trade (?), they are entitled to an advance in wages. Had these same men played less hookey during their school days and studied like the other boys did they would not now be trying to force a new line of logic on the building public.

### NOTICE OF BOND SALE

Notice is hereby given that on the 11th day of April, 1925, at 10:00 o'clock A. M. the Board of School Trustees of the School City of Portland, Jay County, Indiana, will offer for sale at the office of the Superintendent of the Schools of the City of Portland, located on the third floor of the Jay County Court House in the City of Portland, Jay County, Indiana, an issue of $100,000.00 of bonds of the School City of Portland, Indiana.

Said bonds will be 100 in number, dated April 11th, 1925, bearing interest at the rate of 4½% per annum, payable semi-annually as evidenced by and upon the surrender of the annexed coupons as they severally become due. The first interest coupon of each bond will be for interest from date of issue until May 30th, 1926, others will be semi-annually from that date.

Said bonds will mature and become payable in one hundred equal series as follows: One series consisting of two bonds of $1,000.00 each, due and payable May 30th, 1928, and three bonds due and payable on November 30, 1928, and a like series due and payable on the 30th day of each May and November thereafter until all are paid.

Said bonds have been issued in strict compliance with the laws of the State of Indiana and pursuant to a resolution of the Board of School Trustees of the School City of Portland, Indiana, duly entered of record on the 5th day of August, 1924, authorizing said bonds to be issued for the purpose of providing funds for the construction and erection of a High School Building in the City of Portland, Indiana.

Said bonds will be sold according to law to the highest and best bidder for not less than par or face value.

The right is reserved to reject any and all bids.

### NOTICE OF BOND SALE AND TO INCUR INDEBTEDNESS

Notice is hereby given that on March 30, 1925, at 7:30 o'clock P. M., the School Trustees of the School City of Anderson, Madison County, Indiana, will receive at their office in the Senior High School Building in said City sealed bids for the purchase of an issue of bonds of said School City to the amount of $150,000 dated March 30, 1925, bearing 5 per cent interest per year, payable semi-annually, and due ten years after date. Each bid must be accompanied by certified check in favor of the School City for $1,000, as evidence of good faith. No bid for less than par and accrued interest can be accepted. The School Trustees reserve the right to reject any and all bids. The opinion of Smith, Remster Hornbrook & Smith, Attorneys, of Indianapolis, as to legality will be furnished.

Said bonds to the amount of $150,000 represent the aggregate debt to be incurred, and are to be issued, negotiated and sold to provide funds to pay for the purchase of land between 12th and 13th streets and between Fletcher and Pearl streets in said city and to pay for the construction and equipment of a school building thereon. The said building will be of brick, two stories in height, and provision for furnace, coal storage, etc., giving twelve rooms and halls, and the size in approximately 150 feet by 70 feet, horizontal dimensions. The equipment will include plumbing, heating and lighting apparatus.

Dated March 7, 1925.

SCHOOL CITY OF ANDERSON,
By Augusta D. Millspaugh, President.
Thos. M. Jones, Secretary.
Herbert B. McMahan, Treasurer.

## "HIS OWNERSHIP OF HIS TRADE"

### Unionist Editor Contends Labor of Craftsman Is Property Thus Contradicting Argument Other Unionists Have Set Up

A man's right to labor is a property right. The laws and customs of men have recognized this fact for centuries. It remained for trade unionists of modern times to invent the fallacy that "the labor of a human being is not property." We have suspected, however, that sooner or later this fallacy would break down in the heart of the trade unionist.

In the December, 1924, issue of the International Molders' Journal, the editor, Mr. John P. Frey, has an admirable editorial entitled "Some Thoughts Upon Property Right." He bespeaks of mutual respect on the part of the molder and the foundryman for the property rights which each has and devotes to his business. He says:

"When he has completed his apprenticeship the molder has as much a property right in his trade as the foundryman has in his plant, and just as a man's property right in his foundry may be the only thing which keeps him from being a man without anything except a day's pay, so the molder's ownership of the trade he has learned is the only thing which separates him from the unskilled laborer who has nothing except a strong back to make a living with.

"Yet important as the molder's property right in his knowledge of the trade is to him and to his family, and to the community in which he lives, there are many foundrymen whose indifference for this ownership which the molder has in his trade is in inverse ratio to the interest which he takes in seeing that no one injures his property. The molder should have respect for the property which belongs to the foundryman, but he should have an equally strong respect for his property—his knowledge of his trade, and should no more permit the foundryman to do anything which would injure his trade than the foundryman would permit him to do something which would injure his property. It is a poor rule which does not work both ways."

The property right in the knowledge of something is of course of no value apart from the right to use that knowledge in a profitable way. The value of the molder's property right in the knowledge of his trade is, of course, dependent upon his right to work at his trade. His property right in his knowledge of his trade is indivisible from his right to work at it. If the value of the one is to be protected as a property right the value of the other must be protected on the same grounds. It therefore follows that the labor of a human being is a property right and it will be protected as such just as Mr. Frey says it should be. We have pleaded that the property right of a man to his labor should enjoy the same protection afforded an employer in the property right which he has in his plant. We would welcome support for this fundamental and time worn idea.—Law and Labor.

## ADVOCATES STRONGLY THE USE OF STANDARD A. I. A. CONTRACT FORM

### A. B. C. Counselor Holds It Is Safer Than Individual and Private Forms Contractors Are Asked to Sign

Recently while speaking before a joint meeting of general building contractors and sub-contractors of Indiana, Attorney Harry A. Fenton, Indianapolis, Counselor of the Associated Building Contractors of Indiana, touched upon the matter of contracts and in no uncertain way advocated the use of the contract form as incorporated in the Standard Documents of the American Institute of Architects as the safest in guarding the interests of the contractors and the owner in a building operation.

Mr. Fenton has had much experience in a legal way as regards contracts and it is his opinion that the A. I. A. contract form is much superior to the various individual forms of contract that owners and some architects are inclined to put before the contractors to be signed.

Regarding this matter he said briefly:

"I have talked to you several times about the forms of your contracts. To me there does not seem to be any better form than the last edition of the American Institute of Architects, which has also been approved by other national building organizations. Those who got up this latest approved form spent long years in getting these contracts to a workable basis. They seem to fit very well every case. Many of you know that at present I am involved in one of the largest building cases in the state, that of the John A. Schumacher Company vs. St. Anthony's Hospital at Terre Haute in which the arbitration clause of the A. I. A. form of contract will be construed by the court, a case where the owner refused to arbitrate the question when the architect gunned our men off of the job. A nice situation in the State of Indiana, when honest workmen are gunned off of the job by a party to a contract who then refuses the solemn obligation to arbitrate, which is included in that contract!

That arbitration clause is going to be tested to the limit. The John A. Schumacher Company will have to carry the load of this fight to construe the law in Indiana. They have six full time lawyers on the job, and are going all the way through the courts until this issue is settled. Either this contract means something or it means nothing of a binding character.

Why, there was an act going through the legislature recently wanting commercial arbitration enforced in the State of Indiana. We have such an act, passed in 1851. Men, there are two forms of arbitration in the State of Indiana. There is the common law form and the statutory form. We will welcome any move forward in the State of Indiana along that line, and if that is the correct way, and we believe it is, there should not be any trouble in the building lines, in settling any and all controversies.

I am in favor of this standard con-

## BIG LUMBER CONCERN ENTERTAINS MEMBERS OF THE INDIANAPOLIS ARCHITECTURAL CLUB

### Embryo Architects Instructed in Function and Grading of Lumber

In line with similar moves made by Indiana material men, through which the man planning a building and specifying the materials that are to go into it may be thoroughly familiar with those things with which he deals, the Maas-Niemeyer Lumber Co., Indianapolis, played host to the members of the Indianapolis Architectural Club Saturday, March 21, and entertained them at the plant, 21st street and the Monon Railway.

The club is composed of the draughtsmen employed in the local architects' offices and has been quite active in furthering the interest of the draughtsman in his work. The membership has grown steadily and has shown an active response in the aims of the organization. As evidence of this some thirty or more members went out to the Maas-Niemeyer Lumber Company Saturday, where they put in a most instructive afternoon. They were taken on a tour of the big plant, where the various operations in getting out mill work were explained. Then they inspected the various woods and were told of the properties and best usages for each.

One of the most interesting features of the affair was a talk by H. G. Maas, Vice-President and Treasurer of the firm, on the grading of lumber as carried on under the grading rules adopted by regional lumber associations of the National Lumber Manufacturers Association.

At the conclusion of the inspection trip and meeting a buffet lunch was served to the visitors who were deeply appreciative of the hospitality extended to them and the valuable information imparted which will be of much value to them, in the future execution of plans, details and specifications.

The action taken by the Mass-Niemeyer Lumber Co. is most commendable in that a better knowledge by draughtsmen of wood working details, and the proper selection of woods as to function should exert a decided influence for good in future building projects.

## SLIGHT VARIATION SHOWN BY BUILDING COSTS LAST YEAR

### Depletion of Stocks By Great 1923 Volume Failed to Affect 1924 Prices to Any Great Extent

The ease with which the construction industry can adjust itself to an unprecedented demand for building is demonstrated in a review of developments during 1924. Following a year which in itself broke all previous records, the industry entered 1924 with material stocks almost depleted and with an acute labor shortage in the skilled trades. On all sides there were predictions that if as much business developed in 1924 as came out the year before, construction costs would mount. Subsequent events proved that this was not the case and December, 1924, found costs practically where they were the year before. It is true that building costs rose slightly from January to April, but a slight reaction then set in and through the summer months there was a slow but steady downward movement. Throughout the year construction costs paralleled general commodity prices which proves the fact that construction is a basic industry and construction costs may be established as a fair index of the general business situation.

## MORE SIMPLIFICATION IN THE MATERIAL FIELD

### Should Mean Better Roofs

Thirty-five manufacturers of prepared roofing, by joint action have agreed to eliminate shingle "seconds," according to John Lind, Secretary of the Prepared Roofing Association. Seventy per cent of all the roofing sold in the United States, according to the report, is of the prepared roofing or composition roofing type. This action on the part of the manufacturers is taken to indicate that home builders are to be assured of greater protection as to the quality of material offered.

## PENCIL SKETCHES

The Architect is the Medium of Exchange between the man who wants a building and the man who builds.

First of all, the Architect must show the one, the kind and class of building desired, and the other a complete survey of what he is to build.

The contract should be an impartial document with due respect to equal rights of both parties and so written that any man of average intelligence will understand its terms, and further, that there be no discrepancies between it and the plans and specifications. It is not only best, but the height of discretion, to give all necessary attention to this feature of the project, before proceeding any further in the premises.

ORGANIZATION AND CURRENT NEWS

## FORMER PROMINENT WORKER IN RANKS OF STATE A. B. C. GOES TO FLORIDA

### J. B. Goodall, One of the Charter Members of State Contractors Association, Resigns

Many of the members of the Associated Building Contractors of Indiana, especially those who were in during the early days of the state contractors association, will regret to learn of the resignation of Joe Goodall, formerly of Peru. His action in withdrawing from the association is due to his leaving the Indiana building field, he having transferred his business activities to Florida, he now being located at 304 Fielding Ave., Tampa. He is still in the contracting business and is busily engaged as others are, in the great building movement which is taking place in that far southern state, which is rapidly developing into the country's winter playground.

Mr. Goodall was one of the original seventeen Indiana contractors from sundry state cities who met in Ft. Wayne a few years back and launched the Associated Building Contractors of Indiana. He was quite active in the promotion of the organization in its early days and with others freely aided financially in keeping the struggling association on its feet. He served one term as vice-president and for years was a member of the executive board.

## EAST CHICAGO AND INDIANA HARBOR CONTRACTORS HOLD ANNUAL ASSOCIATION MEETING

### Make It a Special Affair in Honor of Retiring President Who Served Three Terms

The annual meeting of the General Contractors Association of East Chicago and Indiana Harbor was held at the Elks Club, East Chicago, March 19, at which the entire membership and a number of guests turned out. A special musical program and some entertainment features added greatly to the evening's enjoyment.

The affair was arranged especially in honor of Joseph Doeppler, the retiring president, who for three terms of office worked hard in the interest of the organization and the contractors and through his efforts and the assistance extended to him by the members did much to improve building conditions in his territory. As a token of appreciation of his work the members presented Mr. Doeppler with a handsome fountain pen. In accepting the gift the retiring president briefly recounted the history of the organization in East Chicago and Indiana Harbor and cited various instances that betokened progress, and expressed the hope that the members would continue to stand together that still greater achievements might be chronicled in the years to come.

Other speakers were J. H. Owens, Field Representative of the Associated Building Contractors of Indiana, and E. H. Hyman, Secretary-Manager of the South Bend Builders Exchange. The former spoke on the legislative activities of the State A. B. C., while Mr. Hyman made a general talk on organization, its influences and benefits.

The new president succeeding Mr. Doeppler is Paul Maginski. Roy Clark is secretary.

# Calumet District

## PROSPECTIVE BUILDERS NOT SO EAGER TO PROCEED

### Things a Little Slow in Getting Started

Local architects and contractors report a new condition that has arisen to act as an impediment to early activity in the building field. There is quite a tendency upon the part of prospective builders to show an inclination to hold back on signing up for plans. Also the same condition exists regarding putting out plans for estimates and closing up on contracts when such estimates have been received.

Things looked rather bright for a time as there was considerable contemplated building mentioned, however, loans seem to be tightening up which is having the effect of curtailing new work, especially speculative building. Conservative observers nevertheless are inclined to believe that when the real building season comes there will be enough work to keep most everyone in the building field busy. At that there are those who feel that the predicted building boom for 1925 will not develop as fast as was forecast. High wages also threaten to have a retarding effect on building activities and may act as a boomerang upon the craftsmen who, though they may have secured higher wage scales, may find there is not the work to produce the much desired wages.

## STILL ON WAGE MATTERS

### Demand of Laborers For Higher Wages Turned Down

The contractors and laborers are still negotiating the wage scale for 1925. Committees representing the two interests held a special meeting last week and put in all afternoon going over the matter. The contractors have fairly well impressed upon the laborers that they will not stand for a further increase in the hourly wage rate. The laborers have asked for another meeting soon to discuss some disputed points in the working rules before a final decision is reached.

## JURISDICTIONAL DISPUTE LEADS TO PLASTERERS' STRIKE

### New Hospital Scene of New Labor Tangle

To add a little zest to an otherwise hum-drum situation in the local building construction field at Hammond the plasterers have inaugurated a strike at the new hospital. Once more the jurisdictional trade dispute has entered into active service. The plasterers got into a dispute over some work the brick-layers were doing though according to the National Board of Jurisdictional Awards said work came within the province of the brick-layers. Because the latter wouldn't step aside the plasterers struck. And to think of it, the National Board was to overcome all trouble and make things serene and peaceful and everybody was going to abide by the awards made!

## EVANSVILLE

### EARLY INDICATIONS POINT TO A PROMISING BUILDING YEAR

**Architectural Circles Busy On Plans With Many Inquiries Continuing to Come in From Prospective Builders**

Prospects for building in Evansville are growing brighter as each week passes and it should not be long before real construction activity begins to make itself felt. Local architectural circles, and also some of the mills that do planning in the nature of home building, are quite busy on prospective plans at this early date, a condition that is taken as a good omen for the future. Those contemplating building projects seem intent on getting things to the point where they can take advantage of an early season start just as soon as the real building season opens up.

In looking forward to a good building year for Evansville, men who have been identified with the construction business advance several reasons for their faith in the outlook. Their main causes for optimism are based on these features: Prices seem to be right, labor and material costs have shown a strong trend to stability, and inquiries for plans and matters relating to building have been quite active.

## FT. WAYNE

### CARPENTER-CONTRACTORS ORGANIZE TO AID LOCAL BUILDING

**Object Will Be to Boom Home Business Interests**

Foreseeing a building movement of considerable extent during the spring and summer months for Fort Wayne, according to their temporary chairman, F. W. Buckles, carpenter contractor, 1225 Lynn avenue, about thirty carpenter-contractors of the city met in the chamber of commerce a few days ago to perfect an organization, the aim of which will be "to help Fort Wayne in every way."

"We believe that the depression period has been passed and our city, along with other localities in the United States, is due for a good building construction volume and we want to get ready for it," said Mr. Buckles. The carpenter-contractors will meet again shortly to effect a permanent organization.

"It will be our aim to keep as much money in Fort Wayne as possible during this building boom. We intend to purchase all of our supplies here and employ local labor as much as possible. We are trying to do our bit for the local field."

The Master Builders, composed of builders, is still in existence here but a wider scope of working conditions is desired, and the new organization was launched for that purpose.

### ADVOCATES A. I. A. CONTRACT

***Start this afternoon and run out in any direction, to the outskirts of town and notice the many new homes going up and you will be surprised by their beauty and the many modern conveniences that are now considered indispensible to the modern home-owner. Places that were newly marked out subdivisions only two years ago are completely built up today. Try and buy one of these places and you will find that they have increased in value from twenty to fifty per cent, and they were built only a couple of years ago.***

# Sealed Proposals

### NOTICE TO CONTRACTORS
### SCHOOL BUILDING

Notice is hereby given that sealed bids will be received for the Construction and completion of a school building to be erected in Jefferson Township, Kosciusko County, Indiana, on what is now known as the Jacob Walters' farm located 7.2 miles west of Milford, Indiana, and to be constructed at an estimate cost of approximately $60,000.00.

Separate bids will be received on the "General Construction," "Heating & Ventilating" and "Plumbing & Drainage" of the building, which shall be prepared on form No. 96, is a recommendation of the State Board of Accounts, and is provided with a non-collusion affidavit.

Bids will be received at the office of Vandeveer & Vandeveer, Attorneys, located on the Southeast Corner of Main and Emeline Streets, Milford, Indiana, at 12:00 o'clock noon, on the 14th day of April, 1925.

Each bid submitted shall have attached thereto a certified check to the amount as follows: "General Construction," $1,000.00, "Heating & Ventilating," $200.00, "Plumbing & Drainage," $200.00; said checks to be made payable to Mr. Leroy Fisher, Trustee, and deposited on the condition that same will be forfeited to said Trustee for damages sustained in the event the successful bidder fails to enter into a contract for the work bid upon, and to give a satisfactory bond, for the full amount of his contract price for the faithful performance of the contract, within five days from the acceptance of his bid.

Plans and specifications are on file at the office of Vandeveer & Vandeveer, Attorneys, Milford, Indiana, The Office of the State Board of Accounts and at the office of Samuel A. Craig & Company, Architects & Engineers, 31 West Ohio Street, Indianapolis, Indiana, and may be inspected by persons desiring to bid on said work at all reasonable times.

Additional sets of plans and specifications may be obtained from the office of the Architects & Engineers upon receipt of $15.00 which will be held in escrow for the return of said plans and specifications, to said Architects & Engineers, on or before seven days after the above date for receiving bids, after which date no money will be refunded. If checks are given, same must be certified.

The School Trustee reserves the right to accept or reject any or all bids submitted or any or all parts thereof.

Signed and dated this 23rd day of March, 1925.
Jefferson School Township, Kosciusko County, Indiana.
By LEROY FISHER, Trustee,
March 28, 1925 R. F. D. Milford, Ind.

### SCHOOL HOUSE

### NOTICE TO CONTRACTORS

Notice is hereby given that T. R. Winemiller, Township Trustee and the Advisory Board of Busseron Township, Knox County, Indiana, will receive sealed proposals until two o'clock P. M. Saturday, April 11th, 1925, at the Emison school building, for the erection and completion of the gymnasium and auditorium addition to the present school building and the required changes of the present school building at Emison, Knox County, Indiana.

All materials and labor must be according to the plans and specifications as furnished by J. W. Gaddis, Architect, Vincennes, Indiana, which plans and specifications are on file at the office of T. R. Winemiller, Township Trustee of Busseron Township, Emison, Indiana, and at the office of J. W. Gaddis, Architect, Vincennes, Indiana.

The plans, specifications and this notice are calling for:

No. 1. Independent bids for the gymnasium

**J. F. BOEHM**
**Tin and Sheet Metal Contractor**
Dealers and Appliers of Carey Built Up Asphalt and Asbestos Roofing
Webster 0217 2326 E. 10th Street Indianapolis, Ind.

and auditorium proper and its joining to the present school building.

No. 2. Independent bids for the heating and ventilating system, requiring the pitting of the present boiler.

No. 3. Independent bids for the plumbing.

No. 4. Independent bids for the electric wiring.

Certified check of 2 per cent, or Bidder's Bond, as provided by the State Law, must accompany each proposal, as evidence of good faith and that the bidder will enter into a contract with the Township Trustee, if the proposal is accepted.

The envelope containing the proposal must be plainly marked: "Proposal for the Auditorium and Gymnasium Building, and its Connection to the Present School Building at Emison, Indiana," "Proposal for the Heating and Ventilating System," "Proposal for the Plumbing," and "Proposal for the Electric Wiring," etc.

The right is reserved to reject any or all bids.

T. R. WINEMILLER, Township Trustee.
Busseron Township,
Emison, Knox County, Indiana.

March 28, 1925.

### SCHOOL HOUSE

### NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned, Trustee of Center School Township, Delaware County, Indiana, and the Advisory Board of said Township, will receive bids at the office of said Trustee, Room 302 Western Reserve Building, in the City of Muncie, in said Center Township, Delaware County, Indiana, until 1:30 o'clock P. M. on Monday, the 20th day of April, 1925, for the construction of a new school building and for the installation of heating and ventilating system and plumbing and drainage system, and for electric wiring, all for said proposed building. All bids shall include all labor, material and supplies necessary for complete construction or installation of that part of the work bid on, and shall be strictly in accordance with the plans and specifications provided therefor which have been properly accepted and approved and are now on file in the office of said Trustee and also in the office of Houck & Simenner, architects, 123½ West Main Street, Muncie, Indiana. Said building is to have one story and basement, and is to be of brick, tile, stone and concrete construction, and is to be located on a tract of real estate owned by said Center School Township in the Southeast Quarter of Section Twenty (20), Township Twenty (20) North, Range Ten (10) East, in School District No. 10 in said Township.

Bidders will submit their bids as follows:

(1) For the construction of school building (General Contract).

(2) For the installation complete of heating and ventilating system and plumbing and drainage system.

(3) For the installation complete of electric wiring.

(4) For the construction as a whole or any combination of contracts.

The estimated cost of said building is twenty-eight Thousand Five Hundred ($28,500.00) Dollars.

All bids must be sealed. Each bid on the general contract shall be accompanied by the certified check of the bidder for Five Hundred ($500.00) Dollars. Each bid on the heating and ventilating system and plumbing and drainage system shall be accompanied by the certified check of the bidder for Three Hundred ($300.00) Dollars. Each bid on the electric wiring shall be accompanied by the certified check of the bidder for One Hundred ($100.00) Dollars. Each bid for complete construction or for any combination of contracts shall be accompanied by the bidder's certified check in an amount equal to the total amounts required for the contracts included in the bid if the same had been bid for separately. All checks shall be payable to Merritt Heath, Trustee. The proceeds of the certified check accompanying the bid for each successful bidder shall become the sole property of said Center School Township in the event such successful bidder shall fail to enter into a contract and execute and furnish an acceptable bond within 10 days after he has been notified that his bid has been accepted. Certified checks of unsuccessful bidders will be returned to them.

The successful bidder or bidders will be required to enter into a written contract or contracts and to execute a bond or bonds with sufficient, surety or sureties to be approved by said Trustee in an amount equal to the amount of the contract or contracts and conditioned for the faithful performance of the same.

Plans and specifications may be had for the individual use of bidders from the architects, Houck & Smenner, Muncie, Indiana, by making a deposit of $10.00 for each set, which deposit will be returned upon the return of such plans and specifications in good condition on or before the day of letting the contracts.

The right is reserved to reject any and all bids.

MERRITT HEATH,
Trustee of Center School Township,
Delaware County, Indiana.

John W. Dragoo,
Harry F. Guthrie,
Arthur D. King,
Members of Advisory Board
of said Township.

WARNER & WARNER, Attorneys.

VOL. VII INDIANAPOLIS, INDIANA, APRIL 4, 1925 No. 1

## FIRE HAZARD COULD HAVE BEEN GREATLY REDUCED

### Interesting Facts Brought Out By Coroner's Verdict Following Disastrous Chicago Fire

On January 31st, 1925, seven persons lost their lives in a fire which destroyed a four story apartment building at 5830 Blackstone Avenue, Chicago. The stairwells were enclosed by wood studs carrying wood, lath and plaster. The coroner's jury sitting on the case said, in part:

"We, the Coroner's Jury, desire to impress upon the citizens of this community their responsibility in protecting their own lives and the lives of others, as well as their property, through a strict and rigid compliance with all the laws and regulations designed to provide such protection, and we particularly urge upon the citizens the advisability, at this particular time, of permitting only such installations of electrical work, in conformity with the so-called Code of the National Board of Fire Underwriters, and as approved by the proper authorities.

"In view of the apparent rapid progress of the fire, caused, in our opinion, by the main stairways being enclosed in common wood studs and covered with wood lath and plaster, the stairways also being constructed of wood and other combustible material—which type of building construction would not be permitted under the present building ordinances of the City of Chicago and t oour knowledge there are now in existence many buildings of three stories and over in height of practically the same type of interior construction—we strongly recommend that ordinances be passed by the City of Chicago declaring all buildings of similar type of construction having three or more floors above the sidewalk level to be subject to condemnation unless the owners of such buildings remove all lath and plaster from either side of the wood studding enclosing all vertical openings, said studdings to be covered on both sides, from the basement to the roof, with metal lath, and covered with cement plaster; further requiring that all openings into such vertical shafts be protected as follows: windows set in metal frames with metal sash glazed with wire glass; doorways of metal frame doors of standard metal clad manufacture, the upper panels of said doors to be glazed with wire glass, and that said doors be made to close automatically."

The Coroner's Jury has no power to pass such an ordinance, nor can it force the City Council to do so. Public opinion is the only thing that can bring about such legislation in Chicago or any other city. However, when such evidence is developed following a destructive and fatal fire and the public is apprised of the facts a determined public opinion will go a long way in influencing the proper officials to pass legislation that will reduce menacing fire Hazards.

## A HOT ONE

### Furnace Firm Takes in a Wide Territory

A member of a staff of engineers was building a home. Came the time to consider the heating contract. Now that engineer was firm in the belief that engineering service is a guarantee of service rendered so he sought out a firm that advertised that its engineers not only planned every one of its furnaces but also installed every one of its products. Nor was he disappointed, as witness the following guarantee which he received from the engineer who sold, planned and installed the job, a copy of which is on file in our office:

"We propose to install a ------ 1026-A 27-inch Fire Box Rapid Fire Furnace, including ten warm air ducts and to run two cold air grilles. Further, we guarantee that this furnace will heat each room equally at 72° of heat in the severest weather. We also guarantee that this furnace will not smoke the walls or form gasic fumes in the residence. And, if any defects prove up, upon this furnace in life to come such defects will be made good free of charge by this firm."

The only flaw in this contract that we can think of is its failure to include a guarantee that the purchaser would need the heat in the life to come. It might also be pertinent to inquire by what authority the engineers of this firm presume that they would be able to follow their customer to that realm of the hereafter where their services would be acceptable.—(From the Rocky Mountain Chapter, Associated General Contractors.)

## EFFICIENCY OF LABOR HAS IMPROVED CONSIDERABLY

### Mechanics In Building Trades Crafts Apparently Turning Out Better Work Than In Former Years

Is labor becoming more or less efficient?

This is a question that has been uppermost in the minds of many during recent years. Immediately following the war, labor reached a low point of efficiency due largely to the fact that countless thousands of poorly trained mechanics had gained access to the trades during the stress of war-time construction. Many contractors are now beginning to report that there is a decided tendency on the part of most mechanics toward increased efficiency.

## I. S. A. INVITED TO SEND REPRESENTATIVES TO A. I. A. CONVENTION AT NEW YORK CITY

### Pleasing Trip In Prospect As a Result of Special Traveling Arrangements Made

An official invitation, sent at the direction of D. Everett Ward, President of the American Institute of Architects, has been received by the Indiana Society of Architects from E. C. Kemper, Washington, D. C., Executive Secretary of the A. I. A., to participate in the Fifty-Eighth Convention of the national organization of architects to be held in New York City, April 20 to 24 inclusive.

Since all State Societies of Architects have been invited to the approaching event the Indiana organization is urged to send one or more representatives. These representatives, though not members of the A. I. A., will be invited to enter into the various discussions and participate in the proceedings, the only restrictions being that they will not have the power to vote on resolutions and business matters.

Though the Indiana Society official delegate has not been named at this time plans are under way for representation at the convention. It is to be hoped that other Indiana architects out over the state in addition to those from Indianapolis, who have signified their intention of going to the convention, will decide to visit New York at the time of the big architectural gathering that Indiana may be well represented.

Those from Indianapolis who will attend the convention are Herbert Foltz, President; Fermor S. Cannon, Secretary, and Merritt Harrison, delegate, respectively, of the Indiana Chapter A. I. A.; Robert Frost Daggett and Wilbur Shook, also Indiana A. I. A. members are also going.

Convention headquarters will be at the Roosevelt Hotel and any architect contemplating making the trip should make his reservation before April 10, up to which time the hotel management will be able to assure accommodations to all visiting architects and their guests.

An attractive feature of the journey to New York this year is that traveling arrangements have been made whereby groupings of architects from the various sections of the country have been made to conform with train schedules and the trains make their way toward New York they will pick up the architects at sundry centers, thus enabling the members of the profession to travel together. For instance, Indiana architects can make arrangements to form a party at Indianapolis and there board Pennsylvania Train No. 30, upon which there will be convention visitors from Texas, Arkansas, Missouri, Illinois, at Indianapolis, Indiana, architects will be taken on and then Ohio architects. The start will be made from Houston, Texas, Saturday, April 18, 12:45 P. M., and the train will leave Indianapolis, Sunday, April 19, 5:40 P. M., arriving at New York, Monday, April 20, 1:52 P. M.

Any Indiana architect contemplating going to the convention and desiring to catch the above train should immediately communicate with I. S. A. Secretary Merritt Harrison, 500 Board of Trade building, or Fermor S. Cannon, Secretary Indiana Chapter, A. I. A., 21 Virginia avenue, Indianapolis.

## INDIANA MAN WINS NATIONAL ARCHITECTURAL HONOR

### Ft. Wayne Man Now In New York Wins 1925 Le Brun Traveling Scholarship Prize

Clarence W. Hunt, of Ft. Wayne, at present connected with a New York architectural firm, is the winner of the 1925 Le Brun traveling scholarship, a yearly award of $1,400 to be devoted to at least six months' study in Europe. Such is the information received from the East. The award was made by a selected jury of architects. The winner of this national architectural honor was graduated from the Fort Wyne high school in 1918 and Carnegie Institute of Technology, Pittsburgh, in 1922. He has been connected with the New York firm for about two years, having worked one year after his graduation in a Pittsburgh office.

The scholarship, established by Pierre Le Brun and awarded under the direction of the New York chapter of the American Institute of Architects, is offered to any architectural draftsman or architect between the ages of 23 and 30 who is a resident of the United States.

Paul F. Simpson, of Lima, Ohio, a graduate of Carnegie in 1921, won the award in 1923.

The subject of this year's competition was a municipal building for a town of 150,000 population having room for all the city officials including a city court and auditorium for public functions.

Though not engaged in the Indiana architectural field it is gratifying to learn that an Indiana man qualified for this high honor.

### INDIANA HARBOR FOSTERING A BIG BUILDING PROGRAM

**Projects Contemplated Deal With Large Industrial Expansions**

The last three months in the history of Indiana Harbor have been historic ones.

More appropriations for industrial and residential developments have been made in that time than in any other similar period in the city's history.

Roughly estimated, the total of the appropriations made since the first of the year will equal $18,000,000. Divided in their proper order, they might be given as follows:

**$18,000,000 Appropriations**

1. Inland Steel has appropriated $8,000,000 to build a new blast furnace, erect additional coke ovens, enlarge the present by-products plant, construct a new 19-inch mill, and to make other extensions and additions.

2. Universal Portland Cement company has appropriated $3,000,000 to construct a new harbor and docks at the Buffington plant.

3. Youngstown Sheet and Tube company has appropriated $5,000,000 for the erection of a new bar and skelp mill and for the completion of a new blast furnace now under construction.

4. Several real estate firms of the city have appropriated $1,000,000 for the erection of one hundred two story brick flat structures; and as many more are expected to be built by private individuals.

### LABOR WAGE CONTROVERSY THREATENS TO TIE UP BUILDING CONSTRUCTION OPERATIONS

**Difficulties Arise At East Chicago and Indiana Harbor**

The record breaking building operations in East Chicago and Indiana Harbor may receive a serious setback April 1 if the present wage controversy between contractors and building laborers is not settled satisfactorily.

An increase of 22.5 cents an hour has been demanded by the laborer's union at the expiration of their present agreement April 1.

The East Chicago Contractors association has not answered the union ultimatum yet; and threats of a strike are filling the air as a result of the delay.

Contractors contend that the building laborers are receiving an unusually high wage rate at present, and that their demands are unreasonable. The present scale at 87.5 cents an hour for common building laborers, contractors say, is the peak price of all times.

The laborers contend, on the other hand, that the scale is not proportionate to the scale received by the various building crafts, who have recently been granted an increase.

Twin City realtors are striving to act as a board of arbitration in the settlement of the controversy. They have several hundred thousand of dollars tied up in many buildings now under construction, and they fear that a delay will seriously harm their investment.

### START BIG 21 APARTMENTS CONSTRUCTION PROJECT

**Other Similar Structures Now Under Contemplation**

Workmen have started breaking ground for the erection of a new 21 apartment building on Chicago avenue near White Oak avenue at East Chicago.

It is being constructed by Albert Given, head of the local pants factory which bears his name.

Other local builders plan to erect a group of similar typed flats at the west end of the city this year.

### A SURE REACTOR

**Jurisdictional Disputes Anything But Help to Union Labor**

If there is anything more short-sighted than some of the policies followed by some of the building trades crafts it would require one to do some tall hunting to locate it. For instance, certain crafts will get into a wrangle on jurisdiction, assume an arbitrary stand and completely tie up the work on buildings utterly disregarding the discomfiture to which such action puts the owner and the contractor while such wrangling continues.

If there is one thing more than any other that casts disfavor on unionism it is this petty, annoying, jurisdictional bickering, the matter of which trade shall execute a certain branch of the construction operation. If such matters must arise there is no reason why the work should not procede while the question itself is put up to arbitration for settlement.

Some trades apparently take a delight in getting into such disputes, tie up the work and cause all kinds of trouble and inconvenience they can and in that way exert a pseudo authority. One might liken the situation to that of the Irishman and his son. The old man said to the boy, "It is not that I have a grudge against you that I beat you, rather, it is to show my authority."

It is just such action as this that is sure to create a greater antagonism toward Union Labor on the part of the public and even the contractor who is inclined to work along with the Unions is inclined to lose his faith in them and their methods.

### SOMEONE DID SOME SOFT PEDALING

**Common Laborers Not So Insistent In Their Demands**

Some of the radicals among the common laborers who have been yelping about securing $1.25 per hour after April 1, or quitting have toned down a little since the more conservative element has insisted that they temper their demand with reason. They were asking for $1.00 to $1.25 per hour at the expiration of thep resent wage agreement on the first of the month. At this writing the laborers seem to be marking time.

# Sealed Proposals

### HIGH SCHOOL
### NOTICE TO BIDDERS

1. Sealed bids will be received by the Trustees of the School City of Wabash, Indiana, at its office in Wabash, Indiana, for the building of a new high school, including general construction, heating and ventilating, plumbing and sewering, electrical work and clock system.

2. The estimated cost of the complete work is $307,233.00.

3. Bids will be received until 10 a. m., April 24, 1925, and then opened for consideration.

4. All bids must be made upon proposal blanks prepared by the School City, which blanks will be supplied upon application.

5. Proposals shall be presented in sealed envelopes which shall be plainly marked to indicate the character of work bid.

6. Each bid must be accompanied by a check for 5 percent of the maximum bid, which must be drawn payable to the order of the "School City of Wabash," and certified good, by a bank or trust company of Wabash.

7. In case a bidder whose bid shall be accepted shall within five days after notice of such acceptance perform his bid by entering into a written contract with the said board, in the form made part of the specifications, to execute the work bid upon and construct and complete the same, and within that time secure the performance of his contract by a bond in the form made part of the specifications, with guaranty bond, to the approval of the Board, then his certified check and the proceeds thereof shall be and remain the absolute property of the School City as liquidated damages for such failure, it being impossible to estimate the amount of damages such failure would occasion to the School City.

8. For information and for plans and specifications for the buildings called for, consult the School City's architects and engineers, J. Edwin Kopf and Woolling, 402 Indiana Pythian Building, Indianapolis. Plans and specifications are also on file in the office of the Trustees, where same may be inspected.

9. Bidders shall offer in their bids to execute a contract and give a bond, forms of which contract and bond are made a part of the specifications so on file with the Trustees and the architects and engineers.

10. Each Contractor receiving from the architects and engineers copies of the plan and specifications, will be required to deposit as security for their return in good order, the sum of $100.00.

11. The right is reserved by the Board to reject any or all bids, and to refrain from accepting any bid pending the sale of school bonds for building purposes.

MINNETTA P. JORDAN, Secy.
N. P. LAVENGOOD,
MILO R. MEREDITH.
Trustees for the School City of Wabash, Indiana.
April 4th-11th, 1925.

## "BC" Series Up-Draft Smokeless Boiler

Patent Pending

Prox Boilers are equipped with a top header, which is a positive steam separator, assures dry steam carrying maximum number of B. T. U.'s Water boiling up will not go into main and cause water knock, no matter how hot a fire may be in any part of boiler. A side connection to this header with natural drain to rear of boiler discharges all water and condensation to side headers. This is only one of the many superior features of Prox Boilers.

PROX UP-DRAFT SMOKELESS BOILERS

Burns all grades of fuel, such as bituminous coal, lignite, coke, oil, gas, wood.

Capacities - 1750 sq. ft. to 22,800 sq. ft. steam

Leslie Colvin,
Indianapolis.

This beautiful addition to the Circle at Indianapolis, The Continental Bank Building, was erected with the use of our Baker Removable Wood Joist-Forms. Herringbone expanded metal lath was used throughout as a plaster-base.

All the other new buildings on the Circle—the Guaranty Building, the Test Building (Circle Motor Inn) and the Columbia Club—were built with the help of these removable forms.

Ask for an estimate on your next multi-story building—A better job at a lower cost.

## SEES DANGER IN TREND TO CHECK, REIN AMBITION BY INSERTION OF RESTRICTIVE RULES GOVERNING PRODUCTION

### A Great Man Believes Labor Unions Should Fit Men for Greater Responsibilities Rather Than Put a Premium on Shirking

"I am not against the eight-hour day, or any other thing that protects labor from exploitation at the hands of ruthless employers, but it makes me sad to see young Americans shackle their abilities by blindly conforming with rules which force the industrious man to keep in step with the shiker. I have always felt that one of the principal reasons for American progress in the past has been that every man has a chance to become whatever he wanted to be. It used to be fashionable to be ambitious. The employe planned to become an employer; the unskilled man sought to become skillful. A young man was not well thought of if he were not striving for a higher place in life. Today I am wondering what would have happened to me by now if 50 years ago some fluent talker had converted me to the theory of the eight-hour day and convinced me that it was not fair to my fellow-workers to put forth my best efforts in my work. I am glad that the eight-hour day had not been invented when I was a young man. If my life had been made up of eight -hour days I do not believe I could have accomplished a great deal. This country would not amount to as much as it does if the young men of 50 years ago had been afraid that they might earn more than they were paid. There ought to be some labor leader strong and wise enough to make trade unions a means of fitting members for better jobs and greater responsibilities"

## BUILDING FIGURES FOR FIRST QUARTER OF THE YEAR SHOW INDIANA VOLUME IN SATISFACTORY RATIO OF GAIN OVER CORRESPONDING PERIOD LAST YEAR

### Gary, Hammond and Richmond All Score Big Increases

Here and there about Indiana, during the first quarter of 1925, the building activity in various cities may have been off a little when compared with that of some of the months of the corresponding period a year ago, but in the aggregate the reports from nine of the leading cities of the state present a very satisfactory result. Since the 1924 figures from Muncie are not available the 1925 figures are not reckoned in the comparative reference.

The ten cities considered show 1,341 more permits issued for January, February and March, 1925, than were granted over the same period in 1924. In like manner the total estimated valuation of the new building work passed upon favorably in 1925, amounted to $15,579,296, as against $14,826,623 in 1924, a gain of 5%. This is surely encouraging for so early in the year when the building season has hardly opened, the actual start beginning when the weather becomes more settled and warms up.

Eight of the cities showed more activity in the way of the issuance of permits so far this year than during the first quarter a year ago. Three localities showed substantial gains in regard to the estimated valuation of the volume of business and it was these three cities that offset the losses of the other seven and carried the first quarter of 1925 through to a gain over the corresponding quarter a year ago.

Richmond stood out far ahead of all the other cities in the matter of gain showing a 249% increase. However, Gary was the real buildin glife saver with her $4,457,770, a figure that registered an increase of 111%. Next came Hammond with a gain of 106%. Richmond, Gary and Hammond issued 52, 285 and 65 more permits respectively than they did during the first three months of 1924.

The record of the other seven cities was as follows: Indianapolis, 640 more permits issued, but a 4.57% loss on the total estimated valuation; Evansville, 385 more permits, 9.1% loss on valuation; South Bend, 71 less permits, 27.4% loss; Ft. Wayne, 37 more permits, 27.7% loss; Terre Haute, 101 less permits, 48% loss; Kokomo 10 more permits, 57.1% loss; Elkhart, 31 more permits, 68.8% loss.

Below are the official figures received from the various city building inspection departments for the first quarter of the years 1925 and 1924::

| Cities | Per | 1925 Est. Val. | Per | 1924 Est. Val. |
|---|---|---|---|---|
| Elkhart | 68 | $ 201,325 | 37 | $ 646,950 |
| Evansville | 845 | 786,611 | 460 | 866,122 |
| Ft. Wayne | 476 | 1,916,192 | 429 | 2,651,100 |
| Gary | 556 | 4,457,770 | 271 | 2,110,784 |
| Hammond | 206 | 941,036 | 141 | 454,665 |
| Indianapolis | 3683 | 5,324,702 | 3045 | 5,324,702 |
| Kokomo | 124 | 147,040 | 114 | 343,085 |
| Muncie | 137 | 372,094 | --- | ------ |
| Richmond | 127 | 299,150 | 75 | 85,627 |
| South Bend | 595 | 1,021,408 | 666 | 1,408,733 |
| Terre Haute | 256 | 484,062 | 357 | 934,855 |
| Total | 7073 | $15,951,390 | 5595 | $14,826,623 |

## I. S. A. EXHIBITS TO GRACE BIG A. I. A. EXHIBIT AT NEW YORK

### Four Indiana Architectural Firms to Display Examples of Their Work

As the result of a careful review of the Architectural Exhibit held by the Indiana Society of Architects the work of four of the members of the Society who are also members of the Indiana Chapter, A. I. A., is to be sent on for display at the convention and exhibit of the A. I. A., at New York City, April 20 to 24, inclusive.

The selection was made by Architect Irving K. Pond, Chicago, Past President of the A. I. A. The firms to be represented at the New York exhibit are: Bass-Knowlton & Co., Robert Frost Daggett, McGuire and Shook, all of Indianapolis, and Johnson-Miller-Miller and Yeager, Terre Haute.

As now planned the Indiana exhibit will consist of the following displays:

**Robert Frost Daggett**—(7 pieces)
- Bank—1 piece—28″x30″.
- Bank—3 pieces—16″x19″.
- Hospital—2 pieces—20″x16″.
- Hospital—1 piece—16″x20″.
- Studies—Butler College.

**Bass-Knowlton & Co.**
- Motor Inn—1 piece—25″x30″.

**McGuire and Shook**—(4 pieces)
- Doorway—Union Trust Bldg.—14″x19″.
- Elevation Bank Bldg.—20″x18″.
- Perspective Bank Bldg.—18″x15″.
- Doorway Residence—15″x19″.

**Johnson, Miller, Miller & Yeager**
- Residence—30″x24″.

This is the first time Indiana has formally been represented at an A. I. A. convention and is quite a step forward in directing attention of the architectural profession over the country to the efforts that are being put forward by the members of the profession in this state.

## HOME COMPLETE SHOW INDIRECTLY SUGGESTS IMPORTANCE OF ARCHITECTURAL SERVICE

### Too Much Involved For Owner to Go It Alone or Leave the Building Operation Just to Chance

At Indianapolis this week there was a big Home Complete Exposition in the large Manufacturers' Building at the State Fair Grounds, and tens of thousand of people have been in attendanee each day and night to look upon building materials, furnishings and the latest modern appliances that go to make a complete home, be it a palatial residence or a cozy little nook of a dwelling.

The show was a fine one and the displays were more artistic and attractive than in former years. There was an appeal in most every booth no matter what the exhibit, be it brick, lumber, roofing, plumbing or heating fixtures, electric fixtures or furnishings from floor covering, wall decorations, kitchen equipment and what not clear through to even a radio outfit.

Everything to make a home complete was there and yet several inquiries were made of the writer as to where the architect and contractor came in. One person in particular, and there were probably others who had the same thought, said, "While all these things are fine and nice, who is going to watch over the building of the home to see that the right things go into it and that something of an inferior nature is not slipped in?"

That was a cue. If there was a way that architectural service and its value could be impressed upon the public it would be a fine thing for the said public. Some inherently, somehow, feel the need for a well designed, architecturally arranged set of plans and a competent builder to execute same if the home complete result is to be attained, others seem to consider a residence a residence regardless of how it is planned or constructed. There is much of the latter work being done without architectural guidance or real contracting skill and in the end the owner pays a big price for a structure that could have been greatly improved had an architect planned it and a real contractor built it. Somehow to a close observer the Home Complete show lacked one great essential and that was the need for careful planning and a supervision of the selection of the proper materials and fittings that go to make up a real building, a real home. Also it failed to stress the place where the competent contractor fits in. The impression generally given the public, the feeling left, was that somehow all these materials and furnishings would somehow assemble themselves into a "Home Complete" if the desire to build was there.

However, with such a myriad of materials, so much in the way of appliances and furnishings, on display to be selected from there came a second thought, to one who knew the building game, that in the building of the "Home Complete" architectural service is an essential in the operation, something that should not be ignored, and, also competent building ability should be employed if the owner's ideal is to be realized.

# Build with the Builders

"The builders . . . . . are insuring their liability in their own company, a trade mutual---a company that has enviably succeeded in every factor involved in carrying out principles of compensation insurance. This company is the

## Calumet District

### PLANING MILL CARPENTERS STRIKE WHEN INCREASED WAGE DEMAND IS TURNED DOWN

**Calumet Workers Ask For A Greater Hourly Wage Than Is Paid in Chicago**

If it isn't one annoyance in the building game it is another. Among the latest disturbances to the equanimity of Calumet building progress is a strike on the part of the carpenters employed in the planing mills. These workmen went out April 1, when their demand for $1.35 per hour was refused. The former scale that expired the first of the month was $1.10. At Chicago mill men are being paid $1.15, and the local operators offered the men here that figure with the priviso that if the big city scale was raised the increase would be met in the Calumet District. However, that counter proposition was turned down by the employes and they walked out.

Later a meeting was called April 3, and the strikers agreed to resume work if they were granted $1.25 per hour, but this offer the mill owners refused to consider. The strike is still on and the planing mills are idle. With the Chicago mills continually fighting for the Calumet work it is impossible for the local mills to pay a higher scale than is in effect at Chicago, and still meet the competition from that city.

### BARKED UP THE WRONG TREE

**Iron Workers Raise a Howl Then Strike Only to Find They Were Wrong**

Just to keep up the turmoil and to demonstrate to the bosses that they are "on the job," the structural iron workers on the big bank and office building kicked over the traces last week, and pulled a strike. It all arose over a claim put in by the Structural Iron Workers, Hoisters and Riggers who held they were entitled to handle all hoisting, rigging and derrick work on this particular project. It so happens that the stone setters were operating a hoist to raise and put the stone in place and the iron workers claimed jurisdicition for all such work. This claim was ignored and the iron workers struck.

There was some intensive investigation started which brought to light the fact that the Chicago Building Trades Council, which holds jurisdiction for a radius of fifty miles of Chicago, had given the stone setters the right on the disputed work and the result was that the iron workers pulled in their horns and went back to work.

Great stuff, isn't it?

### CALUMET BUILDING PROGRESS

Architects Buckley and Skidmore, Hammond, report plans under way for these projects: Meter Building, 2 sty., 25x90, brick construction, at Sheffield and Hanover sts., for the northern Indiana Gas and Electric Co. Three one-story fireproof meter houses, 10x24, and a two story, brick construction, shop building, 60x60, for he same owner, who will buy material and build by day labor.

Architect Mac Turner, Hammond, is ready for bids on a two story residence, bungalow type, 24x75, for John Zyijak of Whiting. Other plans he has in course of preparation are for a 3 sty. brick store building, 50x75, for the Hammond Furniture Co., on E. State st., and plans and specifications for moving and replacing fifteen buildings on the south side of E. State st.

Guy Young was awarded the general contract for the construction of a $10,000 residence for Louis Mott.

Rhoades and Graves, Hammond, of the Florida winter colony, are back home and are starting work on a new 24x40 frame bungalow, on W. Carrol st., Calumet City, Ind.

Architects Hess and Greenwood, Hammond, will receive bids about April 25, on a two story brick residence for Robert De Wese.

Bills of material for the new amusement park on the lake front at Hammond are being rushed through and filled at the local mills and along about April 1, a large force of men was put to work to shape up the place for the opening of the summer season, beginning Decoration Day. It is going to take some tall hustling but the promoters say it can be done. The start of active construction work was delayed somewhat in order to get the attitude of the State Legislature on the Sunday closing proposition.

E. E. COLE.

## EVANSVILLE

### CITY HOLDING ITS OWN IN BUILDING EFFORT

**Record For This Year Only Slightly Behind That Over Corresponding Period in 1924**

While no unusually large building projects have been started in Evansville so far this year, nevertheless the city has been enabled to keep within easy striking distance of the building record for the first quarter of 1924. Since January 1, there have been 845 building permits issued which is far in excess of the total issued during the corresponding period last year. Though the work has run to smaller projects such as home building and repair, remodeling and addition work, the entire volume in estimated cost is almost up to last season's January, February and March figures. Plans for ninety-seven residences

have been approved since the first of the year.

Building records for the month of March show 346 permits issued with a total valuation of $292,128 as against 301 permits at $549,274 during the corresponding month of 1924 and 265 permits at $354,779 during February, 1925. Evansville during the month of February was second in the state only to Indianapolis in the number of permits issued and holds the same position again for March.

During the month just passed, 108 permits totaling $37,782 were taken out for old construction, and 251 permits totaliny $254,346 for new construction.

According to Building Commissioner Kerth the feature of the March report lies in the fact that hardly any large of buildings were started. The greater part of building activity was confined to the construction of homes. Permits for 41 residences, costing in the aggregate $111,625, were issued in March.

The large number of repairing, remodeling and plumbing permits were taken out due to enforcement of building code requirements in the first zone.

## EVANSVILLE WORK HUNG UP BY CARPENTERS' STRIKE

### Workmen Quit When Advanced Hourly Wage Scale Demand Is Turned Down

Local union carpenters are still out on a strike because the Associated Building Contractors of Evansville refused to meet their demand for an increase in the hourly wage scale of 15 cents. Last season the scale was $1.00 per hour and when the agreement expired April 1st, the union asked for an advance. A meeting of the A. B. C.s, was called and after due and serious consideration the members of the association adopted a resolution in which it was agreed not to increase the carpenters' wages since prospects and conditions did not warrant such action.

A counter request was made by the contractors that the matter be submitted to a board of arbitration but evidently no attention was paid to it for the carpenters failed to report for work at the expiration of the last season agreement.

The members of the A. B. C., are holding to their original determination not to grant an increase which has resulted in most of the building work in the city being tied up pending a settlement.

# FT. WAYNE

## BIG DEMAND FOR LABOR TRACED TO REOPENING OF BUILDING CONSTRUCTION SEASON

### Many Men Placed Last Week

A pick up in building construction work locally is reflected in the demand that has cropped out for laborers. At the Ft. Wayne branch of the Indiana State Free Employment Bureau, there have been many calls from contractors for common labor. Last week approximately one hundred and seventy men were placed on building work, this was over one half of the applicants looking for employment at the bureau.

## RUNNING BEHIND LAST YEAR'S BUILDING FIGURES

### Ft. Wayne's Construction Volume Trailing That of 1924

approved for permits since January 1st, outnumber by 47 those recorded during the corresponding period in 1924, nevertheless, the volume of business this year is considerably behind that of last year. Of the past three months, January was the only one to show a gain over the corresponding month in 1924, when a gain of 36% was shown. February failed to come back as strong as was expected and registered a loss of 22.7%. As for March, though an estimated valuation amounting to over $1,000,000 on new work was posted it was 39% under that of March, 1924.

### NEW CONTRACTING FIRM FORMED

**Members Not Unknown to Local Field**

A new contracting firm to be known as Sheets & Carlson, general building contractors. with offices at 344 Utility building, has just been formed here. The members of the firm are W. A. Sheets, who has been engaged in contract work in Fort Wayne for 16 years, and H. M. Carlson, for three years construction superintendent for Mr. Sheets, who has a number of fine local buildings to his credit.

## GARY

### GARY GOING BIG IN BUILDING CONSTRUCTION WORK

**More Than $10,000,000 Worth of New Work Started This Years**

No city in the state has anything on Gary this year when it comes to building, not even Indianapolis. In the latter place every operation costing twenty-five dollars and up is recorded, but such is not the case at the steel city up in northern Indiana, where the big industrial mill work does not come within the jurisdiction of the building inspection department.

At that, Gary, since January 1, has issued 556 permits for a grand total estimated valuation of $4,475,770 according to Building Inspector Herbert Erickson. This is an increase of 285 permits and $2,346,986 in estimated valuation of new work over the first three months of 1924. There has also been some extensive mill construction work done since the first of the year that would total close to six millions of dollars, and this added to the recorded figures would run Gary's building volume up to over $10,000,000 so far this year, a figure no other Indiana city can match.

## INDIANAPOLIS

### OUT IN FRONT OF THE HOUSING EFFORT LAUNCHED IN 1924

**Work This Year Featured By Lack of Big Projects But a Great Volume of New Houses**

Shortly after the opening of the new year it was made evident that Indianapolis was in for another house building year from the way permits to build were being sought at the building inspection department. As time went on the submission of house plans continued in good volume and now that the first quarter of the year has been completed it is found that the first three months of 1925 has been a great period for the development of housing projects.

From January 1st to April 1st, permits were issued for work that will provide accommodations for 998 families. Last year over the same period permits were granted that would take care of 857 families. Thus 1925 so far is 141 housing projects ahead of the corresponding period in 1924.

The total permits issued in Indianapolis since the first of the year are 3,683 for an estimated valuation of $5,324,702, this as against 3,045 permits for an estimated valuation of $5,579,696 granted during the first quarter of 1924. Though the money involved in new construction work this year is $255,994 behind that for the like period in 1924, there were 638 more permits issued in 1925. To date there have been no permits issued for any really large projects and the fact that those of a lesser nature ran up a total estimated valuation almost equal to that of the same three months a year ago indicates the intense activity that the smaller work has caused in the local building field.

### TAKES OVER INTERESTS OF FORMER WELL KNOWN LOCAL MATERIAL SUPPLY MAN

**D. A. Stackhouse Acquires Business Formerly Conducted by Geo. Moring**

The Stackhouse Building Specialties Company has succeeded to the business known as the Moring-Stackhouse Company, and is operating under that name in its new location, 814 Hume-Mansur Building.

Owing to the fact that the interests of Geo. E. Moring, for years a fixture in the Indianapolis building specialties field, are now centered in Chicago, he has withdrawn from the firm, and the new company will be operated under the exclusive control of D. A. Stackhouse.

### WANTED

A detailer and biller for Woodworking plant doing a national business in standardized materials going to the building trades. Knowledge of mill practice, accuracy and ability to work from blue prints essential. Give full particulars, reference, age, present employment, where worked for last five years, salary expected, when could report. A good opportunity for the right man.

Reply, Box 410, Newcastle, Indiana.

### WANTED

**Construction Superintendent:—**

Desires position with general contractor; 25 years experience in different lines of building construction. Can furnish the best of references, also recommendations covering the past twenty years in this territory. Just completed a large Township School project. Address Box No. 12, Indiana Construction Recorder, 312 East Market St., Indianapolis.

# Sealed Proposals

### HIGH SCHOOL
### NOTICE TO BIDDERS

1. Sealed bids will be received by the Trustees of the School City of Wabash, Indiana, at its office in Wabash, Indiana, for the building of a new high school, including general construction, heating and ventilating, plumbing and sewering, electrical work and clock system.

2. The estimated cost of the complete work is $307,233.00.

3. Bids will be received until 10 a. m., April 24, 1925, and then opened for consideration.

4. All bids must be made upon proposal blanks prepared by the School City, which blanks will be supplied upon application.

5. Proposals shall be presented in sealed envelopes which shall be plainly marked to indicate the character of work bid.

6. Each bid must be accompanied by a check for 5 percent of the maximum bid, which must be drawn payable to the order of the "School City of Wabash," and certified good, by a bank or trust company of Wabash.

7. In case a bidder whose bid shall be accepted shall within five days after notice of such acceptance perform his bid by entering into a written contract with the said board, in the form made part of the specifications, to execute the work bid upon and construct and complete the same, and within that time secure the performance of his contract by a bond in the form made part of the specifications, with guaranty bond, to the approval of the Board, then his certified check and the proceeds thereof shall be and remain the absolute property of the School City as liquidated damages for such failure, it being impossible to estimate the amount of damages such failure would occasion to the School City.

8. For information and for plans and specifications for the buildings called for, consult the School City's architects and engineers, J. Edwin Kopf and Woolling, 402 Indiana Pythian Building, Indianapolis. Plans and specifications are also on file in the office of the Trustees, where same may be inspected.

9. Bidders shall offer in their bids to execute a contract and give a bond, forms of which contract and bond are made a part of the specifications so on file with the Trustees and the architects and engineers.

10. Each Contractor receiving from the architects and engineers copies of the plan and specifications, will be required to deposit as security for their return in good order, the sum of $100.00.

11. The right is reserved by the Board to reject any or all bids, and to refrain from accepting any bid pending the sale of school bonds for building purposes.

MINNETTA P. JORDAN, Secy.
N. P. LAVENGOOD,
MILO R. MEREDITH.
Trustees for the School City of Wabash, Indiana.
April 4th-11th, 1925.

### SCHOOL HOUSE—NOTICE TO CONTRACTORS

Notice is hereby given that the Trustee and Advisory Board of Jefferson School Township, Henry County, Indiana, will receive sealed bids at the present school building in the village of Sulphur Springs, Jefferson Township, Henry County, Indiana, up to 1:30 o'clock P. M., on Tuesday, the 28th, day of April 1925, for the furnishing of all materials and performing of all labor for the construction and the completion of the addition to and the remodeling of the school building at the Village of Sulphor Springs, in said Jefferson Township.

Such work will be under the plans and specifications heretofore approved and now on file in the office of the State Board of Accounts, of the State of Indiana, and in the office of the undersigned Trustee, and in the office at the Architects, Henkel & Hanson, 108, Heinemann Building, Connersville, Ind.

Copies of plans and specifications will be furnished any Contractor applying for same on deposit of the sum of fifteen dollars, to be held in escrow for the return of said plans and specifications to the Architects, and the filing of a bona fide bid on the date above mentioned. General plans must be returned on the date of opening of bids. Heating and Ventilating, Plumbing and Electric wiring plans must be returned within ten days after they are received by the Contractor. When Contractors comply with the above rules the amount of their deposit will be refunded to them in full.

All bids shall be made and submitted on form 96 bidding blanks. Each bid shall be accompanied by a certified check upon a solvent bank, made payable to Frank Lester, Trustee, in the amount of not less than three per cent of the total amount of their bid, tendered as a guarantee that the bidder will, if awarded the contract, enter into a bona fide agreement with said school township of Jefferson, for the contract, and furnish sufficient bond equal to one hundred per-cent of the contract price and satisfactory to the Trustee and Advisory Board.

## ARCHITECTURAL DRAFTSMEN AND ENGINEERS

Webster 0217 2326 E. 10th Street Indianapolis, Ind.

If for any reason the bidder shall fail to enter into proper agreement or fail to execute a proper bond, the full amount of the certified check shall be retained by the school township as liquidated damages. The estimated cost of the building complete is $42,000.00. The successful bidder will be expected to begin work immediately on this building and prosecute the same vigorously and complete the same for school in the fall of 1925.

The undersigned Trustee and Advisory Board reserve the right to reject any and all bids, or any part of any bid, and waive any defects or informality, if deemed in the interest of said Jefferson School township.

Bidders in submitting their bids will submit same as follows:

No. 1. On general Contract.
No. 2. On heating and Ventilating.
No. 3. On Plumbing.
No. 4. On heating, ventilating combined with plumbing.
No. 5. On electric wiring.

---

**SCHOOL HOUSE**
**NOTICE TO CONTRACTORS**

Notice is hereby given, that on the 2nd day of May, 1925, at the Hebron School House on Lincoln Avenue, in Knight Township, Vanderburgh County, Indiana, the undersigned Trustee of Knight School Township, Vanderburgh County, Indiana, in conjunction with the Advisory Board of said Township, will receive sealed bids for the furnishing of all labor and material for the construction of a one-story and basement brick school building in said Knight Township, known as the "Caze School," in accordance with the plans and specifications now on file in the office of said Trustee, R. R. 4, Newburg, Indiana, and in the office of Alfred E. Neucks, architect, 605 Old National Bank Bldg., Evansville, Ind. Said bids will be received up to 7:00 o'clock P. M. on the 2nd day of May, 1925.

The estimated cost of said construction is $18,000.00.

Said Trustee, in conjunction with said Advisory Board, will examine said bids and award the contract for said construction to the lowest and best bidder therefor; and the successful bidder will be required to enter into a written contract with said school Trustee for the furnishing of all labor and materials for the construction of said school house in accordance with said plans and specifications, and to give bond, with surety to be approved by said school Trustee, for the faithful performance of said contract.

Each bidder will be required to submit a certified check in an amount equal to three per cent of bid submitted, said check to be forfeited to the township trustee in the event that the successful bidder refuses or fails to enter into a proper contract with proper surety.

The school Trustee and Advisory Board hereby reserve the right to reject any and all bids.

FRED MANN,
Trustee of Knight School Twp.,
Vanderburgh County, Ind.

Arthur C. Stone,
Atty. for Trustee.
April 11, 1925.

**STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24- 1912**

Of Indiana Construction Recorder, published weekly at Indianapolis, Indiana, for April 1, 1925, State of Indiana, County of Marion, ss:

Before me, a notary in and for the state and county aforesaid, personally appeared Donald Campbell, who, having been duly sworn according to law, deposes and says that he is the owner of the Indiana Construction Recorder, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in Section 443, Postal Laws and Regulations, printed on the reverse of this form, to-wit:

1. That the name and address of the publisher, editor, managing editor and business manager are:

Publisher, Donald Campbell, 312 East Market St., Indianapolis, Indiana; editor, Donald Campbell, 312 East Market St., Indianapolis, Ind.; managing editor, none; business manager, Donald Campbell, 312 East Market St., Indianapolis, Indiana.

2. That the owners are: (Give names and addresses of individual owners, or, if a corporation, give its name and the names and addresses of stockholders owning or holding 1 per cent. or more of the total amount of stock). Donald Campbell, 312 East Market St., Indianapolis, Ind.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent. or more of total amount of bonds, mortgages, or other securities, are: (If there are none, so state.) None.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company, but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances or conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

5. That the average number of copies of each issue of this publication sold or distributed, through the mails or otherwise, to paid subscribers during the six months preceding the date shown above is ————. (This information is required from daily publications only.)

DONALD CAMPBELL, Owner.

Sworn to and subscribed before me this first day of April, 1925.
(Seal) JUNE STEELE MYERS,
Notary Public.
(My commission expires December 22, 1928).

## UNUSUAL GRADUATION EXERCISES HELD AT CLEVELAND, OF GREAT INTEREST TO BUILDING CONSTRUCTION INDUSTRY

### Apprentices in Building Trades Presented With Diplomas at Completion of Vocational Education Course

A new era in the world of education in this country was initiated in Cleveland, April 10, 1925, when a group of building trade apprentices, who had completed certain prescribed work, were presented with diplomas by the public school system of that city. This is the first time that education has officially placed its stamp of approval as symbolized by a diploma upon men of brawn and skill rather than upon men of abstract learning and theory.

Those who witnessed the impressive ceremony, which was held in the auditorium of the East Technical High School, were convinced that the public educators of the country are beginning to realize their responsibility in the training not only of the minds but the hands of the youth of America.

The opinion was freely expressed on all sides that the first annual commencement of a building trade school, which was in the way of being somewhat a novelty, would within the next few years be a well established institution in every city.

**Result of Action Launched in 1917**

The apprentice training movement in Cleveland dates back to 1917 when a night class for sheet metal workers was organized. In 1918, a committee of master and journeymen plumbers decided that some provision must be made to recruit apprentices for that important branch of the building industry. This committee petitioned the Board of Education to assist in the work of starting and maintaining such a school. The request was granted and in the brief space of seven years the movement has grown until now in place of a handful of boys in one trade there are nearly one thousand boys in six trades attending the part-time schools.

All of the schools are conducted under the same general plan, which provides for a joint committee in charge, composed of an equal number of contractors and journeymen and a representative of the public school system. The schools come under the provisions of the Smith-Hughes Act, which is a Federal Statute enacted in 1917, that provides for federal and state aid in apprentice training.

The Federal Board for Vocational Education and the State Board for Vocational Education have co-operated in every possible way with the Cleveland committees in making the apprentice schools successful.

**Strive to Keep Student Interested**

One of the strong features of the Cleveland system is that every possible effort is made to keep the boy interested in his job and further to keep him steadily employed. Many trade schools in the past have prospered for a time and then failed utterly because too little attention was paid to these two important factors.

In order to retain the interest of the apprentices they are given instruction in both the theoretical and practical problems of their trade. A bricklayer, for instance is not only taught how to lay brick in a wall, but he is also taught something of the history and development of this ancient art. He is also given instruction in the mathematics of his trade and learns how to lay out his work from plans which he himself has drawn. This same course is followed in all the trades with the result that the apprentice looks upon his chosen trade somewhat in the same light as a professional man does his profession rather than merely as an avenue for a livelihood.

In addition, from time to time evening meetings are arranged at which moving pictures depicting certain phases of the manufacture of materials used by the students are shown. Not long ago the bricklayers were invited to attend a meeting of this kind where a picture was thrown on the screen showing the processes of manufacturing brick. At this meeting an architect delivered an address relative to the art of bricklaying, in which was emphasized the fact that the skilled mechanic is necessary in the proper development of the ideas which the architect has in mind when he draws a set of plans for a building.

**Steady Employment Assured During Training Period**

In order to insure an apprentice that he will be given steady employment during his entire four year course each boy is indentured to a contractor in his chosen trade with the understanding that if his employer runs out of work he will be given temporary employment with another employer in that branch. Thus the danger of boys leaving before the expiration of their apprenticeship period due to unemployment is minimized.

Strict disciplinary measures are used on the boys who willfully absent themselves from the class-room or job. Each boy is taught the sacredness of the contract which he himself entered into, and those who violate their agreement are dealt with severely.

Each apprentice spends four hours a week in the class-room for which he is paid by his employer, and the balance of the time is spent on the job. In this way the practical and theoretical parts of his trade are so correlated that when he is through he is a thoroughly trained mechanic.

Plumbers, bricklayers and carpenters to the number of one hundred and fifty made up the first graduating class. In addition to these trades, classes in painting and electrical work were organized early this year, while the sheet metal course, which was started in 1917, is still training apprentices in that trade.

**Many Prominent Men Present**

Leaders in industry, labor and education were in attendance to offer their felicitations to the graduates. Secretary of Labor Davis, who was unable to be present, sent a message as did Franklin D. Roosevelt, President of the American Construction Council.

A number of the officers of national contractor associations, international and state labor organizations were in attendance.

**Labor Leader Endorses Plan**

One of the speakers of the evening was Matthew Woll of New York, Vice President of the American Federation of Labor. He said in part: "Here we have the realization of labor's concept of education. Here is apprenticeship in the hands of the schools, advised by industry as represented both by the employer and the employe.

"Apprenticeship is not dead. It is being revived and applied in modern terms. Labor is happy to co-operate with the school system of America, which it helped to nourish. In it we find the great hope of the masses and the solution of many of our most pressing problems.

"The first attempts to utilize the schools for trade training secured no enthusiasm from labor. It was an attempt to seize the schools and operate

## INDIANA ARCHITECTURAL DELEGATES TO A. I. A. CONVENTION READY TO LEAVE FOR NEW YORK CITY

### Big Event Opens Monday

The Indiana delegates to the annual convention of the American Institute of Architects who are to represent the Indiana Chapter, and the Indiana Society of Architects, will leave Indianapolis for New York City Sunday over the Pennsylvania Railroad. As at first planned there were to have been five architects in the Indiana party but the pressure of business has forced Fermor S. Cannon and "Bob" Daggett to forego the trip.

Mr. Herbert Foltz, President of the Indiana Chapter, accompanied by Mrs. Foltz, Merritt Harrison and Wilbur Shook, will leave Sunday. Messrs. Foltz and Harrison will act as delegates from the Indiana Chapter, while Mr. Shook was named delegate from the Society.

The train these men will board is carrying special cars for the architects who are being picked up along the route from Houston, Texas, on to Dayton, O.

A very fine program for the convention, which extends from April 20 to 24, inclusive, has been arranged indicating one of the most attractive national gatherings of the members of the architectural profession of the country.

## A. I. A. PRESIDENT ADVANCES HIS IDEA OF WHY BOYS DODGE ENTERING THE BUILDING TRADES

### Places Blame on Some Parents and Then, Too, on Girls

"Mothers and young women, do not be unrelenting in demanding that your son or young man friend must have a white collared job; it may not be in his or your interests."

This, in brief, is the advice of D. Everett Waid, of New York, president of the American Institute of Architects and a leader in enlarging facilities through which boys and young men may learn a trade.

"A great many boys and young men, because of the objection of parents or young women friends to them engaging in some occupation in which they can not wear a white collar, decide not to learn a trade," says Mr. Waid. "They take a clean job, drift along fairly well satisfied with life for a time, then suddenly find that they are not equipped to earn a wage beyond a certain low limit. Most of them decide that it is too late to change to some other occupation and it is regrettable but true, nevertheless, many of them end up in some line of work that is not highly remunerative."

### Building Congresses Pave Way

Mr. Waid said that through building congresses, which the institute is taking an active part in establishing, the architects organization is endeavoring to make it easier for young men and boys to learn a trade that will equip them for work in some branch of the building industry. Nine congresses have been established and others are to be organized soon.

A local building congress, as explained by Mr. Waid, is made up of representatives of all branches of the building industry and building trades labor organizations. They work toward the increasing of facilities to learn a trade, cooperating extensively with local educational officials.

"It is not sufficient that a man be skilled in laying brick, he should be educated to read blue prints," said Mr. Waid.

The fact that so few young men and boys are learning trades is due to more causes than the objection of mothers and young women to their son or young man friends not having a "white-collared" job, according to Mr. Waid. Both contractors and labor unions have not had "out on the job" the maximum of apprentices that is permitted under agreements between the building interests and the trades unions.

Another condition pointed out by Mr. Waid, as mitigating against youth learning a trade is the present shortness of the season to the building industry. This condition, he explained, is gradually being overcome by the activities of the committee on seasonal construction which is working under the sanction of the United States department of commerce. All-year-round construction is being encouraged, chiefly for the purpose of giving in the building trades, Mr. Waid said.

## BOX SHAPED HOUSES DISAPPEAR UNDER GREATER APPRECIATION FOR ARCHITECTURAL BEAUTY

### Modern Homes Result of Effort at Improvement by Architects

There has been astonishing progress in American architecture in the last two decades, and the outstanding feature of this progress is the roof designs and construction.

Americans are rapidly getting away from the box-like houses of the 70s. Modest homes are being designed with almost as much care as the most elaborate structures. The most beautiful feature of the home of today is the roof, which first catches the eye, gives character to a home and makes it a comfortable place to live, a permanent shelter.

Here at least is one good thing the architect has done, though many consider him as rather a non-essential in house building matters, he has been the primary influence in obliterating the tall gaunt hideous monstrosities that formerly prevailed. Others have come along to copy the architectural beauties that have been developed in house building, but, there is no gain-saying the architect started the good work.

# Build with the Builders

"The builders . . . . . are insuring their liability in their own company, a trade mutual---a company that has enviably succeeded in every factor involved in carrying out principles of compensation insurance. This company is the

## GRADUATION EXERCISES

(Continued from page 5)

them as a factory to produce skilled workers who would operate machines for profit alone. To that we were opposed.

"But we do approve of this, for it produces citizens, not automatons. It is developing again a pride in workmanship and it is making the shop not a place of toil alone but a place of education. From that education shall arise a better understanding between employer and employe and a better and more just distribution of the fruits of toil.

"I say to you graduates, value these diplomas as highly as do those entering the professions value theirs. I would rather have the diploma of essential and skilled workmanship than that of any lawyer or doctor. For we are needed as much as they."

### Federal Vocational Official On Hand

J. C. Wright of Washington, D. C., Director of the Federal Board for Vocational Education, said in part: "Today marks one of the most encouraging chapters in the development of what has been so well termed—The New Apprenticeship. To have a commencement exercise such as this for a group of apprentices who are completing their preliminary training and are about to enter upon their careers as skilled and qualified craftsmen in the construction trade, marks an epoch in American industry and craftsmanship.

"This occasion is noteworthy not merely as an indication of the appreciation of well trained and skilled craftsmen in Cleveland, but it is significant in its relationship to a nation-wide development of interest in the training of skilled workers. What has been done in Cleveland is being accomplished with varying degrees of success in many other places. The scope of this new apprenticeship extends from coast to coast and from Canada to the Gulf and the work which is being developed in all these places shows a steady and consistent tendency toward greater efficiency.

"While it is true that much is needed in addition to a plan of organization, no scheme of apprenticeship has a chance to succeed if it is built upon an insecure and unstable foundation. The finest possible group of apprentices, the best and most skillful instructors, the latest and best courses of training, the best tools and materials and the best jobs in the world on which to work are of little value unless they are integrel parts of a superstructure, which has a solid and substantial foundation with co-operation as its cornerstone. Here in Cleveland effective co-operation in the training of apprentices has been realized. There has been some difficulty, as there always is in connection with the performing of any great or important work, but as Roosevelt said: "Difficulties are things to be overcome."

"The big problem then is how can education and labor be most satisfactorily combined. This is not a new problem and Abraham Lincoln recognized its existence when in 1859 at Milwaukee he uttered these words: "Educated people must labor. Otherwise education itself would become a positive and intolerable evil. No country can sustain in idleness more than a small percentage of its numbers. The great majority must labor at something productive. From these premises the problem springs. "How can labor and education be the most satisfactory combined?"

### National Association of Building Trades Employers Represented

Another prominent speaker was Walter Klie of Cleveland, president of the Associated Plumbing Contractors and past president of the National Association of Building Trades Employers. He delivered an excellent address on the romance and development of the construction industry from the beginning of civilization down to the present time. He also outlined the development of the apprenticeship training movement in Cleveland.

### U. S. Secretary of Labor Sends Greetings

Secretary of Labor Davis in his message, which was read by Mr. Wright, said in part: "The old system of apprenticeship training under which the master and the apprentice worked side by side can not be revived. It does not fit into modern production. Education through the public schools offers the modern solution to the problem.

"We are rapidly restoring the dignity of labor and are overcoming that tendency to look upon work with the hands as degrading and menial. Work is happiness. There is no joy that stirs the human heart that is so complete as the sense of work well done, of a task completed."

### Official Cleveland Takes Part in the Ceremonies

Mayor Clayton C. Townes brought a message of felicitation from the city administration and called the commencement exercises "another forward step in the social and industrial life of Cleveland." Supt. of Schools, R. G. Jones, in a brief address stated that the public school system of Cleveland welcomed the opportunity of being of service in the work of training apprentices and expressed the desire that more and more interest in the matter might be created.

The diplomas were presented by E. M. Williams, President of the Board of Education. Charles H. Lake, Assistant Superintendent of Schools, presided and the invocation was asked by Rev. L. C. Wright, fraternal delegate from the Federated Churches to the Cleveland Federation of Labor.

Every speaker on the program called attention to the fact that the success of the movement in Cleveland was due to the spirit of co-operation manifested on the part of the participating groups, namely, employers, employes and public school officials.

## Calumet District

### EFFECT OF GRANT OF ADVANCED WAGE DEMAND BEGINNING TO MAKE SELF FELT

**Contractors Association Members Have Long Predicted Just Such a Situation But Warning Went Unheeded**

At last it appears as if that much referred to quip about killing the goose that layed the golden egg is to come to an actual realization, that is, as regards the Hammond building situation. The handwriting appeared upon the wall but there was no Joseph in the ranks of the building trades who could interpret its meaning, particularly amongst the carpenters, and the latter plunged right on, and, it would now seem the plunge was headed right for the "goose killing."

Last season and this season are two different stories. A year ago every building trades mechanic who really was intent upon working was able to find employment at good wages, no matter what his line, be it common labor or skilled work. That suited the rank and file for a time and then greed crept in to incubate agitation for higher wages.

In former years when such a situation arose the Contractors' Association sought, for the good of the industry, to resist demands of the unions for advanced wages but the organization could never secure any support in its stand from the civic clubs, realtors, home builders or the public at large, in every instance the others went along as they saw fit and always left the contractors to hold the bag.

Came this season and the time for making new wage agreements. The carpenters were right on the job and presented advanced wage demands. Several conferences between the repesentatives of the carpenters and contractors were held but nothing could convince the tradesmen that their demands were untimely. At last the contractors thinking back over the past experiences could not see where they were called upon to spend effort, time and money to combat a wage demand that concerned those who were entirely unappreciative of the good offices formerly exerted by the contractors. As it was the latter resisted increased wage demands, stood firm on their proposition and later found they had been undermined by outside contractors, local owners and realtors who, rather than stand for a principle and delay their work by refusing to pay the advanced scales demanded, played right into the Unions' hands by paying bonuses and other increases in order to get men to carry on the work. These additional costs were passed on to the unsuspecting public, prospective owners, who footed the bill while the realtor and recalcitrant contractor waxed prosperous, and the man and men who stood firm for the public interests laid idle.

Enough is enough and too much is too much, so, the contractors this year took another tack and pooled their interests with all the rest. They decided to grant the demands of the carpenters for an increase and take a chance on the result. Their motto now is "let every fellow take the same dose."

Their action has rather upset the dope and caught the other fellow unawares. Already the realtors are howling as are others connected with the building game, even the carpenters are uneasy. Since the new scale has gone into effect there has been a noticeable slackening in building operations. The general contractors are reducing their forces to a minimum, consequently, since there has been a great influx of mechanics, it being nosed about that the Calumet is paying big wages in the building field, there is a surplus of men standing around. The carpenters have the high wage they wanted, but no work upon which to cash in. In the meantime the contractors of the association have come to the place where they can say truly, "I told you so."

### JURISDICTIONAL DISPUTE STILL ON AT THE NEW HOSPITAL

#### Plasterers and Bricklayers At Loggerheads Over Terrazzo Floor Installation

The controversy between the plasterers and bricklayers over the jurisdiction regarding the terrazzo floor layers that has been going on for some time at the hospital job seems to be no nearer a settlement than when started. Every effort that could be thought of has been tried to get it settled but without any success so far. It is too bad there is not some way to force a settlement in a case of this kind.

### CALUMET BUILDING PROGRESS

Architects J. T. Hutton & Son, Hammond, are receiving bids on a 12 apartment building for W. Fuzzy, for Barring ave., East Chicago. The building will be three stories high, 37x132.

If the strikes continue and high wages put building on the blink the contractors can keep busy by fishing and they have a good chance to eat, too, for word comes back from Cedar Lake that the pickerel and other fish are biting down that way.

E. E. COLE.

## FT. WAYNE

### IMPROPER SUBURBAN DEVELOPMENT OF FORMER YEARS NOW PRESENTS A REAL PROBLEM NOT ONLY LOCALLY BUT NATIONALLY

#### Another Effect the Automobile Has Brought About

Fort Wayne is not the only city that has reasons to worry a little about the wrong type of development of some of the lands immediately outside the city limits.

This is evident from the fact that a large part of the program of the convention of the National Association of Real Estate boards to be held in Detroit June 23-26 will be devoted to a discussion of ways and means to meet a new city expansion movement which seems to be widespread and growing worse with the passing years.

Until the development of the automobile, people naturally chose to live close enough to the downtown district to avoid discomfort and waste of time in walking. Only those who could spare the time and afford the luxury of a carriage and horses were content to live in the suburbs. The coming of the street car extensions helped to make possible the choice of a home-site farther out.

In the meantime, lands which ought now to be very valuable have been practically destroyed for future development by two factors:

First, the platting of the outlying lands, usually by outside professional lot-sellers, who, after "cleaning up," took their departure, never to return, and with no intention of providing water connections or any modern conveniences and improvements.

Second, by the erection on these tracts of raw land, of shacks of the most unsightly type.

Now, with these lands rapidly moving toward the center of things—or, rather, with the center of things moving out to take them in—there arises the disagreeable problem of converting these communities into real home neighborhoods. One is shocked today, on going a short distance beyond a splendidly laid-out Fort Wayne subdivision to find there a dead-line of shacks and hovels. In some instances, these are scattered all through a handsome wooded area which ought to have been made into a place of beauty.

#### What Survey Shows

Students of municipalities, observing in other cities the very same condition which confronts the people of Fort Wayne, declare that America is evolving a type of city that the world has never known before, with a manner of living, in its suburban areas, never before possible. The establishment of this twentieth century type of city community, spreading out into an area five or six times that occupied by cities of its population twenty years ago in an entirely new condition.

## INDIANAPOLIS

### INTERNATIONAL MASON CONTRACTORS' ASSOCIATION DOING SOME GREAT WORK

#### Efforts Arouse Interest of Material Manufacturers and Federal Officials

Just what real association effort means in the way of spreading the gospel, lining up new affiliated associations, and encouraging moves that mean much to a trade, when co-operation is extended, is shown in a report just received by the Mason Contractors' Association of Indianapolis, from W. T. McGarvey, of Cincinnati, O., secretary of the Mason Contractors' Association of the United States and Canada.

He starts off with the assertion that success is measured by real service and assures all members that the work of the International Association is moving ahead rapidly with greater hopes and anticipation than has ever been experienced heretofore. The incentive for the effort that is being put forth had its origin in the very strong co-operative spirit that was manifested by the delegates at the recent Springfield, Ill., convention and the splendid moral and financial support that was extended to the officers in the progressive, constructive plans they advocated for the advancement of the interests of the mason contractors, building conditions and the industry as a whole. Prompted by such inspiration the officers are laboring continuously to demonstrate to the mason contractors, or employers of bricklayers, throughout the United States and Canada, the value and importance of the International M. C. A. of the U. S. and Canada.

An encouraging feature at headquarters is the way the reports come in from local associations relative to conditions, and the expressed desire of such organizations to co-operate in the aim of the International officers.

**Material Manufacturers Sitting Up and Taking Notice**

Aside from the members of the parent association who are lending their hearty support to the great work of bettering conditions there are various manufacturers of materials about the country who are acting in unity with the International towards the advancement of the industry. Particularly is this true of the brick, cement and lime men. Many of these are encouraging the more appentices idea having come to a realization that if the bricklaying industry is to hold its long accustomed place of importance in the building construction field a determined effort must be made to rehabilitate the fast dwindling ranks of the bricklaying mechanics.

Of unusual interest, in connection with the above, was the visit made by International President R. M. Gillespie to the annual board meeting of the Lime Association in New York. This trip was made at the suggestion of President Woods of the Lime Association. President Gillespie was cordially received and was extended an opportunity to thoroughly explain the principles upon which the International Mason Contractors' Association was founded and the effort it is putting forth. At the conclusion of his remarks he was assured that the apprentice plan would be taken up and given thorough consideration at the convention of the Lime Association to be held in May.

**Conditions in National Capital Chaotic Due to Lack of Organization**

From New York, President Gillespie went to Washington, D. C., where he found things in a chaotic condition with the mason contractors unorganized, all pulling in opposite directions, and subjected to all the trials and adversities of the business. Some of the local contractors there appreciated what organization would mean to them and are now seeking to bring the contractors together.

**Federal Board of Vocational Education Endorses International Association's Apprentice Scheme**

A most gratifying feature of Mr. Gillespie's visit to Washington was a visit to the Federal Board of Vocational Education where he found the officers sincerely intent upon arousing the employer of mechanics the country over to the real situation and the pressing need for the induction of more apprentices into the ranks. The board was deeply interested in activities of the International Mason Contractors' Association and endorsed its method of training boys to make lasting bricklayers of them. It was agreed that the association scheme was the logical way for training apprentices and keeping track of them, and the board expressed a desire to co-operate in the movement.

President Gillespie also has been instrumental in building up new International affiliations at Peoria, Ill., Chattanooga and Nashville, Tenn.

**Correspondence Campaign Reveals Members' Interest**

Secretary McGarvey reports that an extensive correspondence campaign with bricklayer employers throughout the country and Canada has elicited a voluminous response from all sections and is a gratifying testimonial of the recognition that is being accorded the International Association.

**One Big Drawback Encountered**

The only draw back the association has encountered is the disregard general contractors have shown to the aprpentice move. Every effort has been made to interest them in the subject but their almost universal silence seems to indicate a lack of concern in the matter. It is hard to think these men must be classed as those who expect others to do a great work and then hope to step in to reap the benefit. Anything the masons do toward bettering or relieving conditions is bound to react to the benefit of the contractors and it would seem that they in proportion would be willing to assume their share of the burden.

At that the work so far this year has been most encouraging and the International officers feel that the evidence coming in to headquarters bespeaks a recognition of the effort and time put forth, for, results are surely beginning to appear.

Ease of Operation

*Kimball No. 2 Hand Power Elevators*

Speed and ease of operation makes the Kimball Hand Power Elevator a little giant for service wherever a light, durable, easily installed elevator is needed.

This machine is fitted with roller bearings, is chain driven and operates with ease and speed. Once installed your hand power elevator needs little or no attention as it functions without oil or grease. All parts are sawed, drilled and fitted and the machine is easily installed in a small space.

*Write for full particulars on the Kimball Elevator Machine you need.*

## AMERICAN ARCHITECTURAL PROFESSION AND ALLIED BUILDING ARTS TO BE REPRESENTED AT PARIS EXPOSITION

### Affair to Be International Exhibit of Modern Decorative and Industrial Art

A number of the architectural, building and other allied art industries intimately connected with the Exposition of Modern Decorative and Industrial Art, which opens in Paris, in May, will be represented by delegates who will accompany the commission appointed by Secretary Herbert Hoover of the Department of Commerce.

The increasing interest of American industries in the art movement which is finding expression in the great International Exposition has attracted many delegates who will join in a survey and study of the specialized exhibits to which the exposition is restricted.

As the exposition will comprise those arts which make for beauty in the domestic and personal lives of the people, only those who are interested in the trades and crafts of textiles, costumes, jewelry, silver, lighting fixtures, builders' hardware, wall paper, glass, ceramics, decoration, construction, and the graphic arts, will visit the vast displays shown in the superb and specially constructed buildings.

The exposition will occupy the Esplanade des Invalides, the Alexandre III Bridge and the Gardens of the Cours la Reine, the entire Grand Palais and the quays of the Seine, from the Concorde to the Alma Bridge. Practically every foreign country will exhibit its artistic products.

Interest in the arts shown at this exposition has been greatly fostered by the attention given to it by Secretary Herbert Hoover who appointed a commission to head the delegation, comprising Dr. Charles R. Richards, president of the American Association of Museums, as chairman, Mr. Henry Creange, the winner of the Friedsam Art and Industry Medal, and Frank G. Holmes of the Lenox potteries in Trenton. The commission appointed Edward L. Bernays, counsel on public relations, as an associate member.

In officially recognizing the importance of this exposition, Secretary Hoover has taken the first step in the government interest in these industrial arts. He called upon the commission to report on phases of the individual groups of exhibits, as may be of interest and value to American manufacturers.

That there will be many unique developments presented for these delegates to study is assured by the statement in the official program, "Works admitted to the Exposition must show new inspiration and real originality. They must be executed and presented by artisans, artists, manufacturers, who have created the models, and by editors, whose work belongs to modern decorative and industrial art. Reproductions, imitations and counterfeters of ancient styles will be strictly prohibited." This ensures the dominance of the modern spirit. This modern movement began some thirty years ago, largely in the field of glass and the new spirit has extended during the last twenty years so that the new characteristics have crept into the designs of many continental countries.

From such resources to which this country is not contributing, fruitful and inspiring ideas and ideals will be brought to our artists and craftsmen which will soon be felt in the elimination of many useless and unbeautiful things which have carried the artistic approval of crude minds which are devoid of taste. It is probable that the reports of this commission will have a far-reaching effect in improving the grace and charm of American life and surroundings.

## RENT NOT ALL PROFIT BY ANY MANNER OF MEANS

### Upkeep is a Very Great Item

One hears a great deal about the excessive high rents that are being charged these days and also much complaint is registered by many persons not familiar with the management of apartment houses as well as other types of buildings occupied as homes, have the erroneous idea that all of the rent paid by the tenants is profit to the owner. It has been demonstrated by keeping itemized monthly expense records that a very large percentage of the gross income is paid out in the operating and the management of the property.

Here is where part of the monthly rent goes:

| | |
|---|---|
| Interest | 30% |
| General taxes | 14% |
| Coal | 15% |
| Decorating and repairs | 10% |
| Janitor service | 7% |
| Special assessments | 6% |
| Heating plant repairs | 5% |
| Electric lighting | 3½% |
| Water rent | ½% |
| Insurance | 2% |
| Total expense | 94% |

ORGANIZATION AND CURRENT NEWS

## Calumet District

### LABORERS AGREE TO WORK AT LAST SEASON'S SCALE

**One Difficulty Overcome by Contractors**

There has been at least one ray of sunshine to filter in over the local building field the past week in the nature of an agreement between the contractors and the laborers. For a time it looked as if a deadlock had developed between these two as the laborers for weeks were insistent upon an advance in wages for this season, and, the building trades employers were equally opposed to any such action.

Finally on the 15th of April the two sides came to terms with the scale remaining at last season's figures.

### GOVERNMENT OFFICIAL STEPS IN

**Secy. of Labor Sends Representative Seek to Settle Planing Mill Workers' Strike**

The wage controversy between the planing mill men and their employers has come no nearer a solution though several weeks have elapsed since it started. The men demand an increased scale, the employers are opposing the demand and both elements are standing pat on their contention.

The latest turn in the situation is the arrival in Hammond of a representative of the U. S. Secretary of Labor who is seeking to arrange a meeting of the two factions in an endeavor to clear up the muddle. There are many hoping a settlement may be reached.

### BUILDING TIE UP THREATENED

**Menace Develops to Blight Big Construction Prospects at Gary**

With members of the cabinet workers and painters local out on strike and a possibility of other trades joining them. Gary is threatened with a building tie-up in the midst of one of the biggest building booms in the history of the city.

The cabinet workers have been out about three weeks and the painters evening last week met in the ball room joined them a week ago. In an effort to avoid a general strike it is understood that effort is being made to come to some temporary agreement pending a final agreement.

Architects Hess & Greenwald, Hammond, issued plans to bidders April 21st, for the wading pool and shelter house at Harrison Park, Hammond.

E. E. COLE.

## EVANSVILLE

### CARPENTER WORK IN EVANSVILLE PUT ON THE "OPEN-SHOP" BASIS

**Demand For 15c Increase On Hourly Wage Scale Turned Down By Contractors**

An "open-shop" policy for carpentry work in Evansville was put into effect by the general contractors April 20.

The new order came after the members of the Master Builders' Association, composed of general contractors and the Carpenters' Union had been unable to compromise on a wage scale.

The carpenters in the union struck for an increase of 15 cents an hour in wages April 1, and approximately 80 members of the union have refused to return on the old scale.

According to President G. L. Miller, of the builders' association, the contractors agreed to an increase of five cents last Saturday, but the union refused to accept the offer and pressed their demand for 15 cents. At a meeting of the carpenters April 18, they voted to accept an increase of 7½ cents, and return to work on that scale.

**Will Pay Five-Cent Increase**

As far as the builders' association is concerned it has gone as far as it intends to in the matter. However, he declared, the association has agreed to pay a five-cent increase, and if the union should decide to come back at that rate, and the association should agree to take them back at that rate, $1.05 an hour will be paid.

Members of the association, with the exception of one, refused the compromise offer of a 7½c increase by the carpenters and agreed to employ non-union carpenters. Miller declared that the contractors are assured of more than enough non-union workers to be able to run full time on an open-shop basis, within one week.

Men employed Monday are to be paid on a basis of what they are worth, and no regular scale will be paid.

The single contractor, who refused to adopt the open-shop policy, has agreed to pay his men the 7½-cent increase. He reached the agreement with his carpenters last week it is said.

**Will Pay Increase**

Another large contracting firm in the city, probably will pay the increase also, Miller intimated. When the strike went into effect April 1, the firm agreed to grant whatever increase the association and union agreed to, if his men would continue work, and would pay them the difference in back wages from the date the strike became effective, Miller said.

On March 31, there were 172 members of the union employed. Many of these, however, were not employed on outside jobs, and would not be affected by the increase.

"Old employes were given the preference at the start of the new scheme Monday," Miller said, "and were offered just what the contractors felt they were worth. Some were paid the old scale of $1 per hour and some more."

The builders decided to adopt a merit policy to determine the scale of wages.

With the exception of the carpenters in the Calumet District Evansville carpenters are the only ones in the state who have demanded an appreciable increase at this time, and in only two or three cities is the wage scale above $1 an hour, the rate local carpenters have been receiving.

## FT. WAYNE

### NORTHERN INDIANA BUILDERS HOLD BIG MEETING AT FT. WAYNE

**Various Branches of Contracting and Material Supply Interests Represented at Gathering**

General contractors, sub-contractors in the various building trades and material supply men of northern Indiana to the number of three hundred one

at the Anthony Hotel, Ft. Wayne, for a big dinner meeting to talk over building conditions and the allied features that enter into the industry. There were supply dealers, contractors and builders in attendance from the city of Ft. Wayne and Adams, Allen, Huntington, Wabash and Whitley counties.

The main address of the occasion was delivered by Attorney Harry Fenton, Indianapolis, counselor of the Associated Building Contractors of Indiana who said, building activities are the barometer of the nations' prosperity. In order to make that prosperity manifold and far reaching contractors, dealers in lumber, brick and other supplies, and mechanics such as carpenters and bricklayers, etc., must join hands and cooperate to make for influences and conditions will encourage greater and greater building effort. They must work in unity to eradicate selfishness and petty jealousies the cancers that eat at the vitals of the industry and impede progress.

There are two essential elements in construction—materials and employes. Dealers sell the former and contractors deal with the latter. All the human elements must for the good of the industry reach a common meeting ground upon which to get together to amicably thresh out and adjust misunderstandings that breed strife and contention. The average problems are mutual he said, and they should be settled to the best interest of the general public.

Many contractors, he asserted, are bankrupt as the result of business entanglements, and if closer co-operation existed in the building industry this possibility would not exist.

Is it competition, eagerness to obtain contracts and the sacrifice of profits and good building standards, that is responsible for this? Mr. Fenton asked.

The new state building code now in course of preparation by the Administrative Building Council of Indiana was characterized as one of the best recently conceived, and is the result of architects, engineers, contractors, labor and material men working in conjunction to improve building regulations and requirements. It is concrete evidence of what builders, as represented by practically all the building interests, can do when a determined effort is made toward legislative action. He called attention to the fact, not generally recognized by all, that the State A. B. C., at each session of the state legislature is on guard at the legislative halls to protect and foster the best interests of the whole.

The speaker then referred to the mechanic's lien law as one of the aids of builders. The law provides a safeguard for dealers and contractors, the speaker said, and the announced that a more helpful statute is being planned in the form of a law to create trust funds guaranteeing payment for supplies and to the contractor.

Reforestation of Indiana will be necessary in the future, Mr. Fenton asserted. Just as the contractors are forced to employ apprentices to learn trades, dealers will be forced to bring about the planting of trees which will take the place of the rapidly decreasing forests, it was stated.

"Sell your business to your city," the builders' attorney urged. "Have your local architects plan your buildings and employ local labor. Then, when you drive about showing the city to visitors, you can truly say, 'This is our city, our own products.'"

Other addresses were made by Max Irmscher, president of the Associated Building Contractors of Indiana; R. H. Hildebrand, secretary of the Indiana Building Supply Dealers' Association; George Schack, secretary of the Fort Wayne Associated Builders, and William H. Moeller, chief of police, who was the representative of Mayor William Hosey.

Dan Boyer was toastmaster and was introduced by A. D. Zuber, president of the Indiana Builders' Association.

Entertainment features were provided by vaudeville artists of Indianapolis.

Will Handle Your Smallest Jobs at a Profit

*Cut Steel Gears*
*Surplus of Power*
*Low Operating Cost*
*Capacity 5 Cubic Feet*

*No. 5 Special Broncho Trailer Mixer*

Here's a real money-maker for you, Mr. Contractor. It is adapted to any kind of construction work and will handle the small jobs with profit and the large ones with the utmost economy. All parts are carefully inspected. Every machine is thoroughly tested before leaving the factory. It mixes quickly and is easily charged or discharged from either side. The drum is held in any desired position by a lock so it may be easily adjusted for handling wet or dry material. It is mounted on Ford wheels with clincher rims for 30x3½ pneumatic tires. Has 2 H. P. gasoline engine. Weight complete is 1400 pounds.

*Start this afternoon and run out in any direction, to the outskirts of town and notice the many new homes going up and you will be surprised by their beauty and the many modern conveniences that are now considered indispensible to the modern home-owner. Places that were newly marked out subdivisions only two years ago are completely built up today. Try and buy one of these places and you will find that they have increased in value from twenty to fifty per cent, and they were built only a couple of years ago.*

### NOTICE OF LETTING OF CONTRACTS FOR HEATING, VENTILATING AND PLUMBING.

Notice is hereby given that on 12th day of May, 1925, at 11 o'clock, a. m., at their office in the High School Building on Guilford Street in the City of Huntington, Indiana, the Board of School Trustees of the School City of Huntington, Indiana, will let contracts for the furnishing of the necessary materials and labor for the proper placing and erection of the heating, ventilating and plumbing in the Tipton Street Ward School in the City of Huntington, Indiana. Alternate combined and separate bids will be received and the estimated cost of said heating, ventilating and plumbing is $20,000.00.

The materials to be furnished and the work to be done shall be according to plans and specifications heretofore adopted by the Board of School Trustees of the School City of Huntington, Indiana, and on file in the office of said Board, as furnished by Snider & Rotz, Engineers, of Indianapolis, Indiana, and prospective bidders may obtain copies of said plans and specifications for the work described from the said Engineers at their office, 703 Merchants Bank Building, Indianapolis, upon deposit of Twenty-five Dollars ($25.00). Said deposit to be returned to the bidder upon the return of the plans and specifications in good condition to the office of said Engineers.

All prospective bidders are hereby notified that said bids on each of said items must be upon forms prescribed by the State Board of Accounts and the same must be sealed and delivered at the office of the said Board of School Trustees in said High School Building at or before 11 o'clock a. m., on said date, at which time said bids will be opened and read by said Board of School Trustees.

A certified check must be filed by each bidder with each bid in a sum equal to five percent (5%) of such bids and conditioned that such certified check will be forfeited to the Board of School Trustees as liquidated damages occasioned by the default of bidder, in the event that such successful bidder fails or refuses to enter into a contract on such bid, within five (5) days after the acceptance by said Board of School Trustees of such bid.

The right is reserved by the Board ofSchool Trustees to reject any and all bids whatsoever and to waive defects or informalities in any and all bids.

W. M. ALLEN, President.
F. E. CUTSHALL, Secretary.
J. C. BAKER, Treasurer.
Broad of School Trustees of the
School City of Huntington, Ind.
April 25, 1925—May 2, 1925.

### SCHOOL BUILDING
### NOTICE TO CONTRACTORS

Notice is hereby given that sealed proposals will be received at the School Building at Atlanta, Indiana, by Otto K. Jensen, Trustee of Jackson Township, Hamilton County, Indiana, until 10 o'clock a. m., May 12th, 1925, for the remodeling of, and an addition to the school building at Atlanta, Indiana, all in accordance with the plans and specifications prepared for same by Wilson B. Parker, Architect, 507 Board of Trade Building, Indianapolis, Indiana.

Plans and specifications are on file at the office of Otto K. Jensen, Trustee, Central Bank, Arcadia, Indiana, and at the office of the Architect.

Separate bids will be received as follows:
1. General construction of addition and remodeling of old building.
2. Heating and Ventilating.
3. Plumbing.
4. Electric Wiring and Fixtures.

The estimated cost of all improvements, including Heating and Ventilating, Plumbing and Electric Wiring and fixtures, is Forty-five Thousand dollars.

All bids must be submitted on forms as prescribed by the State Board of Accounts, each bid sealed, with proper designation on the envelope, indicating the character of the bid.

Each bid must be accompanied by a certified check for two per cent of the amount of the bid, drawn payable to the order of Otto K. Jensen, Trustee of Jackson Township, Hamilton County, Indiana.

In case any bidder whose bid shall be accepted, shall not within ten days after notice of such acceptance, comply with his bid, by entering into a written contract with said trustee in accordance with his bid, and the provisions of the plans and specifications, his certified check and the proceeds thereof, shall be and remain the absolute property of said township, as liquidated damages for such failure, it being impossible to estimate the amount of damages such failure would occasion to said township.

The right is reserved to reject any and all bids.

Dated this April 20th, 1925.

OTTO K. JENSEN, Trustee.
April 25th, 1925.

### SCHOOL HOUSE
### NOTICE TO CONTRACTORS

Notice is hereby given that sealed bids will be received by the undersigned, Trustee of Carrollton School Township, Carroll County, Indiana, at his office in said township, county and state, until One o'clock p. m. on Thursday, May 14, 1925, for the furnishing of all materials and labor for the building, erection and completion of a one-story and ground floor brick school building in and for said township according to plans and specifications on file in my office.

Said building to be erected on a plot of ground in section No.

Eaoh bid to be accompanied by a certified check in the sum of $1,000.00 payable to Rolla L. Barnard, Trustee, as a guaranty that the bidder to whom contract is awarded will enter into written contract and provide bond within ten days after notice that contract has been awarded him, and upon failure to so do, the proceeds of this check to become the property of the above named township.

At the same time and place, sealed bids will be received for the heating and ventilation for said building, bid to be accompanied by a certified check in the sum of $800.00 payable to Rolla L. Barnard, Trustee, conditioned as for general contract.

At the same time and place, sealed bids will be received for the plumbing and water supply in said building, bid to be accompanied by a certified check in the sum of $300.00, payable to Rolla L. Barnard, Trustee, conditioned as for general contract.

At the same time and place, sealed bids will be received for the electrical work in said building, bid to be accompanied by a certified check in the sum of $200.00, payable to Rolla L. Barnard, Trustee, conditioned as for general contract.

Separate bids will be received for each of the above contracts, but a joint bid may be made on any or all of the last three named.

Plans and specifications for the use of individual bidder may be had from the Trustee, or the Architect, Samuel Young, Monticello, Indiana, upon a deposit of $10.00 for general plans, and $5.00 each for heating and ventilation, plumbing and water supply, and electrical work, all of which will be returned upon return of plans and specifications on or before date of letting of contracts.

The estimated cost of said building is $48,000.00.
The right is reserved to reject any or all bids.

Rolla L. Barnard, Trustee,
Carrollton School Township,
Carroll County, Indiana.
Bringhurst, Indiana.

Edwin D. Myer,
John L. Quinn,
Taylor Fouts,
Advisory Board.
James O'Bear, Attorney.
April 25th and May 2, 1925.

### SCHOOL HOUSE
### NOTICE TO CONTRACTORS

Notice is hereby given that sealed proposals will be received by the Trustee of Johnson School Township, Clinton County, Indiana, until 10 o'clock a. m., on the 12th day of May, 1925, at the Hillisburg Bank, for the repair, remodeling, alteration and reconstruction of a grade and high school building located at Scircleville, Indiana, in said Township, County and State, according to the plans and specifications prepared by Rodney W. Leonard, Architect, 309 Peoples Life Building, Frankfort, Indiana.

Plans and specifications for the same are now legally on file in the office of the Trustee of said Township and also on file in the office of said Rodney W. Leonard, Architect.

Any prospective bidder desiring to take copies of said plans and specifications from either of said offices must make a deposit of twenty-Five ($25) Dollars for their safe return.

The approximate total cost of said building and equipment is estimated at $32,500.00.

Bidders shall submit their bids in the following manner:

1. On all work complete as contemplated in the General Specification, exclusive of Plumbing, Heating and Electrical work.

2. On all work complete as contemplated in the Heating and Ventilating Specifications.

3. On all work complete ac sontemplated in the Pluming and Sewering Specifications.

4. On all work complete as contemplated in the Electric Wiring, Signal System and Electrical Fixture Specifications.

5. On a Combined Bid including all work complete as contemplated in Heating, Ventilating, Plumbing and Sewering Specifications.

All bids must be in writing sealed and with the envelops enclosed, giving the name of the bidder and all bids will be opened at the time and place fixed in this notice.

All bids must be made out on forms No. 96 as prescribed by State 'Board of Accounts."

Each bidder will be required to accompany his bid with a certified check for a sum equal to five per cent of his bid payable to said Trustee. The check of the successful bidder will be returned when he has executed proper contract and bond, and in the event that such successful bidder fails to execute proper contract satisfactory to said Trustee, and give the required bond within ten days, then such check of the bidder, so in default, shall be forfeited to said Trustee as liquidated damages for such failure.

The contract will be let, in compliance with the law to the lowest and best bidder, and said contract shall cover all legal requirements of the school law in force.

The Trustee and Advisory Board reserve the right to reject any and all bids.

Dated this 20th day of April, 1925.

Vernon Plummer, Trustee,
Johnson School Township,
Clinton County, Indiana.

Jonathan S. Snyder, President.
James V. Kent, Secretary.
Willard Pickering.
Advisory Board.
April 25th, 1925.

### SCHOOL BUILDING
### NOTICT TO CONTRACTORS

Notice is hereby given that sealed proposals will be received by the Trustee of Grant School Township and the Advisory Board of Grant Township of Newton County, Indiana, at the High School Building at Goodland, Indiana, until two o'clock p. m. of Saturday, May 9, 1925, for the furnishing of all material and labor necessary to erect, and complete a new two story and basement brick and stone school

J. F. BOEHM
Tin and Sheet Metal Contractor
Dealers and Appliers of Carey Built Up Asphalt and Asbestos Roofing
Webster 0217 2326 E. 10th Street Indianapolis, Ind.

building, to be erected on the school square in Goodland, Indiana, in strict accordance with the plans and specifications therefor and under the direction and supervision of the Architect, John A. Bruck, which plans and specifications are on file in the office of said Architect, at Kenttee and in the office of said Architect, at Kentland, Indiana, and are open for inspection of all persons concerned and copies may be had upon a deposit being made with said Trustee, of $25.00 to insure the returning of the same to said Trustee.

The total estimated cost of said building in $75,000.00 and the contract will be divided into two classes. 1st, General Contract; 2nd, Heating, plumbing and Ventilating contract. Each bid to be separate, enclosed in a separate envelope and marked with the name of the bidder and class of bid enclosed.

All bids shall be accompanied by a certified check in the sum of $1,000.00 payable to Lewis W. Lemasters, Trustee, to insure that the bidder, if awarded the contract, will enter into a written contract with said trustee to complete said contract according to the plans and specifications for that class of the contract awarded on or before January 1st, 1926, and that said bidder will furnish a bond in a sum equal to said contract price, payable to said trustee, with a Surety Company as surety, and to the approval of said Trustee, that said contractor will faithfully perform and execute said contract made by him in accordance with said plans and specifications and under the direction, control and supervision of said Architect, and to the acceptance of said Trustee, and as otherwise provided for by law for public contracts.

Upon failure of said bidder to enter into said contract and give bond within 30 days after notice of award said sum of $1,000.00 to be taken as liquidate damages to said Township.

All bids shall be in plain terms and upon forms prescribed by the State Board of Accounts of Indiana, which may be had upon application to said Trustee or Architect above named.

Said Trustee and Advisory Board reserve the right to reject any and all bids and to take a reasonable time for making a decision in awarding said contract or contracts.

Lewis W. LeMasters, Trustee.
Goodland, Indiana.
John A. Bruck, Architect,
Kentland, Indiana.
April 25th and May 2nd, 1925.

## SCHOOL BUILDING
## NOTICE TO CONTRACTORS

Notice is hereby given that James Wright, School Township Trustee, and the Advisory Board of York Township, Benton County, Indiana, will receive sealed proposals until 1:00 o'clock p. m. on Tuesday, May 12, 1925, at the Railway station of the Cleveland, Cincinnati, Chicago and St. Louis Railway Company in the Town of Raub, Benton County, Indiana, for the erection and completion of a school building for York Township in Raub, Benton County, Indiana.

The contract will also include heating, plumbing and ventilating system. Full details of plans and specifications are now on file at the office of the undersigned, James Wright, Trustee, and at the office of the architect, John A. Bruck, Kentland, Indiana, and are open for the inspection of all persons concerned; copies of plans and specifications will be furnished to any contractor applying for the same on a deposit of the sum of $20.00 made payable to the Township Trustee for the safe return of said plans and specifications.

Bids will be received on separate items as follows:

First: On the building complete, except heating, plumbing, ventilating and electric wiring.
Second: Heating, Plumbing and ventilating, Electric wiring will be let at a later day.

All bidders will be required to file their bids in forms required by the Indiana State Board of Accounts, and to accompany such bids with proper affidavits. Each bidder will be required to deposit with his bid a certified check in the amount of not less than 3% of his bid, payable to James Wright. Trustee, to insure that the successful bidder will enter into a written contract with said Township Trustee, and will furnish bond with resident freehold surety of Benton County, Indiana, or a surety bond to the approval of said trustee, and the advisory board, that he or they will faithfully perform and execute the work and contract awarded to him, or them, according to such plans and specification under the direction of said architect, and to the acceptance of said Trustee, as aforesaid, and according to law. The estimated cost of said building is $75,000.00. The right is reserved to reject any and all bids and to take a reasonable time for making a decision in awarding said contract.

Dated this 15th day of April, 1925, at Raub, Benton County, Indiana.

James A. Wright,
**Trustee of York School Township.**
Benton County, Indiana.
Warren McConnell,
Scott McEwen,
Ellis Childress,
Members of the Advisory Board.
April 25th and May 2nd.

## SCHOOL BUILDINGS
## NOTICE TO CONTRACTORS

Notice is hereby given that T. R. Winemiller, Township Trustee and the Advisory Board of Buesseron Township, Knox County, Indiana, will receive sealed proposals until two o'clock p. M., Tuesday, May 5th, 1925, at the present school building at Oaktown, Indiana, for three different school contracts, which are as follows:

1. The erection and completion of the High School building at Oaktown, Indiana.

2. The repairs to the present school building at Oaktown, Indiana.

3. The erection and completion of the addition to the school building at Emison, Indiana.

All material and labor must be according to the plans and specifications furnished by J. W. Gaddis, Architect, Vincennes, Ind., which plans and specifications are on file at the office of T. R. Winemiller, Township Trustee, Emison, Ind., and at the office of J. W. Gaddis, Architect, Vincennes, Ind.

The plans, specifications and this notice are calling for:

1. Independent bids for the High School building proper at Oaktown, Ind.

2. Independent bids for the heating and ventilating system.

3. Independent bid for the plumbing.

4. Independent bids for the heating, ventilating and plumbing combined.

5. Independent bids for the electric wiring.

6. Independent bid for the repairs to the present school building at Oaktown, Indiana.

7. Independent bids for the addition to the school building at Emison, Indiana.

8. Independent bids for the heating in the Emison school building.

9. Independent bids for all work and material specified to be omitted.

Certified check of 2 per cent must accompany each proposal as evidence of good faith and that the bidder will enter into a contract with the Township Trustee, if the proposal is accepted.

The envelope containing the proposal must be plainly marked: "Proposal for the High School Building at Oaktown, Ind.," "Proposal for the Heating and Ventilating System," "Proposal for the Plumbing," "Proposal for the Electric Wiring," "Proposal for all repairs to the Old Building," Proposal for the Addition to the School Building at Emison, Indiana," etc.

Contractors may make such combination of bids as best appeals to them.

The right is reserved to reject any or all bids.

T. R. Winemiller, Township Trustee,
Busseron Township, Emison,
Knox County, Indiana.
April 25th, 1925.

## ELECTRIC WIRING, CLOCK AND SIGNAL SYSTEM, LIGHTING FIXTURES
## NOTICE TO CONTRACTORS

Notice is hereby given that the School City of Frankfort, Indiana, Clinton County, and the Board of Trustees thereof, will receive sealed bids at the office of the said Board of Trustees, located in the Library Building, northwest corner of Clinton and Columbia streets, Frankfort, Indiana, until 10 o'clock a. m., Wednesday, May 6th, 1925, at which time and place same will be opened, read and considered for the installation of an Electric Wiring, Clock and Signal System and Lighting Fixtures, in Reconstructed and Altered High School Building, for use of said School City, and located in said city and all by and according to plans and specifications as provided therefor as further approved by the State Board of Health and State Board of Accounts. Estimated cost of work, $3,500.00.

The plans and specifications are on file for the inspection of bidders at the office of the Board of School Trustees, Frankfort, Indiana, and at the office of Rodney W. Leonard, Architect, 309 Peoples Life Building, Frankfort, Indiana. Copies are available to bidders for use at their own offices upon deposit with the Architect or Trustee of $25.00 to guarantee safe return of same on or before opening of bids. If plans are not returned on date of letting, deposit shall be forfeited. Bidders must familiarize themselves with such plans and specifications before bidding and no departure from the same will be considered.

Bidders in submission of bids will submit same on all work shown and specified.

All bids shall be accompanied by the certified check of the bidder in sum equal to at least 5% of his gross bid conditioned upon his entering into his written contract with sufficient and approved surety if he is the successful bidder, according to proposal. Checks to be made payable to Treasurer of the Board.

All bids and proposals shall be upon the forms prescribed by the State Board of Accounts. Unless bids are accompanied by certified checks as above and upon forms as above, no attention will be given same.

The successful bidder will be required to enter into his written contract and also deliver his bond with approved surety to the School City of Frankfort, Indiana, in a sum equal to the full amount of contract as usually conditioned. The successful bidder will be required by the terms of his contract to enter into the active prosecution of his work immediately and complete said work at the time mentioned in general conditions of the specifications. The Board of Trustees for the School City reserve the right to reject any and all bids without giving any reason therefor.

School City of Frankfort,
Clinton County, Indiana.
Howard Harshman, President.
C. V. Fulham, Secretary.
Frank Isgrigg, Treasurer.
April 25th, 1925.

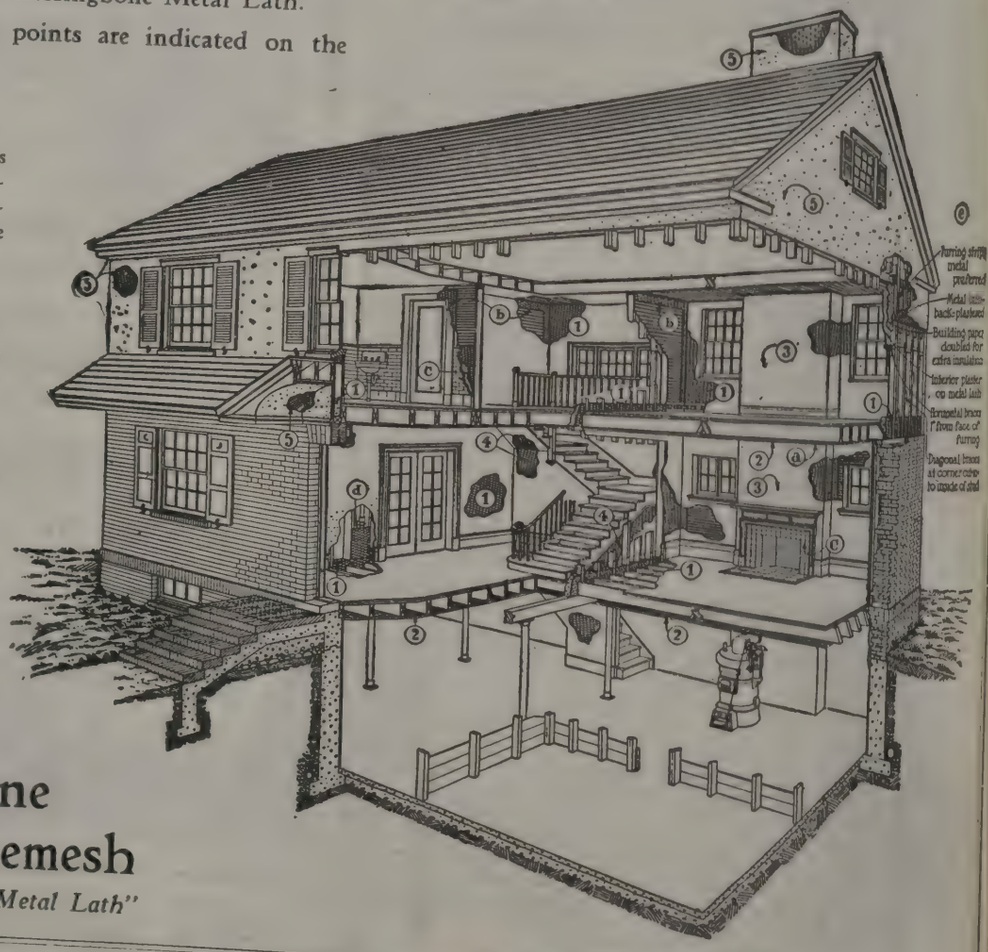
## Protecting the Home at its Vulnerable Points

Ninety-six per cent of dwelling fires start inside the house. By protecting walls and ceilings with Herringbone Metal Lath most fires can be stopped or held in check, with minimum loss, until the arrival of the fire department. Where the additional expense of construction will not permit the full use of this protection, a high degree of immunity from fire can be given the home by protecting its most vulnerable points with Herringbone Metal Lath.

These vulnerable points are indicated on the drawing as follows:



1. All bearing partitions and stud exterior walls, including a basket to hold incombustible material as a fire stop.

2. Ceilings under inhabited floors, especially over heating plants and coal bins.

3. At chimney breasts, around flues and back of kitchen ranges.

4. Stair-wells and under stairs.

5. As a base and reinforcement for exterior stucco.

## PLENTY OF BUILDING NOW BUT AWARDING OF NEW CONTRACTS NOT SO BRISK

### Situation As Seen From New York City

The building trade is getting into that state of bewilderment which has enveloped so many others is the way a New York writer sizes up the current situation. Then he proceeds to say, the professional forecasters are pretty much responsible for it. One day we read that building is now heading into a decline. Another day we learn that construction is picking up. In a week one may run across sundry announcements that the building business was slumping.

In spite of this the trade keeps more or less employed up to capacity. What has happened is this—building in New York has fallen off a little, but it has held up in other parts of the country. For instance, look at these figures:

Just last week the total volume of contracts awarded was over 25 per cent larger than the total in the same week last year. This increase was in public as well as private work. In fact the increase in private jobs was greater than that in public construction.

The drop in New York City is important. It is not merely a decline in one city but of many. The tremendous demand for material in the metropolis has exerted a determining influence on building material prices for some years. If there were to be any very extensive slump in New York City building it might result in taking the pressure off the trade and lowering material prices. But it must be remembered that the decline in New York is not in actual construction but in contracts awarded. There is already enough work under way or contracted for to keep the New York builders in the market for the rest of the season.

The demand for building material seems to keep up throughout the country. Thus in the last week in March more lumber was produced than in the same week last year. More lumber was shipped and there was more new business on the books of lumber companies.

Pretty much the same thing is found in the brick yards. The brick makers turned out more brick than they did in the same week a year ago.

This is also true of the cement business. Production and shipments have held up and shipments are in excess of last year.

Prices have shown no evidence of very marked reduction in demand. Out of 18 basic commodities used in this trade only six showed declines. Six others went up. They were brick, concrete materials, structural bars, yellow pine, yellow pine flooring and turpentine. Six others remained stationary, while another half-dozen fell off. Of these lead and linseed oil dropped because of no decrease in demand but due to other causes. Thus in the lead paint business the weakness in the market of pig lead affected the price.

Altogether the building business might be summed up this way: There is enough business now to keep the industry employed at pretty near capacity for the rest of the year. There may be a decline but it will be in contracts awarded and not in actual construction. The declines which may show up in private building may be more than offset by increase in public works of all sorts.

## INDUSTRIAL EVOLUTION

### Big Principle For Which State A. B. C. Has Always Stood Features A. F. of L. Meeting This Week

The strike as an instrument for compelling adherence to a course of action is becoming obsolescent. On Friday of last week the fourth annual convention of the workers' education bureau of the American Federation of Labor opened at Philadelphia. About 1,500,000 members of forty-nine unions were represented. They are supporting the bureau under a plan adopted at the last annual meeting of the federation. What it means to quote Sidney Miller, Jr., secretary of the bureau, is this:

The convention will epitomize a revolutionary change in the tactics of labor over twenty to thirty years ago. It will note the determination of the American working man that the conference table offers more than the picket lines. It will reflect his first definite committal to belief that his future in public relations will be best served by education rather than force, and that a new order has arrived for which he must competently prepare.

In the achievement of that admirable program, all the details of which will not be realized instantly, labor is entitled to and should receive the support of the great mass of people. Employers, whether as owners of industrial units or the representatives of an army of shareholders, must almost unanimously agree that a common interest binds capital and labor. To a considerable degree they have made the plan now outlined possible. Certainly it was too much to expect that employes would think seriously of abandoning the strike as long as those for whom they worked retained something like a feudal conception of their duties and responsibilities.

Since 1918, according to figures presented at a recent convention of the Academy of Social and Political Science, corporate undertakings in the United States have added 3,500,000 names to their stockholder lists. Of the total 500,000 were employes, 1,000,000 consumers and 2,000,000 represented the general public. For the most part the offerings of stock to employes and consumers, when made available on the deferred payment plan, are limited to preferred issues. While such holdings do not carry with them a direct voice in the management— which may or may not be desirable depending on the nature of the undertaking—the evolution of a broader and more stable base for industry can not be mistaken.

The wider distribution of earnings, both in the form of dividends and wages, is making for a more intelligent perspective. At times the pendulum in the various relations of organized production may swing back as well as forward, but over extended periods it is almost cer-

## COLOR IN ARCHITECTURE

### Woman Specialist On Color Brings Out Interesting Points in An Address Before Architects

"Americans are continually criticised for their failure to respond to the artistic or beautiful," said Hazel Adler, notable specialist and authority on color in her address before an audience of architects at the Industrial and Allied Arts Exposition at Grand Central Palace, recently.

Miss Adler said in part: "American temperament is supposed to be dominated by materialism and commercialism. How far the environments in which the great majority of Americans live, have influenced their colorless temperaments, may be judged when one pictures in the mind's eye the external atmosphere of a typical American city or town which, to even a tolerant observer, in drab, colorless and uninteresting. American "Main Streets" are the cradles of American temperament.

"In every phase of modern life color now makes its appeal. Our books, periodicals and advertising are all colorful. Our clothing, our vehicles, the theatre and our shop windows outdo one another in presenting to the mind a color picture. As life becomes more colorful in all its aspects, so the visible expression of that life—architecture—must become increasingly colorful and architecture today is at the threshold of a color renaissance.

"The possibilities of architectural color expression offered by reinforced concrete represents the simplest and more responsive avenue of approach. The colors suitable for the body of concrete structures are only limited by the artistic conception of the architect. There are no decidedly right or decidedly wrong colors. Each color is suitable to a particular architectural type, environment, texture of finish and roof and trim color scheme. The scope of selection is an inspiration in itself. Then, too, concrete color stain is a permanent stain and architects need not fear the havoc to their color selection of sun and weather.

"Colored concrete is not limited to urban cottages, but has even a greater service to offer to residences and buildings in congested cities. In the country, trees, sky, flowers and shrubs offer colorful backgrounds, but in the city where the great majority of our population is located, the majority of waking hours are spent amid the grayed and dingy backgrounds of the city streets.

"Residential blocks of variegated colored concrete, far from being an eye sore, can be made a source of exquisite delight. In a run down dilapidated neighborhood, only a few blocks away from the busiest business corner in New York City, a group of artists a few years ago purchased two rows of houses on two adjacent streets with backyards adjoining. They remodeled the exteriors of the old structures with concrete and tinted the back walls of the houses in a charming array of soft blues, stone pinks, gray greens and warm buffs. The back fences were removed and a community garden took the place of the individual backyards.

"The selection of the color for the concrete depends on the architectural type of the house, its surroundings and the roof and trim color scheme which is to be used with it. Warm cream and fawn are always a dependable selection. With the cream, several excellent color schemes readily present themselves.

"A brown roof can be used with green trim; a green roof with brown trim; or a red roof with white trim.

"Lichen green, terra cotta red, stone pink sage green venetian orange all offer interesting and practical possibilities for stucco houses. Each color of course demands artistic discernment in the selection of the other colors to be used with it.

The coloring of the walls becomes the problem of the architect and builder as well as the decorator. A wide and delightful range of colors can be applied to interior concrete walls as well as a wide range of interesting textures."

## AN ARCHITECT WHO BECAME PRESIDENT

### Architectural Efforts Overshadowed By His Historical Activities

Almost every one knows that Thomas Jefferson was one of the signers of the Declaration of Independence, also was a statesman, liked to entertain, and was president of the United States, but comparatively few have given him credit for being an architect and the founder of American architecture.

Fiske Kimball, historian of the American Institute of Architects, and head of the fine arts department of New York University, asserts that the architecture of today may be traced back to Thomas Jefferson, who was successively director of public buildings of Virginia, secretary of state, charged with the responsibility for the building of the city of Washington; vice-president, president and rector of the University of Virginia.

In every one of these offices he took interest in building. He designed the Virginia capitol, the first great monument of the classical revival in a strict sense either abroad or here.

While we were colonies England was home, Mr. Kimball said, and we built as they did in the shires, because we were only distant shires of the old country. Our manners, dress and sociables were all paterned on those of the mother land. When the break came the colonies became the United States, a new country, with a determination to eradicate not only the old ties, but the old influences. This determination led to a new type of architecture.

The skyscraper of today is American and Europe admires the lines of the skyscraper, Mr. Kimball said, and Europe is sending her sons over here to study the architecture which was given its start by Thomas Jefferson.

## ORGANIZATION AND CURRENT NEWS

### INDUSTRIAL EVOLUTION

(Continued from page 5)

tain that there will be a gain as far as more equitable distribution of benefits is concerned. To that extent liberalism in trade and commerce will make for conservatism of a wise and judicious sort.—(Indianapolis News.)

### NEW CONSTRUCTION MATERIALS MUST FIGHT THEIR WAY

**Precedent Makes It Hard for New Products to Catch On**

Engineers are human and so are not exempt from the laws of psychology. President Coolidge in his inaugural address told us that "human nature is about the most constant thing in the universe."

Modern ideas of engineering education, for instance, and of industrial preparation, had to fight their way against the tenets of classical training.

In construction, new materials are adopted slowly. This was necessary when only a long period of experience could prove the value of these materials. Even now with the scientific methods of laboratory tests, which shorten the period of probation, engineers wait on general experience and consult general impressions rather than the date of science.

Thirty years ago concrete gradually replaced brick in sidewalks. American Portland cement replaced German cements.

Forty years ago wrought iron bridges were being built by engineers mistrustful of steel. Engineers were fearful of this strong and supposedly brittle material which was replacing the flexible wrought iron beams. (See A. S. C. E. Report.)

Who does not remember that twenty years ago engineers accustomed to design structural steel frames for buildings and bridges, with their positive metallic riveted connections, shook their heads in grave doubt about the permanency of reinforced concrete frames with their loose bars held together only by a cementing medium? Now, buildings sixteen stories high, and railroad bridges of 40'-0 span are considered safe and conservative. In Europe, where materials are more expensive than in the United States, bolder designs with higher stresses are used.

Thus steel and reinforced concrete have won their way and are now the ordinary resources of the designer. No hazard is inherent in their use. Indeed, active movements are under way to increase the allowable stresses on these materials.

The history of rail steel reinforcing bars is not otherwise, except in one respect. While steel and concrete have had only to overcome conservative attitudes, rail steel bars have had to meet in addition an active propaganda directed by interested agents against their use.

A victory was won, when, in 1913, the American Society for Testing Materials referred the matter to a committee and on the basis of a thorough scientific report decided that rail steel reinforcing bars were of a quality and uniformity sufficient to justify a standard specification of the society. This specification, A-16-14, is that which is commonly quoted by architects and engineers in specifying this material.

Rail steel reinforcing bars for concrete are manufactured from rails removed from the track on account of wear after years of service. This rail steel is a product that originally has to meet the strictest specifications before use and during service in track.

The upper end of the ingot is discarded to remove impurities before the remainder is rolled into rails. These rails have to withstand the blows of heavy locomotives during the heat of summer and the frosts of winter, on a yielding or a frozen ballast. After their service in the track they are disposed of to the rail steel industry in whose mills they are then reheated and rolled into various products such as small sections, bars and tubing.

About 500,000 tons are rolled into reinforcing bars for concrete. And so this steel which has had a severe service in the track, now enjoys an easier life covered by concrete where it is free from rust and protected from blows.

It is a high carbon steel that is of high strength and under additional rolling gains in ductility. It has the characteristic of high carbon steel. Higher quality material should not be treated as roughly as the common garden variety.

An unfortunate confusion exists in the meaning of the term "rerolled material." Originally "rerolled material" referred to a product of local mills in which various scrap material, such as bicycle spokes, wrought iron bars and miscellaneous local scrap was bound together with wires, that is, "fagoted," heated and rolled into an inferior and variable product for unimportant uses. This term "rerolled" has been used in connection with rail steel bars, an entirely different product.

Billet steel is another term that does not distinguish the real nature of the product. An ingot is rolled into a billet and t ihsin turn into so-called billet steel bars, regardless of the quality of the billet. It would be entirely justifiable to term as billet steel, the rail steel bars; the original rail being the billet. The sequence woud be ingot, rail, rail steel bars.

### SECRETARY HOOVER ON HOME OWNERSHIP

**Declares Home Owner Has a Constructive Aim in Life.**

Secretary Herbert Hoover, in an inspiring booklet, entitled "How to Own Your Home," published by Better Homes in America, Inc., Washington, D. C., declares that buying or building a home requires the use of sound judgment in seeing that the personal needs of the family are best met with the funds available. It involves not only the carrying on of transactions of financing and buying or building, but it involves the proper determination of location with respect to school, to work, and to neighborhood.

"Maintaining a high percentage of individual home-owners is one of the searching tests that now challenge the people of the United States," declares Mr. Hoover. "The present large proportion of families that own their homes is both the foundation of a sound economic and social system and a guarantee that our society will continue to develop rationally as changing conditions demand.

"A family that owns its home takes

a pride in it, maintains it better, gets more pleasure out of it, and has a more wholesome, healthful, and happy atmosphere in which to bring up children. The home-owner has a happy atmosphere in which to bring up children. The home-owner has a constructive aim in life. He works harder outside his home; he spends his leisure more profitably; and he and his family like a finer life and enjoy more of the comforts and cultivating influences of our modern civilization. A husband and wife who own their home are more apt to save. They have an interest in the advancement of a social system that permits the individual to store up the fruits of his labor. As direct taxpayers they take a more active part in local government. Above all, the love of home is one of the finest instincts and the greatest of inspirations of our people.

"Today, in the period of post-war recovery, when our national productivity is increasing, we have the opportunity to make definite progress in the right direction. Moreover, the development of the automobile has given a great impulse to suburban life and an increasing possibility of home ownership. Happily, a large section of the people is awake to the problem, and an increasing number of business groups have publicly acknowledged their responsibility and interest in it. They realize that unnecessary barriers that may encompass a man determined to own his home are hindrances to good community spirit and to good business. They see that taking a neighborly interest in developing sound financing and other machinery for the use of home-seekers, and insisting on the observance of honest, straight forward methods by those who deal with home-seekers is not paternalism but good business and good citizenship. It is the 'square deal'—and it is not only right but essential that the cards should not be stacked against the home-seeker."

## Calumet District

### LABOR CONDITIONS IMPROVE

**Strikes and Dissention Are Being Cleared Up**

The turbulent, overcast, threatening building labor sky arching the Calumet field is brightening up and the sun is filtering through once more.

Aid from the U. S. Department of Labor enabled the planing mill owners and employes, who were on a strike, to settle wage differences and come to terms. The workers have been granted $1.20 per hour until May 1, 1926, after which time they will be paid on the basis of the Chicago scale, be it more or less. So much for that squall.

Then, too, the laborers lined up after quite a controversy and agreed to work for last season's scale.

Also the plasterers, who were involved in a jurisdictional dispute with the bricklayers over the installation of terrazzo flooring at the new hospital in Hammond, have returned to work pending a settlement of the issue by the national officers of the two unions.

Temporarily peace and harmong reigns. The love of peace may get chased off the perch, though, as a plumbers' strike is threatened at Gary. The bone of contention there has to do whether the plumbers will accept last year's scale or contend for an advance.

### CONTRACTING EXCEPTED

**Trend Would Indicate That Industry Was Excluded From Slogan Consideration**

Things have reached the stage in Hammond as regards the large new building projects that come up, where it is hardly worth while for the local contractors to waste time estimating the big jobs. Somehow it would seem that certain influences or prejudices are at work for the large work is thrown the way of Chicago or other large outside city contractors. And yet, the Chamber of Commerce is always sounding its slogan, "Trade at Home."

That slogan is all right and is a fine thing, but certain citizens seem to think it applies to the other fellow only and that they can trade and deal where they please. As it is Hammond and the Calumet District have just as good contractors as are to be found any place and they would prove it if given half a chance. Some of these owners who are awarding their work to outside contractors would raise an awful howl if by some hook or crook they were ignored as completely as they ignore the local contracting fraternity.

Why not play fair if the "Trade at Home" slogan is to be used at all?

### QUICK TO TAKE BUT SLOW TO SETTLE

**Contractors Association Having a Hard Time to Collect on Surety Bond**

The suit brought by the Building Trades Employers' Association of Hammond against Contractor Androff and the New Amsterdam Insurance Co., is still up in the air. It so happened in 1921 that B. T. E. A., members were bonded in the sum of $1,000 to abide by the constitution and by-laws of the association. Then came labor trouble and Androff is alleged to have bucked over the traces and violated his obligations to the organization. The case was up three times in the Superior Courts of Lake and Porter counties and in each instance a verdict was found for the plaintiff, the B. T. E. A. However, the insurance company appealed the case to the Appelate Court at Indianapolis where arguments were heard April 23. The court did not announce just when a decision would be rendered and the B. T. E. A., is patiently awaiting the outcome.

To a man up a tree it hardly seems right and just that the association, after paying premiums to the insurance company on such a bond for several years, should be forced to drag the matter through the courts in order to secure a settlement. It may be good law, but where does the justice come in when you pay for something and then have a legal battle on hands in order to collect that something?

### REAPING THE WHIRLWIND

**Realtor Builders Find Former Tactics Are Developing Into a Boomerang**

The Home Builders of the Calumet District, the type of fellows who provide the plans, buy material build by day labor and pass the completed house on to the prospective owner on the so much down basis and the remainder in installments seem to have run up on the reefs, have been brought to a standstill and are in distress.

Their situation is due to their own folly for, when the contractors heretofore have combatted wage increases as poor business breeders, the Home Builders would not co-operate, instead, they plunged right ahead, would not stop their work, and paid the demanded increases. They argued that so long as prospective owners would pay the advanced costs of construction why not let them pay.

And so up, up, went wages, but, the worm has turned, the people are bucking now, they refuse to build. The Home Builders are hoping the carpenters will voluntarily decide to work for less than scale figures, a hope that has little foundation.

However, the regular contractors sensed long ago just such a situation as has come about but these wise folks who are now bemoaning their fate could not see it and their predicament today is not causing the contractors any loss of sleep or arousing any great wave of sympathy.

### HIGH WAGES HINDERING NEW BUILDING PROSPECTS

**Some Folks Entertaining the Hope That Mechanics Will Voluntarily Agree to Work For Less**

There is little of new work appearing in Hammond at present, though quite a few projects are hanging fire, owing to current high wage levels. It is just possible that when it becomes thoroughly impressed that there is no chance for wholesale reductions of construction costs prospective owners may go ahead. Some folks started an agitation advocating that the carpenters lower their new scale from $1.37½ per hour and when this information spread it had an effect of further delaying new starts at construction effort in that prospective builders decided to wait a little longer to see what might happen.

### ANOTHER SCAFFOLD BREAKS

**Three Men Injured at New City Hall at Calumet City**

Last week there was a serious accident at the new city hall, Calumet City, Ill., just across the state line from Hammond. A scaffold upon which the plasterers were working broke percipitating the men and planks through the subfloor to the floor below. Three of the men were badly injured.

### CALUMET BUILDING PROGRESS

J. Wesley Reed, general contractor, Hammond, has started construction for Bishop C. J. Schmid on a three story, brick, stone trim, residence, 46x72 on the Catholic University ground at Hoffman St. and White Oak Ave. The estimated cost is $52,000.

A force of men has been started erecting the buildings and amusement devices at the new amusement park, Indianapolis Blvd., and Calumet ave., Hammond, near the lake.

The Jas Frithion residence job is still hanging fire. Architects are trying to trim it down a little so as to reduce the cost.

A car manufacturing company from the East is dickering for a new plant site near the proposed Jones-Laughlin steel mills.

Architects Hess and Greenwood, Hammond, are quite busy. On top of the recently announced prospective work they have this other coming on—two story brick residence for Frank Martin on Forest ave., and also a similar project at Crown Point for Wm. Heindze. They will be ready for bids on these projects May 1, and May 10, respectively.

E. E. COLE.

## FT. WAYNE

### ORIGINAL DRAWING OF ORIGINAL SITE OF FT. WAYNE FOUND

**Start of City in 1824 Was on a Plat of Ground Five Blocks Long and Five Wide**

An interesting document somewhat yellow with age and dug out of the musty and dusty archives at the court house has been placed in the D. A. R., museum in the county building. It arouses interest in view of the great expansion effort Ft. Wayne has taken on as the years have rolled by.

The document in question is an ink drawn plat of the original site of Ft. Wayne as layed out in 1924, at that time five blocks long and the same wide. It was executed by the man who purchased the site of the city from the United States government and is in a good state of preservation.

## INDIANAPOLIS

### NEW BUILDING CODE

**Tentative Draft Completed and Approved As to Adequacy and Legality**

If every thing moves along as planned Indianapolis builders shortly will operate under a more liberal building code than formerly governed local building regulations and requirements.

The city building inspection department for over three years has been working on a new code. It was a big job and took time for the details were legion and investigations of practices in other states and cities were almost endless. A thorough study of the best and most practical usages as gleaned from a wealth of data has resulted in the proposed code. This document now compiled after much editing and reediting has been approved as to legality and adequacy by prominent attorneys who have had the new code under advisement. Before an ordinance is drafted for presentation to the city council for passage, which would place the new code in effect, the new regulations will be submitted to a committee of three architects for study and approval. Thus, the care that has been exercised in the compilation and final approval legally and otherwise will assure to Indianapolis one of the best and most modern building codes in the country.

### INDIANAPOLIS BUILDING PERMITS (ISSUED—APRIL 23 TO APRIL 30th)

**Residence:** (double) $7,000.00, 911-13 E. Minnesota. Owner, Peter Hinz, 1527 So. New Jersey. General contract let to George Culman, 1814 Orleans St. Frame.

**Residence** (double) $7679.00, 902-04 No. Chester. Owner,, Fred J. Stevens, 3109 E. Michigan. Contract let to Harry Newell, c/o owner. Frame.

**Residence:** $7,050.00, 737 No. Bolton. Owner, A. H. Geisel, (foreman Ford Motor Car Co., contract let to J. N. Godsey, 2504 Brookside Parkway. Brick veneer, frame and stucco.

**Store:** $7,000.00, 1 sty. 53x40x69. Roosevelt and Ingram. Owner, The Gardner Realty Co., at site. Hollow tile.

**Residence:** $7,165.00, 5819 Central. Owner, R. L. Durflinger, 1002 Palmer St. Owner builds. Frame.

**Residence:** $6,150.00, 6401 Park. Owner, Robert H. Brown, 175 West 35th. Owner builds. Frame.

**Residence:** $6,140.00, 20 So. Chester. Owner, James Prossell, c/o contractor. Contract let to James Atwood, 924 West 32nd. Frame.

**Apartment:** (rem. from residence) $6,500.00, 1706 Talbott. Owner, Gibraltar Realty Co., c/o contractor. General contract let to J. J. Reith, 550 No. Temple. Frame.

**Residence:** $6,250.00, 53d and Central. Owner, C. O. Dodson, 4018 Graceland Ave. Frame.

**Residence:** $6,725.00, 140 West 44th. Owner, John F. Rhodes, 4143 Boulevard Place. Contract let to F. Graham, 1011 West 32nd. Frame.

**Residence:** (double) $5,275.00, 1033-35 Congress. Owner, Mrs. H. B. Hewett, 1031 Congress. Contract let to Walter Evans, 5022 Winthrop. Frame.

**Residence:** $5,370.00, 5110 Winthrop. Owner, J. Filley, at site.

**Residence:** (double) $5,600.00, 417-19 No. Oakland. Owner, Geo. Thompson, c/o contractor. Contract let to James Atwood, 924 West 32nd. Frame.

**Store:** $5,000.00, 1 sty. 41x52, 363 West 30th. Owner, Henry E. Bruner, 395 West 30th. Brick. Owner builds.

**Stores:** $5,000.00, 3519 Mass. Ave. Owner and builder, Cain and Conerty, Fidelity Trust Bldg. Owner builds. Frame and stucco.

**Residence** (double) $5,000.00, 1556-58 Ringgold. Owner, Charles Roeder, 1602 Ringgold. Contract let to Royse-Borchert Co. City Trust Bldg. Frame.

**Residence:** $4,400.00, 845 Southern. Owner, H. Jones, c/o contractor. Contract let to William Penrose, 909 West 28th. Frame.

**Residence:** $4,775.00, 1630 Sharon. Owner, J. M. Stevens, at site. Frame.

**Residence:** (double) $4,950.00, 735-37 No. Bradley. Owner, Southern Building and Realty Co., Guaranty Bldg. Frame.

**Residece** (double) $4,500.00, 657-59 Eugene. Owner, Charles Alcon, 2316 East 10th. Contract let to Enos D. Pray, Room No. 222, 8 East Market St. Frame.

**Residence:** $4,700.00, 6235 Central. Owner, H. O. Bennett, c/o contractor. Contract let to John N. Kane, 133 Spencer. Frame and stucco.

**Residence:** $4,750.00, 421-23 Bernard. (double). Owner, J. F. Fulk, 931 East Tabor. Owner builds. Frame.

**Residence** (double) $4,300.00, 4724-26 East 10th. (double). Owner, H. F. Markus, 740 No. Riley. Contract let to John M. Cain, 2263 No. Penn.

**Residence:** $4,750.00, 5029 Kenwood. Owner, Leonard Bagoli, 1512 No. Illinois. Frame.

**Residence:** $3,400.00, 28 So. Sheridan Drive. Owner, B. H. Corley, 36 So. Sheridan Dr.

**Residence:** $3,500.00, 5414 Winthrop. Owner, T. E. Grinslade, Peoples Bank Bldg.

**Residence:** $3,200.00, 1202 No. Mount. Owner, Royse-Borchert Co., City Trust Bldg.

### EVANSVILLE

***Grade School and Auditorium Building:** $40,000.00., Petersburg, Indiana. Archt. Harry E. Boyle and Co., Furniture Bldg., Evansville. Owner, Board of School Trustees, J. B. Leas, Supt. of schools. Petersburg, Indiana. Owner taking bids to close May 18th, at 3:00 p. m. (See legal advertising in this issue.) Brick.

***High School** (addition) $44,000.00, (Auditorium, Gymnasium, class rooms) Cynthiana, Indiana. Archt. Shopbell, Fowler and Thole, Furniture Bldg., Evansville. Owner, Casey J. Martin, Trustee, Cynthians, Indiana. Owner, receiving bids to close May 9th, at 10:30 a. m. Brick. Bids will be received on the entire work complete, also separate proposals will be received on the following items:

# Sealed Proposals

### SCHOOL BUILDING
### NOTICE TO CONTRACTORS

Sealed bids will be received by the Board of Education, Petersburg, Ind., at the office of Supt. of Schools, Mr. J. B. Leas, Thornton school building, for the erection of a new grade school and auditorium building, including general construction, heating and ventilating, plumbing and sewering and electrical work.

The estimated cost of the building including the above, is approximately $40,000.00.

Bids will be received until 3 P. M., Monday, May 10th, 1925, and then opened for consideration.

All bids must be made upon proposal blanks which have been approved; these blanks will be supplied by the Architects upon application.

Proposals shall be presented in sealed envelopes which shall be plainly marked to indicate the character of work bid on.

All bids must be accompanied by a certified check or bid bond (either personal or Security Company) for not less than three per cent (3%) of the amount of the bid submitted, made payable to the order of the "School City of Petersburg" as liquidated damages in the event that the successful bidder fails to enter into the proper contract for the work bid upon, and give the proper security or personal bond within ten days from the acceptance of such bid. Checks of unsuccessful bidders will be returned.

Each bidder shall file with his bid a non-collusion affidavit as required by law.

The Board of Education reserves the right to reject any or all bids and to take time to investigate the bids and the qualifications of the bidder.

Plans are on file in the office of the Board of Education, Petersburg, Ind., in the office of the State Board of Accounts, Indianapolis, Ind., and in the office of the Architects, Harry E. Boyle & Co., Furniture Bldg., Evansville, Ind.

Signed: BOARD OF EDUCATION,
Petersburg, Ind.

May 2nd, 9th, 16th.

### NOTICE OF LETTING OF CONTRACTS FOR HEATING, VENTILATING AND PLUMBING.

Notice is hereby given that on 12th day of May, 1925, at 11 o'clock, a. m., at their office in the High School Building on Guilford Street in the City of Huntington, Indiana, the Board of School Trustees of the School City of Huntington, Indiana, will let contracts for the furnishing of the necessary materials and labor for the proper placing and erection of the heating, ventilating and plumbing in the Tipton Street Ward School in the City of Huntington, Indiana. Alternate combined and separate bids will be received and the estimated cost of said heating, ventilating and plumbing is $20,000.00.

The materials to be furnished and the work to be done shall be according to plans and specifications heretofore adopted by the Board of School Trustees of the School City of Huntington, Indiana, and on file in the office of said Board, as furnished by Snider & Rotz, Engineers, of Indianapolis, Indiana, and prospective bidders may obtain copies of said plans and specifications for the work described from the said Engineers at their office, 703 Merchants Bank Building, Indianapolis, upon deposit of Twenty-five Dollars ($25.00). Said deposit to be returned to the bidder upon the return of the plans and specifications in good condition to the office of said Engineers.

All prospective bidders are hereby notified that said bids on each of said items must be upon forms prescribed by the State Board of Accounts and the same must be sealed and delivered at the office of the said Board of School Trustees in said High School Building at or before 11 o'clock a. m., on said date, at which time said bids will be opened and read by said Board of School Trustees.

A certified check must be filed by each bidder with each bid in a sum equal to five percent (5%) of such bids and conditioned that such certified check will be forfeited to the Board of School Trustees as liquidated damages occasioned by the default of bidder, in the event that such successful bidder fails or refuses to enter into a contract on such bid, within five (5) days after the acceptance by said Board of School Trustees of such bid.

The right is reservel by the Board ofSchool Trustees to reject any and all bids whatsoever and to waive defects or informalities in any and all bids.

W. M. ALLEN, President.
F. E. CUTSHALL, Secretary.
J. C. BAKER, Treasurer.

Broad of School Trustees of the
School City of Huntington, Ind.

April 25, 1925—May 2, 1925.

### SCHOOL HOUSE
### NOTICE TO CONTRACTORS

Notice is hereby given that sealed bids will be received by the undersigned, Trustee of Carrollton School Township, Carroll County, Indiana, at his office in said township, county and state, until One o'clock p. m. on Thursday, May 14, 1925, for the furnishing of all materials and labor for the building, erection and completion of a one-story and ground floor brick school building in and for said township according to plans and specifications on file in my office.

Said building to be erected on a plot of ground in section No.

Each bid to be accompanied by a certified check in the sum of $1,000.00 payable to Rolla L. Barnard, Trustee, as a guaranty that the bidder to whom contract is awarded will enter into written contract and provide bond within ten days after notice that contract has been awarded him. and upon failure to so do, the proceeds of this check to become the property of the above named township.

At the same time and place, sealed bids will be received for the heating and ventilation for said building, bid to be accompanied by a certified check in the sum of $300.00 payable to Rolla L. Barnard, Trustee, conditioned as for general contract.

At the same time and place, sealed bids will be received for the plumbing and water supply in said building, bid to be accompanied by a certified check in the sum of $300.00, payable to Rolla L. Barnard, Trustee, conditioned as for general contract.

At the same time and place, sealed bids will be received for the electrical work in said building, bid to be accompanied by a certified check in the sum of $200.00, payable to Rolla L. Barnard, Trustee, conditioned as for general contract.

Separate bids will be received for each of the above contracts, but a joint bid may be made on any or all of the last three named.

Plans and specifications for the use of individual bidder may be had from the Trustee, or the Architect, Samuel Young, Monticello, Indiana, upon a deposit of $10.00 for general plans, and $5.00 each for heating and ventilation, plumbing and water supply, and electrical work, all of which will be returned upon return of plans and specifications on or before date of letting of contracts.

The estimated cost of said building is $48,000.00.
The right is reserved to reject any or all bids.

Rolla L. Barnard, Trustee,
Carrollton School Township,
Carroll County, Indiana.
Bringhurst, Indiana.

Edwin D. Myer,
John L. Quinn,
Taylor Fouts,
Advisory Board.
James O'Bear, Attorney.
April 25th and May 2, 1925.

### SCHOOL BUILDING
### NOTICT TO CONTRACTORS

Notice is hereby given that sealed proposals will be received by the Trustee of Grant School Township and the Advisory Board of Grant Township of Newton County, Indiana, at the High School Building at Goodland, Indiana, until two o'clock p. m. of Saturday, May 9, 1925, for the furnishing of all material and labor necessary to erect, and complete a new two story and basement brick and stone school building, to be erected on the school square in Goodland, Indiana, in strict accordance with the plans and specifications therefor and under the direction and supervision of the Architect, John A. Bruck, which plans and specifications are on file in the office of said Architect, at Kenttee and in the office of said Architect, at Kentland, Indiana, and are open for inspection of all persons concerned and copies may be had upon a deposit being made with said Trustee, of $25.00 to insure the returning of the same to said Trustee.

The total estimated cost of said building in $75,000.00 and the contract will be divided into two classes. 1st, General Contract; 2nd, Heating, plumbing and Ventilating contract. Each bid to be separate, enclosed in a separate envelope and marked with the name of the bidder and class of bid enclosed.

All bids shall be accompanied by a certified check in the sum of $1,000.00 payable to Lewis W. Lemasters, Trustee, to insure that the bidder, if awarded the contract, will enter into a written contract with said trustee to complete said contract according to the plans and specifications for that class of the contract awarded on or before January 1st, 1926, and that said bidder will furnish a bond in a sum equal to said contract price, payable to said trustee, with a Surety Company as surety, and to the approval of said Trustee, that said contractor will faithfully perform and execute said contract made by him in accordance with said plans and specifications and under the direction, control and supervision of said Architect, and to the acceptance of said Trustee, and as otherwise provided for by law for public contracts.

Upon failure of said bidder to enter into said contract and give bond within 30 days after notice of award said sum of $1,000.00 to be taken as

**J. F. BOEHM**
**Tin and Sheet Metal Contractor**
Dealers and Appliers of Carey Built Up Asphalt and Asbestos Roofing

**SCHOOL BUILDING**
**NOTICE TO CONTRACTORS**

Notice is hereby given that James Wright, School Township Trustee, and the Advisory Board of York Township, Benton County, Indiana, will receive sealed proposals until 1:00 o'clock p. m. on Tuesday, May 12, 1925, at the Railway station of the Cleveland, Cincinnati, Chicago and St. Louis Railway Company in the Town of Raub, Benton County, Indiana, for the erection and completion of a school building for York Township in Raub, Benton County, Indiana.

The contract will also include heating, plumbing and ventilating system. Full details of plans and specifications are now on file at the office of the undersigned, James Wright, Trustee, and at the office of the architect, John A. Bruck, Kentland, Indiana, and are open for the inspection of all persons concerned; copies of plans and specifications will be furnished to any contractor applying for the same on a deposit of the sum of $20.00 made payable to the Township Trustee for the safe return of said plans and specifications.

Bids will be received on separate items as follows:

First: On the building complete, except heating, plumbing, ventilating and electric wiring.

Second: Heating, Plumbing and ventilating, Electric wiring will be let at a later day.

All bidders will be required to file their bids in forms required by the Indiana State Board of Accounts, and to accompany such bids with proper affidavits. Each bidder will be required to deposit with his bid a certified check in the amount of not less than 3% of his bid, payable to James Wright. Trustee, to insure that the successful bidder will enter into a written contract with said Township Trustee, and will furnish bond with resident freehold surety of Benton County, Indiana, or a surety bond to the approval of said trustee, and the advisory board, that he or they will faithfully perform and execute the work and contract awarded to him, or them, according to such plans and specification under the direction of said architect, and to the acceptance of said Trustee, as aforesaid, and according to law. The estimated cost of said building is $75,000.00. The right is reserved to reject any and all bids and to take a reasonable time for making a decision in awarding said contract

Dated this 15th day of April, 1925, at Raub, Benton County, Indiana.

## *Beauty of Permanence*

THIS beautiful bit of American-Italian architecture shows the master hand of the designer and the landscape artist. It is the swimming pool on the estate of J. F. Carlton, of Oakland, California. Such artistic spots cost enormous sums but the least expense connected with the cost is the one element that makes the investment *permanent* and the structure *enduring*. This one element, used in this pool, is GF No. 10 Integral Waterproofing Paste.

Briefly the value of GF No. 10 Paste for Integral Waterproofing is made up of these three features:

First—Its absolute solubility in water, insuring uniform distributon throughout the mass.

Second—Its chemical combination with cement to form a perfect and permanent waterproofing.

Third—The simplicity of its application—reducing labor cost and eliminating imperfections due to careless workmanship.

*Ask for literature on GF No. 10—the element of permanence. Be free to ask our Waterproofing Service Department for free advice and specifications.*

## COURTS AND STRIKES

### Supreme Tribunal Hands Down Important Labor Decisions

When labor strikes or lockouts do not results in any material restraint of interstate commerce, the U. S. Federal government is powerless to intervene. The decision was handed down in a case from San Francisco, where the industrial association of that city, the California Industrial Council and other organizations of employers had been found guilty of violating the Sherman anti-trust law in a fight for the adoption of the open shop, as opposed to the closed shop which labor unions had enforced up to 1921. As a part of their campaign, the employers adopted a permit system under which supplies could be obtained only by builders who would agree to join the open shop movement.

The lower court finding that these permits were required for the purchase of building materials and supplies produced in and brought from other states into California, held that there had an unlawful restraint of interstate commerce. The supreme court, in an opinion by Justice Sutherland, declared today, however, that it did not find that there had been a substantial obstruction of interstate commerce sufficient to constitute a violation of the Sherman anti-trust law.

Asserting that the evidence showed interstate trade was neither desired nor intended, Justice Sutherland declared that such building materials as had been brought into the state during the labor dispute, had come to rest within the state and had ceased to be a part of interstate commerce. Considering that the aggregate of material brought into the state did not exceed a few thousand dollars in comparison with the expenditure of $100,000,000 for the construction of buildings during the controversy, he said, a showing had not been made to satisfy the court that there had been a conspiracy to restrain interstate commerce.

"To extend a statute intended to reach and suppress real interference with the free flow of commerce among the states, to a situation so equivocal and so lacking in substance," the court added, "would be to cast doubt upon the purpose with which it was framed."

## ARCHITECTURAL SERVICE GOES A LONG WAY IN ELIMINATING FLIMSY BUILDING

### A'so Smaller Loans and Higher Insurance Rates Might Help

Should the owners of poorly constructed homes be penalized by encountering greater difficulty in securing loans and by being required to pay a higher insurance rate than those who have well-built homes?

This thought has been brought forward by C. Herrick Hammond, representing the American Institute of Architecture who declared that a "lower rate for a well-built house will do much to encourage better construction and discourage unscrupulous contractors," Mr. Hammond added:

"Good construction should be encouraged by granting higher loans to houses that, after inspection during the process of construction, are found to be sound.

"It is the unseen parts of the house that should have the careful attention of the home buyer and builder, and the public should not be mislead by an attractive exterior, for a house that is a dream of loveliness may be badly planned, and it is only by careful study that the defects can be ascertained. On the other hand, home builders should know that it is ridiculous to suppose that a good set of specifications make a good house."

A house costing $7,000 may look exactly like one in the same block costing $9,000, but its history may show where the $2,000 difference is and real architectural service is one of the surest ways to eliminate that difference.

## HOME BUILDING FINANCE AND OWNERSHIP BILL TO BE REINTRODUCED

### Effort to Pass Same at Last Session of Congress Failed

Among the bills which failed of passage in the 68th session of Congress was one on Home Building Finance and Ownership, introduced by Sen. Stanfield of Oregon. This will be re-introduced in modified form in the next session. Among other things, it would "provide" capital for home building and ownership, create standard forms of investment based on home loan mortgages, equalize rates of interest upon home loans, furnish a market for United States bonds, create Government depositaries and financial agents for the United States."—(National Lumber Bulletin.)

## STILL HANGING FIRE

### Jurisdictional Issue Between Brick Layers and Plasterers Not Yet Settled

The conference between officers of the Bricklayers, Masons and Plasterers' International Union and the Operative Plasterers and Cement Finishers International Association, which was scheduled to be held in New York, has been postponed. It is understood that another attempt is being made to get the two factions together in an endeavor to iron out their jurisdictional dispute differences. The truce between the two groups arranged at a former conference still continues to be in force and the men who were called out on jobs in New York, Chicago, Philadelphia and one or two other cities are back at work.

## GREATEST CONVENTION IN THE HISTORY OF THE AMERICAN INSTITUTE OF ARCHITECTS

### Record Attendance Drawn to Notable Architectural Meeting in New York City

Indiana architects recently returned from the Fifty-eighth Annual Convention of the American Institute of Architects held in New York City, are enthusiastic in their praise of the event, the program offered, the entertainment features and the efficient way in which all details were handled and dispatched. It was a most inspiring and impressive assemblage in that a record attendance was present, 1,300, with 94% of the membership of the A. I. A. represented, 604 members, and 696 visitors among who were representatives of numerous state architectural associations and individual members of the architectural profession from these foreign countries: Canada, Columbia, Cuba, Denmark, England, Finland, Germany, Mexico, New Zealand, Peru and Sweden.

Then, too, a program of unusual merit was offered covering a wide range of topics, most pertinent to the profession and practice and in its unfolding clearly demonstrated that the A. I. A. is reaching out to a greater field, growing and broadening in its function, which augurs well for the future of the profession. The endeavor of the Institute was clearly reflected in the views of the speakers who demonstrafed they were not only students but men of broad vision in which practicability and utilitarianism figured largely. There is no escaping the fact that the architects of the country and their great national organization are both shaking off many of the old traditional shackles and are assuming a new and useful role of expanding service not only to the profession but to the entire building industry.

To be sure the various angles of the profession and practice were dwelt upon in the many addresses and discussions, but the going on beyond those subjects was the impressive thing. It was shown in various ways that the Institute is awake to a great mission, a progressive constructive policy that of late years has been creeping into the organization. Particularly was attention directed to this expanding policy by the recognition accorded draftsmen and the intent to encourage them, the joint meeting with town planners, the awarding of medals to building craftsmen for excellence of craftsmanship, an expression of intent to co-operate with other fundamental interests in the building industry, and a willingness of the profession to assert its interest in the Labor problem.

The sessions of the convention were held at the Grand Central Palace and were all full to overflowing with architects from every section of the country, the East, the West, the North, the South and foreign countries.

The event covered a four-days period with morning, afternoon and evening sessions, time being taken out now and then for sight-seeing trips and theatre parties.

It was a week so crowded with varied events it is difficult in our limited space to adequately describe the affair, but with such an attendance and subjects of such moment to the building industry touched upon it goes almost without saying that the effect of the convention will spread far and wide and the good from it will be far reaching long after the records have been filed away in the archives of the Institute.

## ARCHITECTURAL AND ALLIED ARTS EXHIBIT A WONDERFUL AFFAIR

### Thousands Throng Galleries and Express Enthusiastic Admiration

The general public was quick to respond to the appeal exerted by the Exposition of Architecture and the Allied Arts, held in connection with the A. I. A. convention in New York. Day after day the vast galleries, halls and corridors of the Grand Central Palace were thronged by men and women from all parts of America,—indeed from all over the world,—and the exhibits of architecture and all that contributes in any way to architecture which filled every square inch of area upon four floors, were examined, discussed and absorbed by thousands of interested observers. Many visitors focused their attention upon that part of the fourth floor where there was arranged the exhibit of the "Small House Service Bureau."

And what could be more logical? The most interesting aspect of architecture is naturally that with which we are most personally and intimately concerned, and what in the entire realm of architecture could be more appealing than architecture as applied to the houses which are sufficiently inexpensive to be within reach of the average man or woman, and sufficiently small to be operated by the one servant (or probably none at all) which is all that the average housekeeper is likely to have.

A vast number of exhibits made up the exhibit which incorporated plans, details, perspectives, and renderings in color, in fact, all sorts of architectural endeavor even to models of structures. In addition was a vast display of exhibits pertaining to the allied arts associated with architecture in building endeavor. There were sculpture pieces, decorative fabrics, mural paintings, ornamental and wrought iron, art glass, mill work, tile and marble work and various building materials and supplies.

The whole went to make up the most stupendous and artistic allied building arts exhibit ever held in this country and was a complete success in every way reflecting great credit upon the A. I. A., which sponsored it.

ORGANIZATION AND CURRENT NEWS

## THE OUTLOOK FOR ORGANIZED LABOR

There have been less strikes and labor troubles so far this year than in the corresponding period during any of the past ten years, according to the figures compiled on labor conditions by Roger W. Babson, statistician and business authority. "This it not a mere accident," according to Mr. Babson, "but is the result of certain fundamental conditions that are bound to affect the trend of trade unionism during the next ten years." Mr. Babson believes that the trade unions of America will have "poor business" for awhile because of the lack of outlet for surplus manufactured articles. During the war, plant facilities were increased to such an extent that we now manufacture 60 per cent more goods than we have a domestice market for. European trade would ordinarily assimilate this vast surplus, but Europe owes us $20,000,000,000, and the only way she can pay us is in goods. Under this condition we shall likely see foreign made goods competing in our markets to such extent that the production in this country will be considerably under the capacity of our greatly enlarged manufacturing plants. Organized labor is most successful in a market where the demand for men exceeds the supply and since conditions will be reversed for some little time to come, Mr. Babson predicts that labor will not be quite so aggressive in the future as it has been during the past few years.

## AND NOW HE IS BOTH

### A Fanciful Version That Might Have Been

Once upon a time when the process of Creation had been completed and Evolution was silently doing its work, The Spirits of Evolution held a convention to exhibit their handiwork.

Each of the spirits had taken the best of the material given by the Creator and, in process of time, evolved a human being who was capable of accomplishing things directly associated with the name which was given him, and which should be the name of all his mental descendants.

Accordingly, when the day arrived each spirit proudly exhibited the result of his handiwork, and were unstintingly commended by the Master who reviewed them. At a signal they ranged themselves in the order of their entrance and gave a name to the being beside them, which was the best of its kind existing.

"Good Master," spake Number 1, "I bring before Thee the supreme product of my ability, THE MECHANIC, without whom none of the beautiful buildings of the world could be built."

"And I," spake Number 2, "bring to Thee the FOREMAN, who shall direct how the work shall be done."

"And I," said Number 3, "have made the BOOKKEEPER, who shall keep record of the costs, etc."

Number 4, exhibited the Paymaster.

Number 5, had the Collector.

Number 6, a finely finished Financier.

Number 7, had a lawyer.

Number 8, an Engineer, and Number 9, claimed to have the supreme product of all the Architect.

"These are all excellent and worthy examples of your genius," said the Master, "and I unreservedly commend you for your work. But there seems to be something lacking to fill out the general scheme of things—a missing link as it were. These are all specialists in their various professions, and there should be one who could fill each or all of these others places if occasion required."

"May it please your Highness," spake another Spirit, who had not taken part in the exhibit, "during all the ages in which my worthy fellow workmen were fashioning their products I was only helping, but I saved the scraps from all their labors and have fashioned from these a being which I think will demand recognition."

"Bring him in," commanded the Master, perchance it will fill the gap."

The Spirit left the assembly and all eyes were directed toward the entrance. Finally he returned with a man who was just a little different from all the others, and yet he seemed to resemble each of them in some particular. He appeared to be strong and resourceful, slightly stooped, as it were, from carrying some heavy load. When he spied the others he seemed to disappear for a short time, and be merged into them,—but he was forced to collect himself and be what the Spirit had made him, and then he stood before the Master.

"This," said the Spirit, "is the product of my hands, which I have fashioned from the scraps of the others. He is capable of performing the several things which the others are capable of doing, and I commend him to your recognition."

"Well done good and faithful servant, in that you have saved in one being the talents of all these others. What may his name be?"

"My compeers who would not allow me to bring him in with their exhibits, they said he should be called the GOAT, but I have named him GENERAL CONTRACTOR.—(Soloman Jones, Alton, Ill.)

## Calumet District

### RATHER UNEXPECTED IN VIEW OF LABOR DIFFICULTIES THAT CROPPED OUT

#### April Building Volume Reveals a Pleasant Surprise

April 1925 came out on top in building when the volume is compared with that of the corresponding period a year ago, and that too in the face of considerable trouble in labor conditions last month.

As for the projects started, there was just one less permit issued in April this year than during the same month last season. However, the estimated valuations showed a nice increase over the April 1924 figures, a gain of 15.9%.

The official figures submitted by City Building Inspector Henry Vis were:

| Month | Per. | Est. val. |
|---|---|---|
| April, 1925 | 170 | $668,250 |
| April, 1924 | 171 | 576,576 |

## TROUBLE WITH PLUMBERS AT GARY OBVIATED

### Men and Bosses Arrive at Satisfactory Conclusions

After fluttering around the dove of peace, quite disturbed for a time by a threatened embroilment between the master plumber employers and the union journeymen over the wage scale at Gary, has settled down quietly and the indications are that as far as the plumbing trade is concerned the above bird can tuck its head under its wing and go to sleep.

Sometime ago the union plumbers of Gary made a demand upon the bosses for a $14.00 per day wage, action that caused considerable concern in building circles. Conferences followed, the outcome of which is that matters have been satisfactorily adjusted and an agreement reached and signed whereby the scale for 1926 has been set at $12.00 per day.

Further demands for increased wages by the other trades are not indicated and it is anticipated that things from now on will move along serenely.

## GENERAL TREND QUIET

### Not Much Stirring in Building Construction Circles

Building affairs at Hammond and in the Calumet District are moving along in a general lethargic vein. The architects report a slackening up of inquiries from prospective builders, and home builders intimate sales are slow, while it is not the easiest thing in the world to finance the jobs that do bob up occasionally. In the meantime there seems to be more than enough labor available to handle the work requiring attention.

## CALUMET BUILDING PROGRESS

Architects Hess and Greenwood, Hammond, who prepared plans for the Woodmar Country Club building, report Rufus Danner as low bidder on the general contract.

H. B. Olney, East Chicago, was low bidder on the W. Fuzzy, apartment building in that city. Plans were prepared by J. T. Hutton & Son, architects, Hammond.

Archt. Mac Turner, Hammond, reports plans in progress for these projects: 3 sty. & basement store and hotel structure for A. Anderson on Calumet ave.; Flat building (16 apartments), for Mrs. H. M. Eastwood, to be located at Indiana and Logan st. Architect will be ready to receive bids about May 15.

General contractor Leslie Colvin, of Indianapolis, who has the contract for the erection of the Lloyd building has been having quite a controversy with the carpenters over the wrecking of the concrete forms.

Chicago looked pretty good to the B. T. E. A., secretary when he dropped in there last week to look things over. The Builders and Mutual Casualty Co., boys reported business good, which must have been so for they all were busy.

The home builders and outside contractors held a meeting Friday evening at Gary. They will hold a meeting with the carpenters Saturday to endeavor to get the latter to agree to reduce their scale to $1.37½. They will have to see the General Contractors Assn., to do that, as it holds the agreement. The carpenters can't reduce the scale without the association's consent anymore than the association could reduce it without theirs.

E. E. COLE.

# EVANSVILLE

## SLUMP IN LOCAL BUILDING DEVELOPS IN APRIL

### Carpenters Strike A Contributing Cause

Brisk activity in the application for building permits at the city building department throughout April resulted in the granting of 393 permits for the month which was 29 more than were taken out in March, but the projects approved were mostly of a small nature and the total estimated valuation of the whole lot only amounted to $187,407 as against $292,128 posted in March, a loss of 35.8%. Also, last month's building volume fell considerably behind that of the corresponding period a year ago when 483 permits were issued for an esimated valuation of $391,326.

The carpenter's strike which developed early in April and resulted in the adoption of the open shop as regards that trade had an influencing effect in retarding building to some extent but this is being overcome and construction operations are moving ahead again on a normal basis.

Particularly did new dwelling projects fall off, only 27 new permits for that type of structure being issued in April. During April 1924, there were 103 new dwelling permits granted but that was due to the fact that the new city building code was to go into effect May 1, and builders were eager to get in under the old building regulations.

## EXTENSIVE SCHOOL BUILDING PROGRAM UNDER CONSIDERATION

### Would Cover a Five Year Period to Lessen Tax Burden

A five year building program for the expansion of Evansville's educational system is now under consideration. The idea for extending such a program over a five year period is to equalize the educational opportunities of the school population without making the tax burden too heavy. Such a scheme would afford steady additional educational facilities to the city with but slight changes having to be made in the present financial status.

The program as advocated provides for this work:

1st Year—Two new buildings of 12 and 4 rooms respectively.

2nd Year—Several junior high school structures.

3rd Year—Gymnasium and manual training additions to Central High School; several additions, gymnasiums and class rooms to sundry grade schools.

4th Year—Colored grade and high school.

5th Year—Auditorium gymnasium additions, and new heating plants for various grade schools.

## HOME BUILDING IN EVANSVILLE NOT UP TO 1924 VOLUME

### Prospects Brightening However

As compared with the number of home building permits issued during the same period of 1924, Evansville is behind by about 120 homes, according to the report of Carl Dreisch, deputy commissioner of building. In view of the adjustment of several building condition difficulties which have prevailed over the greater part of the month of April, prospects are said to point to better conditions during May.

# FT. WAYNE

### FT. WAYNE FINDS SELF IN A FORTUNATE POSITION

**Can Now Profit By Experience of Other Cities on City Plan Scheme**

Now that Ft. Wayne is about to engage in a city plan scheme she has the advantage of profiting by the experience of other municipalities that already have city plans worked out and in operation. She can begin where they left off and thus be in a position to escape all the pioneering the others had to do to arrive at a tangible working basis.

Those who have advocated the city plan for Ft. Wayne have secured a vast amount of information which they are willing to submit to a special committee recently appointed by the city council, and such data will prove of inestimable value in working out preliminaries.

Since eighteen live Indiana cities have adopted city planning, and several of these plans are in the operation providing for the modern system of directing civic development, the new committee will doubtless find much material for investigation within the state, while hundreds of progressive cities throughout the country stand willing and anxious to proclaim the success of the plan as in operation by them for periods of years.

Every civic organization in Fort Wayne stands ready to give the committee all desired assistance and co-operation.

### 251 PERMITS ISSUED FOR NEW HOMES DURING APRIL

**Month's Building Figures Run Ahead Of Those of March**

While the figures representing the number and value of building permits for the month of April show a falling off of $517,000 over the corresponding month of last year, there is a gain of $60,000 over March of this year, which shows a steady increase in the building operations of the year. Two hundred and fifty-one, out of a total of 365 permits for the month, were for homes.

During April, the total estimated value of buildings for which permits were issued was $1,079,828, as contrasted with$1,019,828 for March.

# INDIANAPOLIS

### ALL BUILDING TRADES AT INDIANAPOLIS NOW IN LINE AT LAST SEASON'S WAGE SCALES

**Iron Workers Call Off Strike And Return To Work**

As regards the building labor situation in Indianapolis all wage scales for the various trades for the 1925-26 season have now been satisfactorily arranged, both to the employers and the merchants with working agreements all signed up. With this feature, so important to the successful pursuit of building operations, straightened out there are many who now look forward to a more active and prosperous building construction season.

The structural iron workers were the last of the trades to line up and they entered the fold Monday, May 4, after having been out on a strike since April 1. When their old scale agreement expired on the latter date they walked out because the building trades employers refused to acede to their demand for $1.50 per hour. Finally they agreed to return to work this week at the 1924-25 figure of $1.25 per hour upon the priviso that the scale would be raised to $1.35 per hour after July 1.

The agreements with the steam-fitters and hod-carriers expired May 1, and those two trades renewed their wage contracts at the last year's scale of $1.35 and 82½c per hour respectively.

### BUILDING REVIVAL INDICATED BY APRIL CONSTRUCTION FIGURES

**Volume Last Month Best So Far Posted This Season**

Again in April building operations at Indianapolis showed a healthier tone than that sounded during any of the preceding months of 1925 and registered a good volume of business. The total estimated valuation of the new work upon which the city building inspection department passed favorably ran up to $2,817,231.

An encouraging development made its appearance in the tendency of larger projects to get under way, something that has been lacking in former months. There were twenty-three permits issued for business structures for an estimated investment of $788,900 quite an increase in that direction.

The big burden of the showing for the month, however, again rested on residential work which rolled up a $1,295,665 total which covered 275 new houses.

Last month when compared with March of this year and April a year ago shows a building business volume gain of 147% and 13% respectively.

An analytical classification of the work passed upon by the city building inspection department shows these types of building started and the estimated valuations.

| Kind of Work | Per | Est. Val. |
|---|---|---|
| Business Bldgs. | 23 | $ 788,900 |
| Industrial Bldgs. | 6 | 248,000 |
| Miscellaneous Work | 242 | 57,293 |
| Public Bldgs. | 2 | 114,500 |
| Residences | 275 | 1,295,665 |
| Remodeling and Add. | 1176 | 312,873 |
| Total | 1724 | $2,817,231 |

# Sealed Proposals

## SCHOOL BUILDING
## NOTICE TO CONTRACTORS

Sealed bids will be received by the Board of Education, Petersburg, Ind., at the office of Supt.

**J. F. BOEHM**
**Tin and Sheet Metal Contractor**
Dealers and Appliers of Carey Built Up Asphalt and Asbestos Roofing
Webster 0217 2326 E. 10th Street Indianapolis, Ind.

of Schools, Mr. J. B. Leas, Thornton school building, for the erection of a new grade school and auditorium building, including general construction, heating and ventilating, plumbing and sewering and electrical work.

The estimated cost of the building including the above, is approximately $40,000.00.

Bids will be received until 3 P. M., Monday, May 18th, 1925, and then opened for consideration.

All bids must be made upon proposal blanks which have been approved; these blanks will be supplied by the Architects upon application.

Proposals shall be presented in sealed envelopes which shall be plainly marked to indicate the character of work bid on.

All bids must be accompanied by a certified check or bid bond (either personal or Security Company) for not less than three per cent (3%) of the amount of the bid submitted, made payable to the order of the "School City of Petersburg" as liquidated damages in the event that the successful bidder fails to enter into the proper contract for the work bid upon, and give the proper security or personal bond within ten days from the acceptance of such bid. Checks of unsuccessful bidders will be returned.

Each bidder shall file with his bid a non-collusion affidavit as required by law.

The Board of Education reserves the right to reject any or all bids and to take time to investigate the bids and the qualifications of the bidder.

Plans are on file in the office of the Board of Education, Petersburg, Ind., in the office of the State Board of Accounts, Indianapolis, Ind., and in the office of the Architects, Harry E. Boyle & Co., Furniture Bldg., Evansville, Ind.

Signed: BOARD OF EDUCATION,
Petersburg, Ind.

May 2nd, 9th, 16th.

FOR ARCHITECT ENGINEER

Devoted to the Interests of the Indiana Construction and Engineering Industry

FOR SUPPLYMAN CONTRACTOR

VOL. VII INDIANAPOLIS, INDIANA, MAY 16, 1925 No. 7

## BIG MEEETING OF BUILDING CONSTRUCTION INTERESTS HELD AT NEW YORK CITY

### Conference Covered Two-Day Period

The American Construction Council is an impartially constituted, national body representing all those interested in any way in construction—investment, bond, insurance, real estate, building and loan; manufacturers and distributors of materials and equipment; architects; engineers; construction labor; general contractors; sub-contractors; boards of trade and commerce; construction departments of public utilities; officials of federal, state, municipal and county departments identified with construction; national and local associations of builders exchanges and of building trades employers and similar associations or federations of building interests; and the public.

It is organized to bring together these various interests for the consideration and solution of problems common to the entire industry and effecting the national prosperity, and to provide a practicable way in which the interests of the public can be presented to the construction industry as a whole for positive action and mutual benefit.

A two-days spring conference of the council was held in New York City, May 8 and 9 at which better building and the elimination of construction peaks and depressions was discussed.

The first subject mentioned had to do with a discussion looking toward the building of better homes and proper housing financing and was participated in by manufacturers and distributors of materials, financial interests, architects, contractors and others linked up with building affairs. As regards the second matter the purpose of the conference was to assist in bringing about that co-ordination within the industry and

(Continued on Page 11, Col. 1)

## ENCOURAGING GAINS SHOWN BY THE APRIL BUILDING VOLUME TURNED IN BY TEN INDIANA CITIES

### Issuance of Permits For the Month Not As Great As a Year Ago But General Character of the Work Was of a Greater Scope

A peculiar feature about the building business in Indiana in April, as revealed by the figures returned by the building inspection departments of ten of the cities which keep an official tab on the new work launched, is that while there were six hundred and twenty-nine less permits issued in April, 1925, than in April, 1924, the total estimated valuation of the new projects approved showed a gain of 15.2% over the valuations recorded for the corresponding period a year ago.

However, the recent month's business when compared with that of March this year showed a good increase all around. There were 1,160 more permits granted in April than during the preceding month, and the total estimated valuations ran 26.9% greater than the March total.

Indianapolis came through with a good volume of business, not far from three million dollars, but of particular interest is the "come back" staged by South Bend, who led all the other cities in the matter of gain by recording during the month a greater amount of new building work than she had posted over the entire other three months since the first of the year. Gary also deserves honorable mention for her April performance which shows a big increase over the April, 1924 business. Ft. Wayne was the fourth Indiana city to post a better than a million dollars worth of new building last month, but her total lacked considerably of reaching the level attained for the corresponding period a year ago. Hammond recorded over a half million dollars in new buildings in April but all the others, except Muncie with a $313,535 volume, just trailed along. Of the ten cities eight of them issued less permits last month than they did over the corresponding period in 1924.

The showing made by the various cities in April as regards permits and gains or losses in the estimated valuation of new building business is as follows: South Bend, 117 more permits, gain 125%; Gary, 75 more, 122.7% gain; Muncie, 135 less, 60.5%; gain; Hammond, 1 less, 15.9% gain; Indianapolis, 386 less, 13% gain; Elkhart, 7 less, 7.5% gain; Richmond, 16 less, .48% gain; Ft. Wayne, 86 less, 32.9% loss; Terre Haute, 100 less, 39.4% loss; Evansville, 90 less, 52.1% loss.

Here are the official figures for April, 1925 and 1924, as reported by the city building inspectors.

| | 1925 | | 1924 | |
|---|---|---|---|---|
| Cities | Per. | Est. Val. | Per. | Est. Val. |
| Elkhart | 28 | $ 177,800 | 35 | $ 165,400 |
| Evansville | 393 | 187,407 | 483 | 391,326 |
| Ft. Wayne | 365 | 1,079,828 | 451 | 1,609,612 |
| Gary | 291 | 1,213,650 | 216 | 544,803 |
| Hammond | 170 | 668,250 | 171 | 576,576 |
| Indianapolis | 1,724 | 2,817,231 | 2,110 | 2,492,173 |
| Muncie | 122 | 313,535 | 257 | 195,232 |
| Richmond | 86 | 127,509 | 102 | 126,895 |
| South Bend | 497 | 1,213,884 | 380 | 543,849 |
| Terre Haute | 282 | 153,571 | 382 | 253,608 |
| Total | 3,958 | $7,952,665 | 4,587 | $6,899,474 |

***Church:** (Sunday School seating 1000, Auditorium seating 800 persons). Hartford City, Indiana. Archt. A. A. Honeywell & Co., Penway building, Indianapolis. Owner, First United Brethren Church, Rev. Turley, Pastor, Hartford City, Indiana. Plans in progress. Ready for bids in 3 weeks. Brick and stone.

***Church:** $80,000, Martinsville, Ind. Archt. A. A. Honeywell, 413 Penway Bldg., Indianapolis, Ind. Owner, Christian Church, Allen Moore, Chmn. Bldg. Comm., Martinsville. Brick. Plans completed—rather indefinite as to when bids will be taken.

***Sunday School** (addition to church) $40,000.00, Sullivan, Ind. Archt. A. A. Honeywell, 413 Penway Building. Owner, Sullivan Methodist Episcopal Church. Rev. E. L. Hutchens, Sullivan, Ind. Owners financing at present. Probably mature late summer. Brick, stone trim.

***Church (rem.) and Sunday School (Add.):** $45,000.00, 1 and 2 sty. 960 West 31st. Archt. A. A. Honeywell, 413 Penway Bldg. Owner, Home Presbyterian Church, Rev. A. S. Buchanan, 3320 Northwestern Ave. Bids close May 25th. Brick, stone trim, will brick veneer old church, new steam heating plant.

***Warehouse:** (1 sty. addition 100x190), $45,000.00, 211 West South St. Archt. Bennett Kay, 738 Lemcke Bldg. Owner, Samuel and Julius Falender, 615 S. Capitol Ave. Archt. receiving bids. Reinforced concrete, tar and gravel roofing, 2 elevators, steam heating plant, steel sash.

**School:** (addition), $30,000.00, Allen School Township, Miami County, at Macy, Ind. Archt. Charles E. Bacon, 605 Odd Fellow Bldg., Indianapolis. Owner, Scudder Wilson, Trustee, Macy, Indiana. Architect selected. Details undecided. Brick, stone trim.

***Community Gymnasium:** $50,000.00, 1 sty. & bas. 103x140. Archt. McGuire and Shook, 320 Indiana Pythian Bldg., Indianapolis. Owner, Board of Education, Greensburg, Indiana. Plans in progress. Owner will advertise for bids in 10 days. Brick.

***School Building:** (addition), $60,000.00, Jackson Township, Hancock County, at Charlottsville, Indiana. Archt. McGuire and Shook, 320 Indiana Pythian Building, Indianapolis. Owner, Walter E. Ross, Trustee, Rural Route No. 8, Greenfield, Indiana. Owner receiving bids up to 10:00 a. m. June 3d., 1925, at the office of the Citizens Bank, Charlottsville, Indiana. Brick.

**County Jail:** (rem.), $10,000.00, Greensburg, Ind. Archt. McGuire and Shook, 320 Indiana Pythian Bldg., Indianapolis. Owner, Board of County Commissioners, William Zetterberg, Auditor, Greensburg, Ind. Preliminary plans in progress. Details undecided.

***Residence:** $35,000.00 (14 rooms, 4 baths, 3 car garage), N. Illinois and 41st St. Archt. Frederick Wallick, 308 Hume-Mansur Bldg. Owner, Guy Wainwright, V. P. Diamond Chain Co. General contract let to Albert Fuller, 434 N. Emerson. Stucco, slate roof, tile baths, vapor heat, incinerator, oil burner, electric refrigeration.

***Residence:** $20,000.00, 2 sty. & bas., 26x33, 44th and Broadway. Archt. Fermor S. Cannon, 21 Virginia Ave. Owner, W. T. Cannon, Pres. Railroad Men's Building and Loan Assn., 21 Virginia Ave. Archt. receiving bids. Brick veneer.

**Apartment Building:** East 11th St., between Park Ave. and Broadway. Owner, Adam Cresskopf, c/o Nutz and Grosskopf (Shoe supplies), 107 South Pennsylvania St., contemplated. (Owner is rather undecided as to an apartment building or stores. definite data later.)

**Residence:** $15,000.00, 2 sty. & bas., Colonial style, Plainfield, Indiana. Archt. Allen and Garriott, 1008-09 National City Bank Bld., Indianapolis. Owner, Fred Hobbs, Plainfield, Indiana. Plans completed. Archt. ready for bids in a few days. Brick veneer, slate roof, tile bath, tile kitchen, tile sun parlor, incinerator, automatic refrigeration, kerosine water heater, water softener, septic tank, hot air heat, oil burner.

***Apartments:** (2 apts, 1 sty. top addition to garage), $7,000.00, Shelbyville, Ind. Archt. William O. Morck, Lombard Bldg., Indianapolis. Owner, Al Schneider, (Overland agency), Shelbyville. Plans in progress. Brick.

***Parochial School:** $20,000, 1 sty. and bas., 41x80, 11th and Temple. Archt., Fichter and Brooker, Akron, Ohio. Owner, St. Peters Evangelical Church, Henry Geiger, Trustee, 1728 E. 12th St., Indpls. Owner taking bids to close May 21st. Brick, hollow tile, furnace, comp. roof.

**Heating, Plumbing and Wiring:** for stores and garage building. Archt. Vonnegut, Bohn and Mueller, 610 Indiana Trust Bldg. Owner, Guedelhoefer Realty Co. Otto Guedelhofer, 202 Ky. Ave. Archt. taking bids on htg. plmg. and wiring.

**Residence and (2) car garage:** $18,000.00, 2 sty. & bas. 5200 block on Central Ave. Archt. Frank B. Hunter, 912 State Life Bldg. Owner, Everett McCory, c/o Fletcher-American Co., Fletcher-American National Bank Bldg. Plans about completed. Ready for bids in a few days. Stucco, asphalt shingle roof (colored Blend), forced air heating, tile and hardwood floors, masonry floors.

**Garage and Root Storage Building:** 2 sty. & bas. 25x60, Rochester, Ind. Archt. Charles Freijs, 233 Lemcke Bldg., Indianapolis. Owner, Forest Farms, Inc., c/o archt. Archt. will superintend construction work in a few days. Frame, boulder construction, asphalt shingle roof, concrete and wood floors, steel sash, steel columns.

***Residence:** $15,000.00, Sutherland Ave. Archt. Clarence T. Myers, 412 Penway Bldg. Owner, Dr. Don A. Anderson, 242 Bankers Trust Bldg. Archt. builds and awards separate contracts. Brick veneer.

**Indianapolis:** Owner, Indiana State Highway Commission, State House, Indianapolis. Taking bids on the following. Bids close May 26, at 10:00 a. m.:

Madison County—One bridge on Road 37-B of 80-foot span; one bridge on Road 37-C consisting of 3 spans at 45 feet each; one bridge on Road 11-C consisting of 3 spans at 45 feet each.

Delaware County—One bridge on Road 37-D consisting of 3 spans at 45 feet each.

Grant County—One bridge on Road 11-E of 28-foot span.

Wayne County—Two bridges on Road 34-D, one of two spans at 28 feet each, and one of two spans at 55 feet each.

Benton County—One bridge on Road 10-S of 72-foot span.

Montgomery County—One bridge on Road 33-D and one small culvert to be let with above bridge. of 65-foot span; also one-half mile of grading

Indianapolis, Ind.

## INDIANAPOLIS ARCHITECTS GIVEN VERBAL SNAP SHOTS OF ELBERT HUBBARD

### Former Secretary Recounts Personal Experiences Gained While In the Employment of the Famous Roycrofter

Tho the attendance at the regular monthly evening dinner and meeting of the Indianapolis Architects Association at the Hoosier Athletic Club, Wednesday, May 13, was somewhat of a disappointment to the officers, that was the only disappointing feature to the affair. The meal was unusually good, the spirit of those present was better and the talk made was one of the best and most interesting of the season and was thoroughly enjoyed by every one present.

For a change, discussions or talks along architectural and building matters were abandoned and the evening was virtually turned over to Percy A. Beech, formerly secretary to Elbert Hubbard, who recounted his experiences with and observances of Mr. Hubbard while acting as secretary.

Mr. Beech's talk was of an informal nature and skipped about from lecture tours about the country with Mr. Hubbard to more intimate personal contact in the shop of the founder of the Roycrofters at East Aurora, N. Y. It was most interesting to listen to the talker who thru his close association with Elbert Hubbard was enabled to reveal to his auditors an insight into the life and character of the man that the public does not know.

Mr. Hubbard to the outside world assumed much dignity and affected certain eccentricities but that was more or less for effect, advertising some might term it. Behind the scenes he was much as other men, he was kind to his help, was quick to aid the man who was down, to give him a chance, and, it did not take him long to diagnose the ability and value of others.

One was inclined to believe Mr. Hubbard arrived into his own, into a sphere of recognition thru accident. He wrote considerable manuscript that was turned down by editors of leading magazines because his style failed to meet with approval, and then he decided to be his own publisher. When he put forth his publication it was seized upon by the public, and Elbert Hubbard became famous. His Little Journeys were widely read, then the lecture platform beckoned for him and from it he swayed audiences much as he pleased.

Finally came a commission from a great newspaper syndicate to go to Eu rope to write on the Great War and conditions over there. Mr. Hubbard aware of the warnings that had been sounded of the intention to torpedo the Lusitania called his help about him before his departure and mapped out plans to be followed should he fail to return. Mr. Beech said there was a something new about Mr. Hubbard, a seriousness never before noticed by others, and that something was truly prophetic of disaster, for, the man went down in the great sea tragedy, he never came back.

## BETTER HOMES AGITATION WILL GRADUALLY CARRY A BIG INFLUENCE FOR THE FUTURE

### ARCHITECTS CAN PLAY A BIG PART IN THE SCHEME

The past seven days were Better Homes Week, nation wide in its observance, and meant to inspire the prospective builder with higher ideals and keener desires for the home for which he has been waiting overlong. Thousands undoubtedly had their attention attracted to building matters in one way or another. Some of these many will decide upon some type of house and build it before the year is out; some will delay another year in the hope of decreases in labor and material costs; others will simply begin looking for plans.

Better Homes Week has become something approaching an institution in America. The national government has encouraged its observance more vigorously than ever before. Some state governments have given the move recognition; while in most sections the local interests which have most at stake support it ardently. But with all of this it is frequently a misnomer; too few of these prospective builders really catch the true significance of the movement.

The better home of the future will not be merely a figure of speech; it will be a really better home, a more substantial and lasting home, a home of safety and permanence. This is inevitable.

The far seeing architect, who appreciates that within the ordinary life of the average house built today there is certain to be a very radical change in the popular preference for and style of homes, will give greater consideration than in the past to what he recommends. This better home movement is on in fact, not in name only. Discerning men who build for the future will build better and more permanent homes.

## STEEL LOCKER VARIETIES REDUCED --

### 17 Recognized Styles Now As Against 65 Formerly

Action taken by a general conference of manufacturers, distributors and users of steel lockers, reducing the "recognized variety" of steel lockers from 65 to 17 became effective April 1, according to the Division of Simplified Practice, Department of Commerce. The application of the "recognized list" was formally endorsed by a sufficient proportion of the entire group, whose members pledged their best efforts to promote the use of these sizes and to eliminate the wastes due to any lack of standard sizes.

### BIG MEETING

(Continued from Page 5)

its related groups necessary in a large way to secure the desired correctives of construction peaks and depressions. The discussion included consideration of the report and recommendations of the Committee on Seasonal Operations in Construction appointed by Secretary Hoover.

The conference was participated in by all elements, including transportation, that are concerned with or would be effected by greater stabilization of the construction industry—those who have to do with the initiation of construction projects of engineering and architectural types and their design and prosecution as well as manufacturers and distributors of materials, transportation agencies, and public officials.

### OPPORTUNITY PRESENTS ITSELF FOR CONTRACTORS TO AID BOYS AND THE BUILDING INDUSTRY

**With Many Youths Graduating the Time Is Auspicious to Direct Their Attention to the Building Trades**

The choice of a vocation or profession is one of the most important steps in the life of any individual. It is something that each one has to decide for himself. Upon the proper decision rests largely whether a person will go through life happy in the knowledge that he is performing a work that is well worth while, or unhappy in the knowledge that he is attempting to do something for which he is not especially fitted. Between now and the middle of June countless thousands of boys will leave the public schools of this country to make their own way in the world. Many of these boys are mechanically inclined and have creative instincts. Hundreds of them could be induced to enter the building industry if the matter was put up to them in the proper manner.

Boys, who would make good bricklayers or plumbers, may get into industries for which they are tempermentally unfitted, and fail in life simply because the advantages of the building trades was not presented to them at the proper time. Here then is an excellent opportunity for every contractor's association in the country to perform a service that will not only benefit the construction industry, but society in general. Between now and the closing days of the school year, an ecort should be made to have the building industry brought to the attention of every boy who is not contemplating a college career. Local associations should appoint an educational committee whose job it would be to see that a practical builder appeared on the platform of every school to talk on the subject of choosing a career, emphasizing the advantages offered by the construction industry. With that thought in mind there has been prepared in the office of the National Association of Building Trades Employers an address entitled, "Choosing a Profession," copies of which will be sent to association secretaries and others interested in the subject upon request. This is a matter of vital importance. We can no longer look to Europe to train our skilled labor, and consequently must do the job ourselves. The time to get the boys is when they are about to leave the public school. If every one in the industry will interest himself in this matter, it will be but a short time until we have apprentices enough enrolled in the construction industry to insure an adequate labor supply for the future.—(Bulletin, National Association Building Trades Employers.)

### CONSTRUCTION BUSINESS HOLDING ITS OWN IN INDUSTRIAL FIELD

**Not Up to Pace Set in 1924, But Is Showing a Tendency to Gather More Speed**

Building construction and the manufacture of automobiles constitute the two bright spots on the industrial map of the country. Many basic industries are showing a general tendency toward contraction of productive activity in order that production and consumption may be adjusted. A notable example is in the coal industry, where as one authority has put it, "conditions are worse now than they have been at any time during the present generation." The reason assigned for the slump in this industry is that union mines, where the basic scale as fixed by the Jacksonville agreement is $7.50 a day, can not compete with non-union mines where the rate is much less. As a result the non-union mines are getting the bulk of the business and the union mines are idle.

While the volume of construction business for the first four months of this year is not as great as it was in 1924, the demand still keeps up, and every indication points to a fairly busy year taking the country as a whole. The biggest drop in contract letting is in New York, but considerable work started last year has not been completed so the industry in the metropolis will be kept going at full capacity for the balance of the year. The drop in New York is counterbalanced to a certain extent by the continued building boom in Chicago. Most of the other large cities report a volume of business on a par with 1924. It is believed that the nation-wide boom of the past two or three years is at an end and that the industry has settled down to normal.

### THE FIVE-DAY WEEK REMEDY

**Remove The Premium on Dilatory Tactics By Cutting Out The Overtime Lure.**

One commentator upon the action of the building trades that have imposed a five-day week upon the industry has explained its existence from the cupidity of those mechanics.

Here is the idea: the trades are principally those required to finish a building job. The owner is anxious to have the job done; the contractor is anxious to get his money; the architect wants to see the structure completed. With a five-day working week, and a possible sixth day conveniently in the offing—for which, be-

ing overtime—double pay, or, at best, time and half time wages are demanded, haste may be made—for a price. .

Every one concerned in the business knows it is immoral, every one knows it is a hold-up, but—they pay!

When the day arrives when no overtime work will be tolerated this sort of thing will be at an end.

Who will start the innovation? Selfish interests so far have hidden the innovator from view.—Building Arts.

### BOARD FEET OR BORED TIMBER?

**A Film That Should Interest Associations of Builders and Architects**

Pinhole borers, wormhole borers, ash borers, pine sawyers, ambrosia beetles, powder pest beetles, and other animated gimlets which wreak enormous losses to loggers and lumbermen through their attacks upon cut logs and seasoned timber, are the targets for an attack by the Bureau of Entomology, United States Department of Agriculture in an educational motion picture, "Board Feet or Bored Timber?"

This new film includes intimate life studies of these pests and features methods of getting rid of them. The picture was photographed in the cypress swamps of Mississippi and Georgia, the pine forests of South Carolina and the dismal swamps of Virginia. Other sections of the film were made in Kentucky and California. It contains photographic material of rare interest.

All together these "borers" cause annual losses amounting to more than $40,000,000. The ways of fighting them, as graphically demonstrated in the film, vary according to their habits, but are extremely simple. Quick removal of the logs from the woods after cutting; the peeling of gum trees immediately upon felling to permit the sun to dry the logs; deadening cypress trees on the stump before cutting; submerging logs in ponds; quick handling of logs at the sawmill and the elimination of waste materials in which the insects may breed are among the control measures recommended in the film.

"Board Feet or Bored Timber?" is a one reel production. It will be circulated through the educational film service of the department and the cooperating State institutions. A complete list of the department's films, with information on the method of distributing them, is given in Miscellaneous Circular 27, which may be obtained, as long as the supply lasts, on application to the department at Washington, D. C.

## Calumet District

### GARY PLUMBERS SWING AROUND AND UPSET THINGS

**Just When Wage Matters Seemed Above Craftsmen Come Forward With New Advanced Demands**

Now things are all askew again and another building trades craft strike is on once more. The dove of peace which fluttered down upon its perch has taken the air and flown away for the time being.

The new and unexpected flurry developed at Gary with the plumbers assuming the offensive a trade that seemingly just recently reached a satisfactory wage adjustment with the bosses. A tentative settlement was reached and the men went back to work at $12.00 per day, stuck to their knitting for several days and then dropped everything and demanded $13.00 per day, also they want working conditions altered which if granted would further add to building construction costs which are already too high in the Calumet District.

When the new demands were submitted to the Master Plumbers, the employers, the latter turned them down and the new strike ensued. The whole thing is a bad break for building chances in the District, for, if the new demands are acceded to a lot of discontent is liable to crop out in the ranks of the other trades and start a new skirmish for higher wages.

There is the bare possibility that if the plumbers persist in their demands and refuse to abide by the $12.00 agreement of recent date all building operations will be discontinued until matters are straightened out.

The high wage rates now being paid the building trades in this section of the state have caused more or less of a slump in construction operations and if further increases are tacked on to current costs even a greater inactivity may be expected.

If a definite settlement with the plumbers at Gary is not arrived at soon, and if the other crafts become discontented it looks as if a fine opportunity would present itself whereby the Commissioners of Conciliation of the U. S. Department of Labor might step in and exert their good offices.

### MORE MEN THAN WORK

**High Wage Reports Flood Calumet District With Outside Workmen Anxious For Employment**

The word has evidently been fairly well broadcasted over the country that great wages are being paid to the building mechanics in the Calumet District. At least that is the inference to be drawn from the many new arrivals of craftsmen who are pouring in from all sections looking for work. Some of these men have been successful in connecting up with employment but quite a few of them are still casting about for something to do. If operations fail to pick up and the newcomers continue to arrive in the proportion that has ruled for the past few weeks the local labor market is sure to be glutted.

### OVER FOR THE PRESENT

**Politicians Have Their Fling, Then Subside**

The primary election having inserted itself into the order of events to liven things up a bit from the general routine succeeded in its purpose and now most of us have settled back into the everyday life again hoping the successful candidates for nominations are all that was claimed for them. From now on we can turn our attention back to business until next fall when the politicians will again take the center of the stage and seek to convince the public who are the logical men to whom to entrust the welfare of the city and county.

### CALUMET BUILDING PROGRESS

The general contract for the Highland, Ind., school was awarded to M. A. Dickover, Hammond, at $45,000. The heating, ventilating and plumbing went to the Dorsey Plumbing Co., also of Hammond, for $10,000.

Operations on building construction work in most of the Calumet District are moving along at a good rate of speed and to all appearances the layman is favorably impressed with the activity shown. However, behind the scenes there

is not the new prospective work developing that there should be at this time of the year and unless more projects begin to put in an appearance soon the outlook for the summer season is not the best or very encouraging.

Architect E. W. Bump, formerly of Hammond, but more recently located at Grand Rapids, has returned to reopen an office in Hammond. They move out look around and then come back.

A large force of men engaged at the new amusement park on the lake front is rapidly assembling the new buildings and other improvements indicating that the place will be ready for the big inaugural in a few weeks.

E. E. COLE.

# EVANSVILLE

## FAILURE OF LARGE PROJECTS TO DEVELOP CURTAILS EVANSVILLE'S BUILDING VOLUME

### Work Started All Practically of a Small Nature

Local building operations this season while active, as far as small work is concerned, has proved disappointing in that large projects have failed to mature and are conspicuous by their absence. Home building has contributed largely to the total volume of business but the hundreds of houses started are unable to make up for the lack of larger structures. Repairing, additions and alterations have been particularly in good volume but, again, these are comparatively small when it comes to expenditure involved and fail to roll up much of a showing. One or two large projects would have given Evansville a good showing, but they did not develop and the result is that the city has not much to offer as a building construction record.

The 1238 permits granted since the first of the year present a sum total better by 295 than the permits issued from Jan. 1st, to April 30th, inclusive in 1924 but the total estimated valuation on the work of the first four months last year is 22.54% greater than the new building work launched in 1925.

| Time | Per | Est. Val. |
|---|---|---|
| First 4 Mo. 1925 | 1238 | $ 974,018 |
| First 4 Mo. 1924 | 943 | 1,257,448 |

# FT. WAYNE

## TRAILING LAST YEAR'S RECORD

### City's Building Effort Lags Somewhat This Season

Two monthly million dollar building records and one of over half a million out of four months to date in 1925 have failed to measure up to the standards established by Ft. Wayne in recent years, a condition that has set the city back when former records are reviewed.

Much as other localities Ft. Wayne's building endeavor so far this season has been directed toward home building not because the desire to build larger was lacking but because the big work has not shown up.

Last year up to May 1st there were 870 permits issued by the city building inspection department with a total given valuation of $4,260,712. The record for the same time this season is 841 permits granted at an estimated valuation of $2,996,020.29 less permits and a decrease of 29.65% in the volume of business.

# SOUTH BEND

## BEST BUILDING PERIOD IN NINETEEN MONTHS

### April Makes Fine Local Record

A new burst of activity broke over the South Bend building field during April and drove to cover the protracted lethargy that had been hovering around for a long time. In September, 1923, the city turned in a volume of building that exceeded $2,000,000, then a decline set in and since that time the monthly valuations have never reached the million dollar mark. The best building month in 1924, was May, when the figures reached $965,148.

This year things started away slowly in January, showed slight improvement in February and kept on through March. Then came April to roll up a fine record of 497 permits issued for a total estimated valuation of $1,213,884, a gain over March of 215 permits and 148.8% in valuation.

At the end of March local building for the first quarter of the year was 27.49% in arrears of that recorded for the corresponding period in 1924. However, with April over that deficit has been wiped out and the total volume of new construction operations for the first third of this season is 14.47% ahead of that of last year for the same time.

Comparative figures show this result to May 1st:

| Time | Per | Est. Val. |
|---|---|---|
| First 4 mo. 1925 | 1092 | $2,235,292 |
| First 4 Mo. 1924 | 1046 | 1,952,582 |
| Advantage for 1925 | 56 | 282,710 |

*Start this afternoon and run out in any direction, to the outskirts of town and notice the many new homes going up and you will be surprised by their beauty and the many modern conveniences that are now considered indispensible to the modern home-owner. Places that were newly marked out subdivisions only two years ago are completely built up today. Try and buy one of these places and you will find that they have increased in value from twenty to fifty per cent, and they were built only a couple of years ago.*

# Sealed Proposals

### SCHOOL BUILDING
### NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned Trustee and Advisory Board of Harrison School Township, Miami County, Indiana, will receive sealed bids at the office of the Trustee in the North Grove School Building, in North Grove, Miami County, Indiana, until 11 o'clock a. m., Monday, June 8th, 1925, for the erection and completion of additions and alterations to the present school building in North Grove, Indiana, all in accordance with the plans and specifications heretofore adopted therefor by the said Trustee and Advisory Board and which are now on file in the said office.

At the same time and place, separate bids will also be received for the complete installation of a new heating and ventilating system.

The estimated cost of the work to be included in said general contract is $13,000.00, and the estimated cost of the work to be included in the contract for the installation of such heating and ventilating system is $7,000.00.

All bids must be in writing on Form No. 96 as prescribed by the State Board of Accounts, delivered sealed, and must in every respect conform to the laws of the State of Indiana.

Each bid for General Construction shall be accompanied by a certified check for $1,000.00.

Each bid for Heating and Ventilating shall be accompanied by a certified check for $500.00.

The certified checks must be made payable to the Trustee of Harrison Township, Miami Co., Indiana, and will be held by him as a guarantee of good faith that the said bidder or bidders will enter into a contract and execute an acceptable bond for the full amount of his bid (said bond to meet the approval of the Trustee and Advisory Board) for the due performance thereof, if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded. Should the successful bidder fail to enter into such a contract and execute such bond, then he or they shall forfeit the full amount of said certified check as liquidated damages for the use and benefit of the proper fund of the said Harrison School Township, Miami County, Indiana.

Copies of said plans and specifications may be obtained from the office of The Elmer E. Dunlap Co., Architects, 1125 N. Buckeye St., Kokomo, Indiana, upon deposit of Twenty-five Dollars ($25.00) for each set. Said deposit will be returned to the bidders upon the safe return of the said plans and specifications to the Architects on or before the day and hour set for receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

C. D. CLINGAMAN
Trustee, Harrison School Twp.
Miami Co., Ind.
EDWARD POFFENBARGER,
JOHN H. HENSLER
RICHARD MALOTT
Advisory Board.

May 16th,23rd, 30th, 1925.

### PURDUE UNIVERSITY
### AGRICULTURAL EXPERIMENT STATION
### ANNEX ADDITION
### NOTICE TO BIDDERS

1.—Sealed proposals to the Board of Trustees of Purdue University for furnishing labor and materials for the construction of the Agricultural Experiment Station Annex Addition upon the grounds of Purdue University in West Lafayette, Indiana, in accordance with plans and specifications prepared by and on file with Walter Scholer, Architect, Lafayette, Indiana, will be received at the office of the undersigned at Purdue University up to 11 o'clock a. m., Monday, June 1, 1925, at which time the bids will be publicly opened and read.

2. Separate sealed proposals on Form 96 prescribed by the State Board of Accounts will be received for the following:

a. General Construction.
b. Heating System.
c. Plumbing System.
d. Combination Heating and Plumbing.
e. Electric Wiring System.

3.—Plans and specifications relating to any of the above work may be secured from the architect, Walter Scholer, Lafayette, Indiana.

T. MIDDLEBROOK,
Controller.

May 16, May 23rd, 1925.

### SCHOOL BUILDING
### NOTICE TO CONTRACTORS

Sealed bids will be received by the Board of Education, Petersburg, Ind., at the office of Supt. of Schools, Mr. J. B. Leas, Thornton annex building, for the erection of a new grade school and auditorium building, including general construction, heating and ventilating, plumbing and sewering and electrical work.

The estimated cost of the building including the above, is approximately $40,000.00.

Bids will be received until 8 P. M., Monday, May 18th, 1925, and then opened for consideration.

All bids must be made upon proposal blanks which have been approved; these blanks will be supplied by the Architects upon application.

Proposals shall be presented in sealed envelopes which shall be plainly marked to indicate the character of work bid on.

All bids must be accompanied by a certified check or bid bond (either personal or Security Company) for not less than three per cent (3%) of the amount of the bid submitted, made payable to the order of the "School City of Petersburg" as liquidated damages in the event that the successful bidder fails to enter into the proper contract for the work bid upon, and give the proper security or personal bond within ten days from the acceptance of such bid. Checks of unsuccessful bidders will be returned.

Each bidder shall file with his bid a non-collusion affidavit as required by law.

The Board of Education reserves the right to reject any or all bids and to take time to investigate the bids and the qualifications of the bidder.

Plans are on file in the office of the Board of Education, Petersburg, Ind., in the office of the State Board of Accounts, Indianapolis, Ind., and in the office of the Architects, Harry E. Boyle & Co., Furniture Bldg., Evansville, Ind.

Signed: BOARD OF EDUCATION.

Petersburg, Ind.

May 2nd, 9th, 16th.

## APRIL BUILDING FIGURES OF THE COUNTRY SHOW PERIOD ONE OF THE BEST IN HISTORY OF BUILDING RECORDS

### Gains Develop in All Sections

Indications are in evidence of a strong upward trend in building activities throughout the United States during the coming summer.

At no time since March, 1924, has there been such a large volume of building operations in immediate prospect, based on the official reports of plans filed and permits issued in the leading cities and towns of the country.

The magnitude of these declarations carries additional promise of a sustaining influence to general business activities by reason of the fact that the exhibit is consistently promising in all sections. Gains were confined to no region or section.

In 365 cities and towns reporting to S. W. Straus & Co., building financiers, for the month of April, there was a gain of 32 per cent as compared with April, 1924. A year ago, the April reports showed a loss of 7 per cent from April, 1923.

Although there was a loss during the first quarter of this year in these same cities, the April figures were of sufficient magnitude to develop a gain for the four months period. Thus, in volume of building plans filed and permits issued, the first four months of 1925 establish a new high record for the initial third-of-a-year period.

With the exception of March, 1924, April reports were the largest for any single month in the history of the country. It also was the first month since September, 1924, that every section of the country exhibited an increase over the corresponding period of 1924. The East, 103 cities reporting, gained 56 per cent; the Central, 116 cities, 19 per cent; the Pacific West, 79 cities, 16 per cent; the South, 67 cities, 9 per cent.

The total for the 365 cities was $457,169,969, an increase over April, 1924, of $112,073,044.

### Gains in Leading Cities

Twenty-one of the twenty-five leading cities in point of building operations showed substantial gains, making the gain for the entire group 49 per cent ahead of last April.

New York City, which for several months had been slowing down so rapidly that the gains for the rest of the country were submerged, displayed a remarkable change in tendencies. The increase over April a year ago was 113 per cent, each of the five boroughs participating in the surprising revival.

Chicago had a gain of 33 per cent and Philadelphia 11 per cent. St. Louis made a gain of more than 223 per cent. Washington, with an 86 per cent increase, held eighth position. Baltimore had a gain of 57 per cent; Seattle, 140 percent; St. Paul 199 per cent and Rochester, 115 per cent.

Yonkers, N. Y., carried off all the honors for monthly gains, exhibiting an increase of 435 per cent.

## CURRENT BUILDING MATERIAL AND LABOR SITUATIONS

### Prices Fairly Stabilized and Labor Trouble Almost Negligible

Except for marked downward fluctuations in steel, April building material prices remained fairly well sustained at levels established in March. The break in steel was characteristic of all centers and was largely due to the excessive production in the industry since the beginning of the year. In fact it is reported that during April, steel operations dropped to 77 per cent of capacity as compared with 92 per cent in March. Lumber was quoted slightly lower in both the Pittsburgh and Dallas markets and lime and plaster were down in Louisville. Other changes were mixed and isolated.

The labor situation was well stabilized, with important wage questions generally out of the way for the time being. In a number of cities long-term agreements at the former rates were negotiated. Many of these are not terminating until 1927 and 1928, which is expected to have a salutary effect on the industry. There were only a few isolated cases of labor trouble.

## MEETING OF IMPORTANCE TO BUILDING INDUSTRY TO TAKE PLACE AT BOSTON NEXT WEEK

### Jurisdictional Disputes to Be Up For Consideration

The next meeting of the National Board for Jurisdictional Awards will be held at Boston, Mass., the week beginning May 25.

The national importance of many of the cases to be heard by the Board insures a large attendance of contractors and labor leaders from all parts of the country.

A tentative schedule of the more important cases to be brought up follows:

Cutting Chases, Channels and Openings in Brick, Tile and Other Masonry.

Request for Rehearing of Dispute on Metal Trim in re Hollow Metal Doors and Trim for Elevator Enclosures.

Request for Rehearing Reinforced Concrete, Cement and Floor Construction.

Request for Rehearing of Decision on Conduo Base.

## THE DOLLAR

### A Wee Bit of Advice

You must learn not to overwork a dollar any more than you would a horse. Three per cent is a small load for it to draw; six, a safe one; when it pulls in ten for you it's likely working out West and you've got to watch to see that it doesn't buck; when it makes twenty, you own a blame good critter or a mighty foolish one, and you want to make dead sure which; but if it draws a hundred it's playing the races or something, just as hard on horses and dollars; and the first thing you won't even have a carcass to haul to the glue factory.—George Horace Lorimer.

## INDIANAPOLIS

***Nurses Home:** 5 sty. & bas. 80x112, Fall Creek Boulevard and Illinois St. Archt. D. A. Bohlen and Son, Majestic Building. Owner, St. Vincents Hospital, Sister Mary Joseph, Fall Creek Boulevard & Illinois St. Archt. receiving bids to close May 25th at noon. Brick, concrete and steel.

***Residence and (2) car garage:** $18,000.00, 2 sty. & bas., 5200 block on Central. Archt. Frank B. Hunter, 912 State Life Bldg. Owner, Everett McCoy, (Bond salesman), Fletcher American Co., Fletcher-American Bank Bldg. Archt. ready for bids. Stucco, asphalt shingle roof, (color blend), forced air heating, tile & Hardwood floors, masonry floors.

**War Memorial Building:** (bids for foundation for Building ("A"); Indianapolis. Archt. Walker and Weeks, 1900 Euclid Ave., Cleveland, Ohio. Owner, Trustees of the Indiana World War Memorial, Paul Comstock, Secy., Penn. and Mich. St., Indianapolis. Owner receiving bids to close July 21st, at 9:00 a. m. for construction of foundations for Building "A."

**Stores:** (3) $10,000.00, 1 sty. 50x55, 2174 N. Meridian. Archt. Clarence E. Hughes, 914 E. 44th. Owner, Albert E. Uhl, 807 Fletcher Trust Bldg. Owner will build and award seaprate contracts. Brick.

**Coliseum:** $300,000.00, to $500,000.00, 1 sty., 30 feet high, 160 feet wide, 270 feet long. (Seating capacity 20,000 persons.) Washington Street between Euclid Ave. and Linwood Ave. Owner, Company Organizing, c/o L. E. Williams, (Real Estate), 126 Pembroke Arcade. Tentative plans have been submitted. Owners have asked permission from City Plan Commission to build. Definite data later.

**Residence and Garage:** "Spanish architecture," 52nd and Central. Archt. not selected. Owner, William T. McLaughlin, (Insulating materials, boilers, roofing), 622 N. Liberty St. and H. W. Roll, 622 N. Liberty St. Contemplated, will probably build early fall. Will select an architect in a few weeks. Stucco.

### Contracts Awarded

***Bank Building:** $75,000.00, Wabash, Indiana. Archt. McGuire and Shook, 320 Indiana Pythian Bldg., Indianapolis. Owner, Wabash National Bank, Wabash, Ind. General contract awarded to Leslie Colvin, Continental Bank Bldg., Indianapolis. Heating and Plumbing let to Hipskind Heating and Plumbing Co., Wabash, Ind. Bank fixtures let to Aetna Cabinet Co., 321 West Maryland St., Indianapolis. Start work shortly. Brick, concrete and steel.

***Apartment Hotel (1000 rooms) Garage (250 car capacity) Stores:** $2,500,000.00, 10 sty. & bas. Fall Creek Boulevard and Meridian St. Archt. William K. Eldridge, c/o E. G. Spink Co., Medical Arts Building. Owner, E. G. Spink (Real Estate), Medical Arts Building, and George J. Marott (Retail Shoes), Washington St. Owner will build and award separate contracts. Excavating. Brick, hollow tile and reinf. concrete floors and roof construction, electric elevators, fire doors, conc. & steel stairs, comp, roof, terrazzo & tile floors, steam heat, incinerators, ranges, refrigerators, built-in-features.

***Apartment Building:** (18 apts.), 3 sty. & bas. $115,000.00, 37th and Meridian. Archt. George and Zimmerman, 501 Meyer-Kiser Bank Bldg. Owner, Meridian Plaza Apartments, Herbert L. Moody, 3370 College Ave. Awarding separate contracts. Brick work let to O. B. Ent, 2251 N. Meridian. Heating and plumbing let to Hayes Bros., 236 West Vermont St. Electric work let to C. L. Smith Electric Co., 122 S. Penn. Lumber & Millwork let to Brannum-Keene Lumber Co., all Indianapolis. Brick. Start work at once.

**Apartment Building:** (48 apts.), $100,000.00, 3 sty. & bas. 40x129x87, at 12th and Alabama Sts. Private plans. Owner, Henry Dollman, Jr., (Contractor), Merchants Bank Bldg. Plans about completed. Owner will build and award separate contracts. Brick.

**Apartment:** (12 apts., 10 car garage), $50,000.00, 2131 College. Private plans. Owner, Everett M. Schofield, State Life Building. Owner builds and awards separate contracts. Brick veneer.

**Apartment:** (8 apts.), $35,000.000, 19 West 28th. Private plans. Owner, Everett M. Schofield, State Life Bldg. Owner builds and awards separate contract. Brick veneer.

**Residence and garage:** $16,000.00, 45 Meridian Place. Owner, H. L. Simons, 5151 N. Meridian St. Owner builds and awards separate contracts. Brick veneer and frame.

**Residence and Garage:** $14,000.00, 4117 Central Ave. Owner, Katherine T. Sullivan, 4067 Central Ave. Will build by day labor. Brick veneer and frame.

**Residence and Garage:** $14,000.00, 3650 Fall Creek Boulevard. Owner, Jean R. Whitman, c/o Circle Talking Machine Shop, Monument Circle. Contract let to Louise Powell, c/o owner. Brick veneer and frame.

**Residence:** (double), $10,000.00, 4604 Washington Blvd. Owner, Frank Starner, 2158 N. Pennsylvania. Owner builds. Brick veneer.

**Residence:** $10,000.00, 2 sty. & bas., 5140 N. Pennsylvania. Owner, Henry Schoemaker, c/o contractor. General contract let to F. M. Bartholomew and Son, 4044 Central Ave. Frame and brick veneer.

***Residence:** $35,000.00 (14 rooms, 3 baths, 2 car garage), N. Illinois and 41st St. Archt. Osler & Burns, 241 N. Pennsylvania St., Indianapolis. Owner, Guy Wainwright, V. P. Diamond Chain Co. General contract let to Albert Fuller, 434 N. Emerson. Stucco, slate roof, vapor heat, incinerator. (Note corrections.)

**Residence:** (double), $10,000.00, 53rd and Park. Owner, A. S. Meng, 725 Occidental Bldg. Owner, F. M. Bartholomew and Son, 4044 Central Ave. Frame.

**Residence and Garage:** $10,000.00, 4535 N. Delaware. Owner, Katherine B. Mott, 522 Powell Place. Frame and stucco. Owner builds.

## INDIANAPOLIS BUILDING PERMITS (WEEK OF MAY 14TH TO MAY 21ST)

***Church:** $20,000.00, 2 sty. & bas. 75x181, 30 Audubon Circle. Archt. Herbert Foltz, Wild Bank Bldg. Owner, Irvington Methodist Episcopal Church, Rev. W. L. Ewing, Pastor, 5539 East Washington St. Excavating. Owner builds. Brick and stone, slate roof, steam heat.

**Stores:** $30,000.00, 2 sty. 40x125, 42 S. Capitol Archt. Vonnegut, Bohn and Mueller, 610 Indiana Trust Bldg. Owner, Guedelhoefer Realty Co., Otto Guedelhoefer, Pres., Ky. Ave. and Capitol. General contractor, J. E. McGaughey, American Central Life Bldg. Excavating. Brick.

**Residence:** $7,800.00, 5241 N. Delaware. Owner, G. D. Bray, 716 East 46th St. Owner builds. Brick veneer and frame.

**Residence:** $6,500.00, 5869 Guilford. Owner, James Brooks, at site. Frame and stucco.

**Residence:** $6,610.00, 2216 West Wash. Owner, W. G. Brown. Contract let to Geo. H. Brown, 2216 West Washington. Brick veneer and frame.

**Residence:** $6,675.00, 5036 Kenwood. Owner, Paul C. Kepler, 2902 N. Delaware. Contract let to Emmett Pierson, 2934 Kenwood. Brick veneer.

**Residence:** $5,000.00, 940 Hervey. Owner, H. C. Sohn, 1216 S. Senate Ave. Frame.

## ARCHITECTURAL PROFESSION HAS MADE GREAT PROGRESS IN THE LAST FEW YEARS

### Evidence of That Fact Attested By Marked Beauty of Designs Revealed At Big A. I. A. Exhibit At New York

No more chering and encouraging fact could be learned by a visitor to the Exposition of Architecture and the Allied Arts, of the American Institute of Architects at New York recently, than that architecture in every branch or department has made and is making progress which could never have been forseen or expected even a few years ago. Most folks have been trained by long public indifference to look for architectural excellence almost exclusively in residence and ecclesiastical buildings, —in banks occasionally, but in structures of most classes anything other than the most obviously utilitarian seemed somehow to be almost inappropriate.

**Business Appreciating Art**

No more cheering and encouraging tion roamed through the vast halls and corridors of the Grand Central Palace and viewed the photographs and sketches of what is being done in different quarters of the world, it was quickly to be seen that a marked advance is being made all along the line. After a period which has seemed endless, during which the business world was content to ignore the claims of architecture, if indeed it did not resent the very existence of those claims, the same world seems now to have made up its mind that those claims are valid and just and should be allowed, particularly since architectural merit is now seen to be an asset, and (even more particularly) since it costs little if anything more to have structures which are at least dignified and often beautiful than buildings which by their extreme ugliness excite a feeling of weariness if not of aversion. The world is so accustomed to the hideous factories which fill the environs of most cities that it was cheering to find that in Detroit a well known motor car company allowed an architect to plan a factory architecturally good; and it was more than a little encouraging to find that business in other forms is responsible for a fine publishing house in Philadelphia and a handsome brokerage office at Milford, Connecticut. A freight station would be almost the last building in which to look for anything even approximating architecture, and yet that such a structure can have architectural excellence is proved by just such at Chicago. Water towers have never been supposed to be susceptible of architectural treatment, and yet an architect has designed such a tower for the State of Massachusetts, which has dignity and character to add to its obvious usefulness to the public.

**Many Fine Buildings Shown**

Banks and insurance companies have never been wholly indifferent to architecture's claims, and appreciation which is strong was evidenced by some exceedingly fine exhibits of recently erected bank and insurance buildings.

The architects who have been responsible for much of the college, university and school work done during the last few years have accustomed folks to measure their achievements with an eye rendered critical by being trained to a high standard. And yet if one had been inclined to select any one department of architecture represented with particular splendor at the Exposition, it would have been well to have given serious consideration to that section that included buildings of an educational character. The exhibits portraying the work being done in that particular field were excellent and appealing.

As for residential work it would have been extremely difficult to have selected from so vast a number of exhibits a few for special mention since the examples submitted were so meritorious. One of the big impressions gained from a review of the residential exhibits was that recent work seems to be distinguished by simplicity and character, for the day of vast and gorgeous residences seems to have passed, and even the very rich are now living in apartments or houses which are of no very great size. But to mention a few examples one should include those sent from Philadelphia by Carl A. Ziegler and R. Brognard Okie, which are of the type they understand so well; a fine house in Connecticut by Thomas H. Ellett; an excellent brick house at Hartford from Philip L. Goodwin; a house at Brookline by Walter E. Kirby, and a most charming house in Virginia by Duncan Lee.

The high character of the work done by the architects presupposes taste and culture of an equally high order among their clients, a situation that undoubtedly will grow stronger and stronger in the future and, urged on and encouraged by the architects, should afford the profession a great opportunity draw unto itself that appreciation so long withheld.

## AROUND ARCHITECTURAL CIRCLES IN INDIANA

A handsome addition to the architectural colony of Indianapolis made its debut May 16 when Maurice Thornton and Alfred Rodecker, architects, opened their new suburban office, Suite B, 658½ Fairfield Ave. Their quarters are unique in local circles in that they are purely architectural in treatment having been designed and executed with an Italian motif which makes the office quite an artistic creation with a luring appeal for the visitor.

A new architectural firm has appeared over the horizon at Hammond. Max Wainwright, formerly connected with the practice at Chicago and more recently with the firm of A. C. Berry & Son, architects, Hammond, has severed his connection with the latter concern and opened an office of his own.

## ORGANIZATION AND CURRENT NEWS

### IMPORTANT DECISIONS BY U. S. SUPREME COURT QUITE INTERESTING

**Both Employer and Labor Score Through Reflected Impartiality**

Two cases involving questions relating to the employment of labor, which were given decisions by the United States Supreme Court recently, are of far-reaching importance. First, the Court killed the Industrial Relations Court of Kansas on the grounds that it enforces compulsory arbitration. Second, in a case started by the United States against building contractors and trade associations, charging conspiracy in restraint of trade, because of an agreement through which supplies are withheld from contractors employing union labor in San Francisco, the Court decided against the federal government. The Court held that employers in a community can have a working understanding like the one in San Francisco if it is confined to a particular state. These two decisions coming from the Supreme Court simultaneously, one favorable to labor by denying the right of a state to force arbitration in labor disputes, the other unfavorable to labor by upholding the open shop, are interesting because labor union officials in the past have frequently criticized the Supreme Court in its decisions and repeated attempts have been made to have it subordinated to the legislative branch of the government. —(Bulletin, National Building Trades Employers' Association.)

### NORMAL VOLUME OF CONSTRUCTION ACTIVITY INDICATED

**Brick Demand Not As Strong As It Was a Year Ago**

Current reports from 116 manufacturers of common brick indicate that the high pressure demand of 1924 has diminished, according to the Monthly Digest issued by the Common Brick Manufacturers' Association of America. Continuing the report says, this general summary reflects the experience of individual brick producers in all sections, except in a few areas where construction has not fallen materially from the high volume of 1924.

The most conspicuous example of the latter class is Chicago, where both the movement of brick and the orders on hand show an increase. New England also indicates a decided pickup since the report of thirty days ago. Everything indicates that there is now a normal volume of construction activity. Those who were tuned up to the super-demand of the past year are inclined to feel that there is a slump; but if compared with any normal year in the past, the present volume would show a thoroughly satisfactory condition.

### MANY COMING TO APPRECIATE WHAT GOOD MATERIALS AND CONSTRUCTION MEAN

**Cheap Houses Are Just Like Other Things That Are Cheap**

That the quality of homes is to improve year by year, as the people awaken to an appreciation of the falsity of using "cheap designs, shoddy material and flimsy fire-trap construction," is the belief of Robert H. Sexton, director of the national own-your-home exposition in New York City.

"As a matter of fact," said he, "builders may slightly reduce the purchase price by following such methods but they are not reducing costs. That which is skimped in construction must be paid out many times over in high repair bills, excess fuel consumption, general upkeep. The poorly built house soon develops faults and becomes a hazard and liability to the community as well as to its owner.

"This lowering of standards in home-building is dangerous to the art of home-building. Poor construction usually comes through a lack of understanding rather than by direct intent. We need a campaign to improve construction methods. It is highly important that good practice in home-building be worked out and presented to the home-building public, which should realize the importance of good construction in the health and happiness of homes.

**For Larger Loans**

"A better built house is a little more expensive in first cost than a shoddy built house. But they must look beyond bathroom fixtures and wall paper when buying. Financial institutions making loans on houses are in a position to raise standards by loans large enough to cover first class construction and insisting on it. The reliable builder always is for better construction and regrets to see a prospective owner-builder fall into the hands of those who offer unfair competition, and seek to cover up later by shoddy construction."

### COSTS ONE WAY OR THE OTHER

**Money Saved By Neglect to Train Youth Goes For Inefficiency Later On**

"A community must pay either for the cost of training labor or for the greater cost of inefficiency of labor, and inefficiency of labor means inevitably general industrial and commercial inefficiency," says Secretary of Commerce Hoover. "To provide such training is clearly a public responsibility. Education in general, including vocational education for the youth, is Democracy's most important business."

### NOW AND THEN IT SEEMS THAT WAY

**Satisfied But Not Contented**

It is said that there are three S's in Business standing for Sales, Service and Satisfaction, which are said also to apply to all business. They must apply to the building business like this, the Material Men make the sales, the Owner and Architect get the service, and the Contractor is usually Satisfied that he got the worst of the whole deal.—(Iowa Builder.)

### NO REAL SLACKENING IN BUILDING IN SIGHT

**Influences At Work to Hold Up the Demand For New Construction**

Production figures for April given out by the department of commerce in so far as they relate to building materials, confirm the tale of the building permits. No real slackening of construction is in sight. Here and there residential building may be slowing up, but

this is offset by new construction in other regions.

The statistics for the registration are of the country indicate that the birth rate is beginning to increase, as it was predicted would happen after immigration was further restricted. This influence is negligible now, but it indicates that those who have been betting on the small apartment may have been mistaken. It takes more housing per family, when it is figured that most families must also provide shelter for a car. If there isn't going to be any drop in babies, it is easy to see that the ratio of construction to population must rise in the future. The increased sales of lumber also remind us of the spreading out of population, which means more building. Suburban building is better reflected in lumber than in metals.

With bettered living all about, it is quite evident that much obsolete residential property will be scrapped and replaced in the next few years.—(Chicago Tribune.)

## Calumet District

### IF ONE COULD ONLY SEE AHEAD

**Opportunity Slow to Be Recognized By Most Folks**

Those who should know whereof they speak, because of the study and surveys they are continually making, assert that the Hammond of 1950 will be a mighty city—a city that will differ from the Hammond of today as much as the present city differs from the one of old when two stores and a few dwellings marked its entirety. The big point is this—there is not to our knowledge another community in the country with greater opportunities at its command, nor one that can offer to its people such sure and quick rewards. Every dollar invested, every development launched insures manifold benefits and profits. The city can not fail simply for the reason that it has wonderful geographical possibilities.

And just so as in other cities men fail to arise to the occasion, there are men in Hammond today who will be there in 1950, who will harken back to the year of 1925 and wonder why in the name of all things eternal they failed to sense the boundless opportunities that were theirs at that time. Then, again, in Hammond in 1950, there will be other men holding over from the age of 1925 who, in the parlance of the street, will be "sitting pretty" because of the faith they had in the city and its future.

There is no question but that Hammond is growing by leaps and bounds both physically and industrially and is a Land of Promise, a Land of Opportunity, for men of broad vision, men who want to go ahead. It is men of that stripe whom Hammond welcomes, the doors are always open, and it is gratifying to announce that it is such men who have come in, such men who are already in, who are pushing the city onward and upward.

### THE TERROR INVADES LAKE COUNTY

**Gunmen Rob and Kill**

The Reign of Terror of the French Revolution was cold blooded, but, how about the Reign of Terror of 1925? Never a day goes by right now that one is not confronted with accounts in some newspaper of really diabolical crimes.

Just recently Chicago gunmen, presumably, invaded Lake County and at Crown Point murdered an inoffensive cripple. He happened to be at the Half Way House on the Cedar Lake road, when the five bandits held up the place and robbed the patrons. In the get-away they killed the cripple. It was a forceful way of closing a witness' mouth and eliminating damaging testimony.

The worst of it all is that law enforcement officers seem unable to cope with the situation since bad booze and automobiles have come in for such strong play.

### ANOTHER REMEDY PROPOSED TO LIGHTEN LABOR'S LOAD

**Massachusetts Painters Propose a Panacea**

Soon they won't be working at all.

The latest along that line emanates from Massachusetts where rumor has it that the officers of the state organization of painters have under contemplation a demand upon the bosses for a ten minute rest period at the end of each hour. Such a scheme reduced to terms of time actually worked would mean that the painters would work only six hours and forty minutes a day, or thirty-five hours and 20 minutes a week, where there is a five and a half day week prevailing. In the city of Boston where painters now operate under the forty-hour week agreement it would mean that the members of that craft would work but thirty-three hours and forty minutes a week.

Why split the time off into ten minute periods? Why not make it a thirty minute on duty and thirty minutes off? such an agreement would give the men time to take a little nap, smoke a cigarette, or take a little spin in an auto in order to relax the strained and stiffened muscles that had been over-exerted by the excessive labor of the thirty minute working period.

Really things are coming to a pretty pass. Something will have to be done to lighten the enormous burden of labor that the poor overworked building craftsmen are now forced to stagger under. Unless something of an easement is effected all the painters and other building trades mechanics will be driven to an early grave. As matters are now many of them are badly afflicted with automobilitis, and if they are not given sufficient time to ride enough to counteract the dread malady there is no telling what may be the outcome. It would be a good thing to act before the worst happened and the already thining ranks of labor are further greatly decimated.

### CALUMET BUILDING PROGRESS

The general contract for a gymnasium building 70 ft. x 140 ft., on the Catholic University grounds at Hoffman and White Oak aves., Hammond, was awarded to J. Wesley Reed at $62,000.

Guy Young, Hammond, was the successful bidder on the general contract for the erection of a $9,000 bungalow for Max Wainwright at Calumet City, Illinois.

Concrete forms have been placed for the top story of the new bank building and for the third story of the new Lloyd building.

Not much in the way of new work developed during the past week, in fact, prospective building is not very brisk

E. E. COLE.

## East Chicago

### NO GLOOM OVER BUILDING PROSPECTS HERE

**Construction Operations Growing to Record Levels**

New construction work completed and placed under way at East Chicago in the first four months of 1925 will total near-

ly $2,500,000, according to building permits issued by Commissioner Henry Bainbridge.

If the next five good weather months compared in size with that of April, East Chicago will go over her former years of residential and business development by several million dollars.

The figures for the first four months of this year shows:

| | |
|---|---|
| January | $135,207 |
| February | 544,825 |
| March | 502,750 |
| April | 718,745 |
| May (for 12 days) | 112,450 |
| Total | $2,013,977 |

To the civic and commercial betterments can be added approximately $20,000,000 worth of industrial expansions in 1925. Most of the major plants in the Twin City district have programs which amount into the millions.

## EVANSVILLE

### LABOR VOTES TO ENFORCE CLOSED SHOP POLICY IN LOCAL BUILDING FIELD

**Action Outgrowth of Wage Controversy With Carpenters**

The closed shop was declared by vote at a meeting of the Building Trades council of Evansville a few days since, throwing open again the controversy recently started over the wages of union carpenters, and designed to offset the attitude of builders and contractors, who recently have hired a large percentage of non-union men.

The declaration was designated a "future policy." H. L. Messex, president of the council, would not say definitely whether the action was to apply to union men now employed on buildings where non-union men also were working.

The meeting in which the action was taken was held at the council hall. Whether the closed shop idea will take action immediately is to be decided, it was said, in another meeting to be held soon.

The action affects all union men engaged in a building trade, including carpenters, electrical workers, lathers, painters, paper hangers and plumbers.

Hereafter each job is going to be either 100 per cent union or 100 per cent non-union, labor officials said after the meeting.

In accordance with the action, any man in any building trade would be required to quit work on any building where even one non-union man was employed.

The action grows out of a demand of union carpenters, several weeks ago, it was said, for a raise from $1 to $1.15 an hour. The request was denied by builders and contractors, who however, attempted to compromize by offering $1.07½ an hour. When the carpenters refused to accept the compromise, builders and contractors declared open shop and hired non-union skilled labor.

## FT. WAYNE

### HELD HER OWN IN BUILDING WITH OTHER INDIANA, ILLINOIS AND MICHIGAN CITIES

**Ft. Wayne Stood Eighth in a List of Thirty-Five Municipalities Reporting For April**

Local building activities in Ft. Wayne, according to figures compiled recently, have given the city a good rating with other municipalities of Indiana and neighboring states, only three in her home state and four in Illinois and Michigan showing to better advantage than she did. Of the thirty-five cities of the three states making reports on building operations for April, Ft. Wayne stood eighth in the list in the volume of new work started. Chicago, Detroit, Indianapolis, Grand Rapids, Evanston, South Bend and Gary were the cities who led Ft. Wayne.

A year ago the city stood fourth in building in ratings made for the same tri-state territory, Chicago, Detroit and Indianapolis only beating her in building performance. At that time a number of large structures were erected. Now contractors are engaged in constructing the smaller type, such as residences and storerooms.

### NORTH SIDE TO HAVE A FINE SPACIOUS AUDITORIUM

**Fast Growing Section Pleased With the Prospects**

With the completion of the North Side high school on the property bordering the east bank of the St. Joseph river, north of State boulevard, the north side will be provided with a large circular auditorium which is one of the outstanding features of the building.

Charles R. Weatherhogg is rushing the plans for the magnificent north side building, and the announcement that construction work will probably be started in September is greeted with much satisfaction by the entire city and especially by the people of the fast growing northern sections of the city.

# Sealed Proposals

### SCHOOL BUILDING
### NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned Trustee and Advisory Board of Harrison School Township, Miami County, Indiana, will receive sealed bids at the office of the Trustee in the North Grove School Building, in North Grove, Miami County, Indiana, until 11 o'clock a. m., Monday, June 8th, 1925, for the erection and completion of additions and alterations to the present school building in North Grove, Indiana, all in accordance with the plans and specifications heretofore adopted therefor by the said Trustee and Advisory Board and which are now on file in the said office.

At the same time and place, separate bids will also be received for the complete installation of a new heating and ventilating system.

The estimated cost of the work to be included in said general contract is $13,000.00, and the estimated cost of the work to be included in the contract for the installation of such heating and ventilating system is $7,000.00.

All bids must be in writing on Form No. 96 as prescribed by the State Board of Accounts, delivered sealed, and must in every respect conform to the laws of the State of Indiana.

Each bid for General Construction shall be accompanied by a certified check for $1,000.00.

Each bid for Heating and Ventilating shall be accompanied by a certified check for $500.00.

The certified checks must be made payable to the Trustee of Harrison Township, Miami Co., Indiana, and will be held by him as a guarantee of good faith that the said bidder or bidders will enter into a contract and execute an acceptable bond for the full amount of his bid (said bond to meet the approval of the Trustee and Advisory Board) for the due performance thereof, if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded. Should the successful bidder fail to enter into such a contract and execute such bond, then he or they shall forfeit the full amount of said certified check as liquidated damages for the use and benefit of the proper fund of the said Harrison School Township, Miami County, Indiana.

Copies of said plans and specifications may be obtained from the office of The Elmer E. Dunlap Co., Architects, 1125 N. Buckeye St., Kokomo, Indiana, upon deposit of Twenty-five Dollars ($25.00) for each set. Said deposit will be returned to the bidders upon the safe return of the said plans and specifications to the Architects on or before the day and hour set for receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

C. D. CLINGAMAN
Trustee, Harrison School Twp.
Miami Co., Ind.
EDWARD POFFENBARGER,
JOHN H. HENSLER
RICHARD MALOTT
Advisory Board.

May 16th,23rd, 30th, 1925.

SELF-LOCK ROOSHOR ADJUSTABLE

Why waste time, labor and lumber with the old 4x4 method of shoring? You can save hundreds of dollars on every shoring job by using Rooshors.
The Rooshor is instantly adjustable from 8 to 14 ft. and more, fits any and every job, locks automatically, cannot come apart, supports heavy loads with absolute safety, weighs only 66 lbs., lasts 7 to 10 years, pays for itself quickly.
Over 400,000 in use by 700 contractors —a proven success.

Time and labor losses of shoring by hand methods more than pay for modern Rooshors

One man carries, erects and fits any Rooshor in any location instantly.

## UNITED STATES CIRCUIT COURT OF APPEALS HANDS DOWN DECISION IN METAL TRIM CASES

### Ruling Disputes Right of National Jurisdictional Awards Board and Labor to Say Who Shall Or Shall Not Do Work

The Metal trim case which has been in the Ohio Courts for over two years between Wm. O'Brien, individually and as Secretary of Local No. 65 and Vice President of the Amalgamated Sheet Metal Workers' International Alliance, et al., Appellants vs. Jos. D. Facken thal, Ancillary Receiver for the Central Metal Producers Corporation, Appellee.

The decision was handed down on May 15th, 1925. The case was heard before Circuit Judges Dennison Mack and Donahue.

This controversy is immediately a Sheet Metal Workers' Union and a Carpenters' Union, at Cleveland. The facts are fully stated by the District Court in its first opinion (278 Fed. 827). From the injunction entered upon this opinion there was an appeal; but we dismissed the appeal because the buildings, to work upon which the contest related had been finished and the appeal had become moot (284 Fed. 827). After remand, a supplemental bill was filed, and it was made to appear that there were issues still alive, particularly as to the more general rights involved. The District Judge filed a supplemental opinion, parts of which are printed herewith, again ordered an injunction, and this appeal was taken.

To recapitulate briefly: Plaintiff below, appellee here, is a factory constructor of sheet metal doors, frames, etc. He also employs workmen and installs his product in the erection of the buildings where it is used. He employs union carpenters and union sheet metal workers ... jurisdictional dispute has long existed between ... carpenters and union sheet metall workers as to which craft had the right to install sheet ... doors and frames. It is claimed that this ... was submitted by those representing the respective unions, to a building trade arbitration tribunal and decided against the carpenters. To this decision the Carpenters' Union have refused to yield, for various stated reasons.

The City of Cleveland was engaged in erecting two buildings upon each of which some sheet metal work was required which indisputably called for the employment of sheet metal workers. Upon one of these buildings plaintiff became sub-contractor for furnishing and installing metal doors and frames, and this work was in progress through his union carpenters. Thereupon the Sheet Metal Workers' Union threatened the City of Cleveland that unless it discharged plaintiff from his sub-contract, or persuaded him to discharge the carpenters and employ the other union, they would strike upon both of these buildings, and one or both of these strikes in fact followed. There being no other sheet metal workers obtainable except those who had struck, the City yielded and discharged plaintiff from his sub-contract. The injunction forbids a further continuance of this course of conduct.

Denison, Circuit Judge: The majority of the court think that the judgment shall be affirmed and, in the main, for the reasons stated by the District Judge in both opinions. Judge Mack thinks otherwise. Under these circumstances it seems sufficient to state the conclusions of the majority without elaboration.

(1) So far as the injunction may forbid, the Sheet Metal Workers' Union from inducing and procuring other crafts to strike in aid of its position, neither the practical effects of the injunction nor the facts involved are clear enough to justify consideration. We do not think that particular subject-matter is necessary to be decided.

(2) So far as the injunction forbids threats of strikes and coercion of that nature as to a building upon which plaintiff is not engaged and no carpenters are employed in the disputed work, the right to injunction has a stronger foundation than as to buildings upon which this dispute has become concrete; but the decree below can not be wholly sustained by restricting it to this situation.

(3) The sheet metal workers say that the carpenters have refused to abide by the controlling union laws; and if this is true, then so far as we can see, the carpenters have become, for this purpose and from the viewpoint of the sheet metal workers, non-union men, and the legal aspect of the controversy is just the same as if between union and non-union workmen.

(4) The right to strike and threaten to do so as a means of coercing an employer with whom the strikers have a direct controversy, and as a general right, is not questioned upon this appeal; it is the limitations upon that right which are here involved.

(5) There is not and never was any employer-employee relation between the plaintiff and the Sheet Metal Workers' Union. There was no controversy between the building owner and the union. A valid contract existed between plaintiff and the City, and the defendants compelled the City to break it; and the City doubtless became, in a sense, engaged in a joint conspiracy with the sheet metal workers to compel the plaintiff to conduct his business in a way distasteful to him. The effort of the sheet metal workers is to succeed over their immediate opponent, the carpenters' employer, by injuring and threatening to injure, third parties, the building owners, who are strangers to the controversy.

(6) While the case does not show the malicious enticement of the Hitchman cases, and while it does not present a secondary boycott in the precise aspect of the Duplex and Truax cases, we conclude that it is governed by the underlying principle of the two cases last named and that the decree below was therefore justified upon that principle.

(7) It is more than doubtful whether the Carpenters' Union was bound to submit or did submit this jurisdictional dispute to the arbitral tribunal. If not,—as the District Judge was inclined to think and as appellee forcibly argues—the questions chiefly relied on by appellant disappear from the case. At any rate, plaintiff was not bound by the arbitration, and can not be compelled to conduct his business accordingly.

The decree is affirmed. Judge Mack dissents. The specified parts of the District Court opinion follow:

"2. Defendants are, in my opinion proved to be engaged in a conspiracy, the objects of which are not lawful and the means adopted to carry it out are not lawful means. This is true for the reasons stated in my former opinion, which need not now be repeated. This conclusion is not only supported but compelled by the following cases: Loewe v Lawlor, 208 U. S. 275; Gompers v Bucks Stove and Range Co., 221 U. S. 418; Lawlor v. Loewe, 235 U. S. 522; Hitchman Coal Co. v. Mitchell, 245 U. S. 229; American Steel Foundries v. Tri-City Council, 257 U. S. 184; Truax v. Corrigan, 257 U. S. 312; United Mine Workers v. Coronado Coal Company, supra. See in addition, cases cited in my former opinion. These decisions of the United States Supreme Court define what are and what are not the lawful objects of a labor organization; what are and what are not lawful means to carry out these lawful objects; what is and is not a dispute between an employer and employees concerning terms or conditions of employment; what may and may not be done to third person in furtherance of a labor dispute between an employer and its present, past, or expectant employees in a dispute concerning such terms or conditions of employment. These cases declare it unlawful to boycott third persons in aid of either party to that labor dispute. Whatever views I may entertain to the contrary, or whatever conflicting expressions may be found in decisions of other courts, must yield to these carefully considered declarations of the United States Supreme Court.

3. Defendants' main reliance and chief justification for their conduct is that they are engaged in enforcing the award of a National Board for Jurisdictional Awards. This contention was dealt with in my former opinion so briefly and is reiterated so earnestly that some supplementary

# Indiana Society of Architects

Office of the Secretary
500 BOARD OF TRADE BUILDING
Indianapolis, Ind.

## ANNUAL MEETING PLANS STARTED

### Effort Launched to Make June Gathering of I. S. A. Unusually Attractive

Four weeks more and then the members of the Indiana Society of Architects will once more assemble for the regular annual meeting of the organization. As has always been the custom the gathering will be held at Indianapolis for the important reason that the central location of the city assures easier facilities for all members attending.

The meeting this year is scheduled for Saturday, June 27, and according to preliminary plans will consist of a noon luncheon, a business session in the afternoon, and a 6:30 p. m. dinner, to be followed by entertainment features.

Particular importance attaches to the meeting in that at it the annual election of officers will be held. As soon as the nomination committees report ballots will be printed and mailed out to members, who will be asked to mark them, and return same to the secretary in time for an official account and announcement at the meeting. Two committees to prepare nominations have been named, one by the president and the other by the board of directors. The members of these committees are: President's Ticket: A. C. Bohlen, Herbert Foltz, and Wm. C. McGuire. Director's Ticket: Warren D. Miller, Kurt Vonnegut and Merritt Harrison.

Arrangements for the day's program are still in an embryotic state, not far enough along to announce, but those in charge of such details are working along lines that promise interesting results. The members composing this committee are: Wilbur Shook, Donald Graham, Wilson B. Parker, Herman Scherrer and Merritt Harrison.

Further announcements concerning the annual meeting will be made from week to week, and with the membership thus fully posted and given plenty of time in which to plan for this event it is the hope of the officers that the members of the Society will turn out strong and aid in making the gathering a success.

## HOW DO YOU STAND?

### Arrears in Dues Means a Crippling of the Power of the I. S. A. to Function to the Best of Its Ability

Are your dues for membership in the Indiana Society of Architects paid up?

That is a suggestion from the secretary for all members to consider.

This is an important matter if you wish to be actively identified with the organization, and to participate in its deliberations.

The Indiana Society of Architects is deserving of your support, if you are a member of the profession, for it has done some mighty fine things for the practice, and through those things undeniable benefit has accrued to every architect indirectly. Through the Society the profession has been accorded a recognition by other organizations and by public officials, and has been taken into councils where in former years no architect's voice was ever raised. In cooperation with other building interests things have been achieved that have profited the building industry and reflected back upon the profession profitably.

Under the banner of the Society and through its agency the profession has been able to reach levels upon which the contracting, engineering fraternities and the labor element could be met in harmony, and problems mutual to all could be threshed out. Better relationships have been established both between the architects themselves and other elements, that go to make up the building industry. The effort put forth by the Society is not individualistic, rather is it collective in the interest of the whole profession.

There is no state architects society in the country that has been more active than that here in Indiana, nor one that has accomplished more.

Surely such a record is one of which all Indiana architects can be justly proud, and there should be a personal incentive on the part of all members to desire to have a hand in the work being done.

The dues are nominal and the funds of the organization are spent with discretion, under the supervision of the board of directors.

With the annual meeting at hand, if you are behind in your dues, why not pay up, and lend your effort to the big one being exerted to advance the profession?

Remittances for unpaid dues will be greatly appreciated by the treasurer who is getting up his annual report.

## WALLS

### Indiana Has Few of Them

"China's great wall was built to keep intruders out. What it really did was to keep its people within, and away from the progress which comes with contact with others.

"Some architects make for themselves walls which impede their thought. Within these walls they wear deep ruts of habit; one the habit of specifying the first material with which they have become familiar. They do not search and study the newer materials impartially.

"Others adopt promiscously any widely advertised material, but to find it will not stand the test of time.

"Then there is the architect with the ego. This type of man is few and far between, fortunately. One has to go through a wall to get a word with him. His is the loss. Folks don't have to bore through walls anymore in order to get to good architects."—From The Washington State Architect.

## ORGANIZATION AND CURRENT NEWS

### METAL TRIM CASE

(Continued from page 5)

observations will be made. The Amalgamated Sheet Metal Workers' International Alliance is a national, if not an international, labor organization of sheet metal workers. It is also locally organized and has local organizations or unions. One of these locals, known as No. 65, has jurisdiction within the Cleveland territory. These unions assert that the work and labor of installing and hanging interior sheet metal trim of No. 10 gauge or lighter, such as doors, door frames, window frames and transoms belong to their trade or craft; in other words, that it is a sheet metal worker's job and not a carpenter's job. The National Board for Jurisdictional Awards is an extra-legal tribunal, said to be composed of members of the American Institute of Architects, the Engineering Council, the Associated General Contractors of America, the National Association of Building Trades Employers, and the Building Trades Department of the American Federation of Labor. It is said that a board of eight members, consisting of representatives designated by these several bodies, has heard this dispute between the sheet metal workers and the carpenters and have made an award that the work in question belongs to members of the Amalgamated Sheet Metal Workers' Union, and that the members of the United Brotherhood of Carpenters and Joiners refuse to respect or abide by this award.

It is this so-called award that the defendants have combined and conspired to enforce against plaintiff. In enforcing this award, they contend that any means short of actual violence are lawful means, and that it is lawful to boycott owners or contractors who have let contracts to plaintiff and others who will not agree to employ members of the Sheet Metal Workers' Union; coerce or induce them to break contracts with plaintiff and others who will not do so; and call and induce strikes against owners and other contractors if plaintiff and others are permitted to install sheet metal trim with workers not members of the Sheet Metal Workers' Union. Needless to say that the United Brotherhood of Carpenters and Joiners' of America claim and exercise the same right whenever contractors attempt to install sheet metal trim, employing members only of the Sheet Metal Workers' Union.

Defendants' contentions involve the assertion of a number of impossible rights. If their contentions are admitted, the members of the sheet metal workers' organizations are the only persons within the United States or at least within such parts thereof as the sheet metal workers may be organized, who have the right to work or labor in installing metal trim; that their members have obtained a monopoly of this kind of work to the exclusion of all other labor ready and willing to work; and that they may exclude from working at this kind of labor not merely members of the United Brotherhood of Carpenters and Joiners but all other persons. If their contentions are sustained, then no owner or contractor wishing to have done a job calling for metal trim, has the right to employ or contract with persons ready, willing, and able to do such work in competition with members of the sheet metal workers' organizations or without their consent. The legal consequence of admitting these asserted rights is that all persons not members of the sheet metal workers' organizations are thus deprived of liberty and property without due process of law. The right of every free man to work without interference for whoever may be willing to employ him, is denied. The right of every person wishing to have done a job of work calling for sheet metal trim, is denied his lawful right to employ freely others to do that work and have it done without interference. Congress may not thus deprive persons of liberty or property without violating the Fifth Amendment to the Constitution. No State may do so without violating the Fourteenth Amendment to the Constitution. These constitutional guarantees to each and every citizen of the right to life, liberty and property; are vital, living principles, and have recently received most emphatic vindication by the United States Supreme Court in Meyer v. Nebraska, decided June 4, 1923, holding void state laws prohibiting any one from teaching German to children under ten years of age; and in Wolff Packing Co. v. Court of Industrial Relations of Kansas, decided June 11, 1923, holding void certain provisions of the Kansas law creating its court of industrial relations.

Should we admit, however, that it is lawful to combine and conspire to enforce a monopolistic award of this nature, defendants' combination must nevertheless be denounced because the means resorted to in its enforcement are unlawful. Briefly stated, these means are efforts to induce owners and principal contractors to break their contracts with plaintiff; efforts to induce owners and principal contractors to refuse to perform contracts lawfully entered into with plaintiff; coercive efforts to compel plaintiff to discharge employees satisfactory to it with whom it has established contract relations, which efforts are nonetheless illegal even though such employment is at the will of both parties. The coercive means used are threats and intimidation against plaintiff and owners and principal contractors with whom it had valid and subsisting contracts; actual and threatened strikes of workmen employed by the owners, principal contractors, or other contractors, on the same or other jobs; indeed, the coercion and intimidation has extended even to the creation of a reasonable fear or apprehension that strikes in other building trades than the sheet metal working line would or might be called if plaintiff continued to employ union carpenters or if owners and principal contractors refused to break their contracts with plaintiff. As already said, these methods are unlawful. They are not means used in furtherance of the legitimate objects of a labor organization in a labor dispute between an employer and employees concerning terms and conditions of employment. These acts are directed towards third persons and are property, classifiable as secondary boycotts. Even if it be admitted that peaceable requests or persuasion might be used to induce plaintiff to discharge its union carpenters or to induce owners and principal contractors not to let contracts to plaintiff because of plaintiff's unwillingness to employ only members of the Sheet Metal Workers' Union, it is never lawful to induce or to attempt to induce peaceably or by persuasion, much less by threats, coercion the calling of strikes, and the starting of boycotts, one to break an existing contract with another. Whenever this is the object of the conspiracy, it is always held to be an illegal conspiracy, and all interference to prevent its performance, with knowledge of its existence, is unlawful.

The utter obsence of any legal basis to support defendants' contention will, I think, be realized even by them if the situation were reversed. Let us assume that the Congress of the United States, or the legislature of the State of Ohio should pass acts that all sheet metal trim should be done only by members of the United Brotherhood of Carpenters and Joiners of America; that such work should not belong to or be done by members of the Sheet Metal Workers' Union, or by any other labor or group of laborers, organized or unorganized; that no owner or contractor desiring this kind of work to be done, should or could hire any one so to do not a member of said United Brotherhood. This is the converse of the rights asserted by defendants. Any such law would be promptly declared void by any tribunal worthy to be called a court, as depriving men of the right of liberty and property without due process of law, in violation of the Fifth and Fourteenth Amendments to the Constitution. What Congress or the legislature may not do directly, no group of labor organizations nor any extra-legal National Board for Jurisdictional Awards may do indirectly. The asserted rights and the adopted means are a step in advance of any ever heretofore asserted by a labor organization.

If defendants may assert these rights and combine to enforce them, so likewise may the employers. That aspect of the situation has been so well summed up by Circuit Judge Ward in Irving v. Joint District Council, 180 Fed. 896, that I adopt his statement as my own. At page 900 he says: "The right of workingmen to unite for their own protection is undoubted, and so is there right to strike peaceably because of grievances; but their right to combine for the purpose of calling out the workmen of other employers who have no grievances, or to threaten owners, builders, and architects that their contracts will be held up if they or any of their sub-contractors use the complainants' trim, is quite another affair. To take the converse of the proposition: Will the defendants admit that employers may combine to prevent any employer from using union labor. May the employers agree not to sell or to contract with any one who deals with an employer who uses union labor? Either of these propositions is destructive to the right of free men to labor for or to employ the labor of any one the laborer or the employer wishes. See the language of Justice Harlan in Adair v. United States, 208 U. S. 161, 174, 28 Sup. Ct. 277, 52 L. Ed. 436. If the struggle is persisted in between labor and capital to estab-

lish a contrary view utimately either the workmen or the employers will be reduced to a condition of involuntary servitude."

## STANDARD GRADE OF STEEL FOR CONCRETE REINFORCEMENT

### Many Years Tests Suggest the Above

It is an interesting fact that, in the early days of reinforced concrete construction, the thought was held that by introducing steel bars, to resist the tensile stresses, that concrete was thereby made more elastic. In other words, it could be stretched to a much greater degree without cracking than if the steel were not present. This theory led to the conclusion that the greater the strength of the steel, the more the concrete could be stretched without producing cracks.

Later developments proved the fallacy of this theory, and the reason is not difficult to understand. In the first place, the presence of the steel does not change the physical properties of the concrete and, secondly, high strength steel stretches the same amount under a given load as steel of low strength, as the modulus of elasticity is practically a constant for all grades of steel.

With this in mind, it should be the purpose of the designer to seek a grade of steel for his reinforcement that will yield all of the strength that is necessary, consistent with dependability and uniformity. Turning to the recent report of the Joint Committee on Standard Specifications for Concrete and Reinforced Concrete, which Committee is composed of representatives from five of the leading technical societies of the United States, it is found that the highest unit stress recommended for reinforcing steel is 18,000 pounds per square inch.

This stress is permissible for intermediate and hard grade new billet steel bars and for rail steel bars, but the Committee recommends as preferred material for reinforcement that meeting the requirements of the Standard Specifications for Billet Steel Concrete Reinforcement Bars of intermediate grade, made by the open hearth process. The standard referred to being that of the American Society for Testing Materials, Serial Designation A-15-14.

The Joint Committee spent many years in investigation and preparation of their report and a recommendation expressed therein may well receive careful consideration on the part of all users of reinforced concrete.

On the question of the relative reliability of new billet steel as compared with that of rail steel a bulletin published by the University of Wisconsin entitled "Comparative Tests of New Billet Steel and Re-rolled Steel Reinforcing Bars" is of interest.

From the standpoint of ductility the tests showed that new billet steel met this requirement satisfactorily, while in the re-rolled bars 42½% failed to pass this test.

The report further shows that the cold bending of new billet bars did not diminish their strength. For the re-rolled bars there was a loss in strength ranging from 14% to 46%. In the standard bend test 47% of the re-rolled bars failed to pass and it appears that re-rolled bars become more unreliable in this respect as they increase in size.

# Calumet District

## AS SEEM AT A DISTANCE

### Gary Turned Into a "No-Man's-Land" By Building Fracas

The contractors at Gary rather than submit to being whip-sawed about whenever certain elements took a notion to upset wage conditions accepted the challenge hurled at them recently and just closed up shop for the time being.

As things stand now there is a big strike on in the building field on the part of craftsmen and the employers are just sitting tight and waiting developments. From the sidelines the members of the contractors association appear to have all the best of the argument to date, for the organization has ninety percent of the contractors and sub contractors on its side. The ninety percent rather than muddle along with a few disgruntled crafts trying to impede operations just shut down the whole works.

In the plumbing field one boss who refused to join the Master Plumbers Association in its stand against increased wages finally had a change of heart, swung into line, paid off his men, and ceased operations temporarily until the issue is settled.

There were a few builders who were willing to go it alone but they find themselves up against it now since the material, supply and lumber dealers have shut down too and refuse to deliver during the strike. These dealers are with the contractor's association, heart and soul believing the wage stand necessary to the future progress of Gary's building activities.

The association has not been idle by any means and has gone on perfecting its organization fences. Many building trades employers who were not interested heretofore have joined up with the bosses since the plumbers by their action started the strike ball rolling.

The word is out that the Plasterers International officers refuse to sanction a wage demand over $12.00 per day a condition which leaves the fight up to the local. Then, too, rumor has it, that the union plumbers now are desirous of arbitrating the wage question, something they refused to do absolutely originally. The contractors are in no mood to open up any such negotiations now.

There is no doubt but that the Gary building trades employers are in closer relationship at this time than ever before, and all they have to do is to sit tight to win. Word is being bandied about by the unions that the contractors are weakening but such is not the case as they are backed up solidly by the civic organizations and financial interests who are eager to see building costs held within reason and are opposed to further wage advances.

## INDUSTRIAL EXPANSION ATTRACTS ATTENTION OF OUTSIDERS

### Millions Going Into New Mills

The Calumet region is beginning to arouse the wonder of Chicago. A summary of the operations now going on is given in the following article in the Chicago Journal of Commerce:

"Building in Hammond this year is expected to reach close to the $10,000,000 mark, as already $5,000,000 of major construction has been started. The larger projects include a nine-story First National bank building costing $1,000,000, an eight-story Lloyd building costing $800,000, a $1,650,000 motion picture house, a St. Margaret's Hospital addition costing $600,000, a $250,000 Northern Indiana Gas and Electric Company building, a $110,000 Straube Piano Company addition, and $150,000 Melton apartments.

New construction in the first four months of 1925 in East Chicago totals $2,500,000, according to building permits issued by Commissioner Henry Bainbridge, in addition to approximately $20,000,000 for industrial expansion. The

permit total for January was $139,207, for February $544,825, for March $502,750, for April $718,745, and for 12 days in May was $112,450.

Preparations for a complete unit of tin mills by the Youngstown Sheet & Tube Works in Indiana Harbor has been started.

Indiana Harbor builders are spending several millions of dollars for new housing to provide for the increased population expected because of the $18,000,000 industrial development in the district.

A group of real estate firms of the city are to spend $1,000,000 for erection of 100 two-story brick flat structures and as many more are to be erected by individuals.

The Inland Steel Company has announced a new subdivision for residential purposes to be opened this summer, along Cline avenue and Guthrie street. Lots will be sold with the stipulation that buyers build within six months. Housing restrictions are provided.

Inland Steel has an $8,000,000 program, Universal Portland Cement $3,000,000 and may make an additional $7,000,000 appropriation, and the Youngstown Steel & Tube Company $5,000,000.

## East Chicago

### TO IMPROVE SHIP CANAL

**City Interested in Project Sponsored by the Government**

Major Rufus Putnam, government engineer in charge of the Chicago district, has advised Secretary H. R. Packard of the East Chicago Chamber of Commerce, that dredging will begin on the Indiana Harbor ship canal within the next ten days.

Bids on the contract, he states, are being advertised and will be returnable the first part of June. The project being proposed is to deepen the channel to 20 feet, the governments requirements for navigatable streams.

## GARY

### GENERAL CONTRACTORS LEND THEIR SUPPORT TO THE MASTER PLUMBERS

**Building Wage Battle Grows To Large Proportions**

When journeymen plumbers and the master plumbers failed to reach an agreement at a lengthy meeting a few days ago the city-wide building lockout took on a new force, this in Gary, more than 120 hours after members of the Gary General Contractor's Association forced other craftsmen off the job last Monday morning when 2,000 or more workmen were informed that there was no work.

Members of the General Contractor's Association also held a meeting and when it adjourned they were still just as firm in their decision to "stand pat" as they were when they announced that they would get behind the master plumbers and assist them in their fight to force the plumbers to return to work at the original wage scale of $12 for an 8 hour day.

## FT. WAYNE

### ARCHITECTURAL AND CONTRACTURAL EFFORTS APPRECIATED

**New Shrine Temple Highly Praised**

The front elevation of the magnificent Shrine Temple on West Berry street has attracted much attention because of its loftiness and the unique oriental suggestion of its entrance. The manner in which the contractors, Max Irmscher & Sons, have followed religiously the design of Architect Guy Mahurin in the brick work has also excited much attention and will cause Fort Wayne to be widely advertised through this structure to show what can be done in the fine art of bricklaying.

A prominent brick manufacture recently wrote to the architect as follows regarding this latest handsome structural addition to the city:

"For the first time I saw yesterday the Shrine building in Fort Wayne, and it is only because my time was very limited that I was unable to call on you and express my admiration of this truly wonderful piece of brick-work.

"It is indeed gratifying to see a brick product accorded the treatment which you have given it in this building. I can appreciate the work involved in detailing this brick-work, but the result you have obtained is well worth it, as I have seen nothing anyplace, which could favorably compare with the north front of this building.

"I wish to thank you, in the name of the brick face industry, for this beautiful example of the detailing, especially so, as you have secured this by using only standard sizes."

# Sealed Proposals

### SCHOOL BUILDING
### NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned Trustee and Advisory Board of Harrison School Township, Miami County, Indiana, will receive sealed bids at the office of the Trustee in the North Grove School Building, in North Grove, Miami County, Indiana, until 11 o'clock a. m., Monday, June 15th, 1925, for the erection and completion of additions and alterations to the present school building in North Grove, Indiana, all in accordance with the plans and specifications heretofore adopted therefor by the said Trustee and Advisory Board and which are now on file in the said office.

At the same time and place, separate bids will also be received for the complete installation of a new heating and ventilating system.

The estimated cost of the work to be included in said general contract is $13,000.00, and the estimated cost of the work to be included in the contract for the installation of such heating and ventilating system is $7,000.00.

All bids must be in writing on Form No. 96 as prescribed by the State Board of Accounts, delivered sealed, and must in every respect conform to the laws of the State of Indiana.

Each bid for General Construction shall be accompanied by a certified check for $1,000.00.

Each bid for Heating and Ventilating shall be accompanied by a certified check for $500.00.

The certified checks must be made payable to the Trustee of Harrison Township, Miami Co., Indiana, and will be held by him as a guarantee of good faith that the said bidder or bidders will enter into a contract and execute an acceptable bond for the full amount of his bid (said bond to meet the approval of the Trustee and Advisory Board) for the due performance thereof, if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded. Should the successful bidder fail to enter into such a contract and execute such bond, then he or they shall forfeit the full amount of said certified check as liquidated damages for the use and benefit of the proper fund of the said Harrison School Township, Miami County, Indiana.

Copies of said plans and specifications may be obtained from the office of The Elmer E. Dunlap Co., Architects, 1125 N. Buckeye St., Kokomo, Indiana, upon deposit of Twenty-five Dollars ($25.00) for each set. Said deposit will be returned to the bidders upon the safe return of the said plans and specifications to the Architects on or before the day and hour set for receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

C. D. CLINGAMAN
Trustee, Harrison School Twp.
Miami Co., Ind.
EDWARD POFFENBARGER,
JOHN H. HENSLER
RICHARD MALOTT
Advisory Board.

May 16th,23rd, 30th, 1925.

### HIGH TENSION LABORATORY, ELECTRICAL ENGINEERING BUILDING
### NOTICE TO BIDDERS

1. Sealed proposals to the Board of Trustees of Purdue University for furnishing labor and materials for the construction of the High Tension Laboratory, Electrical Engineering Building, upon the grounds of Purdue University in West Lafayette, Indiana, in accordance with plans and specifications prepared by and on file with Nicol, Scholer and Hoffman, Architects, Lafayette, Indiana, will be received at the office of the undersigned at Purdue University up to eleven o'clock a. m., Saturday, June 6, 1925, at which time the bids will be publicly opened and read.

2. Separate sealed proposals on Form 96 prescribed by the State Board of Accounts will be received for the following:

   a. General Construction.
   b. Heating and Plumbing.
   c. Electric Wiring.

3. Plans and specifications relating to any of the above work may be secured from the architects, Nicol, Scholer and Hoffman, Lafayette, Indiana.

W. T. Middlebrook,
Controller.

May 23d, 30th, 1925.

### INDIANAPOLIS

**Bank and Office Building:** Miami, Fla. Bank, 2 floors & basement of 17 sty. 45x140. Archt. George and Zimmerman, Meyer-Kiser Bank Bldg., Indianapolis. Owner, Meyer-Kiser Bank, 128 East Washington St., Indianapolis. Now taking bids on electrical work and special equipment, 1X telephones, autocall system, telloautograph system, burglar alarm, annunciator and automatic clock system.

**Residence and Garage:** 2 sty. 30x70. Archt. Frederick Wallick, Hume Mansur Bldg. Owner, Harry Goldstein, c/o Goldstein Bros. (Department Store) Washington and Delaware Sts. Plans in progress. Ready for bids shortly. Brick veneer over frame, stone trim.

***Creamery Plant:** $60,000.00 for building, $65,000.00 for equipment, 2 sty., 68x110, West Ohio and Toledo Sts. Owner, The Sugar Creek Creamery Co., Danville, Illinois, and 337 West New York St., Indianapolis. Frank Leggett, Indianapolis manager). The Clark Construction Co., Danville Ill. Bids rejected, project inabeyance temporarily. Reinforced concrete, steel sash, comp. roof, white enamel brick, 100 H. P. boiler, churns, cream vats, a three (3) ton refrigerator and special machinery.

***Cold Storage Building:** $15,000.00, 1 sty., 60x120, Kokomo, Indiana. Archt. H. Ziegler Dietz, State Savings and Trust Bldg., Indianapolis. Owner, Mike Mascari (Fruits), Jefferson and Penna. R. R. Kokomo, Ind. Plans completed, ready for bids shortly. Brick, cold storage doors, comp. roof, refrigeration, cork insulation. tanks.

***Nurses Home:** 5 sty. & bas., 120x160, "Fall Creek Boulevard and Illinois St." Archt. D. A. Bohlen and Son, Majestic Building. Owner, St. Vincent's Hospital, Fall Creek Boulevard and Illinois St. Bids in under advisement, will award contract next week. Brick, reinforced concrete and steel, fireproof construction.

***Paint Manufacturing Plant:** 4 sty., 100x200, 15th and Nickle Plate RR. Archt. Bass, Knowlton & Co., 312 N. Meridian. Owner, Ed. D. Logsdon, c/o Knox Consolidated Coal Co., 817 Traction Terminal Bldg. Lessee of entire building, The A. Burdsall Co., Georgia and Capitol. Plans in progress. Plans ready for bids in 60 days. Reinf. concrete and steel, steel sash, elevators, comp. roof, steam heat.

***Motor Bus Garage:** $200,000.00, 4 sty. & bas., West Maryland. Archt. Vonnegut, Bohn and Mueller, 610 Indiana Trust Bldg. Owner, Red Ball Transit Co., L. E. Hiner, Pres., Merchants Bank Bldg. Plans about completed. Ready for bids in a few days. Brick, concrete and steel, steel sash, comp. roof, steam heat, concrete ramp.

***Residence:** $15,000.00, 2 sty. & bas., Plainfield, Indiana. Archt. Allen and Garriott, National City Bank Bldg., Indianapolis. Owner, Fred Hobbs, Plainfield, Indiana. Archt. revising plans. Owner will build by day labor. Mr. Rushton, c/o owner. Will superintend construction. Brick veneer, slate roof, tile kitchen, bath and sun porch, incinerator, auto refrigeration, kerosine water heater, water softener, septic tank, hot air heat, oil burner.

***Church:** $65,000.00, 1 sty. & bas., 60x120. Archt. George V. Bedell, Aetna Trust Bldg. Owner, Englewood Christian Church, Rev. Otto A. Trinkle, 10 N. Rural St. Project temporarily inabeyance, until owners are able to arrange finances. Brick, stone.

**Church:** (colored), 1 sty. & bas., 25th and Sangster. Private plans. Owner, Mt. Lebanon Missionary Baptist Church, 2560 Caroline Ave., Rev. R. Gregory, Pastor, 2560 Caroline Ave. Probably brick. Sketches.

**Store:** 511 East 40th. Owner, Willard D. Peck, 511 East 40th St. Start work soon. Brick.

***Parochial School and Community House:** $20,000.00, 1 sty. & bas., 40x80, 11th and Temple. Archt. Fichter and Brooker, Metropolitan Bldg., Akron, O. Owner, St. Peters Evangelical Church, Henry C. Geiger, Trustee, 1728 East 12th St. Plans in progress. Ready for bids soon. Brick, stone trim.

#### Contracts Awarded

***Stores:** (2) $8,000.00, 1 sty., 40x40, "English Type." Archt. Thornton and Rodecker, College and Fairfield. Owner, Thomas C. Hood, (occulist), 1008 Hume-Mansur Bldg. General contract let to M. M. Andrews, Peoples Bank Bldg. Brick, Mill construction.

***Stores and Offices:** $14,000.00, 2 sty. Batchelder and Scales, Board of Trade Bldg. Owner, Hyman Unger, 2208 N. Talbott. General contract let to A. Greenspan, 708 S. West St. Brick.

**Residence and Garage:** $10,000.00, 310 Buckingham Drive. Owner, George A. Kirkwood, 147 West Pratt St., Apt. No. 4. General contract let to Charles G. Cones, 3518 N. Illinois St. Frame.

## THAT ANNUAL MEETING—WHAT IT MEANS

### A Real Opportunity For the Architectural Profession in Indiana

How about attending the annual meeting of the Indiana Society of Architects at Indianapolis, Saturday, June 27th?

If you are an architect you undoubtedly are proud of your profession and the fact that you are numbered in its ranks, for it is one of the oldest of them all and has given to the world shelter, comfort and art. As a member of the profession you owe to it everything you have to offer for its advancement which, in turn, means your advancement. One of the greatest avenues to that desired progress is thru the channel of the Indiana Society of Architects, the original and only architect's organization in the state that has continuously sponsored better business relationships, co-operation, and constructive policies in the building industry field, this in addition to effecting closer personal contact between the members of the profession in Indiana.

Those who have attended the regular meetings of the Society realize the opportunity that is offered for a wider acquaintanceship, and acquaintanceship means better understandings. To assemble thus brings together architects, contemporaries in the same field of endeavor, men who talk the same language, think similar thoughts, are traveling the same direction, are looking for the same answers to the same problems. It is an opportunity such as is offered to comparatively few architects in other states and it is one the Indiana architects should be loath to pass up.

The records have been closed on what will go down in history as one of the most trying periods in the life of the building industry, reverses and disappointments for all, architects, contractors, material men, et al. Those vicissitudes are all behind now, readjustments have been effected and promise looms for the 1925 building season which is at hand. A little hob-nobbing, an interchange of ideas, a projecting of progressive constructive thought at this time may do a great deal of good, it can do no harm. To be there will be to look ahead and it is not improbable that one will carry back home a better feeling for his profession, for his fellow architects.

Make up your mind to attend the annual meeting to receive the benefits that an interchange of thoughts of architects from all over the state will bring forth; to do your best to encourage the zealousness that has gripped the Indiana Society of Architects thru the years of existence.

Your presence will show to those of the organization that you appreciate what has been done and is being done for you and your profession. To attend means that you are willing to meet your moral obligation to the profession and that you not only belong to it but are a part of it.

## HELPS ALL AROUND

### Benefits Apparent At Every Turn

Accident prevention effort in woodworking plants, according to E. R. Maule, general manager of the Hammond Lumber Company, has convinced him more than ever before of the benefits to be derived from organized safety. "These benefits are concealed," he said, "and include a saving in raw materials, reduced overhead, decreased labor turnover, better production—both in quality and quantity, happier workers, friendliness between foremen, and a greater appreciation on the part of everyone for the welfare of the other fellow."

## BUILDING CONSTRUCTION COSTS SHOW STABILITY STAGE REACHED

### Now Firm and Steady

A chart showing average construction costs for the past 10 years has recently been issued by the Associated General Contractors of America. An interesting feature of the chart is that it unquestionably shows the increasing stability which has been developing in the last two years.

Taking the 1913 level as 100, there was a rapid increase of cost to the peak of nearly 250 in 1920. Costs then began to decline and reached the level of 185 in 1922. This decline was followed by a slight increase and for the past two years costs have remained stable around the 200 mark.

## ISN'T THAT FINE!

### But How About the Fellow Who Got in Front of An Auto While Looking Back?

"Fashion in specifying short skirts and bobbed hair has helped to cut down accidents in industry," said a big mill owner recently. "Long skirts and long hair catching on moving machinery have caused many women operators to be injured."

# Build with the Builders

"The builders . . . . . are insuring their liability in their own company, a trade mutual---a company that has enviably succeeded in every factor involved in carrying out principles of compensation insurance. This company is the

## Builders & Manufacturers Mutual Casualty Company
of CHICAGO

It is a company operating solely in the building industry, insuring only the compensation and public liability of its members, and furnishes such insurance at a remarkably low cost."

ORGANIZATION AND CURRENT NEWS

## THE UNSKILLED, INCOMPETENT CONTRACTOR, AGAIN

### His Elimination a Matter That Rests Largely Within the Province of the Architect

One of the many pertinent questions discussed by building contractors among themselves is the question of eliminating the unscrupulous and unskilled bidder. Whether he be one or the other or both his presence is always a matter of concern to the established contractors who are called upon to meet him on the field of competition. It is needless to add that these contractors believe that his admission to bidding is a rank injustice to those who have consistently bid and built buildings of quality.

Many contractors feel that the burden of eliminating this feature of the business is entirely in the hands of the architects and that if they will but have the courage of their convictions, this problem can be greatly minimized.

A western architect, in referring to the relations of architect and contractor, expressed himself on the problem in this manner:

"If I were asked to cite the qualifications which a man must have to become a successful architect, I would place among the first the requirement that he must be a man with sufficient courage of his convictions to demand from the outset from his clients the consideration only of the most reliable and competent contractors in requesting bids on any given piece of work.

"The average client on entering the architect's office believes that the architect who is capable of preparing complete plans and specifications can produce the same satisfactory building, no matter who the contractor may be. This mistaken viewpoint has resulted in innumerable poorly constructed buildings, and as a result a failure on the part of many architects to secure public confidence.

"When one points out the necessity for careful consideration of the most reliable contractors in securing any bids, the owner immediately argues that this is not necessary as long as he is employing his architect to superintend the structure.

"Any architect who claims that he can secure satisfactory results for a client from contractors that are either inexperienced or unreliable is simply lying to himself or to his clients. The inexperienced or unreliable contractor who bids too low on any particular piece of work will in nine cases out of ten simply furnish, if carefully supervised, work in proportion to his bid and no more. The architect should point out to his client that he in his turn would not purchase large quantities of material from unknown or possibly unreliable sources in his own particular business; therefore why should he ask the architect to do this very thing for him as his agent?

"I believe that it is up to the architects to impress upon their clients the fact that in securing bids they, as architects, hold no magic wand to produce something for nothing out of a good set of plans and specifications on which too low a figure has been placed by the contractor, who often submits a tempting but meaningless estimate.

"The average business man of today knows little of the real principles underlying a successful building operation, but I am surprised to see how many men are coming more and more to the realization that it pays to employ only contractors of the highest standing and it is up to the architects to help spread this propaganda.

"As an architect, I would suggest to the contractors that they on their part expend all their energy upon producing the best possible results in the work they have at hand, rather than dissipate this energy in an effort to secure some other "big job," and I sincerely trust that the architects of the country may quickly come to the realization that they, in their turn, must fearlessly point out to the owner a fact which they know to be true, namely, that a building cannot be any better than the contractors they employ.

"Finally, it is my opinion that if the architects and contractors follow this advice neither will ever have to give a moment's thought to the future, as the amount of work on hand will be as much as they are able to possibly handle.

"Failures on the part of architects to carry thru building operations with success are due in nine cases out of ten to the fact that the architect has employed for his client a contractor not fitted or able to carry out the building operation in question.

"The older a community grows the more will these facts become apparent unless the architects exert an influence to weed out the shyster, careless and incompetent builders. As long as present conditions exist the responsible contractors are powerless to escape unfair competition, the owners must run a big chance and even architects are not free from the shadow of the menace.—(Iowa Builder.)

## A TREMENDOUS WASTE THAT CAN BE ELIMINATED EASILY BY EXERCISING A LITTLE CARE

### Improperly Addressed Mail Costs the Government Over a Million and a Half Dollars Annually

While it is generally accepted that this is not the age of miracles, nevertheless, there are thousands of patrons of the United States Mails who take it for granted that Uncle Sam has many wonder-workers on his pay roll.

The very fact that there are wizards in the employe of the Post Office Department—men and women who are uncanny, to say the least, in deciphering illegible hand-writing—has caused no end of trouble and expense to the government as well as to the tax-payer, along with inconvenience in the receipt and delivery of mail matter.

Yet, with all this expert handling and careful study of hand-writing on the part of postal clerks the annual revenue from dead mail matter received by the government amounts to approximately $300,000.

Last year, the Dead Letter Office received $120,000 from the sale of orphaned packages which could neither be forwarded to the addressees nor returned to the senders because of inadequate addresses. The same office turned into the United States Treasury $55,-

523.96 in cash removed from misdirected letters or found loose in the mails.

Postage stamps were taken from letters or found loose in the mails having a value of $12,165.67, almost double the entire revenue of the postal service in 1789.

Three-cent fees collected for the return to senders of letters which could not be delivered totaled $92,007.54.

But this is not half the story. Checks, drafts and money orders, whose owners could not be located, and amounting to $3,546,542.54 finally found a resting place in the Dead Letter Office.

For want of correct or complete addresses 21,000,000 letters were deposited in the Dead Letter Office, not to speak of 800,000 parcels which had been improperly addressed or wrapped.

Strange to say, this depositing of letters and packages in the mails with incomplete, inadequate or incorrect addresses and wrapping comes, in a large majority of cases, from those patrons who are the most liberal contributors to this branch of the United States government.

It has been estimated by postal officials that 200,000,000 pieces of mail are given "directory service" every year, which means that employees must take time from the regular handling and dispatching of mail in the endeavor to provide correct addresses for this huge volume of misdirected matter. In New York City alone, the cost of this service approximates $500 every day in the year and the total amount through the country is stupendous.

While the revenue from the Dead Letter Office is sufficient to keep that branch of the postal service functioning it is not nearly enough to pay the annual toll for support of the "NIXIE."

A "NIXIE" is a letter or parcel so improperly addressed that it can neither be delivered to the addressee nor returned to the sender without special treatment. This special treatment costs the Post Office Department or the taxpayer in the final analysis, approximately $1,740,000 every year.

In order to lift this tremendous burden from the shoulders of the Post Office Department and on the pocketbook of the American people, the first week in June has been set aside by Postmaster General New as "Better Mailing Week." An active nation-wide campaign will be conducted during that period for the purpose of impressing on the mailer the necessity from every viewpoint of using more care in the addressing of his mail, not only letters but parcels as well.

## EASTERN CITY REPORTS FAVORABLY ON APPRENTICE TRAINING VENTURE

### Four Building Trades Courses in Operation

Boston has gone officially into the building trades apprentice training and the scheme has progressed encouragingly. The success of the venture is attributable to the co-operation that has been exercised by the contractors, labor unions and public school authorities.

Courses in carpentry, bricklaying, electrical work, and tile setting are already under way, each of which is under the direct supervision of a committee composed of three contractors and three mechanics.

The Boston Plan differs from that employed in many other cities in that an apprentice is not indentured to one particular contractor, but to the craft. Every candidate for admission to a class must apply to the craft committee of the trade he has chosen, for a consideration of his general fitness. If he seems a suitable applicant he enters a probationary period which covers the first six months of his employment. Another feature of the Boston Plan is job rotation under which an apprentice during his four year term gets practical experience on every conceivable job incident to the craft he has chosen.

## STOOD FOURTH IN MATTER OF WASTE

### Construction Industry Should Show Greater Efficiency Thru Standardization of Building Materials

"Tomorrow's profits must come from today's wastes," declared R. M. Hudson, chief of the Division of Simplified Practice, U. S. Department of Commerce, before the New Jersey Building Congress. "When the Hoover Committee on the elimination of waste in industry made an expert survey of six of our major industries, it found that the building industry stood in fourth place, with 53 per cent waste, while 34 per cent was chargeable to management. One of the major causes is lack of simplification and standardization in materials, methods, machinery and so on." The Division of Simplified Practice has already made a big contribution to construction economy through the elimination of excess sizes and dimensions of building materials. There have been eliminated 60 per cent of the variety in finished sizes of soft lumber; 81 per cent of the variety in metal lath; 98 per cent of the variety in brick sizes; 47 per cent in hollow tile, and 51 per cent in roofing slate.

## SURROUND YOUR JOBS AND THE BUILDING INDUSTRY WITH SAFETY PRECAUTIONS

### Such Action By Contractors Will Pay Real Returns

"Clean up, rail up, and cover up," has been suggested as a slogan for general contractors in an effort to insure greater safety on their construction operations. The slogan applies particularly to projecting nails unprotected floor and wall openings and scaffolds.

It has also been strongly recommended that first-aid equipment, safety inspections, and safety bulletins or posters be used in connection with each job.

Temporary unemployment of workers, it is asserted, is indirectly responsible for many accidents and every precaution should be taken to eliminate fluctuations in the building industry.

# Calumet District

## THREAT OF TROUBLE IN OUR NEIGHBORING TERRITORY

### Menace Lurks At Chicago

The Building Trades Council of Chicago are threatening to call a city wide strike June 1st in an effort to make Chicago a closed shop in the building trades—and put out of business the Citizens Committee and the contractors now doing business under the Landis Award.

It would not be surprising if such a move was made. The probability is that such procedure, instead of making Chicago a closed shop city, would make it an open shop city. It seems the contractors now doing business in conjunction with the Citizens Committee are not in favor of returning to the conditions that prevailed before the Citizens Committee to enforce the Landis Award was formed. The doing away with the Citizens Committee and the return to the closed shop would offer opportunities for a return to the old conditions of

graft, strikes, intimidation and all the ills that prevailed before the committee was brought into action. Other business interests that would be offected by the move are not in favor of returning to the old conditions, so, the Unions had better be careful or they might start something that they would not be able to finish.

### CALUMET BUILDING PROGRESS

Max R. Wainwright, architect, and J. Roy Allen, associate architect, have let the contract for the Carl Nelson residence, two story, brick and stone trim, on Moraine Ave., Kenwood, to Chas. Kanard for 20,000. They also awarded the contract for a two-story brick residence and garage for Walter Meyen, in South View, to F. C. Rowley for $20,000. The same architects are preparing plans for Julus Meyen for a two-story brick residence and garage in South View, Hammond.

Work is progressing rapidly on the bank building, Lloyd building, the amusement park. The Straube Piano Plant addition is about completed and the forms are ready for the last story of the Juergens fire proof warehouse and storage building.

E. E. COLE.

## EVANSVILLE

### SHOWS IMPROVEMENT

**City's Building Work Records Gains Over Other Periods**

Local building operations assumed a more promising tone during May despite some prevalent annoying situations, and when the last permit for the month was posted a compilation of the work approved showed one of the best volumes of new building construction recorded for some time past.

Last month's business showed good gains over both April this year and May a year ago, 46.3% and 33.1% respectively. True it is less permits were issued in May than in April, 82 in fact, but the nature of the projects was larger. As compared with May, 1924, there were 166 more permits granted in May, 1925.

Home building grew more active in May when 62 permits were issued for such structures, while in April only 27 new house permits were issued.

The work passed upon during the month and the estimated valuations follow:

| Classification | Per. | Est. Val. |
|---|---|---|
| Remodeling and Alts. | 98 | $ 62,251 |
| New Residences | 62 | 187,400 |
| Other Work | 157 | 24,439 |
| Total | 317 | $274,090 |

## GARY

### GARY BUILDING LOCK-OUT ENDED

**Operations Resumed After a Two-Weeks Period of Idleness When Men Drop Demands and Return to Work**

Gary's city wide building lockout and strike is at an end.

More than 2,000 members of the various labor crafts returned to their work last week end following one of the bitterest and complete building tie-ups in the history of the city.

Workmen have been idle since May 18, at a loss of approximately $50,000 to the workmen and holding up in the neighborhood of $7,000,000 worth of new buildings under construction.

Announcement of the settlement was made by Bert Stevens, business agent for the striking plumbers and James Daniels, a representative of the master plumbers, following an arbitration meeting also attended by the plasterers who demanded a $3.00 a day increase and their bosses.

Both the plumbers and plasterers agreed to go back to work at the former wage scale. Members of both unions are now actively engaged at their trades. The striking plumbers asked an increase from $12 to $13 a day.

The termination of the wage controversy relieved a tense situation which for a time threatened to keep Gary from recording one of the biggest building years in the history of the city.

It is generally accepted that the backbone of the strike was broken when some fifty members of the Gary General Contractors association took steps to get back of the master plumbers and assist them in their fight to prevent further increase in the cost of building construction. A sum of money was raised for this purpose and they planned to hold-out if they had to tie-up every job in the city all summer. The General Contractors association are to take steps to make their organization a more active body in the future.

*Start this afternoon and run out in any direction, to the outskirts of town and notice the many new homes going up and you will be surprised by their beauty and the many modern conveniences that are now considered indispensible to the modern home-owner. Places that were newly marked out subdivisions only two years ago are completely built up today. Try and buy one of these places and you will find that they have increased in value from twenty to fifty per cent, and they were built only a couple of years ago.*

**SCHOOL (ALTERATIONS)**
**NOTICE TO CONTRACTORS**

Notice is hereby given that on the 23rd day of June, 1925, at 10:30 o'clock a. m. at their office in the High School Building in the City of Wabash, Indiana, the Board of School Trustees of the School City of Wabash, Indiana, will let contracts for the furnishing of the necessary materials and labor for the proper placing and erection of certain alterations and plumbing in the the East Ward School in the City of Wabash, Indiana. The estimated cost of said work is $8,000.00.

The materials to be furnished and the work to be done shall be according to plans and specifications heretofore adopted by the Board of School Trustees of the School City of Wabash, Indiana, and on file in the office of said Board, as furnished by J. Edwin Kopf & Woolling, Architects, of Indianapolis, Indiana, and prospective bidders may obtain copies of said plans and specifications for the work described from the said Architects at their office, 403 K. of P. Building, Indianapolis, upon deposit of Twenty-five Dollars ($25.00). Said deposit to be returned to the bidder upon the return of the plans and specifications in good condition to the office of said Architects.

All prospective bidders are hereby notified that said bids on each of said items must be upon forms prescribed by the State Board of Accounts and the same must be sealed and delivered at the office of the said Board of School Trustees in said High School Building at or before 10:30 o'clock a. m. on said date, at which time said bids will be opened and read by said Board of School Trustees.

A certified check must be filed by each bidder with each bid in a sum equal to five per cent (5%) of such bids and conditioned that such certified check will be forfeited to the Board of School Trustees as liquidated damages occasioned by the default of bidder, in the event that such successful bidder fails or refuses to enter into a contract on such bid within five (5) days after the acceptance by said Board of School Trustees of such bid.

The right is reserved by the Board of School Trustees to reject any and all bids whatsoever and to waive defects or informalities in any and all bids.

Minetta F. Jordan,
N. P. Lavengood,
Milo R. Meredith,
Trustees for the School City of Wabash, Indiana.
June 6th-13th-20th, 1925.

Owner receiving bids to close June 23d at 10:30 a. m., at the office of the Board in the High School Bldg., Wabash, Ind. (See legal advertising in this issue.)

# Sealed Proposals

### SCHOOL HOUSE
### NOTICE TO CONTRACTORS

Notice is hereby given that the Trustee of Concord School township will receive bids for the construction of a new school house in the town of St. Joe, Indiana, according to the plans and specifications now on file in his office, until the hour of ten o'clock A. M., on the 27th day of June, 1925. And that said Trustee will let a contract for the construction of said building at the school building in the town of St. Joe, DeKalb County, Indiana, on the 27th day of June, 1925, at ten o'clock a. m., of said day to the lowest responsible bidder for the construction of a school building according to the said plans and specifications now on file in his office, each bidder will be required to furnish a certified check in the sum of 5% of his bid conditioned that he will enter into a contract with said trustee if his bid shall be accepted and shall furnish a bond as required by law to the approval of said township trustee, which bond shall be in the sum of his bid. Bids will be received on the contract separately and combined.

The township trustee reserves the right to reject any and all bids. Dated this 29th day of May, 1925.

Frank L. Milliman,
Trustee of Concord Township.

June 6th-13th-20th, 1925.

### SCHOOL BUILDING
### NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned Trustee and Advisory Board of Harrison School Township, Miami County, Indiana, will receive sealed bids at the office of the Trustee in the North Grove School Building, in North Grove, Miami County, Indiana, until 11 o'clock a. m., Monday, June 15th, 1925, for the erection and completion of additions and alterations to the present school building in North Grove, Indiana, all in accordance with the plans and specifications heretofore adopted therefor by the said Trustee and Advisory Board and which are now on file in the said office.

At the same time and place, separate bids will also be received for the complete installation of a new heating and ventilating system.

The estimated cost of the work to be included in said general contract is $13,000.00, and the estimated cost of the work to be included in the contract for the installation of such heating and ventilating system is $7,000.00.

All bids must be in writing on Form No. 96 as prescribed by the State Board of Accounts, delivered sealed, and must in every respect conform to the laws of the State of Indiana.

Each bid for General Construction shall be accompanied by a certified check for $1,000.00.

Each bid for Heating and Ventilating shall be accompanied by a certified check for $500.00.

The certified checks must be made payable to the Trustee of Harrison Township, Miami Co., Indiana, and will be held by him as a guarantee of good faith that the said bidder or bidders will enter into a contract and execute an acceptable bond for the full amount of his bid (said bond to meet the approval of the Trustee and Advisory Board) for the due performance thereof, if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded. Should the successful bidder fail to enter into such a contract and execute such bond, then he or they shall forfeit the full amount of said certified check as liquidated damages for the use and benefit of the proper fund of the said Harrison School Township, Miami County, Indiana.

Copies of said plans and specifications may be obtained from the office of The Elmer E. Dunlap Co., Architects, 1125 N. Buckeye St., Kokomo, Indiana, upon deposit of Twenty-five Dollars ($25.00) for each set. Said deposit will be returned to the bidders upon the safe return of the said plans and specifications to the Architects on or before the day and hour set for receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

C. D. CLINGAMAN
Trustee, Harrison School Twp.
Miami Co., Ind.
EDWARD POFFENBARGER,
JOHN H. HENSLER
RICHARD MALOTT
Advisory Board.

May 16th,23rd, 30th, 1925.

## CONCRETE EVIDENCE OF THE MISTAKEN PUBLIC CONCEPTION OF ARCHITECTURAL ABILITY

### Stock Plan Houses Draw Fire That Puts Architects in an Undesirable Position

It is refreshing though distressing at times to be impressed by the utter inability of men, whom one would think should know, to discern between a house designed by an architect and one of the stock plan variety.

Just recently at a luncheon club meeting at Indianapolis a former college professor, now secretary of an association, took for his subject, "The Trials of a House Hunter," and entirely unbeknown to himself pronounced a scathing indictment of the stock plan house when he took it upon himself to bemoan the fact that present day architects are leaning too much toward standardization in house designing and are getting away from the little individual characteristics, touches that make a real home.

However, he soon tipped off his hand to knowing ones when he began his talk by saying he started out seeking rental property, then placed himself in the hands of realtors who took him all over the city to show him new houses for sale. To one famiiliar with the situation it was apparent from his descriptions of the places visited that they were all stock plan "stuff." As he progressed and referred to the standardization of plans with slight exterior changes but identical interiors there was no mistaking the fact that he had not been looking at architects' products. He spoke of the little things stuck in to catch the eye and the lack of utilitarian features.

It was strange that a college professor could be so far off the track and pitiful that he did not realize it, that he did not know whereof he spoke. But the great pity of it all was that there were so many business men present who were probably as ignorant as the speaker of what architectural service involves, accomplishes, and because the speaker was a college professor, a man of standing in the community, a certain percentage of his auditors would be inclined to accept his statements as facts and in turn deprecate the alleged tendency of architects toward standardization at the sacrifice of individuality.

### LOGICAL

In selecting any but thoroughly skilled and efficient Contractors, it must be acknowledged in advance that something less than first quality work is expected and must be accepted. This applies as well to the administrative functions of the General Contractor as it does to the craftsmanship of the mechanics whom he and his sub-contractors employ. One cannot secure a grade of work higher than the ability of the man who performs it.

## TO BE IN THE NATURE OF A BIRTHDAY CELEBRATION

### I. S. of A. Will Be Ten Years Old June 27

Annual meeting plans for the gathering of the Indiana Society of Architects are shaping up nicely, promising an interesting affair for Saturday, June 27, when the architects of the state are to assemble at Indianapolis.

The program committee, consisting of Donald Graham, Merritt Harrison, Wilson B. Parker, Wilbur Shook and Herman Scherrer, is working out a scheme for entertainment that will not only offer some pleasing diversions, but will be educational as well. It is planned to present a different lay-out this year from that of former meetings, one feature to be moving picture films dealing with building matters. This is just a hint at what may be expected as complete arrangements and details have not as yet been consumated.

The nominating committees have submitted their reports, but since there are a few conflicts it is impossible to announce the proposed tickets at this time. Suffice it to say the candidates suggested for the office of president are both prominent architects and have long been interested in the welfare of the society, and in line with this thought, the other candidates for offices are also strong, able prospects, any of whom are successful, will prove equal to their position and assure to the I. S. A., a progressive administration.

The approaching meeting will mark the tenth anniversary of the founding of the Indiana Society of Architects, and since that occasion there is no question but that the organization has had a strong influence in building up the morale of the profession in Indiana, put into operation many constructive moves and gained for the practice of architecture in the state a new recognition.

This event should be a real birthday party and your presence will do much to make it a success.

# Build with the Builders

ORGANIZATION AND CURRENT NEWS

## SCIENTIFIC CONCRETE MIXES

### A Few Interesting Facts for Contractors

Few contractors realize, perhaps, how great an effect a difference in the proportion of water can have in the mixing of concrete. There are many who do not realize that for each pint of unnecessary water added to a concrete mixture the strength of the finished concrete may be decreased as much as if two pounds of portland cement had been left out.

The best concrete mixture is that which is as stiff as can be mixed conveniently. Even this will not be of the maximum strength which could be obtained, but a mixture of maximum strength would not be practicable for general construction purposes, as it would be too stiff to be worked. But a mixture of the stiffest consistency that can be worked will give 70 to 90 per cent of the maximum strength, which will be found adequate for construction purposes.

The following table shows how too much or too little water detracts from the strength of concrete by wasting the strength of the cement:

10% too little water wastes 27% of the cement strength
6% too little water wastes 10% of the cement strength
7% too much water wastes 10% of the cement strength
12% too much water wastes 20% of the cement strength
18% too much water wastes 30% of the cement strength
25% too much water wastes 40% of the cement strength
31% too much water wastes 50% of the cement strength
42% too much water wastes 60% of the cement strength
63% too much water wastes 70% of the cement strength
80% too much water wastes 70% of the cement strength

The right amount of water for cement mixtures of varying strengths is shown in the following table:

| Cement | Sand | Gravel | Water per sack of cement |
|---|---|---|---|
| 1 sack | 1¼ cu. ft. | 2½ cu. ft. | 5 to 5½ gal. |
| 1 sack | 1½ cu. ft. | 3 cu. ft. | 5½ to 6 gal. |
| 1 sack | 2 cu. ft. | 3 cu. ft. | 5¾ to 6¼ gal. |
| 1 sack | 2 cu. ft. | 4 cu. ft. | 6 to 6½ gal. |
| 1 sack | 2½ cu. ft. | 5 cu. ft. | 7¼ to 7¾ gal. |
| 1 sack | 3 cu. ft. | 6 cu. ft. | 8¼ to 8¾ gal. |

Mass concrete such as is used for heavy foundation work should not slump to exceed 2 inches. Reinforced concrete such as walls should not slump more than 6 inches; concrete roads when finished by hand should not have more than a 4 inch slump, while cement mortar for floor finishes should not have a greater slump than 2 inches.

To apply the slump test, estimate the minimum slump that you can use and still obtain the necessary consistency in the concrete. Test the hatches frequently to check the slump and increase or decrease the quantity of water accordingly.

Consistency of concrete mixtures is easily measured and regulated by the slump test.

The only apparatus needed in making the slump test is a five-eighth inch pointed metal rod twenty-one inches long and a piece of sheet metal for a form, rolled into the shape of the frustarum of a cone. The form can be cut from a piece of metal fifteen inches wide, twenty-six inches long, and not less than 20

(Continued on page 13)

## A MUCH MOOTED SUBJECT

### Solution Would Seem to Lie in Amount of Civic Pride Possessed By the Prospective Builder

Much has been said and written regarding the habit of out of town contractors coming into our home cities and grabbing the good big jobs.

This has been a cause of complaint ever since contracting started. There never is a gathering of builders anywhere that this burning topic is not brought up and every one present, no matter from where he hails, registers a complaint about this reprehensible practice. But so far none of these violent objectors has suggested a remedy and there does not seem to be one in sight.

There certainly is no law to prevent any one from coming into any city and bidding on work and there is no law to prevent their getting it if they are sufficiently low to make it an object for the owner to give it to them.

In the matter of public and quasi public building, it does however seem particularly unfair for the work to go to an out of town contractor.

The officials of any city it would seem, should have enough civic pride to tell out of town solicitors for opportunities to bid, that their city's work must be done by its citizens and taxpayers and there is no question but that they can get a sufficient number of local bidders to assure them of a fair price.

The same thing might and possibly should apply to a slightly less extent to quasi public buildings such as theaters, hotels, restaurants, banks, etc., that depend almost exclusively on local patronage and the stock of which is held largely by local men.

But as we said before there is no law to exact such conditions and it only depends on the extent of the interest the owner takes in his own city and its representative contractors.

If the difference in price is great it is asking almost too much of any man to expect him to sacrifice a great amount just to establish a reputation for civic pride and loyalty to his home town and he is inclined to ask and not without reason, "why are the out of town con-

tractors able to underbid the local man?" There are various answers to that query. It may be that he bids low to get started in a city where prospects of future work look alluring. It may be that he has a large organization that is idle and is willing to take little or nothing above his overhead to keep it going.

In any case it would take a considerable amount of courage to turn down a bid that is extremely low and it would not be good practice to allow a local man to meet it for if the out of town man is allowed to bid at all, he should and usually does, have the same treatment that it accorded to the local bidder. —(Bulletin of Buffalo, N. Y., Builders' Exchange.)

## East Chicago

### NEW BUILDING SHOWS A TENDENCY TO LAG

**Labor Trouble and Tight Money Blamed for the Slump**

May was a big month in new construction at East Chicago although far below the figure of the two preceding months.

In the thirty-one day period of May, a total of $357,375 worth of residential and business building was contracted and put under way of construction. An apparent lag in new building has been in evidence for the past few weeks due in part to labor troubles and difficulty to obtain loans.

## GARY

### BUILDING LABOR TROUBLE ONCE MORE CLEARED UP

**Gary Threat Overcome**

It is to be hoped, now that peace has been effected in the Calumet District building field, that the construction business will not be interrupted any more this season by serious labor disputes between employers and employes or by jurisdictional flare ups amongst the building trades crafts themselves.

The recent misunderstandings over the hourly wage scales at Gary that arose between the employers and the sheet metal workers, electricians and plumbers, and for a time seriously threatened the building construction business not only locally but also held a menace for surrounding territory, have been straightened out and these three crafts along with all the others are back at work.

First the plumbers crashed through for a raise; followed a lockout, and a shutting down of all work. Next the plumbers reached a settlement and everything looked good, but the sheet metal workers and electricians bucked seeking to recover wages for the time lost during the tie-up when the plumbers were out. However, all wage matters have been ironed out and operations are under way once more.

So far this season considerable loss has been sustained as a result of the labor trouble and a slump has also been caused in the volume of building business. The losses suffered can not be made up but it is possible and probable that with no more trouble developing confidence can be inspired in the prospective owner-builder and that these prospects will go ahead with their contemplated construction plans.

If the present encouraging conditions can be maintained there is no reason why a new impetus should not impart itself to building schemes and thus send construction activities ahead at a quickened pace. No one can better encourage such a chance for prosperity than the craftsmen and the employers all of whom should boost and work for amicable relationships between the bosses and the workmen.

## HAMMOND

### BUILDING INCREASES CONTINUE

**Hammond Again Turns in a Good Monthly Construction Record**

Building permits issued in Hammond during the month of May showed the same steady increase over May of last year that other months have shown in 1925. The valuation of the May building business was about $88,725 better than the same item posted in April this year.

During the month Commissioner Henry Vis issued 164 permits having a total valuation of $756,975. During the same period last year three more permits were issued but the total was only $547,025.

He has compiled figures covering the first five months which show a total valuation of permits reached $2,366,262, which is a gain of $787,956 over the first five months of 1924 when the total was $1,578,266.

### WIND JOINED WITH FIREMEN TO PREVENT GREAT CONFLAGRATION

**Hammond Saved From Greater Loss When Wind Veers Around**

One of the greatest fires that ever visited Hammond recently threatened a wide area of destruction and only hard work on the part of the firemen and a change of wind direction prevented a greater conflagration.

The fire was discovered in the yards of the Paxton Lumber Co., and before it could be controlled it swept through the Hammond Brass Co.'s plant, threatened the gas plant and the entire block of buildings just to the east. When the fire was at its height and the firemen were about at the end of their string the wind veered around completely and fanned the flames back over the smouldering ruins and the great menace was checked. The loss is estimated at 300,000.

### CONSTRUCTION JOTTINGS

Architects Hess & Greenwood, are preparing plans for a brick cottage on West Vine St., for Mr. Nicholson. The plans will be ready for bids June 20th. Estimated cost $12,000.

Ahlborn and Pezok received the general contract for the erection of a store, office and apartment building in Indiana Harbor for John Tapania. The structure will be 3 stys. high, 58x120, and will cost $96,000.

They are putting the finishing touches on the "Blue Streak" at the new amusement park. This pleasure device is guaranteed a short and sure exit for any one who has a weak heart.

The stone work on the new bank and the Lloyd buildings is moving upward rapidly. Progress on these structures is going right along at a steady pace.

E. E. COLE.

## Indiana Harbor

### MEANS MUCH TO THE CITY

**Deepening of Ship Canal Started**

Dredges have steamed into the Indiana Harbor ship canal and are now at work deepening the channel to the government's navigable requirements of twenty feet.

Authorization for the dredging was

[illegible] by Major Rufus Putnam, United States engineer in the Chicago district, and the contract for the work awarded [illegible] this week.

In accordance with the governments specifications, the main canal from the "forks" to the lake will be dug to a depth of twenty feet. This will allow boats of the Standard Oil Company as well as other industrial ships to penetrate the channel its full length if so desired. The western portion of the canal was dredged by the East Chicago company last year as a completion to the final contingent to closing of the Jones & Laughlin Corp. land deal.

Recommendations have been made by H. R. Packard, secretary of the East Chicago Chamber of Commerce, which is responsible for the new improvement, to sheet the banks of the canal up its entire length so as to avoid additional time and expense of dredging it again.

## WORK STARTS ON FILL TO BE THE SITE OF A GIANT POWER PLANT

### Operation to Be Rushed Through To As Early Completion As Possible

Actual work has begun to fill the 100 acre tract of land of the lake at the Illinois-Indiana State Line where a giant Power station is to be erected by the Peoples Gas Light and Coke Company, an Insull interest.

The contract for the fill-in was awarded this week with the stipulation that work was to be rushed at top speed to allow construction of the plant at the earliest possible time.

The station will serve the industrial district of South Chicago, East Chicago, Indiana Harbor, Whiting and Hammond. Its erection is part of the enormous program of new extensions being made by the Commonwealth Edison company in 1925.

## ANOTHER TWO MILLION DOLLARS MONTHLY BUILDING TOTAL TURNED IN

### Construction Volume Holding Up Well and Compares Favorably With That Recorded In 1924

New construction activities in Indianapolis for the month of May, according to the figures of the city building commissioner, rolled up a good volume of business, the estimated valuation of same topping the two million dollar level. This was a gain of 4.1% over the business of May, 1924, though the permits issued last month were but 1,561, as compared with 1,754 granted during the corresponding period a year ago.

A comparison of the building business for the months of May and April this season indicates that there was a slight falling off in operations in May, the money estimated to be involved being 27% in arears of the total posted in April.

New house construction continues to lead all other types of structural building work, a total of 271 permits having been granted for new homes in May. This was forty-seven more than were granted in May, 1924, and just four less than posted in April. The amount of the estimated valuation of the new houses started last month was $1,219,595, as against $871,547 recorded for the corresponding period a year ago.

A tabulation and classification of the permits issued in May shows the following:

| Type | Per. | Est. Val. |
|---|---|---|
| Accessory bldgs. | 206 | $ 46,351 |
| Business bldgs. | 20 | 118,200 |
| Industrial bldgs. | 6 | 47,000 |
| Public bldgs. | 3 | 244,000 |
| Repairs & Alterations | 791 | 190,443 |
| Residences | 271 | 1,219,595 |
| Tenements | 2 | 65,000 |
| Miscellaneous work | 262 | 117,152 |
| Total | 1561 | $2,047,741 |

## SCIENTIFIC CONCRETE MIXES

(Continued from page 11)

gauge. When finished it will be twelve inches high, four inches in diameter at the top and eight inches in diameter at the bottom.

Fill this form with concrete to be tested, placing it in layers about 4 inches deep and working it with the pointed metal rod. Each layer should be rodded exactly 30 times. Lift off the form immediately and measure the settlement or slump of the concrete.

Concrete having a slump of ½ inch will contain only a little more water than necessary for maximum strength, but will be too stiff for most construction work. Concrete containing 10 per cent more water than is required for greatest strength will give a slump of 3 to 4 inches; 25 per cent excess water gives a slump of 6 to 7 inches; 50 per cent excess water gives a slump of 8 to 10 inches.
